Thorough Lubrication

IMPERIAL Polarine can be depended on to give you thorough lubrication, to keep the engine running quietly and faultlessly, to take you a 100 miles or 1,000 miles at the least cost for fuel, oil and repairs.

Imperial Polarine forms a piston-to-cylinder seal that maintains compression and utilizes the full power of the fuel. It spreads a thin, yet unbreakable oil film over every friction surface that minimizes wear—it is the *perfect lubricant.*

Imperial Polarine will not break down under high operating heats. It burns freely with handly trace of carbon. Costs less because it saves depreciation and fuel. Sold in gallon and four-gallon sealed cans, half-barrels and barrels, also in 25-gallon steel kegs, by dealers everywhere.

Look for the Imperial Polarine Chart of Recommendations when you buy oil. It shows which of the five grades described below is recommended for your car. Use the grades specified, exclusively.
