PARASITIC WASPS TO FIGHT CORN BORERS

United States Bug Experts Send Insects to Assistance of Dominion Entomologists.

A despatch from Winnipeg says:—Dominion bug experts will import from the United States this summer a horde of parasitic wasps which they will turn loose in the Canadian corn belt to destroy and fatten upon their hereditary enemy, the corn boring worm.

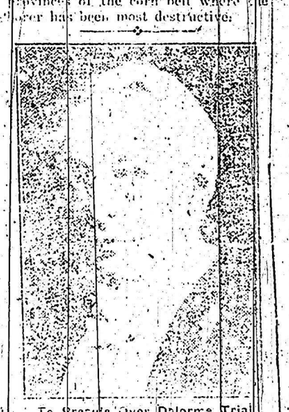
The campaign will be waged along lines drawn by W. R. Walton, superintendent of the insect division of the United States Bureau of Entomology, who offered his aid at a recent meeting of grain growers.

Wherever corn is grown in America, there lives the corn borer, taking his toll of millions of dollars from the value of the crops each year. He makes his home within the green husk of the tender plant, and eats his way over the milky ear, completing his work of destruction long before the crop matures.

Until the United States entomologists discovered in France the tiny wasp, there was no known means of destroying the borer without also destroying the corn. This insect does the trick, according to Mr. Walton.

Brought to America to a new hunting ground, it was discovered he liked the climate, reared large families, and had a predilection for corn borer, making his home in the husk of the ear within easy striking distance of his game.

With the aid of this parasite considerable progress has been made toward exterminating the borer from the corn fields of the United States, Mr. Walton reported. It is now planned to bring several armies of the insect from the Government reserves across the border and liberate them in midsummer in Ontario and other provinces of the corn belt where the borer has been most destructive.



To Preside Over Delorme Trial

Chief Justice Lemieux, of Quebec, is to preside over the trial of Abbé Delorme, who has been released from custody on bail, for the murder of his brother.

TO RESTORE NELSON'S ANCIENT FLAGSHIP

"Victory" to be Preserved in Condition She Was in at Battle of Trafalgar.

A despatch from London says:—Great Britain is striving to raise £80,000 which is needed to complete the "Save the Victory Fund" to restore Nelson's old flagship to a state exactly as it was in the time of Britain's greatest sea captain.

At the present moment the ship which led the fight at Trafalgar rests in dry dock at Portsmouth where it is hoped she shall spend the rest of its days. Nelson's ship now reposes on a line of blocks entirely out of the water, with its strong steel frames resting a cradle in which she is cradled.

But unfortunately the Victory as she stands does not present the appearance that she did when she took part in the battle of Trafalgar. It is hoped eventually to refloat the Victory and restore her to her former appearance. This means much work, because many modifications were made in Lord Nelson's flagship since the time of his last battle. Most of the ship's guns, the rammers for loading them, the magazines, storerooms, cabins, galley cooking stove, mess tables, hammocks, boats and anchors have disappeared.

The present masts and rigging are small and insignificant compared with those the Victory carried at Trafalgar, and the original steering arrangement virtually does not exist.

It is intended to restore all these things and have at each porthole an actual gun and carriage such as was used in the ship at Trafalgar, and also to have the magazines in the hold constructed and fitted as they were when Nelson fought. In addition it is intended to clear the decks for action so as to show the fighting arrangement.

Wrist watches are said to be giving way to a revival of the older-fashioned pendant watches for ladies.

Nominations to the Sixteenth Legislature of Ontario

With Standing in Two Last Previous Houses at Dissolution.

(Nominees Who Were Members of Last Legislature Are Starred.)

Thirteenth Year in Camp

Chaplain Major J. C. Piper, who is in camp at Niagara Camp with the Haldimand Rifles. This is his thirtieth year in camp. He is one of the oldest fighting chaplains in Canada, and served with the C.E.F. overseas.

Duke and Duchess of York Receive Canadian Rug

A despatch from Ottawa says:—During his recent visit to England, Major R. K. Hodgson, private secretary to His Excellency the Governor-General, presented to Their Royal Highnesses the Duke and Duchess of York, the wedding gift of Lord and Lady Byng of Vimy. The wedding present was a handsome rug made of the hide of the largest Buffalo killed at Wainwright Park last year. The presentation was made at Buckingham Palace, and Their Royal Highnesses expressed their pleasure at receiving such a characteristically Canadian gift.

Canada from Coast to Coast

St. John's Nfld.—Hawes and Co., Ltd., of London, England, report that Newfoundland and Labrador exports of salt codfish to Europe during the year ending March 31, 1923, excepting shipments via Liverpool or New York, and direct shipments subsequently lost at sea, amounted to 931,303 cwts. as compared with 1,076,043 during the previous year.

Halifax, N.S.—An increase in value and quantity is shown in the annual report of Nova Scotia fisheries production for 1922, compared with the previous year. The value of fish, including the quantities marketed for consumption fresh, canned, cured or otherwise prepared, was $10,207,444, an increase of $428,821.

Fredericton, N.B.—The Provincial Government has given its final approval for the construction of the new Agricultural School building to be erected on the property of the Dominion Experimental Station here. The plans call for a two-storey building, costing in the neighborhood of $25,000. A feature of the building is a judging arena for the livestock with removable seats.

Quebec, Que.—Quebec Ayrshires won championships at Boston, at the first one-breed show ever held in America. Over three hundred and fifty Ayrshires, from ten states and provinces, competed at this show. R. R. Ness and Sons, of Howick; Gilbert McMillan, of Huntingdon; J. W. Logan, Howick, and E. C. Budge, of Beauharnois, were the winners from this province.

Port Arthur, Ont.—The total elevator capacity of Port Arthur and Fort William will reach 65,000,000 bushels by September, this year, according to the chief statistician of the Port Arthur Chamber of Commerce. In 1900 the total storage capacity of the two ports was only 5,700,000 bushels, of which Port Arthur controlled only five per cent. By the close of 1924 the elevator capacity is expected to reach seventy millions.

Winnipeg, Man.—Bringing with them effects to the value of $78,852, and monetary wealth totalling $342,832, approximately 880 settlers from the United States came to Canada between Kingsgate and North Portal, during April, according to the Federal Government immigration report.

Sir Lomer Gouin

Canadian Minister of Justice, who heads a delegation to Washington seeking for the restoration to Canada of property owned by Germans resident in Canada, and United States during the war. The property involved is said to be two million dollars worth of stock in Canadian corporations.

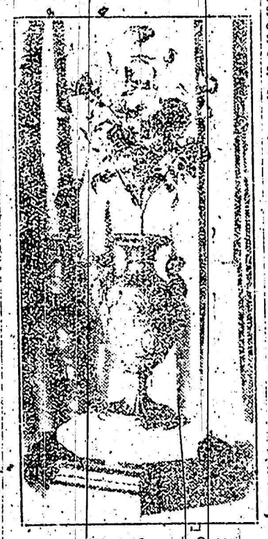
Regina, Sask.—The formation of the Saskatchewan Corn Growers' Association has excited a good deal of interest, and a very substantial list of prizes has been offered for the first provincial corn show at Maple Creek next November.

Edmonton, Alta.—The first woman graduate in agriculture from the University of Alberta was given her degree recently. She is Miss Sarah Marryat, sister of Hon. Mrs. Parlby, Minister without Portfolio in the Alberta Government, and lives at Alix, Alta. For two years Miss Marryat was a student at Olds Agricultural School. She has just completed a three-year course at Alberta University.

Nelson, B.C.—Work was commenced recently at clearing a site on the river near here for the construction by Howland and Waltz, of Minneapolis, of a sawmill, which will form the first unit of a large pulp and paper mill which is to be erected here. The City of Nelson will supply the electric power for the new sawmill, which is expected to be in operation about the middle of June, pending the construction of the company's hydro-electric plant.

Trees to the number of 10,000 were distributed among Saskatoon school children by the Parks Officials and Dominion Forestry Branch on the occasion of Arbor Day. Each child received one maple and one ash. Last year only 5,000 trees were distributed.

Since the declining months of 1922 the volume of savings in Canadian chartered banks has been rising and at the end of March, 1923, the total savings deposits amounted to $1,219,295,721, or nearly $140 for every man, woman and child in the Dominion.



Pope's Gift to Spanish Queen

The Golden Rose, which has been presented to the Queen of Spain this year, is the gift of the Pope to the Queen who has done most for her church during the year. The vase and rose tree are gold, with twelve golden roses and seven buds.

Wheat grown in Western Canada has for several years been in demand over from all parts of the United States and the Old World. That the reputation of this high grade wheat is increasing is evident from the fact that a local seed company recently received an order for 500,000 bushels of seed wheat from the Argentine Republic.

The Week's Markets
