THE CEMETERY.

We believe a new cemetery for Acton is now nearer to being an established certainty than has ever heretofore been the case. In compliance with a petition signed by about eighty property-owners, the Council on Tuesday evening introduced a By-Law to raise by way of loan the sum of one thousand dollars for the purchase of land for a public cemetery. This By-Lay is published in our columns this week. The election is fixed for Monday, 18th May.

It is proposed at the time of voting that each voter select, from a number of properties offered, the one he or she desires to be purchased, denoting the same on the ballot. The council will then purchase for a cemetery the property receiving the largest number of votes. This plan must certainly meet the wishes of all. It is fair and reasonable and will remove many of the objections presented on former occasions.

The very fact that a large number of those strongest in their opposition to the By-Law previously are among the petitioners would seem to warrant the success of the By-Law now beyond a doubt.

The necessity for a cemetery is unquestioned, and now is the time for action. We might rightly pause and consider if there existed any doubt about this, but there exists no doubt. A majority of the property owners realizing this necessity have petitioned the council, and the council are acceeding to their wishes. Let the By-Law be successful.

ARBOR DAY.

We are pleased to state that the council has again taken a favorable view of the importance of planting additional shade trees on our streets. Following our suggestion of last week they have instructed the Reeve to proclaim Friday, 8th of May, an Arbor Day for this municipality. This has been complied with and our citizens are requested to spend some reasonable portion of the day in planting suitable shade trees on the streets adjoining their premises. The Minister of Education has proclaimed the same day Arbor Day for every rural and village school, subject to the approval of the trustees, and recommends that suitable shade trees, such as:—hard and soft maples, elms, basswoods, walnuts, butternuts, birches or chestnuts, be carefully planted by or in presence of the pupils of the schools. This is a most commendible project, and will no doubt be carried out by the trustees here.

The council is arranging for the delivery the evening before Arbor Day of a large number of trees, and these will be judiciously served out to citizens for street planting, free of charge. We think it would be a good idea for all desiring trees for that occasion to leave the number they will want with the Municipal clerk, as by this plan the council can act with some degree of intelligence as to the total number to secure.

Nothing so suddenly obstructs the perspiration as sudden transitions from heat to cold. Heat rarifies the blood, quickens the circulation and increases the perspiration, but when these are suddenly checked the consequences must be bad. The most common cause of disease is obstructed perspiration, or what commonly goes by the name of catching cold. Coughs, colds, sore throat, etc., if attended to in time are easily subdued, but if allowed to run their own course, generally prove the fore-runner of more dangerous diseases. Nine-tenths of the consumptives date their affliction from a neglected cold, and the diseases that are caused by wet feet, damp clothes, or exposure are more numerous than are generally supposed. One of the most efficacious medicines for all diseases of the throat and lungs is Bickle's Anti-Consumptive Syrup. It promotes a free and easy expectoration which frees the lungs from viscid phlegm by changing the secretions from a diseased to a healthy state. 12
