Board of Health Conference.

A meeting of representatives of the Provincial Board of Health, the township Board of Health and the members of the Board of this municipality will be held in the town hall to-morrow morning at 10 o'clock. The object is to pursue enquiries into the cause of the cases of Anthrax which occurred in the flats in the third concession of Esquesing, below Acton, last summer. There has been no trouble this year but the township Board has been active in looking for the cause.

Hiving the Potato Bugs.

A farmer in a large potato growing district successfully tried a remedy for potato bugs as follows:—He procured some boards and laid them here and there among his potatoes, and on these boards were placed raw potatoes sliced. At noon on the first day of his experiment he and his hired man found every piece of potato covered with bugs. He killed this crop, and at night another crop was killed, though not so large and in a week not a bug could be seen, and his trouble with bugs after this was comparatively small. Dip the pieces of potatoes in Paris Green and save killing the bugs.

The Sky's Phenomenal Display.

The display made by the aurora borealis in the heavens on Saturday night, was one of the grandest and most brilliant ever seen here. An immense arch spanned the sky near the zenith, reaching the horizon on all sides. Behind it darted variously colored and changing mellow lights that shot columnar rays far southward, at the end of which sheets of faint light flashed with electrical rapidity and in a most dazzling manner. Lovers of the heaven's wonders watched the phenomenal play of the lights, from half past ten till after midnight. Numbers of our citizens enjoyed the rare sight.

The High School Examinations.

The result of the High School examinations has not yet been made public. The desired information, as far as the names of the candidates are concerned, is this year withheld from the press until the authorities decide upon the standing of candidates recommended by the examining boards. At Georgetown High School 36 out of the 58 candidates who wrote have passed, and 7 are recommended. Of the 36, eight are from Acton Public School, and one other is recommended. The most of the candidates have been made aware of their standing, but the press is not at liberty to publish the names. The official list will be given in these columns at the earliest possible moment.

The New School Building.

The fine weather of the past few weeks has enabled the contractor of the new school to push forward the work with rapidity. The joice for the floor of the second story is now laid and the brick layers are nearly ready for the second story windows. During the last week a good many of our citizens have visited the school and all express themselves well pleased with the appearance of the work. The terra cotta brick shows up well and the bricklayers are doing their work in a superior manner. The public is now well satisfied that brick was properly adopted in preference to stone. The walls will likely be up and the building enclosed before vacation is over.

A Suggestion For S. S. Workers.

The attention of all who are engaged in Sunday School work in this section is invited to the interesting description, by Rev. J. W. Rae, of a great mass meeting of Sunday Schools and those interested in their success, held at Lloydtown on Dominion Day. Such gatherings are productive of great good in bringing Sunday School workers together for a day of pleasant fraternal intercourse, encouragement and enthusiasm, giving them the privilege of hearing addresses by able speakers upon various topics incident to the work in which they are engaged; and in providing for the children of the Sunday Schools of all the country around a mammoth pic-nic characterized with much greater enthusiasm and *eclat* than could be realized by any single school. None of the Sabbath Schools of Acton, nor we believe of the vicinity, have yet arranged for pic-nics for the present season and there is time to arrange for a successful union gathering if the matter is promptly taken into consideration. To this end representatives from all the schools of this section are invited to attend a meeting at the FREE PRESS office next Monday evening, 25th inst., to discuss the question, and to hear from Rev. Mr. Rae, further details concerning the mass meeting and picnic so successfully conducted at Lloydtown.

Ladies —AND— Gentlemen

Did you ever stop and think what a difficult matter it must be to select a stock of Dry Goods such as the firm of E. R. Bollert & Co. carry, especially in this age when the demands of fashion have become so exacting? Where is there another man in this city or out of it that has had the experience in buying Dry Goods as

E. R. BOLLERT

who has been in business over thirteen years in this city, and during that time has been constantly studying the characteristics of the Dry Goods trade and who is now in Europe, and will there for weeks search the different manufactories where the finest goods are to be found and there select our Fall and Winter Stock?

But take our stock at present and where will you find a better assorted one, that is the better class of goods?

The cheap Shoddy goods we have no room for, and if we had would not keep such goods as they are expensive at any price, and do the trade more harm than good. It is better trade we do and that is what we cater for.

The time is past and gone when people would buy a stack of Dry Goods because they are old fashioned and cheap. People now-a-days just buy what they need and that must be the very latest and not goods that are half worn out with age.

We have no old fashioned stuff to throw away, but throughout each and every department will be found nice, clean, fresh seasonable goods and at reasonable prices.

Any person wishing to buy a parcel of Dry Goods will do well to call and inspect our stock. No trouble to show goods.
