To the Public of Canada.

OFFICE OF THE
JOSEPH HALL MANUFACTURING COMPANY,
OSHAWA, ONT., MARCH 8, 1872.

Being desirous of testing the merits of the different water-wheels now offered for sale in Canada, as to their economical use of water, we as manufacturers of the GENUINE JAMES LEFFEL DOUBLE TURBINE, make the following challenge to the manufacturers of ANY WHEEL now made in Canada, whether it be IMITATIONS of the JAMES LEFFEL DOUBLE TURBINE or any other pattern, the wheels in all cases to be wholly manufactured by the competing parties:

We will place in the hands of any responsible party six thousand dollars ($6,000), the party accepting the challenge to do the same, the money to be held subject to the award of the judges. The wheels to be tested in a flour mill, driving the same runs of stone, grinding the same wheat, and having the same number of square inches of opening to receive the water, the amount of water discharged to be the measure of the amount used by each wheel.

The judges to be non-residents of Canada, and to be thoroughly well informed in the mode of testing the power of turbine wheels—each party to choose one judge, and the two to chose the third.

The owners of the winning wheel to have their money refunded them, and the loser's money to go towards establishing a mechanical free library in any town in Canada named by the owner of the successful wheel.

The wheel to be tested at ¼, ½, ¾, ⅞, and full gate.

Each party to give good and sufficient bonds, to the amount of $4,000, that the loser shall pay the entire expenses of the test.

There are some wheels that give very good results with full head and full gateage which entirely fail under partial head and partial gateage. Such wheels in our climate, where the water-powers are affected by both cold and drouth, are of no practical value.

We claim that we are the only makers of the GENUINE JAMES LEFFEL DOUBLE TURBINE WHEEL in Canada, and that it is without a RIVAL in the WORLD IN PRACTICAL RESULTS.

More than 6,000 of these wheels are now in operation in Canada and the United States. The sales of no other wheel ever yet introduced on this continent exceed one-sixth this number.

Our wheel has been thoroughly tested in GREAT BRITAIN, and has fully maintained the reputation it has gained in Canada and the United States, as the most economical water-wheel in practical operation ever yet introduced.

We are now publishing a new descriptive water-wheel pamphlet containing 150 pages of valuable matter, which will be sent free to all applicants.

For further information address,

F. W GLEN,
Oshawa, Ont.

N. B.—We desire to call attention to the following certificate:—

SPRINGFIELD, Ohio, Dec. 25, 1868.

We take pleasure in informing the public of Canada, that we have sold and furnished Mr F. W. Glen, of Oshawa, Ontario, Patterns, Formers, Drawings, Guages, and all other necessary information to build our celebrated Double Turbine Water-wheel, invented by James Leffel, and known as the "Leffel Wheel." We have also obligated ourselves to furnish the same facilities for manufacturing to no other parties in Canada. Without the information we have given to Mr Glen, no one can successfully build our wheels, and we advise parties in Canada to purchase our wheels of no other manufacturer. Mr Glen's facilities are unsurpassed, and we feel sure that he will build a wheel that will give perfect satisfaction. We therefore commend him to the public of Canada with entire confidence, feeling sure he will manufacture a wheel in all respects equal to our own.

[Signed,
JAMES LEFFEL & CO.

May 20.

The Daily News.

THURSDAY EVENING, MAY 23.

DELENDA EST CARTHAGO.—People are becoming mightily amused with the final lines of every article in the *Globe* of late. With a high disdain for the eternal fitness of things, it has one invariable chorus for every diatribe. It is told that a Roman Senator used to end every oration with the expression:—"And whatever is to be done Carthage is to be destroyed." Our modern Cato (Oh! what a falling off was there), is now assuming the dress of the great antetype, and whether the article treats of commerce, finance, treaties, boundaries, or the the thousand-and-one subjects that must engage the attention of a newspaper man, the refrain is sure to find a place. And in lugubrious wail the maudlin melody bursts forth:—"Close up your *shattered* ranks, and move on to victory." "Defeat the Dominion Cabinet." "*If* the people of Ontario only do their duty in the political struggle now impending, all will be well." *If*, what a world of meaning in that little word. Shakespeare, somewhere says: "I could call spirits from the vasty deep," and the reply is:—"Well, so could I, and so could any man, but *would they come when they are called.*" And, "whatever else is to be done the Cabinet must be destroyed." We have inadvertently quoted this lament again but let it stand. It will give aid and comfort to the oppressed.

THE TELEGRAPH LINE.—The poles for the branch line from the Montreal Telegraph Company's office in the city to Portsmouth, Kingston Penitentiary, etc., have all been erected, and as soon as the wires are strung, the line will be ready for use. This mode of communication will be a great convenience, and will no doubt be largely taken advantage of by the business public of the above mentioned thriving village.

VOLUNTEERS.—Now is the time for the enrollment of names for service as volunteers. All who intend to go to the front should fall in now. It is probable that the pay will be increased over the amount last year, and, as a little preliminary or setting up drill is necessary before going upon the parade ground, in order that a recruit may not be laughed at by his spruce comrades, the earlier those thinking of it join the better for all concerned. The coming camp is expected to be an uncommonly jolly one. If it is wished to join any particular company, apply to the captains—if not, make application to the adjutant.

THE MENDELSSOHN CONCERT.—On Friday evening next the famous and peerless Boston Quintette Club, composed of Messrs Wm. Schultz, Carl Meisel, Thomas Ryan, Edward Heindl and Wulfe Fries, will occupy the boards of the City Hall, to give one, and we regret to say *only* one, of their incomparable concerts. Their playing, remarks the Chicago *Tribune*, is a unit. Consider the two violins, the cello, flute and clarionet as one instrument, played by a great artist, and you have the exact effect produced by the club. There is precision not alone in the main, broad movement of the theme, but in the ornamentation, every run and trill, and every detail of light and shade. There is no criticism to be made of their playing.

SPEAKS WELL.—Building operations were never more brisk than at present. Large numbers of labourers are employed, and many more are greatly needed. If the city authorities would take in hand to answer the questions of the Ontario Government, as to how many men are required here, and other information sought, the city would speedily receive a large addition to its population in this respect. If we desire to make a creditable advancement, the more rapidly it can be done the better, therefore all legitimate means towards this end ought to be made use of.

ADVANCING.—We have frequently during the present year alluded to the impetus this city had received by way of building operations—making such advancement as had not marked its progress for many years. This fact appears the more evident when we state on reliable authority that certain contractors have declined any additions to the amount of work already on their hands. "Skilled labour" is also anxiously required, so that we can rightly conclude "ruin and decay" are on the wane.

THE REVOLUTION.—John Connel, an old man of 72, though healthy and hearty in spirits, applied at the Police Station last night for protection. In reply to questions as how and where he lost his right leg, which was missing, he stated that he was shot in battle when quite a youth in defence of his country from an invasion of the Americans, being in all the conflicts along the St. Lawrence River and Lake Ontario during the revolution of 1812. The misfortune by which he was maimed was borne by him with pride, in consideration of the glorious object towards which his enthusiastic energies had been devoted. He was still as loyal as ever. True, adversity had many times attended his toilsome and wearying career through the subsequent years of his life—but in the face of trial and hardship he was yet fond of his connection with the British constitution, and if duty called he would most willingly again enter the field and risk the loss of his remaining leg, perhaps life, nobly supporting the flag of liberty. The mere mention of annexation was a serious injury to his feelings. A patriot surely!

The Carleton Place *Herald* says:—A few weeks ago a Perth paper suggested that the railway track from Smith's Fall's to Carleton Place should be ripped up and a line laid, and the traffic of the road carried round, by Perth. The same editor announced last week, that the Kingston and Pembroke Railway is also to be made round by that town. Next week he will want the Grand Trunk line ripped up from Kingston to Brockville. Perth must be a great place!
