AND HE SPOKE THE TRUTH

Bishop William Anderson of the United States, who has been engaged in behalf of his church in directing work in France, Italy, North Africa, Spain and Portugal, recently made the following significant statement:

"When the whole world was ready to follow our leadership the United States somehow flinked. The necessity for the hour is for the recovery of the prestige of American idealism.

"Our task is to make the European peoples realize that the heart of America is unchanged—that first, last and at all times her attitude is one of sympathetic helpfulness."

It will take the United States a long time to persuade the world that it has signally failed humanity in its greatest emergency. The prestige of the United States has suffered irreparable degradation, and Americans will find that it cannot be restored in the present generation to the honorable position which it gained by the influence of President Wilson at the Peace Congress. The Senate barely destroyed by partisan strife what the President had gained by wise and disinterested statesmanship.
