Give the Grass a Chance

The practice of taking short cuts across lawns and boulevards is quite a common one with some folks. The time gained by such a practice is not worth considering when balanced against the damage our thoughtless footsteps can inflict when the ground has not dried up after the passing of the winter's snows. It may seem a small matter, but the realization beautiful can never be attained until we learn to pay attention to the little details which make or mar the appearance of the place.
