CORRESPONDENCE

The following letter from Rondeau Park will be read with interest by many of our subscribers:—

Mr. Moore, Editor of the Herald:

Dear Sir—Just a few lines to tell you the boys are all well. Jim Kennedy and Dalt McCartney have quit and are back in Georgetown and we miss them. Some of the boys are thinking of trying to be home for the 24th. Our Camp "B" Rondeau Park, are real champions at softball. They won 13 games straight, never lost since they started. They beat Camp "A" every time they play. So the boys say if you could, would you send a good softball team to try and beat them; but we want nothing but the best. The superintendent told some of the boys that they are going to round up the deer, but he won't tell them just when, because he wants it to be a surprise.

We are in hut No. 6 and they are all a swell bunch of boys. We are putting in a break wall all along the beach. Some of the boys went up to the channel at Erieau and caught 36 perch about 9 inches long. Monky was with them and he caught two of them. We have caught quite a few snakes, some of them six feet long, called wampers.

Nobody seems to know just how long the camp will last. Sometimes some of the boys go to Ridgetown on Saturday evenings to the show, and on several occasions the boys went to Chatham and spent Saturday evening. The superintendent read the piece you had in the paper from the Highgate paper and he said it was very nice of you to put it in, so we would be glad if you would print this letter. We thank you very much for the papers each week.

Some of the boys are sunburnt and I think this Park is a good summer resort. We are having different people come from all over the world just to see the wonderful work we have done so far. A visitor who was here on Sunday was more than surprised at the work we have done. The boys all think well of our superintendent and the foreman.

We must bring this letter to a close as the boys from East Windsor are early to bed and early to rise, and are hollering lights out, but they all wish your paper, the Georgetown Herald, every success in the future.

Yours truly,

James Williams
and the Georgetown boys.

SCIENCE ends DANGER of hot homes!

New discovery reduces temperature 6 to 12 degrees on hottest days

SOLID ROCK BECOMES WOOL

When solid rock Johns-Manville makes it into fibres that at last make home really health. This stone is actually blown into a light fluffy wool, and felted into bats that have all the appearance of cotton batting.

FROM the Johns-Manville laboratories has come an amazing new insulation, a light, fluffy wool-like substance that is actually blown from rock. It looks like cotton, but is a pure mineral, with all the characteristics of its stony origin—clean, fireproof, vermin-proof, permanent, odorless.

When installed in your attic floor or ceiling, it forms a heat-proof barrier more than 3 inches thick. Results are astounding. Hot homes become delightfully cool, and you can depend on savings of from 20 to 35% on your fuel bills in winter. Experts agree that only thick rock wool will protect houses against heat and cold in a truly scientific way.

Phone us today, and let us tell you how little it will cost to make your home really livable every day in the year. There is no obligation.
