The Wood Company, Windsor, Ont.

Woods Phospodine is sold in Milton by Dr Wickson & Co., Druggists.

Canadian Champion.

MILTON, Jan. 18, 1900.

According to the Chief of the United States Bureau of Statistics the preferential tariff of the Canadian Government is producing the desired results. He reports that in 1899 British exports to Canada increased 8 per cent., while those from the United States to the Dominion increased 4 per cent.

Our courts have at last began to do something more than merely report the names of convicted bribers and bribe-takers in elections. Last week at Whitby those of one party received their sentences and on Tuesday, at the same place, those of the other took their medicine. The good work will be continued in other constituencies.

A band of Cree Indians left Canada about the time of the Reil rebellion and settled in Montana, where they are looked upon as a nuisance and where it is alleged smallpox has been bred in their dirty lodges. They offer to leave their present location, some for Shoshone reservation, and some for further west, provided the necessary funds are raised for travelling expenses and it is proposed that a subscription list be circulated among the white citizens in order to get rid of them.

E. Tinsley, Chief Game Warden for Ontario, reports that 5,600 deer hunters licenses were issued in this province last season, and that the number of deer killed was 6,500. The latter number was much larger than that for the previous year. This must have been due to the amendment to the Game Act, passed last year, which legalized the killing of deer in water.

The excuse for the change was that as long as hounding was legal deer would be killed in water any way. There was something in this, but the last could have been stopped by prohibiting the first, and why this was not done is hard to understand, the more so because when the opinions of all those who took out deer hunting licenses in 1898 were asked by the Chief Warden the majority of those received were against hounding. It might be uncharitable to say that the amendment was passed, not to protect the deer, but to facilitate their slaughter by so-called hunters who cannot leave the trails in the bush without losing themselves, and who for that reason are unable to kill deer in a sportsmanlike manner, but the passing might bear that constuction.

It is time for a change, to prevent the practical extermination of the deer, which will be a question of only a few years under the present law, though Mr. Tinsley reports that they are holding their own. He no doubt repeats what been said by so-called hunters of the type referred to above. They, for obvious reasons, want the Game Act to remain as it is.

Let us have a law to prohibit hounding. It is true that this will involve a loss of revenue, for it would keep many hounders and water-hunters out of the bush; but it is to be hoped the the question of revenue from licenses hoes not figure except subordinately in the framing of Ontario game laws. If it does, however, a permanent, if reduced, revenue will be better than a larger, but transient one. It will not pay to "kill the goose that lays the golden eggs."

The War in Africa.

Jan. 16.

No further news has been received regarding Gen. Buller's movements for the relief of Ladysmith. A rumor spread abroad yesterday that the British had met with another reverse happily has no foundation. According to Boer reports, Mafeking was still holding out on the 15th inst. British forces have established a permanent post at Zoutspan Drift, in the Orange Free State, north of the Orange River. Maj.-Gen. French's forces are still engaged in constant skirmishes with the enemy around Colesberg.

Jan. 17.

On Monday a Boer commando from Colesberg attempted to storm a position held by a company of the Yorkshire Regiment and the New Zealanders. The Boers were beaten off with a loss of 21 killed and 50 wounded. There is no news of importance from any other part of the field. A London Times correspondent reports that heavy firing was heard at Springfield and Chiveley yesterday. The report, previously denied, that General Methuen will be recalled is now asserted to be true.

Liberal Conservative Meeting.

The annual meeting of the County of Halton Liberal Conservative Association for the election of officers was held in the Royal Templars' Hall, Milton, on Tuesday, the 16th inst. The following officers were elected:

S. Dice, President.
J. W. Elliott, Vice-President.
John Irving, Secretary.
E. W. Boyd, Treasurer.

The following were elected vice-presidents for their various municipalities:

Oakville—Dr. Urquhart.
Burlington—J. C. Smith.
Milton—W. J. Armstrong.
Georgetown—John A. Thompson.
Acton—Geo. Hynds.
Esquesing—Col. Appelbe and Thos. Chisholm.
Trafalgar—Wm. Patterson, Wards 1 and 2 Capt. McDonald, Wards 3 and 4; John Dearing, Wards 5 and 6.
Nelson—J. F. Richardson, New Survey; W. A. Irving, Old Survey.
Nassagaweya—W. L. Elliott, Ward 1; J. P. Allison, Wards 2 and 3.

Addresses were delivered by D. Henderson, M.P., J. W. Elliott and others.

Stuffed the Guileless Reporter.

Guelph Mercury.

Private W. J. Moore, Acton, who goes out as a member of the contingent, was in the Burmese war, and is personally acquainted with General Roberts.

At Toronto assizes on Friday the burglar, Harry Williams, was sentenced to be hanged on Good Friday, April 13th, for the murder of J. E. Varcoe.

BOYNE.

AND ITS EARLY HISTORY.

Where It Is and How Its Name Originated.

(From our own correspondent.)

Boyne is a small village situated on the corner of the second line in Trafalgar, about three miles from Milton; also at the junction of Mud and Dolby creeks. Population, 26; noted for sobriety and good citizenship.

The first building erected in the village was a frame schoolhouse, which was built in 1835. It now answers the purpose of a driving-shed on the farm of Thos. Crozier. The first frame Methodist Church was erected on Joseph Bowes's farm in the same year.

Boyne's first settler was Edward McLernan, who moved there from near Brampton in 1842 and started business as a blacksmith in a log building which stood on the opposite side of the road from where the present shop stands. Mr. McLernan remained in his small log quarters five years, when he built a house and shop on a larger scale on the opposite side of the road, which stands at the present day. Mac. was considered a very energetic young man in those days and soon worked up a considerable trade, not only in the blacksmithing line but in the manufacture of wagons, sleighs, and farm implements in general, employing a number of men. The house now occupied by Wm. Stoutt was built in the same year for George Leitch, a wagon-maker.

The brick cottage now owned by Thos Brownridge was built in 1854 by Stephen Emmett, who came from St. Catharines in that year and started a dry-goods store, but failed after being in business a short time.

In 1861 the population of the village and surrounding country had increased considerably, and the residents, feeling their importance in the world, held a public meeting to decide on a name for a post office. Different names were suggested, among them being Lurgan, Boyne, McLernansville and others. After much cogitation and discussion it was finally put to a vote, which carried in favor of McLernansville. The name chosen was found rather long for the post office stamp and Boyne was agreed on in its place, which name it has ever since borne. After the office was opened for business it was taken charge of by Miss Annie Dynes, who in later years married a Mr. Rutherford, of Hamilton, and moved to Michigan.

In 1869 the trustees decided that a larger and more up-to-date school was required and the present brick one was built.

There are two churches near the village the Methodist and Presbyterian.

APPLEBY.

Jan. 15.

Rev. Mr. Forman, of Grimsby, will preach a missionary sermon in the Methodist Church on Sunday evening.

Bert Parsons and Miss Julia Alton visited friends at Everton last week.

Timothy Burns, of Waterdown, paid his annual visit to friends on the concession last week.

John Gray, of Freelton, was in town on Monday.

A number from this vicinity attended the annual tea-meeting at Mount Pleasant Methodist Church on Monday evening. They report a good time. The programme was given principally by Rev C. O. Johnson, of Toronto. The lecture given by the above gentleman on "Mental, Ornamental and Detrimental" was well worthy of going to hear.

About 200 people attended the meeting of the Appleby Literary Society on Friday evening. In the absence of the president, A. D. Alton, the chair was filled by Geo. W. Alton. The following programme was given: Solo, Miss Sara Reiger; reading, Frank Wulker; song, Arthur Lindley; reading, W. F. Alton; song, G. H. Alton. J. E. Moody gave some choice selections on the graphophone. The programme was good, but the attention given was not the best. Inattention of the hearers on such an occasion is a great drawback to those taking part. Good order is a necessary element for success in any meeting. The disturbance which was raised at the conclusion of the meeting on Friday evening was far from creditable to those who were the cause. We are not referring to anyone personally, but all who were involved should help the society by giving good attention at every meeting which is held.

Special services are being held in the Methodist Church each Sunday evening, at the conclusion of the regular services.

In last week's Champion we were assisted in our correspondence by a kind-hearted yeoman in this vicinity, three additional items having been published at the end of our correspondence. It always has been our aim to send in as lengthy a budget as it is possible for us to secure. In doing this we are sometimes unacquainted with many items of news, consequently we cannot send them for publication. In the future we will rest assured that our assistant of last week will keep his eyes open and make up the deficiency. We think, however, that the writer is capable of running a correspondence under his own name and should therefore become a regular scribe.

PALERMO.

Jan. 15.

The Sunday School Convention of the Township of Trafalgar was held here on Tursday. Delegates to the number of about 60 attended from all parts of the tswnship. Papers were presented by Miss Madden, Palermo; Miss B. Robinson, Omagh; Miss Waldbrook, Sheridan, and F. H. Deacon, Milton. The statistical report shows that there are nineteen Sunday Schools in the township, with a membership of scholars of one thousand four hundred and sixty-nine, and an average attendance of nine hundred and eighty-seven.

Miss May Mathieson is visiting friends in Ancaster.

On the afternoon of Wednesday last Miss Lottie Wood and George Grice, of this village, were united in matrimony. The happy event took place at the residence of the bride's father, Wm. Wood. Miss Annie Wood performed the duties of bridesmaid, while Elijah Grice attended the groom. After the sumptuous repast, the happy couple took the train for the east amid showers of rice and the best wishes of their numerous friends.

We would advise our fast young friends to make haste a little more slowly if they wish to avoid the discomfort of broken noses, etc.

It is our sad duty to chronicle the death of Charles Cook, who passed away peacefully on Friday morning. Deceased had all his life been connected with the Sunday School and Sons of Temperance Division here, and from his quiet, orderly habits was the friend of all who knew him. During the past two years he had been working at the baking trade in Hamilton, but failing in health, he returned to this village about two months ago. Since then he rapidly declined, till the end came on Friday morning. Mr. Cook and family have the sympathy of the entire neighborhood in their sad bereavement.

LOWVILLE.

Jan. 15.

Frank Spence attended the annual meeting of Nelson and Burlington Agricultural Society at Nelson, of which he was president last year. We are pleased to learn that he was re-elected by acclamation. We trust that the society may have as prosperous a year as last. The president and directors, as last year, are confident of success.

We have had fair sleighing since last Thursday, but if the warm weather continues much longer we will be out of it.

George E. Gastle returned home on Friday evening, after spending a pleasant visit in Queensville and vicinity.

It is stated that two of our young men went out calling one Sunday evening recently and received a warm reception. It is reported it was the bald end of a broom.

Frank Spence had the misfortune to get his buggy badly broken on Thursday of last week. It was the result of the bad roads.

Miss Gussie Vollick is spending a short time with her parents here.

We congratulate Councillor Richardson on being successful in getting his by-law for the commutation of statute labor passed on Monday, 8th inst., and trust it will be successfully carried out and the roads improved by the change.

Rev. Mr. Wass is assisting in the revival meetings now being held at Nelson.

John Turnbull, V.S., has been very busy during the past two weeks. There seem to be a great many horses sick at present.

Mr. and Mrs. J. Houston, of Milton, visited friends in this vicinity on Sunday.

Mr. and Mrs. W. D. Flatt, Hamilton, visited with Councillor Richardson on Saturday and Sunday.

ASH.

Jan. 16.

Owing to the fine sleighing the merry chime of bells can be heard on every side.

J. McLean, of Morriston, spent Sunday with R. Husband.

C. McCleary, of the Northwest, called on friends here last week.

Some of our young men are suffering from bad colds. It is hoped they will soon recover.

OUR SOLDIER BOYS FOR AFRICA.

Canada has been kept well posted in the movements of the first Canadian contingent to South Africa by the excellent cable news service of the Family Herald and Weekly Star, of Montreal. It will be interesting to know that the Family Herald has completed arrangements to have another special correspondent to report the doings of the second contiugent. The war news service of the Family Herald and Weekly Star is superior to any paper on the American continent, and seems to be appreciated, as it is said twenty-five thousand new subscribers have been added during the past two months.

The ticket-of-leave system for convicts recently introduced by Hon. David Mills is working well, and it is proposed to extend its operations to the Central Prison.

The British War Office has accepted the offer of Lord Strathcona to equip and maintain a body of 400 Canadians as mounted infantry for service in the Transvaal.

WHIMS OF RACE HORSES.

Tricks Which Jockeys Must Guard Against on and Off the Track.

"Talking about people being peculiar," remarked an old trainer, "if there is anything more peculiar than race horses I haven't come across it. Race horses, I mean thoroughbreds, of course, are as full of whims as—well, as a woman, and you've got to humor them just the same as women. I remember one I trained some years ago—a horse, I mean, of course. He was a great one, and few of them could show him the way in. Yet that fellow couldn't be exercised in preparing him for a race unless the boy on him was rigged out in the stable's regular colors. You couldn't fool him about it, either, for he knew just as well whether the boy was fully dressed as we did, and if he wasn't you couldn't get the old fellow on the track. But when the boy put on the duds, why, the old horse would go out and do all that was wanted of him.

"Then there was another that I had that wouldn't associate with other horses, and the consequence was that we had to train him by himself. Actually had to wait every time until every other horse was off the track. Then, when he had the whole track to himself, we had all we could do to get him off when we thought he had been given enough. This same one we had to send to the post by himself, and when we got him there we had to keep him away to one side, off from the beach. Another one I had was just the opposite, for he wouldn't go on the track either for exercise or for a race unless he was accompanied by another horse.

"Then there is the horse that runs true as long as he is in the lead, but will stop and give up the fight the moment another one gets near him or passes him. On the other hand, there is the horse that tries all the harder as long as he is behind. Then there is the horse that will not try if the jockey carries a whip, while there are others that will not try unless they are given both whip and spurs. But, as I said, they are very peculiar and have as many whims as mankind."—Washington Star.

ORIGIN OF THE PHILIPPINES.

Earth's Upheaval Changed Swamps Into a Valuable Archipelago.

A million or so years ago, according to the government geologist, the Philippines consisted largely of swamps and shallow seas. There was an immense luxuriance of tropical plant growth in the swampy regions, where accumulations of vegetable debris were eventually covered with mud and transformed into a kind of coal called "lignite," which today is probably the most valuable mineral asset of the American India. At length there came a crumpling and upheaval of the earth's crust so tremendous as to be felt all the way from Switzerland to the Himalayas, where the bottom of the ocean was uplifted into mountains three miles above sea level. Indeed the strata representing these ancient marine beds are now found in the Himalayas at an elevation of 10,000 feet. The Philippines shared in this uplift, which also formed the land bridge to Asia already mentioned.

Across the land bridge from the mainland came all sorts of animals to the archipelago, and in a later age they were cut off from returning by a general subsidence of the islands. The latter sank so much indeed that the group was reduced to a mere sprinkling of hilly islets, four of which existed within the present area covered by Luzon, while Cebu was completely submerged. At this time there began a series of volcanic eruptions, mostly submarine, which threw up a great amount of material from the bowels of the earth, thus adding largely to the land area, and about 10,000 years ago there came another uplift, which raised the archipelago to its present status approximately. It is believed, however, that the islands are still rising gradually, occasional earthquakes being merely jars incidental to the slow process of elevation. The volcanic phenomena have not yet ceased. A few years ago there was a violent eruption of Mayon, in southern Luzon, which is the most beautiful, symmetrical volcanic cone in the world, sharply pointed at the apex.—Philadelphia Call.

Pistols were first used by the English cavalry in 1544. They are said to have been invented in the small Italian town of Pistoria.

Wooden legs are used by over 1,000,000 English speaking men.

So Enjoyable

is the cheering, strengthening cup of tea that pleasant custom proffers the visitor and this little hospitality is widespread.

We call your attention to the cups and saucers which you can buy cheaply for cash (and without buying tea) and rely on us as good china. These can be bought in the set or separately.

Telephone 960. 29 King-st. E., Hamilton.

BOOK BINDING.—Orders for bookbinding should be left at this office. It is surprising how nice a volume can be made of those magazines, even though they are somewhat soiled from much handling. Books, magazines, or periodicals bound or rebound in any style at very reasonable prices. Blank books, such as journals, ledgers, day books, with any kind of ruling, made to order. All work warranted first class.

Hon. Edward Blake told the people of Longford, his Irish constituency, on Sunday, that did he believe the Fenians would make an attempt on Canada, he would borrow a Mauser rifle and start for Canada at once to defend his family against his "fellow Home Rulers."

The scarcity of soft coal for locomotive purposes is giving much concern to the Grand Trunk and Canadian Pacific Railways. The Grand Trunk Railway Company have been obliged to ship from Montreal to Toronto coal required for the western division, which, under ordinary circumstances, would come direct from Pennsylvania.

The regulations passed by the Ontario Government for the enforcement of the manufacturing clause in regard to pulpwood have received the assent of the Lieutenant-Governor. It is provided that every license or permit to cut spruce or other soft wood, not being pine, suitable for manufacturing pulp or paper, on the ungranted lands of the Crown, or to cut such timber reserved to the Crown on lands leased or otherwise disposed of by the Crown, which shall be issued after April 30th next shall contain the provision that all such timber cut under such license or permit shall be manufactured in Canada. The manufacturing condition is not, however, to apply to logs, timber or wood cut and in use in Canada for fuel, building or other purposes for which logs, timber or wood in the unmanufactured state are or may be used.

Daily World and Champion, 1 yr., $2.75.

It is understood that of eight Manitoba Conservative seats gazetted on Jan 14th, the Liberals will protest Morris, Morden, Manitou, Rosenfeldt, Portage la Prairie and Avondale. The other two seats gazetted were Rockwood and Virden.

Eureka Harness Oil is the best preservative of new leather and the best renovator of old leather. It oils, softens, blackens and protects. Use

Eureka Harness Oil

on your best harness, your old harness, and your carriage top, and they will not only look better but wear longer. Sold everywhere in cans—all sizes from half pints to five gallons.
