The Canadian Champion
MILTON, Mar. 2, 1911.

We publish this week the second of the series of articles on reciprocity from the Canadian Century. That protectionist publication is greatly troubled about the Canadian farmers, for whom it predicts no end of trouble and loss in the event of the reciprocity agreement between Canada and the United States going into effect. Its articles are inspired by manufacturers, not by farmers. Except a few fruit growers, Canadian farmers are not alarmed. They welcome the prospect of a larger market and higher prices for their produce. In this part of Canada farmers are particularly pleased by the prospect of the United States markets being reopened to their barley, which was, perhaps, their principal and most profitable crop before those markets were closed to them by a high tariff. On the other hand, there is strong opposition to the agreement among farmers of the United States, who believe that it will unduly favor Canadian farmers.

COUNTY COUNCIL.

Milton, Feb. 28th, 1911.

The council met at 10.30 a. m. in accordance with adjournment. The Warden in the chair.

Members present, Messrs. Bingham, Earl, Featherston, Grant, Hutcheon, Hynds and Thompson. Also Mr. J. P. Griffin, Reeve of Nelson, who filed with the Clerk his certificate of election and qualification.

The minutes of the last meeting were read and confirmed.

Mr. Thompson moved, seconded by Mr Hynds, that the chairman of the good roads committee, the Road Superintendent and Mr. Bingham be appointed a committee to attend the Good Roads Convention to be held at Toronto on the 1st, 2nd and 3rd of March, 1911.—Carried.

Mr. Griffin moved, seconded by Mr. Earl, that the Warden purchase a suitable wreath to be sent to the family of our late colleague, J. C. Ford. Carried.

Mr. Hynds moved, seconded by Mr. Hutcheon, that when this council adjourns it stand adjourned to meet for regular business on Tuesday, March 7th, 1911, at 10.30 a. m. Carried.

Mr. Earl moved, seconded by Mr. Hynds, that whereas Divine Providence has in His wisdom removed from our midst one of our members, it is the unanimous wish of this council that, in honor of the memory of our late friend and colleague, Jas. C. Ford, this council do now adjourn to meet at Oakville to-morrow (Wednesday), March 1st, 1911, to pay a last tribute of respect to Mr. Ford's memory. Carried.

The council adjourned.

Halton Press Association.

The winter meeting for 1911 of the Halton Press Association was held at the public library building, Burlington, on Friday. President Forster, of the Oakville Star, was in the chair and the other members present were: Messrs. H. P. Moore, of the Acton Free Press, J. M. Moore, Georgetown Herald; Flenty, Oakville Record; Mitchell, Oakville News, and Panton, of the Champion, besides Mr. Harris, of the Burlington Record, who was the host of his fellow pressmen and treated them to an excellent dinner at the Queen's Hotel. A. C. Smith, Reeve of Burlington and ex-Warden of Halton, assisted Mr. Harris in entertaining the visitors and made a neat speech of welcome. He and Mr. Harris had intended to give the visitors a drive through the town and particularly to show them the new waterworks, which provide absolutely pure water and plenty of it, with first-class fire protection. Unfortunately there was no time for this. All he available time was taken up in the business meeting and explanation by Mr. Emery, editor of Printer and Publisher, Toronto, of the new system of estimating the cost of printing.

Officers were elected as follow: A. S. Forster, President; F. White, 1st Vice-President; E. A. Harris, 2nd Vice-President; J. M. Moore, Sec.-Treas.; W. J. Flenty, Asst. Sec.; H. P. Moore, R. D. Warren, Wm. Panton, E. G. Mitchell and C. A. G. Matthews, Executive Committee.

President Forster announced that the summer meeting would be held at Oakville and said he hoped the members could arrange to spend two days at it.

Curling.

Milton sent four rinks to Toronto on Thursday to play a friendly game with Parkdale, the latter winning by this score:

Milton.		Parkdale.

Total.....	38	Total.....	62

Majority for Parkdale, 25 shots.

Four Guelph Royal City rinks will play here to-morrow if the weather is favorable.

The single rink competition which has been in progress ever since the season opened was decided on Monday evening. The winning rink is composed of N. Ryder, Frank Hemstreet, Elgin Ford and Rev. W. M. Mackay, skip. Each player gets a medal. A other single rink competition began on Monday evening, on the heads-and plan, but continued from evening to evening. The players of the two rinks which lead at the finish will receive prizes, and so will the winners of a consolation competition. One set of prizes will be four pairs of fine Acton made gloves, kindly donated by Mr. Storey.

WHEN HE'S AT WORK

A medical correspondent writes to the editor of the "Sporting Times":—"Possibly the following anecdote, which actually happened at my medical inspection of school children last week may be worth repeating. I may mention that the first question we put to the children is "What is your father's occupation?"

Enter bright looking boy.

"What's your father's work, laddie?"

"Please, sir, 'e's not workin' now."

"But what does he do when he is working?"

"Please, sir, 'e goes out an' sups ale all day long."

J. J. Hill will build a million-dollar station for the Great Northern at Winnipeg.

RHEUMATISM CURED
TO STAY CURED

Liniments of no Avail—The Trouble Must be Treated Through the Blood.

This article is intended as a talk to the man or woman with rheumatism who wants to be cured. Not merely relieved, not half cured, but actually cured. The most a rheumatic sufferer can hope for in rubbing something on the swollen aching joints is a little relief. And all the while the trouble is becoming more firmly seated. Medical authorities now know that rheumatism is rooted in the blood, and that while rubbing on liniments or hot fomentations may give temporary relief, they cannot possibly cure—you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills cure rheumatism. They make new, rich blood, which expels the poisonous acid, and the rheumatism disappears. There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains and tortures of this dreaded trouble. Mr. Joseph Luddington, New Harbor, N. S., says: "Some three years ago my wife was stricken with rheumatism, and suffered so much that we despaired of her ever getting well again. At first she was able to go about, but in spite of all we did for her she grew so bad that we had to lift her in and out of bed, and finally the pains grew so excruciating that we could only move her little by little, with the sheet under her. Finally we were induced to get Dr. Williams' Pink Pills for her. I do not remember just how many boxes she took, but I do know that they were the first medicine that reached the disease, and that she continued to improve until she was again as well as ever, and could do her household work. To us it is simply marvellous what Dr. Williams' Pink Pills did for her, and we are glad to give this testimonial in the hope that it will benefit some other poor sufferer."

Dr. Williams' Pink Pills are sold by all medicine dealers dealers or will be sent by mail at 50 cents a box or six boxes for $2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Milton Horticultural Society.

As it is drawing near to the time when cleaning up commences, we would ask all who are interested in this work to begin preparations, and it is thought well to begin by giving a report of the annual meeting of the Ontario Horticultural Association held in Toronto.

The annual meeting opened in the City Hall at 2 p.m. on 17th November, 1910, with the largest representation of delegates in the history of the association, which shows the keen interest taken by the local branches all over the province. The president, in his address, urged very strongly affiliation with the Ontario Association. Out of 61 societies 42 had paid their fees and become members. Milton was not behind in this matter. One of the benefits accruing is the receiving of all reports and literature sent out by the Government, which, in cost, amounts to more than any individual member pays to the several societies. These reports are very instructive and merit careful study.

The address of the superintendent, Lockie Wilson, was clear and concise, and I might say here that the Milton Association came in for a very generous share of praise, especially as it has been in existence for so short a time. Pleasant reference was made to F. H. Deacon, an old Milton boy, who so generously donated the three silver cups to the society for annual competition. From the superintendent's address we learned that Canada is very far behind in the matter of horticulture. Reference was made to the schools of Russia receiving Government support, to the effect that such schools must have from 17 to 150 yards of ground set apart for experimental purposes and must also have a course in horticulture on their curriculum, and also maintain gardens for flowers and plots for trees, etc. Inspectors are sent out to see that the trees are properly planted and pruned and instructions given as to care. The necessity of school gardens was strongly emphasized in the address.

One noticeable feature in the local reports shows that where the most active societies exist the town councils were ready to give substantial assistance. Barrie especially was noted. There the council assisted to the amount of $75.00.

The paper by Mr. McNeil, of Ottawa, "Fronts for the City Garden," will be dealt with by G. S. Bowes, as he has had considerable experience along that line in his own garden.

A very valuable and instructive paper on "Outdoor Roses" was read by Mr. McKendrick, of Toronto. He strongly recommended the "Hybrid Tea Roses" instead of "Hybrid Perpetual," the former being more fragrant and better bloomers, although not quite so hardy, yet with attention will stand our Canadian winters just as well if slightly protected. He recommended planting the first week in November, yet good results are had by planting in April and May. To combat the aphis use nicotine and for mildew use sulphur. In choosing a good rose select a good glossy, leathery foliage, as they will be found least susceptable to disease. The climbing rose was not forgotten, the choice falling on Crimson, Rambler, Dorothy Perkins and Lady Gay.

The closing session was replete with pleasing incidents. C. C. James, Deputy Minister of Agriculture, urged the societies to a more vigorous work. He had with him sixteen distinguished visitors from the Southern States, who were introduced. Mr. Joyner, President of the Agricultural Society of Virginia, said they considered Canada far in advance of the United States in agricultural matters and that they had come here to examine the methods adopted and to learn all they could regarding the growing of fruit, He had a great deal of respect for Prof. Robertson, of Ottawa. In Virginia they considered him a great man, because in his addresses to them he always set them thinking along the right lines pertaining to agriculture. He also said that a great many school teachers in his country were Canadians and he had yet to find one who had not been a success. So it was no wonder, he said, there was a beaten path from their country to the land north of them.

Mr. Groff, of Simcoe, the gladiolus king, read a very exhaustive paper on the "Gladiolus from a Scientific Standpoint." I will not say anything regarding it. Suffice it to say that the members of the association can read it when they receive their report. The fertilizers used in their growing were slacked lime and hardwood ashes. One mistake made by amateurs was not planting them deep enough.

Prof. Hunt, of O.A.C., Guelph, gave a talk on propogation and care of house plants, illustrating his talk with specimens in all stages of development, from the taking of cuttings. I think our society should lay plans to secure Prof. Hunt for an evening at an early date, which would not only be instructive, but profitable as well.

FRANK PEAREN, Delegate.

OBITUARIES.

JAMES C. FORD.

JAMES C. Ford died at his home at Oakville on Monday from a kidney complaint, from which he had been suffering for some time and which was aggravated by a recent attack of la grippe. Mr. Ford was 44 years of age. He was born in Trafalgar and was a son of the late George Ford. When a young man he qualified as a school teacher and taught for some time in Trafalgar. For a number of years he had been the head of the firm owning the Oakville basket factory. In 1905 he became a member of the county council, in which he continued to represent Oakville up to his death. He was an exceptionally good business man, while his genial, kindly nature made him a general favorite, and he had great influence in the county council. That body met on Tuesday. The flag on the court house was half masted and the council chamber draped as a mark of respect for Mr. Ford's memory, and practically no business was done beyond the reading of the minutes and a motion to adjourn for a week. Mr. Ford left a widow and one child, a daughter about 14 years of age. The funeral took place at Oakville yesterday afternoon, from the Methodist Church, which was crowded. All the members of the county council, the sheriff, the treasurer, the clerk and the county road superintendent were present, marching in a body, as did the town council, and the local lodges of Masons, I.O.O.F. and the C.O.F. The services were conducted by the pastor, Rev. Mr. Magwood, assisted by Rev. Rural Dean Broughall, of St. Jude's Church, and Rev. J. E. Munro, of the Presbyterian Church. W. Bro. Rural Dean Broughall conducted the Masonic service. All business places were closed. There were a great many beautiful flowers.

JOHN MAHON.

John Mahon died in the Guelph hospital on Monday, from complications following an operation for appendicitis. He was 41 years of age, was the eldest son of James Mahon, and left a widow and one child. He was a farmer, was highly esteemed, and his unexpected death was a great shock to the community.

The Manitoba Grain-growers' Association has appointed Rod Mackenzie to represent it at Ottawa and watch legislation affecting farmers' interests

For Sale.

One No. 7 Fleury Grinder and Bagger, 13 inch plate, almost new, been used only one season, good article, no fault. Firm giving up business. Apply James Harrison, Burlington, Ont.

Seed Oats for Sale

Garton's Regenerated "Abundance" "Black Victor." Guaranteed pure, heavy yielders." Only a limited quantity for sale. Write or come and inspect. Bigger Bros., Glenclare Farm, Trafalgar, Ont. m 2 - 16

NOTICE is hereby given that a by-law was passed by the County Council of the County of Halton on the 24th day of January, A.D. 1911, providing for the issue of debentures to the amount of $4,000 for the purpose of paying for certain road machinery, and that such by-law was registered in the Registry Office of the County of Halton on the 21st day of February, A.D. 1911.

Any motion to quash or set aside the same or any part thereof must be made within three months after first publication of this notice and cannot be made thereafter.

Dated the 21st day of February, 1911.

3t WM. PANTON, County Clerk.

NOTICE is hereby given that application will be made to the Legislature of the Province of Ontario at its next session by the Toronto Suburban Railway Company for an Act authorizing the Company.

(a) To extend its line from some point on its present authorized Guelph or Hamilton line, at or near Cooksville, in the Township of Toronto, to a point at or near the Town of Milton, in the County of Halton, passing through or near the townships of Toronto, Trafalgar, or Esquesing, thence northerly to a point at or near the Village of Acton, in the County of Halton.

(b) To extend its line from some point at or near Guelph, in the County of Wellington, to a point at or near Berlin, Preston, Hespeler and Galt, in the County of Waterloo, and to Hamilton, in the County of Wentworth, passing through or near the townships of Guelph, Waterloo, Dumfries, Puslinch, Beverley, Flamboro West, and Ancaster;

(c) To increase the capital stock; to authorize the issue of bonds for terminals and permit the company's railway to be constructed across waterways, other railways and highways, and extend the time for the commencement and completion of the company's railways.

Dated at Toronto this 24th day of January, 1911.

ROYCE & HENDERSON, Traders Bank Building, Toronto, Solicitors for the Toronto Suburban Railway Company. 29-6t

CANADA'S OPEN DOOR

This is the second of the series of articles on Reciprocity republished from the Canadian Century to which reference was made in our issue of last week.

Canadian Fruit Farmers in Great Peril.

(From The Canadian Century.)

The largest deputation of farmers that ever waited on any Canadian Government was that of the fruit growers of Western Ontario, who went to Ottawa on February 10 to protest against the Reciprocity Agreement. The case they presented to the Government was a strong one. They showed that if the Reciprocity Agreement was endorsed by the Canadian Parliament and the United States Congress it would reduce the value of every orchard in Ontario and ruin thousands of small fruit farmers who had paid high prices for their little farms and spent time and money in planting trees. They showed that many large farms had been subdivided for fruit-growing purposes, and that new subdivisions were constantly being made. They said that a farm of one hundred acres which formerly supported only one family, being cut into ten small fruit farms, supported ten families. Among other memorials presented by this deputation was the following:

"We, the undersigned, the president and executive committee of the Old Country Association, composed entirely of men born and bred in the British Isles, and the great majority of whom are engaged in the fruit industry, respectfully and earnestly beg to draw the attention of the Dominion Government to the peculiar hardship which will be imposed upon us should this proposed tariff legislation come into effect.

"We have been induced to leave Great Britain and to come to this peninsula, and to invest our capital in the purchase, planting and general improvement of fruit lands in a large measure owing to the very wide distribution of official pamphlets and other literature emanating from Canada, and distributed throughout the British Isles, positively stating that the Ontario grower is protected in the home market by a high tariff against foreign-grown fruit and vegetables and thus enjoys that market without serious competition from outside sources.

"The amount of customs tariffs on the various fruits is specifically stated in these pamphlets and literature; and in order that this particular advantage to the Canadian grower may be clearly understood by the British this tariff scale is not only set forth in Canadian money, but is also set forth in the coinage of Great Britain. Under the belief that these conditions would be stable we have not only sunk our own capital, but have been instrumental in bringing many of our countrymen here to invest in this growing industry, which, owing to the steady rise of recent years in the values of land, now requires a large amount of capital to purchase and equip even the small farms the majority of us own, and to provide for the maintenance of our families during the years it takes to bring an orchard into bearing."

Four days after these Ontario fruit farmers presented their case to the Government Mr. Martin Burrell, member of Parliament for Yale-Cariboo, gave the House of Commons a remarkably clear and comprehensive statement of the position of the fruit growers in all the provinces of Canada, giving special attention, of course, to his own province of British Columbia, which has made wonderful progress in the planting of orchards during the last ten years. Mr. Burrell has devoted twenty-eight years of his life to the practical work of fruit growing. No man in Canada has a better knowledge of the question.

In 1901 there were 567,000 fruit trees in British Columbia, according to the Dominion census. Now there are estimated to be five million fruit trees in that province, and the area devoted to fruit is rapidly increasing.

The grain grower of the prairie gets his big farm at low cost, sometimes as a free grant; the land is ready for cultivation; the Government subsidizes a railway to take the grain to market. The British Columbia fruit farm must first be cleared of enormous trees; the people of the East and of the prairie provinces can scarcely realize the immense size of British Columbia timber. After the land has been cleared at great expense and fruit trees planted the farmer must wait for years for his trees to grow and bear fruit. In many parts of the province he must pay his share of the cost of constructing irrigation works. In the Okanagan Valley alone the amount of $1,550,000 has been expended already in irrigation works for orchard purposes and vast outlays of the same kind are going on all over the province.

According to the Dominion census of 1901 there were in the whole of Canada 15,053,875 apple trees, 1,301,775 peach trees, 902,101 pear trees, 2,115,095 plum trees, 1,288,998 cherry trees and 179,425 other fruit trees; a total of over twenty-one million fruit trees, besides 2,783,566 grape vines and large acreages of small fruits. Since 1901 there has been a very great increase in the number of trees. British Columbia farmers alone having planted about 4,500,000 trees within the ten years. Mr. Burrell estimates that there cannot be less than thirty million fruit trees in Canada now, and he thinks that $150,000,000 is a low valuation to place on the orchards of Canada to-day. THE CANADIAN CENTURY some weeks ago published an article on the value of a tree. It was pointed out that a German railway company had been forced to pay six hundred dollars for one cherry tree which it destroyed, and the principle upon which the court decided the value of a fruit tree was explained. Mr. Burrell's estimate only allows five dollars as the average value of a Canadian fruit tree when he values the orchards of the Dominion at $150,000,000. We believe that the real value is very much greater.

Now what would be said if the Government suddenly took away the tariff protection of a group of manufacturing industries in which $150,000,000 of capital was invested?

We hear a great deal from the politicians about vested rights. Why should there be any more consideration for the vested rights of manufacturers than for the vested rights of farmers. Has not the small farmer a vested right in the fruit tree that has cost him money, labour, time and anxiety?

We do not believe that the prosperous grain growers of the prairie provinces of Canada will vote against their brothers in British Columbia and Ontario when they know the real facts. We appeal to those farmers of Canada who are not fruit growers to stand by their brother farmers in this time of peril.

World Competition for Canadian Farmers

"Why should Canadian farmers lose every vestige of protection for their products while the tariff on manufactured goods remains almost untouched? If farm products from the United States, the Argentine Republic, Russia, Austria-Hungary, Denmark, Norway, Sweden, Spain, Japan, Australia, New Zealand and other countries are to come into free competition with Canadian farm products in our own home market why should not manufactured products come in free from the same countries?

These are the questions which farmers throughout Canada are asking each other now, and they will ask the politicians the same questions a little later on. Free trade in farm products and protection for manufactured products is a condition of things that cannot be permanent.

What Will American Farmers Say?

When the farmers of the United States learn that the same Reciprocity Compact that gives them free entrance to the Canadian market gives exactly the same privilege to almost every food-exporting country in the world they will be enraged. They will say: "With Russians, Japanese, Austrians, Argentines, Danes, Swedes, Norwegians, Spaniards, Australians, New Zealanders and a host of other food producers dumping their surplus products into the Canadian market what will there be left for us?" They will complain that Canadians will try to relieve their glutted markets by shipping some of this foreign stuff into the United States, and indeed it will be very difficult for the United States Government to prevent them doing so. How will United States customs officials be able to distinguish between Canadian farm products and the foreign food that will be dumped on the Canadian market? Dishonest men in both Canada and the United States will take advantage of the situation. On the other hand honest Canadian exporters will often be suspected of fraud. American customs officials will sometimes charge that good, honest, Canadian eggs, butter, cheese, etc., come from Argentina, Siberia, or some other outlandish place that has been given the right to send its farm products freely into Canada. Bitter controversies will arise. The pleasant kindly feelings that have so long existed between Canadians and Americans will be replaced by a spirit of suspicion and antagonism that may have serious consequences.

Store Opens 8.00 a.m. J. L. Sanderson Store Closes 6.30 p.m. Saturday 10 p.m.
SUCCESSOR TO BASTEDO & CO

Milton's Cash Store!

MARCHING ORDERS!

100 Boys' and Youths' Tweed and Serge Suits; long and short Pants, single and double breast, Buster Browns and Norfolks, ages from 4 to 20 years. Prices were $3.00 to $12.50; clearing them out at $1.50 to $7.50.

Auction sale of 53 head of dairy cows of Charles Adamson, one mile west of Erindale, on Dundas Street, on Thursday, Mar. 30th. Geo. Andrew, Auctioneer.

SENSITIVE CELLS

Did Not Work as Prisoners Suspected a Trap was Set

A reminder of the Pearl Bryan murder case, in which the headless body of the girl was found near Ft. Thomas years ago, has been removed from the city hall. The two sensitive cells that were built expressly on the order of the late Chief Deitsch, in order to hear what Jackson and Walling might have to say when placed together, were torn out and sold to a neighboring town. After Jackson and Walling had been arrested, efforts were made to have them tell where the head of Pearl Bryan was. They both declared they did not know. Chief Deitsch heard of the sensitive cells and had two of them built. They had sounding boards and a canopy of sensitized steel that was guaranteed to carry sound a long way. The cells were built in the basement of the city hall next to the storage room of the police department. The two men were placed in the cells and Chief Deitsch and a corps of detectives stationed themselves in the House of Detention, where the sound pipe ended. They heard something like this: "This is a scheme, Walling. Be careful what you say. Deitsch has kept us apart for some time and now he suddenly places us in the same cell. There is a scheme of some kind."

"I believe you are right," replied Walling.

"I know I am right. Look at this ceiling. It is different from anything else. We will just pay our compliments to Col. Deitsch and if he is listening he will hear what we think of him."

The prisoners then said some things that caused the chief to turn red. Turning to Detective Billy Jackson, now chief of police, he said "Here, Billy, you listen a while."

Jackson listened for a time and then turned away.

"What are they saying?" asked the chief.

"They are talking about minor matters."

"Yes, they are calling the chief of police names, eh?"

"Yes, sir; that is it."

Jackson and Walling were in the cell about 24 hours, but during all the time they did not say a single incriminating word. The fact that the cells were in existence soon became noised about and no one would be trapped in them. As they had outlived their usefulness Inspector Callahan recommended that they be sold.—Cincinnati Times-Star.

A FOUR-FOOTED PATIENT

A dog was brought to the West London Hospital, Hammersmith, for treatment. Its owner, a young woman, stated that the poor animal had been run over, and she feared the bone of its foot was broken. Being unable to pay for the advice of a veterinary surgeon, she had brought it to the West London. The hurt was carefully washed and dressed by the casualty officer and the patient was then allowed to be taken home. The owner left full of gratitude for the care and attention bestowed on her pet.

TO PUT DOWN DUELLING

Abbe Lemire has introduced in the Paris Chamber a Bill to make duelling a punishable offence. The penalty varies from imprisonment for six days to five years and fines from $20 to $2,000, according to the gravity of the offence. The severest punishment is for the duellist who kills his man; the lightest for taunting a man for not fighting.
