The house fly accumulates disease germs from the filth on which it feeds and leaves them on food on which it alights and in milk into which it drops. It is responsible for typhoid fever, for children's summer diseases and for many deaths. It breeds in manure heaps and in decaying garbage. The best way to keep down its numbers is to prevent its breeding. In up-to-date cities and towns measures are taken to this end, and the time to take them is before the hot weather sets in. We have heard of no such action here. What are we to understand from this?

The Oil Field.

Drilling was completed last week in the Brandon Oil Syndicate's new well, six feet from the first, which was blocked by the breaking of the drill cable. There is a fine showing of oil, but there has been difficulty with the pump, which will be replaced by a better one. A considerable quantity of oil has been pumped as it is, but until the accumulated oil has been brought up it will be impossible to estimate the average yield. The Syndicate figures on from 8 to 10 barrels a day.

Oil has been struck at 1480 feet in the Bowlby Oil Syndicate's well on Thos. Howden's farm over three miles from the Brandon well, same high quality as that in the latter, but drilling will be continued in the hope that the quantity will increase. The strike is most encouraging. It shows that we have a big oil field, no matter how the Howden well yields. We are sure of heavy producers somewhere in this neighborhood.

Two new wells are being drilled by the Brandon Syndicate, one about 400 yards south of the original one and the other on W. N. Scott's farm, below the mountain.

The Indianapolis people are drilling on the Milton Pressed Brick Co's. property, close to the base line. They began yesterday and will continue day and night until they strike oil or find they can't get it.

Other operators are expected to get busy very soon.

Halton Farmers' Institute.

Halton Farmers' Institute held its annual meeting in the town hall, Milton, Saturday, June 22nd. The retiring president, Mr. Lawrence, of Sheridan, gave a very favorable report of the work during the year.

The Sec'y-Treasurer's report was received, with a membership of 351, and $281.51 on hand.

Regular meetings will be arranged in Esquesing and McCurdy's Corners. Supplementary meetings at Norval, Ballinafad, Palermo, Postville, Nelson Village, Kilbride and Sheridan. Also Milton is asking the Institute Branch of the Department of Agriculture to hold one day Judging Class in December.

Considerable discussion took place as to the advisability of asking for a District Representative for Halton. Conditions are such that it was thought wise to leave this matter over for one year. The institute still affiliates with the Provincial Winter Fair. Directors were appointed throughout the county. Election of officers resulted in the following:—President, M. Holmes, Nassagaweya; Vice President, Jas. Wilson, Milton; Sec'y-Treasurer, E. F. Nixon, Ashgrove.

Boy Scout Notes.

Scouts will please meet at 7 o'clock sharp on Friday evening for practice.

F. B. Smith and Miss Jessie Smith are kindly training the boys in several new songs.

The monthly church parade of the troop will take place on Sunday morning to Knox Church, when Rev. W. M. Mackay will preach a special sermon to the boys. Mr. Mackay has kindly consented to act as chaplain to the troop.

On Monday evening, the 17th inst., at a special session, thirty-two were invested as regular members of the organization and are now entitled to wear the Tenderfoot badge. J. W. Williams, acting as scout-master, and Percy C. Jourdain, assistant scout-master, were in charge. The scouts promised on their honor 1. To be true to God and the King; 2. To do good turns daily to other people; 3. To keep the scout law. Short addresses were delivered by Drs. Anderson and McColl and Rev. Mr. Donnelly.

Frank Sloan has been elected to the office of senior scout, his duties being to help the patrol leaders in their work.

County Court.

The County Court resumed on Thursday morning, Judge Gorham presiding, and closed on Friday. There were two non-jury cases, both arising from an automobile accident last summer, on Dundas Street, Nelson, at or near the crossing of the Twelve Mile Creek: Downs vs. County of Halton and Bell vs. County of Halton. The two actions were tried together, as the evidence was the same in each. The plaintiffs claimed damages for personal injuries and the wrecking of the auto. The defence was contributory negligence, over speeding, that the driver lost control of the car and that there was a sufficient railing along the roadway. A number of witnesses were examined, among them physicians who had examined the injuries of the plaintiffs. Judgment was reserved. T. J. Blain, Brampton, for plaintiffs; J. W. Elliott, K. C., for defence.

Jack Kaiser very kindly treated Reeves Hynds, of Acton; Bingham, of Esquesing; and Moore, of Georgetown, to an auto ride to Milton on Tuesday to attend county council. Jack has an excellent 40 h. p. car and he knows how to handle it too.—Georgetown Herald.

PICKPOCKETS AT GUELPH.—W. E. Pollard, Secretary of West Durham Farmers' Institute, had his pocket picked of $12 at Guelph while on a Farmers' Institute excursion. Thomas R. Philp, of Whitby, and several other men, lost their pocket-books with amounts varying from $10 to $25. All think they were robbed on the electric cars.

Earl Beatty, of Churchville, had a narrow escape from drowning one day recently. While canoeing on his uncle's pond at Lisgar the canoe upset. His foot was caught in some way and finally through his own efforts he got clear and reached shore unhurt. Had he not kept his head in his efforts to release himself from his perilous position he would undoubtedly have been drowned.—Streetsville Review.

Miss Laura M. Moore, daughter of Mr. and Mrs. R. N. Moore, 64 Salisbury avenue, left Toronto yesterday for Calgary, Alta., where she will be married on Wednesday, June 26, to Wm. Mortimer Johnstone, of Calgary, formerly of Guelph, Ont. About fifteen of her friends gave her a surprise in the form of a linen shower, in which she received many beautiful gifts.—Globe, 19th.

Methodist L. A. Bazaar and Concert.

The longest day in the year for scientists was a very prosperous day for the Methodist Ladies' Aid in Milton. On Friday afternoon a very successful bazaar was held, through the medium of which the ladies placed before the public a gorgeous array of dry goods and fancy goods and a splendid selection of home-made candy and baking.

In the evening the public were entertained by an unusually good concert. W. E. Donnelly, who acted in the capacity of chairman, added largely to the success of the entertainment, and in his opening remarks reminded the people of Milton that they had a right to be proud of the splendid heritage of their possession. Among other compliments he said that he had never seen even in the foothills of the Adirondacks a more beautiful scene than that which greets the visitors and runs on in all its lonely splendor before the horizon of the eye as he stands on the top of the mountain to the west of us and gazes across this charming country.

The selections by our local talent, so well rendered, proved once again to the public that Milton's local singers and musicians are not amateurs, but specialists. And the local talent was very ably assisted by the Misses Smith, of Barrie, Mrs. Walter Bews, of Revelstoke, B. C., and Mr. La Feaux, of Vancouver.

The results of the bazaar and entertainment were very gratifying to the Ladies' Aid. Everybody had a good time, and the proceeds were over a hundred dollars. The ladies are to be congratulated on their splendid success and it is their intention to make this an annual affair.—Com.

Father Chiniquy Libel Suit.

Judgment was last week given in the Chiniquy libel suit in Montreal, the plaintiff being allowed $3000 damages. This action was brought by Mrs. Rebecca Morin, a daughter of Father Chiniquy, who was an ex-priest and writer, against Joseph Begin, editor and publisher of a Roman Catholic weekly, La Croix. In an article some time ago La Croix contended that as Father Chiniquy had taken vows of perpetual chastity he could never legally marry, and his daughter was therefore illegitimate. In giving judgment Justice Greenshields said: "I grant the right of a paper to refute the criticisms of any man whose teaching it disapproves of, but I do not grant the right of a paper to besmirch and vilify the memory of a dead man and to make gratuitous statements about his private life. And surely no attack befouling the memory of a good woman can ever be sanctioned by any reasoning. I cannot find any endorsation for the contention that once a man is a Catholic he is always a Catholic, in the laws of the land. The civil law of the Province gave the Church certain rights in regard to the collection of tithes, but it did not give it a lien or mortgage on a man's conscience."

SIEGE OF DELHI

Greatest of Historical Spectacles at the C. N. E. This year.

The Siege of Delhi will be the historic spectacle at the Canadian National Exhibition this year. There is no more terribly picturesque scene in English history than this sketch from the great Indian mutiny. The rich and varied costumes of the natives of different castes, mingled with the uniforms of the English officers, give to it color that cannot fail to delight the eye, while the tragic drama cannot fail to be of enthralling interest. Every detail is to receive the strictest attention to make this the greatest of the many historical spectacles that the Canadian National has become famous for.

Wood's Phosphodine,
The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old Veins. *Cures Nervous Debility, Mental and Brain Worry, Despondency, Lost Vitality, Impotency, Nightmare, and Effects of Abuse or Excesses.* Price $1 per box, six for $5. One will please, six will cure. Sold by all druggists or mailed in plain pkg. on receipt of price. *New pamphlet mailed free.* The Wood Medicine Co. (Formerly Windsor) Toronto, Ont.

NEW STRENGTH FOR NURSING MOTHERS

Aching Backs and Tired Limbs Need Not be Endured.

Aching backs, tired limbs, attacks of faintness, headaches and backaches need not be a part of woman's life. There are times when her blood needs special attention, and these times are indicated by one or more of the above symptoms. It is at such times that Dr. Williams' Pink Pills are worth their weight in gold to women, for they actually make the rich, red health-giving blood which makes weak, tired, despondent women active and strong, and feeling equal to all their household duties. Such a sufferer was Mrs. William Sullivan, Main River, N.B., who says: "I am writing to acknowledge the great good I received through Dr. Williams' Pink Pills. After my baby was born last summer I was so run down that life was really a burden. I had to drag myself about to do my housework, and every moment was one of trial. If I went upstairs I would be breathless and tired out, and my heart would palpitate violently, and I would have a feeling as though I was smothering. My appetite was poor, and my baby was suffering from my weakness. I was advised to try Dr. Williams' Pink Pills and got six boxes, and before they were all quite used I was like a different woman. My appetite returned; I regained my strength, and the work about the house no longer bothered me. As the result of my experience I would strongly urge all weak women and nursing mothers to use Dr. Williams' Pink Pills."

There is no woman, no matter what her station in life, who will not enjoy better health if she occasionally fortifies her blood through the use of Dr. Williams' Pink Pills. The Pills are sold by all medicine dealers or may be had by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The Rifle.

The Champion has been presented with a copy of "The Rifleman," published in London, England. It is the official organ of the Society of Miniature Rifle Clubs, of which the Duke of Connaught is patron, Field Marshall Earl Roberts, president, the Dukes of Norfolk and Westminster trustees, Col. N. Lake, secretary, Col. S. H. Winter, assistant secretary. The objects of the society are to promote the establishment and maintenance of clubs, furnish them with rifles and ammunition, offer prizes for competition, etc. The shooting is done at short ranges, 15 to 25 yards, with 22 cal. short range rifles, so that there is no difficulty in providing safe ranges, as there is for the long range, high velocity military rifles, a difficulty which has put an end to home rifle practice in Halton by the officers and men of the 20th Halton Rifles, long noted as a crack shooting corps, but which for some years has been unrepresented at the O. R. A. or D. R. A. matches.

By instruction and practice on the miniture rifle ranges the young marksman learns the mechanical part of rifle shooting, and having learned it, has no difficulty in quickly learning to handle the long range rifle. He is well prepared to do his part in the defence of his country should it be necessary. His training is much more practical than that given at the militia camps. The heavy annual expenditure on the camps is wasted, as the traning is drill rather than rifle shooting and a large proportion of the men who receive it are the unemployed, immigrants and others, who scatter and are lost sight of as soon as the camps break up. On the other hand the members of the rifle clubs are permanent residents.

There are few miniture rifle clubs in Canada, as there is no encouragement for them such as they receive in England, and which should be offered them here. The young men who are organizing one at Milton Heights are deserving of credit and, since they can expect nothing from the Government at present, should get local encouragement in the shape of contributions for prizes, etc.

Baseball.

The first match of the schedule of the town league was played on Saturday, the Motor factory nine beating that of the Screw factory, 20 to 6. Both teams showed need of practice, particularly in judging flies. The pitchers were not hit as hard as the score shows, both suffering through misjudged flies, which should have been easy outs, going as base hits. With a little practice, both teams will put up fast ball and the future games will be well worth seeing. Robt. Fleming was umpire and gave satisfaction to players and spectators.

OBITUARY.

MRS. BROOKS.

Ann Jane Macartney, widow of the late Jacob Brooks, died at her home in Esquesing, yesterday morning, in her 69th year. She had been an invalid since last August and had been confined to her bed for over two months. She was born in the county Armagh, Ireland. Mr. Brooks died seven years ago. Mrs. Brooks was a sister of W. C. Macartney, of Hamilton, and a niece of the late Charles McClelland, of Bellgrave. She is survived by two sons, Arthur and Charles, Esquesing, and six daughters, Mrs. S. D. Binkley, Lowville, Mrs. W. J. Lindsay, Hornby, Mrs. John Henderson, Franklin, Man., and Misses Lizzie, Tillie and Esther, at home. Four sisters survive, Mrs. R. S. Miller and Mrs. John Bush, Hamilton, Mrs. McKee, Glenwood, and Mrs. Frank Armstrong, Burlington. The funeral will take place tomorrow at 2 p. m., interment in Boston Church Cemetery.

CANADA'S NORTHLAND

Rich Areas of Agricultural Land Still Remain to be Opened

So much is sometimes made of the severity of the Canadian winter that it is generally taken as a corollary that only a comparatively narrow belt of land reaching across the continent is really suitable for permanent settlement and habitation. It is an impression which needs to be remedied, and in this respect a statement of his Majesty's Trade Inspector to the Dominion of Canada, is of considerable interest.

"To state with accuracy," he says, "just how far the truly habitable—the agricultural and industrial—area of Canada may extend northwards would be a difficult task, but a study of the climatic conditions of the Dominion seems to show that it is only in the centre of the continent that the extreme rigors of winter and the infertility of the soil need confine industrial and agricultural settlement to a narrow area. In the province of Quebec, in Ontario, and in the West, settlement is moving steadily northward; in the former province, the district of Lake St. John, at the head of the Saguenay, 176 miles norheast of the City of Quebec, is proving itself a territory of great value; in what is called New Ontario—the district between Lake Nipissing and James Bay—a mineral region of great wealth is attracting a large influx of population.

"The Temiskaming and Northern Ontario Railway, operated by the Ontario Government is expected to bring settlement into the area known as the Great Clay Belt lying north of the height of land above Lake Huron, and reported by the engineers of the National Transcontinental Railway to contain some 13,635 square miles of excellent land well suited for agricultural settlement. This estimate moreover, refers only to land actually explored in the course of the railway surveys, and the reports referred to states that the fertile belt may cover a still greater extent of territory.

"In marked contrast to the western plains, northern Ontario is a forest country, in this respect corresponding to the original character of the fertile and now closely settled provinces of Quebec and Ontario. Although such a country presents certain important advantages, the clearing of forests and preparing the land for cultivation involves heavy labor, and every Canadian knows something of the splendid qualities of industry and courage exhibited during the last generation in converting virgin forests into smiling homesteads by the deplorable but necessary process of burning magnificent timber on the spot where it grew because there was no market for it. Conditions in this respect have completely changed, and the demand for timber of all kinds is now such that the cost of clearing accessible land is more than covered by the value of its timber.

"In the western provinces the northward advance of settlement is very marked, and there is every indication that the construction of railway communication from Edmonton to the Valleys of the Athabaska and the Peace will enable the spread of population to extend itself some 700 miles north of the American frontier. There is indeed ample ground for the opinion that the exploration of the resources of the hinterland of Quebec, of New Ontario, and of Northern Alberta will offer in the immediate future abundant incentive for the continued flow of capital and population towards the Dominion."

ORIGIN OF THE BAGPIPES

Reached Present State of Completeness After Centuries of Evolution

In a lecture in Dublin Mr. E. Kent reviewed the history of the bagpipe and illustrated his remarks throughout with limelight views. He showed the bagpipes to have originated in the simple reed such as children construct from the rushes that grow by the river banks.

The addition in time of a bladder and a few notes to the chanter produced the first rude bagpipe. The chanter developed until various pleasing tones could be produced, and a drone was added. The lecturer showed that the drone was undoubtedly antique but could not explain its origin. From one drone to two or more was a natural and inevitable step. Then the final development of the bagpipes in Europe, with the sole exception of Ireland, was the substitution in certain cases of a bellows for the player's mouth.

Ireland makes a further advance by adding to the chanter and drones a new part known as the "regulator," this being a keyed pipe upon which a skillful player could produce pleasing harmonies. The lecturer showed by means of drawings and sculptural remains that the pipes were a favorite instrument in the fourteenth and sixteenth centuries.

"MOST POPULAR MAN IN KENT"

Lord Harris, who recently celebrated his 61st anniversary, has had a distinguished career as diplomat, courtier, cricketer, and organiser. He has been described as the most popular man in Kent, a reputation earned as captain of the Kent eleven, when he did more for the game than almost any man of the day. For five years he acted as Lord-in-Waiting to Queen Victoria, and he spent the same term as Governor of Bombay, during which period he and Lady Harris are said never to have made an enemy.

Canadian Flying Corps

It is possible that a military aviation company will be organized in Toronto—the first in the Dominion. It has been suggested to the Department of Militia that such a company might be organized with "Casey" Baldwin and J. A. D. McCurdy, the Canadian aviators, as two of the chief officers.

Schools as Moving Picture Shows

Edison, the electrical wizard, is preparing to spend $3,000,000 and devote eight years of effort to the perfection of a series of educational moving-picture films for use in school-rooms. It is expected that moving pictures will in time become "an indispensable adjunct" of a school course, and one of the special advantages claimed for the plan is that it will "interest boys who hate school and cannot learn from books."

ORDER NOW.—Under a special arrangement made with the publishers of the Toronto World we are enabled to offer that daily morning paper and the Champion for one year for $3.00 for both. It is unnecessary to enlarge on the merits of the World as a newspaper. They are well known. But the World makes its daily market report a specialty, which makes it the most valuable paper of all Canadian newspapers. Regular subscriptions to the Champion are $1.50, while this exceptional clubbing offer stands open. Do it now.

Millinery Bargains to close Season!

Wedding.

THOMPSON—NIXON.

"Augha-gannan Farm," the residence of Mr. and Mrs. James H. Nixon, Ashgrove, was the scene of a very pretty wedding on Wednesday, June 19th, when their daughter Ada Ethel, was united in marriage to Rev. Griffin M. Thompson in the presence of about fifty guests. The house was tastefully decorated with ferns and cut flowers, the color scheme being pink and white. At four o'clock the bride entered the parlor with her father to the strains of Lohengrin's wedding march played by Miss Dell Nixon. The ceremony was performed under an arch and bell of evergreens and orange blossoms by Rev. S. M. Roadhouse, of Georgetown, assisted by Rural Dean Davis, of Stoney Creek. The bride wore a gown of cream silk crepe de chine, trimmed with crystal fringe, lace and pearls and a tulle veil caught up with orange blossoms. She carried a shower boquet of bride's roses and lilies of the valley. The matron of honor, Mrs. Harry Shepherd, of Montreal, wore pink messaline trimmed with crystal fringe and lace and carried a boquet of pink sweet peas. The bride's travelling suit was blue broadcloth with trimmings of tan. After the ceremony a dainty luncheon was served. Guests were present from Toronto, Arthur, Wingham, Teeswater, Montreal, Gladstone, Man., and Middleton, Conn. On their return Mr. and Mrs. Thompson will reside at Stoney Creek.

Girls Wanted.

Wanted at once, two girls over 17 years of age, to learn telephone operating. References required. Apply at Telephone Central, Main St.

Wanted.

Girls to learn glove making. No experience necessary. Good wages to industrious girls. Must have good references as to character. Apply at factory opposite C.P.R. station.

W. H. STOREY & SON, Ltd.
