REDUCED OPERATIONS.—For some time there has been no unemployment problem in Milton, but that happy state of affairs has come to an end for a time, perhaps until next spring. The regular meeting of the W.C.T.U. was held at the home of Mrs. R. E. Harrison last week and is thus reported by the Secretary: "A most interesting program was given, and the following facts about the great prohibition battle now raging over the civilized world are worth repeating. Detroit, now considered the wettest city in the United States, is still a witness for prohibition. In 1917, when the city was wet, the arrests for drunkenness were 18,000. In 1924, when dry, the arrests had dropped to 12,000, and the population had doubled. Even with the bootleggers doing their worst prohibition has proved a blessing. The government of Cuba has just passed a law authorizing the teaching of Scientific Temperance in all its 6000 public schools. The Socialist party of Germany is definitely pledged to work for a Local Option law. All the women government members are for it. A petition for Local Option, containing 466,000 names, was presented. Hungary, South Africa, India, Holland, Wales, are petitioning for Local Option laws. A darker side of the picture is that although England has an army of men out of employment, last year she spent on drink one thousand million dollars. France, in 1925, has 8000 more places selling liquor than in 1924. She now has a liquor shop per ninety men, women and children in the country. No wonder she cannot pay her debts!"
