The Canadian Champion
MILTON, Aug. 19, 1926.

## W. J. L. HAMPSHIRE IS LIBERAL CANDIDATE FOR HALTON.

There was a very large attendance of delegates at Tuesday evening's convention of the Halton Liberal Association, at the Princess Theatre, to choose a candidate for the Federal election. Every polling subdivision was represented. Dr. H. A. McColl, President, was chairman. Nominations were made as follow:

W. J. L. Hampshire, of Esquesing, by James Waddibrook, seconded by Duncan Campbell.

Duncan Campbell, of Moffat, by W. J. L. Hampshire, seconded by W. L. W. Fisher.

James Waddibrook, of Trafalgar, by W. J. Clements, seconded by A. S. Forster.

Mrs. M. F. Cowland, of Milton, by Mrs. Gorham, seconded by Mrs. T. m Brown.

All the candidates except Mr. Hampshire withdrew and his nomination was made unanimous by a standing vote, on motion of Mrs. Cowland, seconded by Duncan Campbell.

When, at 8.20 p.m., the candidate stood up to address the convention, the auditorium was crowded and he was greeted with cheers. Mr. Hampshire said he accepted the nomination as his duty. His grandparents came to Canada in 1847 and all were staunch Liberals in the old stirring days. He pronounced Rt. Hon. W. L. M. King one of Canada's most distinguished Prime Ministers. He denounced the "whispering campaign" which he said Tories were carrying on. They had blocked all legislation by the King administration in the last session of Parliament, some of the best ever offered to Canada. He discussed the constitutional question. Mr. Hampshire said he had studied it thoroughly, knew the constitutionality and that he would conduct the campaign from the public platform. He was frequently cheered at the conclusion of his speech.

Mr. Hayden, President of the Young Men's Liberal Club, spoke next. He endorsed the Blue Ribbon of the Conservatives as misused for political purposes with no foundation for it. He discussed dumping, which he said prevailed under Conservative administrations, though Tories tried to hide this. Any reforms made in the Customs Department had been made by Liberals. The committee on smuggling had done good work, and Stevens spoiled it. He said the action of the Governor General in dissolving the House established a precedent.

J. C. McRuer, K.C., of Toronto, was next. He denounced the "whispering campaign" of the Conservatives and said the whispers were untrue. He said Mr. Meighen had become Premier twice, but that had never been endorsed by the people of Canada. He dwelt for some time on the budget. He said the national debt had been decreased by $81,000,000 under the King administration and the budget reduced value of the Canadian dollar. He gave Mr. King credit for getting Sir Henry Thornton at the head of the C.N.R., which had made good under his management.

The meeting closed with cheers for the Liberal leader, the candidate and the King.

## BASEBALL.

The biggest crowd of the season saw the first of the two league home and home games for the Halton League championship at the Fairgrounds last Saturday. Campbellville and Burlington and other outside points were well represented. The locals won 7-1, though they were outhit and errors were easy as to errors, five for each team. But the Carlisle errors were costly, particularly in the third frame, when Milton scored three runs on three errors and only one safety, a bunt by Armstrong on a squeeze play, the stunt of the game, which baffled the visitors. Armstrong scored in another run in the sixth by another bunt, a sacrifice, Telfer's sacrifice and an error accounted for Milton's final score in the seventh. Carlisle's lone run in the ninth was scored on a wild pitch. The visitors tried no trouble baseball, all swinging, trying for long hits. Telfer did great pitching, with sixteen strikeouts at his credit. Warner had seven hits, but the locals found it hard to connect safely with his offerings. The umpires, Hickey of Hamilton, behind the bat, and Bray of Bronte, in the field, were both good.

|---|---|---|---|---|
| Carlisle | 000 000 001 | 1 | 6 | 3 |
| Milton | 100 020 10x | 5 | 5 | 3 |

Two-base hits, A. Warner and Akins. Sacrifice hits, Armstrong and Telfer. Stolen base, H. Alger. Bases on balls, off Warner 1, off Telfer 2. Struck out, by Telfer 16, by Warner 9. Hit by pitched ball, by Telfer, Hamilton. Wild pitches, Warner 1, Telfer 1. Left on bases, Carlisle 12, Milton 5.

Milton lost the second of the home-and-home games for the league championship at Carlisle yesterday 4 to 7. Telfer was not up to his usual form and was hit hard, but his support was bad. Two errors and a misjudged fly, with 2 hits and a walk accounted for Carlisle's 2 runs in the first frame. In the second there was a hit. In the third he retired in favor of Akins, with three runs scored on three hits, an error and a pass, with nobody out. Akins retired the side scoreless, but Carlisle got two runs in the seventh on three hits and an error. Warner pitched well. He got almost perfect support, and the umpires, Hickey, of Hamilton, and Bray, of Bronte, were good. There was a big crowd, with tremendous rooting.

Two-base hits, Akins 2, McMullen, A. Warner 2, Burns. Three-base hit, Little. Stolen bases, Akins 2, A. Warner. Double plays, Buck to Akins to Little, Warner to J. Alderson to A. Warner. Struck out by Warner 9, by Telfer 2, by Akins 5. Bases on balls, off Telfer 1, off Akins 4, off Warner 2. Base hits off Telfer 5, runs scored 5. Hits off Akins 5, runs scored 2. Losing pitcher, Telfer. Left on bases, Milton 7, Carlisle 9. Umpires, Hickey at the plate and Bray in the field.

The third and deciding game will be played at Bronte at 3 p.m. today. It is to be hoped that the local boxmen will be in form and well supported, with betting behind them, and that they will win.

## ANOTHER LOST CONTINENT?

### Only Land Explorer Sees at Pole Is a Few Small Islands.

Amundson, who recently crossed the North Pole in the airship Norge, says that around the Pole was a great stretch of sea, part of it open water. The only land seen was a few small islands.

This contradicts the stories of many explorers who have actually sighted ranges of mountains giving every appearance of a huge tract of land in the extreme north. Nearly every Polar explorer has firmly believed in a Polar continent lying to the northwest of Axel Heiberg Land. Thirty years ago this land actually figured on maps under the name of Crocker Land.

In 1906 an expedition reached the latitude of this land to find nothing but sea, yet eight years later the MacMillan expedition sighted tall mountain peaks in this direction. MacMillan tried to reach them, but had to turn back.

After the war he tried again, and once more sighted the peaks. Again he tried to reach them, but a heavy gale blew up and haze hid the mountains which the explorer was unable to reach. But here is a curious point. The tides at this point showed variations which only the presence of a large mass of land could explain.

We have good reason to believe that a large part of the Atlantic was once occupied by a continent which has sunk into the depths, and we are aware that great changes are taking place in the North Pacific, where the sea bottom appears to be rising. It may be that this Arctic continent has recently sunk out of sight under the sea, or the explanation may be that the peaks seen so often by explorers were merely mirages.

### Volcano-Loving Bird.

One of the rarest parrots in existence has been added to the collection at the Zoo. It is known as a Guilding's parrot, a species so scarce that, so far as is known, there are only three specimens in captivity. The species is confined to the island of St. Vincent, and is believed to have been almost exterminated in the past owing to the habit of the birds of nesting on the slopes of volcanoes, which were once active on the island.

## POLICE COURT.

On Friday James Horton, formerly of Acton, appeared here before Police Magistrate Moore, charged with a criminal offence of which a girl aged ten years was the alleged victim. Horson had been arrested at Cobalt. He was committed for trial at the autumn assizes.

## Gained 10 Pounds In 22 Days

That's going some—but skinny men, women and children just can't help putting on good healthy flesh when they take McCoy's Cod Liver Extract Tablets.

Chock full of vitamines—the kind that are extracted from the livers of the cod—the kind that are a real help to frail, rundown, anaemic, skinny men and women.

Try these sugar-coated, tasteless tablets for 30 days—if they don't help greatly get your money back.

One woman gained ten pounds in twenty-two days. Sixty tablets, sixty cents. Ask any druggist for McCoy's Cod Liver Extract Tablets. Directions and formula on each box. "Get McCoy's," the original and genuine."

### Summer Advertising.

There are some business firms that make it their practice to ease up somewhat on their advertising in summer. A great many firms have goods in stock at this time that will be a source of expense if carried over to another season. Styles may change, money has to be borrowed to carry goods that do not sell readily. A great many enterprising firms find that they gain the best results by clearing up their stock very largely as they go, and getting fresh goods on their shelves. They accomplish this result by advertising freely through the summer. It is a tremendous help to a firm if it can give the impression that it is pushing for trade every day and week in the year. The firm that advertises gives that impression. It makes the public feel that it is alert all the time to pick up goods at a bargain, and pass its goods values on to the public.

Metropolitan department stores know the game of merchandising, and it is noticeable that they keep up a great deal of advertising through the summer. If it pays them it will pay the stores in Milton.

George Cannac, aged 9, is dead at Whiting, Ind., the victim of his playfellows, who "burned him at the stake." He died before rescuers could reach him. The group of playmates decided upon George as the captive to be burned in the "Indian pageant." He was tied to a stake, but the fire would not light. So someone poured turpentine on the wood at his feet and on his clothing. He was in flames a moment later.

## MYSTERY OF COLOR.

### Is Not What Most of Us Think It Is.

Color is not what what most of us think it is. When, for instance, we look at a blue flower we take it for granted that the flower creates its own blue. Actually what we see is the result of the flower's power to select, absorb, and reflect certain rays of light that fall on it.

Color is made of light, which in itself has no color at all, but is purely a form of energy that the eye is able to perceive, just as the ear is able to distinguish certain vibrations of air, called sound. Sir Isaac Newton found that when a beam of light was passed through a solid wedge of glass, or prism, it was split into a horizontal band of seven colors—red, orange, yellow, green, blue, violet, and indigo. This band is familiarly known as the spectrum. The rainbow is a large-scale spectrum in the heavens.

The colors of objects depend entirely on how the substances of which the objects are composed deal with the light falling on them. If the object is what we call white, it will send to our eyes all the rays that fall on it. If it is what we call colored, our eyes will pick up only a certain proportion of the rays. Black is caused by an object absorbing all the rays of light that fall on it. Incidentally, no flower does this.

What we call "tints" are pure colors diluted with white light. Pink is red mingled with white; eau de Nil is green and white. "Shades" are mixtures of black with particular colors; red and black mixed give us brown or dark red.

The blending of lights, however, produces a different effect from colors mixed on, say a palette. Yellow and blue mixed in the ordinary way produce green, but yellow and blue light mixed yield a faint pink light. The reason is that on the palette we do not mix actual colors but merely the absorbent properties of the substances concerned.

### Unbreakable China.

Destruction tests with china are now being carried out systematically in the research laboratories of great pottery firms. The doomed plate, or teapot, is fixed firmly in position, and a ball at the end of a steel pendulum swings down and hits the target. By lengthening the pendulum, harder blows are struck until the end comes. Then the resistance is mathematically computed. Each experiment brings us nearer to the day when a dish or plate will rebound uninjured from the tiled scullery floor. Scientists have improved matters until British chinaware now outlasts that of all other countries, so far as can be proved in the laboratory.

## FARM FOR SALE.

100 acres, west half lot 10, con. 5, N.S., Trafalgar, 3 miles from Milton, on stone road. Bank barn 52x75, cement floors and water in stables, drive house, hen house, hog pen and garage. 30 acres in alfalfa, 12 acres seeded to alsike, 5 acres ready for wheat, 4 acres light bush, balance in good fresh seeded clover and timothy; watered with three good wells and never failing spring. Large concrete house with 12 rooms, in good repair; wood shed, cistern, good double cellar; shade trees and 2 acres good spy orchard. Apply to

R. H. PEACOCK,
R.R. 4 Milton.

Lever Brothers, Toronto, will send you free a cake of their famous Plant Soap, if you mention this paper.

## Halton Receives Consignment of Boys Under New Immigration Policy.

Sixteen boys have been placed with farmers in Halton county through the Agricultural Representative, R. R. Fleming. These are the first boys placed in the county under the new immigration policy. They are placed at a very moderate wage for the first year and are above the average type. These boys were selected from good families and have excellent manners and good training. They are from 15 to 19 years of age. A number more will be placed in the county in the near future. The farmers pay them a small wage, take a kindly interest in them and arrange that they have some recreation. Reports from farmers who have received the boys are highly satisfactory.

## MARRIED

Edge-Ross—At Hamilton, on [illegible] by Rev. S. B. Wilson, Petro[illegible] youngest daughter of Mr. [illegible] of Georgetown, to [illegible] youngest son of Mr. [illegible] of Hamilton.

## DIED

Poile—At Georgetown, on [illegible] Aug. 14th, William James P[illegible] his 57th year.

Snider—At Regina, Sask., Friday Aug. 13th, Roxana Vernon Brethour, widow of the late Rev. D. W. Snider, mother of Mrs. J. Donald Shook, Toronto.

Monkey Brand Soap is a cleanser and labor conscious, but won't wash clothes.

FALL FAIRS FOR 1926

[illegible] Canada to [illegible] North Dakota, [illegible] to Canada of [illegible] American [illegible] These farmers, [illegible] wives and families, represent [illegible] lation of 541. They brought [illegible] them cash and effects valued [illegible] 381,750.
