long wool, but medium-woolled sheep may be raised with great advantage to the individual as well as to the whole country. The labors of such men as I have mentioned should, therefore, be properly appreciated and encouraged. In addition to them I see the name of Mr. John Ashworth, of Belmont, in the list of competitors for the prizes in this class, but there are no local exhibitors

Pigs.

The pens devoted to swine are always an instructive if not a very attractive part of the exhibition: and this year they will be as numerous and as well filled as on any previous occasion. Although little is exported from Canada the yearly product is valuable. Every effort to improve the animal should therefore be encouraged, for the least improvement would realize a large sum to the farmer by adding to the market value of his pork. It is gratifying to know that in this respect we do not fall behind our neighbors in the United States. Improvements are every year being made which add largely to the wealth of the country.

YORKSHIRES.

Of all the large-breed pigs the Yorkshire is perhaps as valuable in every respect as any other. There are twenty-nine entries this year of this class of animals, and some of those entered are said to be exceedingly fine. Among the names are those of Messrs. C. A. Jordison and Robert Gibson, Kingston township; James Main, Trafalgar; J. Featherstone, Toronto township; Robert Clarke, Tyendinaga; and S. H. Reeves, Toronto township. It will be observed that the local exhibitors are few, the greater number of animals entered coming from the country west of Cobourg. I see that our Canadian exhibitors are to have competitors from the United States—Mr. James Brodie, Rural Hill, Jefferson County, New York—the county lying on the right bank of the St. Lawrence below this place. He has made entries of boars and sows, and expects, I suppose, to carry off a fair share of the prizes.

LARGE BERKSHIRES.

There are thirty entries of large Berkshires a valuable breed held in high estimation in England. The meat is well suited for bacon and hams, as it has less fat in proportion than most other breeds. Among the intending exhibitors of Berkshire boars I notice the following: Messrs. George Hunter, Kingston; John Currie, Dereham; James Main, Trafalgar; A. McMillan, Kingston Township; Hon. G. Crawford, Brockville; J. B. Struthers, Crosby; Wm. Doyle, Kingston. Large Berkshire sows will be shown by Messrs. George Hunter, Kingston; J. Featherstone, Toronto Township; Hon. G. Crawford, Brockville; Jame Main, Tratalgar; A. McMiland and Wm. Doyle, Kingston.

OTHER LARGE BREEDS.

Besides the Yorkshire and Berkshire valuable breeds are often obtained by crosses between these and others, the Chinese being often crossed to advantage with native breeds. Among those who have entered large breed boars and sows are Messrs. Main and Featherstone, Trafalgar; R. Williams, Ernestown; T. D. Creighton, Fredericksburg; and F. Van de Bogart.

SUFFOLKS.

This is the most valuable of small-breed pigs. It is easily raised and makes excellent pork. The London market is now almost exclusively supplied with it, as it combines the best qualities of all the other breeds. The show of Suffolks this year promises to be large.

Of boars one year and over there are six entries, the exhibitors being Messrs. L. W. Herchmer and P. Sewell, of Kingston township; James Main; John Ashworth, Belmont; J. M. File, Fredericksburgh; and J. Featherstone.

Of boars less than one year old the entries number thirteen, the exhibitors being the same as in the previous section, with the additional names of Messrs. W. A. Grant, Kingston township; and R. Williams, Ernestown.

The entries of sows which number seventeen, are made by the same parties.

IMPROVED BERKSHIRES.

There will probably be an extensive collection of this breed on the grounds. Six boars, one year and over, are entered by Messrs. John Carrie, Dereham; James Nimmo, Camden; W. Eagleson, Hamilton township; John Ashworth and Hon. G. Crawford.

There are eleven entries of boars under one year, the exhibitors being the same, as well as Messrs. John Crumb, Darlington; J. Russell, Markham; and M. H. Cochrane, Compton.

There are twenty-seven entries of sows of all ages, by the same exhibitors. Messrs. Robert Gibson and George Scott, Kingston Township, also made entries in those sections.

ESSEX AND OTHER SMALL BREEDS.

The number of entries in this class is twenty-nine, the following being among the exhibitors: Messrs. S. H. Reeves and J. Featherstone, Township; James Main, Trafalgar; J. Johnston, R. Spooner, Robert Gibson, L. W. Hirchmer, P. Sewell, H. Rankin, J. McCammon; O. McMichael, and J. F. Grant, Kingston Township; John Cuming, Londesborough; J. Carruthers, Haldimand Township; N. Bethell, Grantham; and D. P. Williams, North Fredericksburg.

THE HARVEST OF 1867.

West of Toronto.

SARNIA.—Fall Wheat the greater part destroyed by midge, that portion uninjured is very good. Spring Wheat: The yield will be an average crop; some samples shown gave 65 pounds to the bushel—well saved, and fine berry. Oats: There will be a fine crop in every respect. No rye grown. Barley fully the average yield. Peas: Quality very nice, the crop will be above the average. Hay will be very abundant. Clover a good crop, and a good second crop secured. Roots of all descriptions good, and above an average yield.

FORREST.—Fall Wheat a poor crop; little sown; will average ten bushels to the acre.

Spring Wheat will average fifteen bushels to the acre.

Coarse grains good; not much threshed yet.

Root crops poor.

Potatoes an average crop and sound.

No flax in this neighbourhood.

WIDDER.—Fall Wheat, the great staple heretofore in this section, has this year proved almost a total failure, owing to the ravages of the midge; the yield will not exceed 7 bushels to the acre. That variety known as midge-proof has turned out very well, and averages about 25 bushels to the acre. The quantity sown is, however, limited; and what there is will be in demand for seeding purposes.

Spring Wheat is about an average; not much raised in this section.

Peas are unusually good, and there will no doubt be a considerable shipment.

Barley has been well harvested; there has not been so much sown in proportion to other seasons. It will be an average yield.

Oats are unusually heavy, and are being harvested in good order.

Corn is a full crop; there is a larger quantity than usual sown.

Root crops have progressed favorably so far, but the continued drought is beginning to injure them, and the yield will be much diminished.

Flax and rye are not raised in this section.

HAMBURG.—Fall Wheat is over the average crop, plump and good; the quality never was better, free from damage of any kind. The quality sown is not nearly so large as Spring wheat. In the immediate vicinity of Hamburg the Spring wheat is light in straw, but the quality is good and free from damage. There will not be an average crop. A few miles from here both north and south, it is much better and will be over the average and a good quality. Peas, oats and barley suffered from the dry season. In the immediate neighbourhood of this station, although light, the quality is good. A few miles from here both north and south, they are excellent in quantity and quality. Flax is considered a good average crop. Potatoes will be very small yield, but the quality is good. The late rain has very much improved the other root crops and they are promising well.

ALNA CRAIG.—Fall Wheat, owing to the ravages of the midge is almost a total failure with the exception of midge-proof which will average from ten to twelve bushels per acre.

Spring Wheat about the same.

Barley an average crop.

Oats, a splendid field.

Potatoes and turnips owing to the extreme dryness of the season will be rather a small crop, but there are no signs of potato disease in this vicinity.

Fall wheat—white fall, is almost totally destroyed by the midge, in some instances not yielding more than four bushels to the acre. Midge proof is good, yield above the general average.

Spring Wheat excellent, will average near fifteen bushels per acre.

Oats and Barley good.

Pease, a little thin on the ground, but a fair average crop.

Potatoes, very fine crops, though it is feared there are symptoms of rot. Turnips promise well. No flax in this vicinity.

LUCAN.—Fall wheat, poor crop, damaged by weevil, sample, only middling; yield average 12 bushels per acre. Midge-proof wheat very good both in yield and sample, average about 18 bushels per acre.

Spring wheat middling crop, well saved and sample good yield: about fifteen bushels per acre.

Barley, not much sown this season; average sample yield about 20 bushels per acre.

Pease, good average, 40 bushels per acre.

Potatoes and Turnips good, but yield small on account of the dry season.

Flax none in this vicinity.

Hay crop large and well saved.

GRANTON.—Fall wheat in this section of country is but very little sown and with those who have any is comparatively speaking a failure, the yield will not on an average exceed 10 or 12 bushels per acre.

Spring wheat although somewhat short in the straw is a very fair crop and will average from 20 to 25 bushels. The quantity of this grain sown is large.

Oats and barley are good and will go from 30 to 40 per acre.

Pease are also good.

Of flax there is but very little sown.

Potatoes and turnips, considering the great continuance of dry weather throughout the summer, are good and there is reason to believe will be at least an average crop. All kinds of grain have been saved in excellent condition; and with the exception of fall wheat, the sample will be better than that of last year. The shipments of grain from this station for the coming autumn and winter will be one hundred thousand bushels.

THORNDALE.—Fall wheat crop a failure; little sown; yield average, about four to ten bushels per acre. Spring wheat fine crop; plump grain, average yield 17 bushels per acre. Pease very good, about 35 bushels to acre. Barley, excellent yield, 40 to 45 bushels. Flax none raised. Hops, numerous yards; fair yield. Potatoes good, but below the average yield. Other root crops looking well

LONDON.—All cereals this year in Middlesex, Westminster, and Elgin have been good, viz., Fall and Spring wheat, the former about an average, the latter in yield not better than last, but in quality far superior. Barley better than last; sample good. Pease a full average; double the quantity was sown this year. Oats—the crop will be very large. Hay abundant, and well saved. Farmers never had a better year for cutting and hoisting their product; fine weather the whole time. Flax good; not much sown in this neighbourhood, principally in Elgin. Apples will be very plentiful. Grapes very fine, double the quantity in the market to what there was last year. Potatoes—the early crop very good; late ones will not be equal to last year's yield. Turnips are improving and likely to be good.

ST. MARY'S.—The crops in this locality will be full up to the average of the more favourable of the past years, and far exceeding the crop of 1866 in quantity and quality. Fall wheat very good sample; yield very abundant except in some few fields injured by midge: it was harvested in splendid order. Spring wheat, a much heavier crop than last year; rather short in the straw from want of rain. The prospects of its being housed in a good dry condition are excellent. Flax—This article is fast becoming a leading staple in the neighbourhood. The crop is very fine. The dry weather during harvest will have a most favourable effect on the quality of the seed. There will be nohe of the sand and earth mixed with the seed, as was the case last year. Potatoes and other root crops suffering for want of rain.

STRATFORD.—Fall wheat partially a failure in the immediate vicinity; will not be more than three fourths of an average. Spring wheat is about an average crop near here, while further north both Spring and Fall Wheat are about an average. Every description of course grain a very heavy crop, and will considerably exceed the average. Root crops are doing well, and have not suffered from want of rain so severely as the grain crops. There is a considerable extent of Flax cultivated in this district, and the crop has succeeded tolerably well. The general summary is that in the immediate neighbourhood of Stratford, Fall Wheat is particularly a failure and Spring Wheat an average, while a little further north both crops are very heavy. Coarse grains and roots are a great crop in all sections.

—An extensive emigration is about being inaugurated from the Southern States to Brazil, Jamaica, Honduras and the Bahamas. The project is received with favor by the British authorities. A line of steamers is about being started between Jamaica and New Orleans.

—It is probable that the Parliament of Canada will be first assembled, that a short session will be held to legislate on pressing matters, that it will be prorogued to meet early in 1868, and that the Local Legislature will meet in the early part of November.

—Mr. Durrell, of Dorchester, Mass., was robbed, five months ago, by a servant girl, of $15,000. The money was recovered and deposited in the Blue Hill Bank, for safety, in a small trunk. This money was again stolen by the men who robbed the bank last week.

A STITCH IN TIME SAVES NINE.—The season has now arrived when from the use of new vegetables and the weakening effects of heat on the system, people have reason to fear attacks of dysentery, and predisposition to cholera. On the first symptom of either affliction, proper medicine should at once be taken, and no more safe and efficacious remedy can be kept on hand than Mortimer's Cholera Mixture. Price 25 cents a bottle.

Testimonial.—We, the undersigned, having had occasion to try Mortimer's Cholera Mixture, have no hesitation, but much pleasure in recommending it, because of the immediate relief we experienced by its use. A few bottles of it should be in every household.

FAITHFUL MINISTERS OF HEALTH.—In examining the vessels at the various wharves we find among the curiosities of our commerce the brig *Miranda*, just in from Truxillo with a cargo of Honduras Sarsaparilla for Dr. J. C. Ayer & Co., of Lowell. So particular are this firm as to the articles used in compounding their various remedies that they have this drug, like some others they consume, gathered for them by a skilful agent of their own in the tropical regions of its growth. He informs us that there are many species of the plant, but two of which are really valuable in medicine; the qualities of these are also affected by the time of gathering, mode of curing, etc., operations which in that region of unreliable workmen imposes a heavy labor upon him. One of the inert varieties of Sarsaparilla grows wild in our own forests, while several others, nearly worthless, abound in Central and South America. The intelligent agent assured us that the virtues of this drug had never been fully told, and that the reason of the low esteem in which many hold it is mainly due to the importation of such immense quantities of the worthless varieties. His accounts of his trips to Honduras and his business excursions along the Gulf of Dulce and the rivers of Montagua and Santiago and among the adjacent mountains were of intense interest We can but commend and honor his employers for the faithfulness and energy with which they execute their trust as ministers to the public health; and we suspect that this course is at least one of the reasons why their medicines are held in such extraordinary favor throughout the civilized world.—*New York City News.*

New York Money Market.

NEW YORK, Sept. 25.—Stocks active and improving.

Gold 143¾.

At the second board stocks were strong.

Gold closed at 143¾.

The *Post's* financial article says, the Loan Market is less excited, and more confidence is felt.

Stocks better.

Having been issued by His Worship

The Mayor

APPOINTING

Thursday next, Sept 26,

—AS A—

PUBLIC HOLIDAY

—AN—

EXCURSION

Will take place to the beautiful and picturesque villa of the

Hon. L. J. Papineau,

Who has kindly and generously placed his grounds for the use of the Excursionists. Excursionists may proceed to Grenville, and return at their option. The splendid and elegant steamer *Queen Victoria*, chartered for the occasion, will leave the Queen's Wharf at 7 o'clock, a.m., punctually, arriving at Papineauville at 10 o'clock, giving four hours to view the grounds, and surrounding delightful scenery.

Tickets one dollar each, there and back. May be had of Messrs. J. G. Robinson & Co., The Tea Pot; Messrs. P. A. Eagleson & Son, Mrs. Proderick, Scott's Confectionery, T. W. Carrier, New Edinburgh; W. Minore and Hiram Johnson, and at the boat. Children half-price.

September 24, 1867. 546td

GRAND PIC-NIC

AT HULL,

At Wright's Gardens,

(The property of Pierre Lariviere.)

Thursday, 26th inst.

Seats have been erected so that visitors can enjoy the spectacle of the Regatta, which will take place on the river on that day.

The place is central and well got up to see the races.

The best refreshments will be served on the grounds.

The Band of the Queen Fire Company, and a String Band, directed by Mr. K. M. Fehr. The Grounds will open at one o'clock, precisely.

Admission 25 cents; Children free.

P. LARIVIERE,
Proprietor.

Ottawa, September 24. 546-3

Tickets, 37½ cents; extra charge for refreshments.

Ottawa, Sept. 25, 1867. 547td

WATERS'S QUININE WINE

Is of all the preparations of Quinine the most perfect, of all tonics the most efficient, of all stomachics the most grateful, of all stimulants the most innocent; its taste is pleasant, its action gentle, its effect certain, it creates appetite, assists digestion, and gives tone and strength to every tissue and fibre, and invigorates the whole human economy. It may be taken with benefit at all times, and all seasons, by the young or old, the weak or strong. Like all successful preparations it has many servile imitators, but not one rival. The genuine is protected by the trade mark, R. W., on Capsule and Label.
