THE NORTH ADAMS CHINESE.

THEIR PROBABLE RETURN HOME—DESIRE OF MR. SAMPSON TO GIVE WHITE LABOURERS WORK—WAS THEIR EMPLOYMENT PROFITABLE?—ATTEMPT AT EDUCATION.

NORTH ADAMS, Mass., June 6.—The movement to suppress Chinese immigration that is agitating the people of the Pacific slope has received so much attention that the question has become a national instead of a sectional one. The complaints against the encroachments of this cheap labour element have thus far come from California, but the few Chinamen living in New England are naturally looked upon by labouring competitors as intruders, especially as the depression in manufacturing industries is throwing large numbers of mill operatives and tradesmen out of employment. It is not at all improbable, however, that most of the North Adams Chinamen (the first with whom the experiment of introducing Chinese labour into Massachusetts was made), will be sent back to San Francisco this summer. This town is suffering severely from the temporary stoppage of large manufacturing establishments, and Mr. Sampson, the employer of the Chinese, feels that it may be for the best interests of the town to discharge, or rather not to re-engage his imported help, thus enabling him to give employment to residents of the place.

Has the introduction of Chinese labour into Massachusetts been profitable? To the manufacturer perhaps so, though the general opinion is to the contrary. To the community? No, it can hardly be so considered, when it is remembered that the Chinamen are not tax-payers, and that they have a peculiar fondness for sending their earnings home, where their hearts are; and their hearts are certainly not in this country. All things considered, perhaps the best that can be said of the experiment in North Adams is that it has been attended with indifferent success. One of the good results of the experiment, or one which has been most beneficial to the employer, has been the breaking up of the Order of Crispins, which formerly controlled the shoe-shops of that section of Massachusetts. In 1870 Mr. Sampson, having suffered much from the strikes of the Crispins, and being unwilling to comply with their demands, sent his agent, Mr. Chase, to San Francisco for Chinamen, mainly for the purpose of breaking up the Order, between which and himself a bitter warfare was waging. The first importation consisted of seventy-five men and boys, for most of them were between the ages of sixteen and twenty years. Since that time several lots have come and returned, the number employed, in the factory during the past six years ranging from 75 to upward of 100. The present number is 85, of whom 45, the latest arrivals, were imported a year ago. Some of the first importation remained four years, and then returned to China, and have since come back to this country and are now working at Belleville, N. J. The Chinamen here all work by the month, on contracts for three years or longer. The prices paid them have never been made known to the public, though they are supposed to receive from $20 to $25 per month. Over 40 of them are at liberty to go at any time, the term for which they were hired having expired. They are in no hurry to return, and would undoubtedly be glad to renew their contracts, but the opportunity so to do will probably not be given them. The employers' plans, however, have not been announced.

There could have been no place more favourable for the introduction of this class of labour or for the improvement of the Chinamen than this enterprising New England town. They have been given constant employment and have had rare opportunities for learning a valuable trade. The employer says very little about the success of his undertaking. He may be satisfied with it, but he does not express himself very enthusiastically on the subject. He says the Chinamen are sober and industrious, and he has but little fault to find with them, and that is about all he does say. But the fact that in other shoe manufactories in the same town they have never been admitted, even after working for years at the trade, shows that other manufacturers do not have confidence in them as workmen, or at least that they are not willing to exchange skilled American help for the so-called cheap labour. Their improvement socially has not been at all marked, though during the first year or two after their arrival the good people of the community, who did everything in their power to improve the moral and intellectual condition of the heathen strangers, felt encouraged to believe that the work in their behalf would bring fourth abundant fruit. No class of foreigners in Massachusetts have received so much attention, or have been favoured with as many opportunities for improvement as these Chinamen. Sunday schools and evening schools have been opened for them, and they have been admitted into some of the finest families of a cultivated New England society for free instruction. The kind-hearted ladies of the place have devoted themselves with an untiring zeal to the work of educating them, and of raising them to a respectable social position. The work has never seemed a hopeless one, and now it cannot be called wholly fruitless, for its good results can be seen, but in no proportion to the liberality of the means used. The bread was cast upon the waters with a lavish hand, and some of it has returned again; but much has drifted away, and been seemingly wasted upon the tide of ignorance and superstition. It appears improbable that the same advantages given to other classes of foreigners would have been so unsatisfactorily improved. The Chinamen are better than when they came here, or rather many of them are, but the improvement took place during the first years of their stay, the ambition which they showed at first apparently wearing away with the novelty of their new situation. They improved up to a certain point, and there they are resting. Many of them have learned to read and write, but after five or six years study none of them are far advanced. The churches have welcomed them, and have gone out after them in many and various ways, but few, if any, have manifested any change of religious belief. Some of them attend the Baptist Church and Sunday School regularly; but the hideous face of what the visitor calls an idol looks down upon them from the wall of their common sitting-room, and gases upon their superstition as they burn incense before the barbarous shrine. They have been admitted to parlours both to receive instructions and as curiosities, and some of them have adopted American costumes, but not many of them have laid aside their uncouth manners and Oriental clothing. They have had every opportunity for learning of the duties and privileges of American citizenship; but of the whole number only two are known to have declared an intention of becoming citizens, and these are the only two who have been willing to sacrifice their queues to good taste and civilized customs. The climate agrees with them, and they lose but little time through illness or idleness, less than workmen of any other nationality in the same trade, and this is the cause that has made the employment of them at all desirable. As to economy, no rule applies to them at all; some of them spend a very small portion of their wages, while others spend nearly all in luxuries. Their savings are almost invariably sent to China or to their agents in San Francisco for investment. New-England need have no fears concerning Chinese immigration. There are only a few industries in which they can compete with Eastern labourers, and it takes them a long time to learn a trade. The Chinamen at Belleville, N.J., are employed in a laundry where their competitors are mostly girls. In a few special cases of this kind they perhaps might be employed, but the introduction of this inferior kind of labour is not likely to be at all general in the East. Wages are so low now that they do not care to come, and in making bargains they always expect a guaranty of steady employment with prices figured on a gold basis. The doubtful success of the experiment in this place will certainly not have a tendency to increase Chinese immigration to the East.

To Consumptives.

The advertiser, a retired physician, having providentially discovered, while a Medical Missionary in Southern Asia, a very simple vegetable remedy for the speedy and permanent cure of *Consumption*, Asthma, Bronchitis, Catarrh, and all throat and lung affections; also a positive and radical specific for Nervous Debility, Premature Decay, and all Nervous Complaints, feels it his duty to make it known to his suffering fellows. Actuated by this motive, he will cheerfully send (free of charge) to all who desire it, the recipe for preparing, and full directions for successfully using this providentially discovered remedy. Those who wish to avail themselves of the benefits of this discovery without cost, can do so by return mail, by addressing, with stamp, naming this paper, DR. CHARLES P. MARSHALL, 33 Niagara Street, Buffalo, N. Y. 10wly

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelop to the REV. JOSEPH T. INMAN, *Station D, Bible House, New York City.* 4102eod

COLDS produce catarrh, catarrh produces laryngitis, bronchitis, and consumption, and especially is this the case where there is a scrofulous constitution or tendency. Hence, how important that the cold or catarrh, either acute or chronic, should be arrested and subdued at once. For this purpose take Dr. Sage's Catarrh Remedy. It is unnecessary to add testimonials, as where once tried it recommends itself. It is sold by druggists and dealers in medicines. 4109

READ THIS TWICE.—Five to thirty drops of Thomas' Eclectric Oil will cure common Sore Throat. It never fails in Croup. It will cure a Cold or Cough in twenty-four to forty-eight hours. One bottle has cured Bronchitis of eight years' standing; recent cases are cured in three to six days. It has restored the voice where the person had not spoken above a whisper in five years. As an outward application in all cases of pain or lameness, nothing like it has ever been known. One bottle will cure any case of Lame Back or Crick in the Back. For diseases of the Spine and Contraction of the Muscles it is unequalled. In Rheumatic or any other pain the first application does you good. It stops Ear Ache and the pain of a Burn in three minutes, and is altogether the best and cheapest medicine ever offered to the people—the cheapest, because it takes so little to do you good. It is composed of six of the best oils, and nothing but oils is worth its weight in gold. Why not buy it to-day?—A. B. DesRochers, assistant postmaster, Arthabaskaville, P. Q., writes:—"Thirteen years ago I was seized by a severe attack of rheumatism in the head, from which I have nearly constantly suffered. After having used 'Thomas' Eclectric Oil' for nine days, bathing the forenoon, I have been completely cured, and have only used half a bottle. This I can certify under oath if you wish."—Rev J. Mallory, of Wyoming, N. Y., writes, "Dr. Thomas' Eclectric Oil cured me of Bronchitis in one week." Dealers all over the country say, "We have never sold a medicine that has given such complete satisfaction as this."

Sold by all medicine dealers. Price, 25 cents

MATHUSHEK PIANOS.

EXCEL in volumes of tone.
EXCEL in voice-like quality of tone.
EXCEL in firmness and purity of tone.
EXCEL in durability and keeping in tune.
EXCEL for the concert-room.
EXCEL for teaching schools and seminaries.
EXCEL for the drawing-room.

These are broad assertions, but capable of proof, they are unlike any other in construction; all their peculiarities are points of excellence. Their illustrated and descriptive catalogue, which we send FREE to any address, explains in harmony with scientific and mechanics all that is claimed for the Mathushek.

These are thousands of happy owners of Mathushek willing to certify to their superior excellence. We have room here for but a few brief extracts:—

NEW YORK, Oct. 25, 1867.

We, the undersigned, judges of pianos at the Fair of the American Institute, after a careful examination of the Concert Grands do award to FREDERICK MATHUSHEK, the honour of making the best of this class of instruments then and there exhibited, or known to us elsewhere.

[Signed] EDWARD MOLLENHAUER,
A. D. WOSKMANN,
JULIUS GRIEF,
CHARLES FRADEL.

MUSICAL CONSERVATORY,
Broadway and 22nd Street,

These Pianos must take the lead of all known instruments, and their peculiar construction renders them by far the most durable, and the least liable to get out of tune.

EUGENE J. MERRIAM.

Since the date of this Concert the Math which has been my favourite.

J. JAY WATSON,
Watson's Conservatory of Music, New York.

No money would tempt me to banish it from my home.

D. SCHUYLER, Buffalo.

Mathushek superior to all others.

H. MOLLENHAUER, New York.

Mathushek has in reality taken a step in advance of all makers of Pianos in the world.

W. SHAW,
Musical Critic, Saratoga.

I have heard nothing to equal it in sweetness of tone. Its notes are like those of our sweetest singing birds, or those of the finest human voice, and instrument never fails to afford me delighted with our instrument May you be blessed with great success deserved.

Yours truly, SPENCER L. FINNEY,
Pastor Second Presb. Church, Princeton, N.J.

The Mathushek Orchestra Square Grand Piano is brilliant, of wonderful power and sweetness of tone.

ALFRED H. PRAER Rochester

I was fully convinced that the Mathushek was the crown of all.

H. BELLAUH.

My old piano, which has taken care of my piano for the past ten years, says that the No. 10 Oval Grand you just received from you, is the best made and finest instrument in this city.

Yours, &c.,
D. M. SOMERVILLE, Cleveland, O.

Elm St. W. M. S. School, Toronto.

We have great pleasure in stating that as an instrument to lead the singing in a S. School nothing can want a better. It is soft and full. The bass is grand, and when 400 voices are singing one is distinctly heard. Every note rings out clear as a bell.

WARREN STEN NEDY, Superintendent.
E. J. BUNNER, Pastor.
SAMUEL FRIDLIY, Musical Conductor.

It has given my family the very highest satisfaction.

Rev. JOHN BREDIN, Barrie.

It has given entire satisfaction, and delighted all who have seen it.

THOMAS BENT, Toronto.

It gives the most complete satisfaction. For sweetness, smoothness and richness of tone we have never heard its equal.

J. O. EMMETT, M.D., Fonthill.

Wish to to certify that I purchased two of your Mathushek Pianos and find them all represented a first-class instrument. I consider them second to none.

GEO. TAYLOR, Don Mills.

The Mathushek I purchased from you three years ago has given the most perfect satisfaction. Everything you said in regard to them has been fully borne out. Quite a number are in use here, and all say they would not exchange their piano for any they have ever heard.

DR. A. BURNS, St. Thomas.

PHOSPHORUS

AS A

MEDICINE.

Although the modern Materia Medica includes many valuable remedies for human affections, it is a matter of certainty that in all cases where the animal vitality is failing, phosphorus is decidedly superior to every other remedy, at present known. It will work effects such as nothing else will produce, and it possesses the great advantage of not causing, when its use is relinquished, the slightest reaction or depression.

The *Cornhill Magazine* of April, 1861, says:—"Of all the inorganic elements, none seem to exhibit so striking an adaptation to become a constituent of the organic body as *Phosphorus*. Here, then is an element which can unexpectedly and quickly pass from a condition of great chemical activity to one of great chemical inertness. In virtue of this character phosphorus may follow the blood in its changes, may oxidize in one great set of capillaries, and be indifferent to oxygen in the other; may occur in the brain in the vitreous form, change its place with the intellect or imagination demands, and literally manifest that thought by may breathe and words may burn, and may be present in the human frame in its amorphous form, content, like an impassive crystal, to sustain upon its unwearied shoulders the mere dead weight of some of flesh—and what is here said of the brain is contrasted with the bones, will apply with equal or greater force to many other organs of the body. All throughout the living system, we may believe that Phosphorus is found at the centres of vital action in the active condition, and at the outlying points in the passive condition."

Dr. Mowbotham says it is difficult to avoid the conclusion that Phosphorus in a free, unoxidized state is an essential element of activity in the brain and nervous system of animals; its equality difficult to resist the conviction of the great importance of Phosphorus as an element of the *Materia Medica*.

The question naturally presents itself, "Why is so valuable an element so little regarded and so seldom prescribed?" The only answer which can be given is—that scientific chemistry has been found in its preparing it that its action may be kept under perfect control. Hitherto it has been used in almond oil, olive oil, in Sulphuric Ether, in rectified Alcohol, in Chloroform, and in several other substances; but however valuable it has been found in all the delicate known methods of its preparation, irregular results have been experienced, which have rendered it unsafe for general purposes, and to employ it in a reliable form. But a chemical process has now been discovered, by which the invaluable action on the human system of Phosphorus is realized without any of those drawbacks which previous modes of administration have invariably produced.

Protected by Royal Letters Patent. Dated October 11th, 1875.

UNDER DISTINGUISHED PATRONAGE.

DR. BRIGHT'S

PHOSPHODYNE,

THE NEW CURATIVE AGENT, AND ONLY RELIABLE REMEDY FOR NERVOUS AND LIVER COMPLAINTS.

This Phosphatic combination is pronounced by the most eminent members of the Medical Profession to be unequalled for its power in replenishing the vitality of the body, by supplying all the essential constituents of the blood and nerve substance, and for developing all the powers and functions of the system to the highest degree.

It is agreeable to the palate, and innocent in its action, while retaining all its extraordinary properties; and as a specific against all the known therapeutic agents of the present day for the speedy and permanent cure of

Nervous Prostration,
Liver Complaints,
Palpitation of the Heart,
Dizziness,
Noises in the Head and Ears,
Loss of Energy and Appetite,
Dyspepsia and Indigestion,
Female Complaints,
General Debility,
Indigestion,
Sleeplessness,
Incapacity for Study or Business,
Weak Kidneys,
Lassitude,
Shortness of Breath,
Trembling of the Hands and Limbs,
Impaired Nutrition,
Mental and Physical Depression,
Consumption (in its first stages only,)
Dyspepsia,
Eruptions of the Skin,
Impaired Sight and Memory,
Nervous Paralysis,
Impoverished Blood,
Nervous Debility in all its Stages,
Premature Decline,

and all morbid conditions of the system arising from whatever cause. The action of the Phosphodyne is twofold—on the one hand incasing the principle which constitutes nervous energy, and on the other the most powerful blood and flesh generating agent known; therefore, a marvellous medicine for renovating impaired and broken-down constitutions. It quickly improves the functions of assimilation to such degree, that where for years it has been impossible to assimilate, a healthy and semi-vital condition has existed, the body will rapidly increase in quantity and firmness, and the whole system return to a state of robust health.

LUNGS, LIVER, HEART, KIDNEYS, STOMACH, AND INTESTINES

with a harmony, vigour, yet mildness unparalleled in medicine.

The Phosphodyne

gives back to the human structure, in a suitable form, the phosphoric or animating element of life, which has been wasted, and exerts an important influence directly on the spinal marrow and nervous system, of a invigorating character, and invigorating character, maintaining that buoyant energy of the brain and muscular system, which renders the mind

CHEERFUL, BRILLIANT, ENERGETIC,

entirely overcoming that dull, inactive, and sluggish disposition which many persons experience in all their actions.

THE BENEFICIAL EFFECTS

of the Phosphodyne are frequently shown from the first day of its administration by a remarkable increase of nervous power, with a feeling of vigour and comfort, to which the patient has long been accustomed.

DIGESTION IS IMPROVED,
THE APPETITE INCREASES WONDERFULLY,
THE BOWELS BECOME REGULAR,
THE EYES BRIGHTEN,
THE SKIN CLEARS AND HEALTHY,
AND THE HAIR ACQUIRES STRENGTH,

showing the importance of the action of the Phosphodyne on the organs of nutrition.

Finally, the PHOSPHODYNE maintains a certain degree of activity in the previously debilitated nervous system; it then enables all debilitated organs to return to their sound state and perform their natural functions. Persons suffering from

Nervous Debility,

or any of the hundred symptoms which this distressing disease assumes, may rest assured of an efficacious and even speedy cure by the judicious use of this most invaluable remedy.

DR. BRIGHT'S PHOSPHODYNE

Is sold only in Cases at 10s. 6d. by all Chemists and Patent Medicine Vendors throughout the World.

Full Directions for Use in the English, French, German, Italian, Dutch, Spanish, Russian, Portuguese, Danish, Persian, Hindostanee, Turkish, Arabic, Bengalee, Chinese and Japanese Languages, accompanying each case.

CAUTION.—The large and increasing demand for Dr. Bright's Phosphodyne has led to several imitations under similar names; purchasers of this medicine should therefore be careful to observe that each case bears the British Government Stamp, with the words Dr. Bright's Phosphodyne engraved thereon (white letters on red ground), and that the same words are also blown in the bottle. Every case bears the trade mark and signature of proprietors. The public are also particularly cautioned against purchasing spurious imitations imported from the United States, and are requested to note the directions for use are printed in all the languages as above, without which none can possibly be genuine.

EXPORT AGENTS.

Norton, Weiner & Co, 107 Southwark street, London; S.E.; Evans, Lescher & Evans, 60 Barclay street, London, E.C.; Edwards, Burgoyne, Burbidges & Co, 38 Coleman Street, London, E.C.; May, Sons & Thompson, 19 Aldersgate street, London, E.C.; Sanger & Hoxsey, 43 Farringdon street, London, E.C.; Barclay & Sons, 95 Farringdon Street, London, E.C.; Newbery & Sons, 27 Gresham Street, London, E.C.; Sangers & Sons, 150 Oxford street, London, W.; G.
