SUPPOSED MURDER.—An inquest was held by Dr. Pomeroy, Coroner, Hungerford, on the body of Barney Murphy, found dead in the river Moira. The deceased was missing since the election in January, and it was believed that he was murdered. The body was found by two of Bogart's lumbermen, on the third of May, and a *post-mortem* examination of the body was made by Drs. Jones and Roslin, who swore that they found wounds on the head and body, which were the cause of blows struck deceased before death; could not say that they were the cause of death. Other witnesses were examined, but the only facts of importance elicited were, that a person by the name of Thomas Rutledge told Murphy, when Murphy asked him to take something to drink, that he would sooner break his neck, or drink his heart's blood, than drink with him. Murphy said he would sooner drink whiskey than drink any man's heart's blood.

---

It is said that a person stopping at Palmer's Tavern saw Rutledge go out shortly after Murphy, and shortly afterwards heard the cry, I am murdered, &c. That Rutledge came back to the tavern and enquired who was sleeping up stairs, saying at the same time, that he knew some one was looking out of the window up stairs. The strangest feature in the whole case is, that Rutledge was never seen in Hungerford since the night Murphy was missed. From all the facts of the case there is no doubt but that the unfortunate man Murphy was cruelly murdered. All the witnesses sworn on the inquest say, that the deceased was a quiet, harmless, and inoffensive man. We trust the authorities will take the matter up.

---

Arrangements are in progress to establish a new mission in Japan. The primary object will be the introduction of Christian civilization—the means to be used will be of a practical and educational character. The mission will consist of two clergymen, three ladies, and a physician and surgeon. The movement is under the special charge of the Reformed Dutch Church, but relies mainly on individual aid of support. Special pains will be taken to introduce all the useful and practical arts, with industrial machines, &c., into Japan, and thus prepare the way for the moral and religious instructions of the people.—*New York Times.*

---

Intelligence has reached Havanna of the loss of the British war steamer 'Jaseur,' which on the night of the 4th struck a hidden rock to the northward of Jamaica, and began to fill rapidly. A raft was hastily constructed, to which the ship's ten boats were attached, and to this frail support the officers and crew, sixty in number, committed themselves. A heavy gale set in soon after, and the sea washed ten men from the raft, who were drowned. The remainder took to the boats, one of which, containing the captain and nineteen men, after suffering exposure and famine, was providentially driven into a port on the south side of Cuba; but the other, in which were thirty men, has not since been heard of.

---

The Sultan, on conferring a pension of 6000fr on Mdle. Eveillard, daughter of the French consul murdered at Djeddah wrote to her the following letter:—'Abdul Medjid Khan to the young daughter of the regretted consul of France at Djeddah.—Some insensate wretches have immolated a just man, the father of a family They have left alone and an orphan the child of his blood and of his affection. May Almighty God permit his servant Abdul Medjid to become the second father of the young girl, and may this flower of the west not refuse the friendly dew which is offered to her by him who would give his power and his life to cicatrise the eternal wound made in her young heart. This is the prayer of the unworthy servant of God, judge of the innocent and the guilty, Abdul Medjid Khan.'

---

A PRISON BIRD LECTURING ON THE HOLY LAND.—Some months ago, it will be remembered, all the prisoners in the jail at Dayton, Ohio, made their escape. Among them was an ingenious but dishonest fellow named Joseph KeKinney, who has not been retaken. He next turned up in New-Madison, Indiana, in which place he gave a course of lectures on his "Travels in the Holy Land," to large and fashionable audiences. He so thoroughly gammoned the innocent people of New-Madison that he was invited by the Professor of the college to repeat his lectures before the students. Unfortunately a "minion of the law" was looking out for the Oriental traveller, and, in order to escape, he was forced to close his lecture rather precipitately.

---

PERSEVERE.—To those who art apt to get discouraged, we say in the language of a great and good man—Sir Walter Scott—that we have rarely seen a man who conscientiously devoted himself to the studies and duties of any profession, and did not omit to take fair and honorable opportunities of offering himself to notice when such presented themselves, has not at length got forward. The mischance of those who fall behind, though flung upon Fortune, more frequently arises from want of skill and perseverance. Life is like a game of cards—our hands are alternately good or bad, and the whole seems at first glance to depend on mere chance. But it is not so; for, in the long run, the skill of the player predominates over the casualties of the game. Then do not be discouraged by the prospect before you, but ply your studies hard, and qualify yourself to receive Fortune when she comes in your way.

---

Of all learning, the most difficult department is to unlearn: drawing a mistake or prejudice out of the head is as painful as drawing a tooth, and the patient never thanks the operator.

---

THE GOLDEN ROSE.—'The Pope,' says a letter from Rome, 'recently, in accordance with annual custom, blessed what is called the golden rose. This flower, which is made of the purest gold, and ornamented with precious stones, was rubbed with balm and incensed—his Holiness reciting verses explaining the mystic meaning of the benediction; after which he took it in his left hand and blessed the people. Mass was then celebrated in the Sixtine Chapel. The gold roses are ordinarily sent to female sovereigns, sometimes, to princes, and sometimes, though rarely, to towns' corporations. The one of last year was sent to the Empress of the French, and that of year before to Queen of Spain.

---

THE UNIVERSAL AIM.—Vice disputes with virtue for the front, dishonesty leaps while honesty creeps; opposite to every church, and adorned mansion, and every pleasant place, there are low places, hospitals and hovels—all reeking, all murmuring at life, and still trying to live. The dark of dungeons, the gallows' gloom, the splendor of thrones, are lighted with the hope to live; the chained felon, who has no frequent visitor save the spider and the fly, cherishes his living day, as well as she who shines through parlor gayety, and, dazzling all her courtiers, reigns queen of laborless show.

---

The daily allowance to the maids of honor to the British Court during the reign of Henry VIII., was a gallon of ale for breakfast and a chine of beef; a piece of beef and a gallon of beer for dinner. In the afternoon, a gallon of ale and a maniple of bread; and for supper, a mass of porridge, a piece of mutton, and a gallon of ale; after supper, half a gallon of wine, and bread. If the court beauties at that time needed three or four gallons of ale, daily, Falstaff's carving for sack, at an earlier period, need not be wondered at.

---

A golden rule for a young lady is to converse always with her female friends as if a gentleman were of the party; and with young men as if her female companions were present.

---

The Rev. Dr. Steane, in a letter to the *Freeman*, calls attention to the religious state of Sweden. 'The work which God is carrying on in that land, and to a large extent by Baptists, is, without exaggeration, one of the greatest spiritual phenomena of the times in which we live; and it seems to me to constitute a loud call upon us to lend a helping hand.'

---

Advices from British Columbia give encouraging accounts as to the mines. Much excitement had been occasioned at Victoria by the authorities not permitting a public salute to be given by the American residents on the 22nd February in honor of the anniversary of Washington's birthday.

---

Accounts from South America are deplorable. Every republic is in a state of anarchy or revolution, trade paralysed, agriculture ruined, the country overrun by banditti. One adventurer succeeds another in the command of the hostile armies in rapid succession. In fact, the disease which is killing Mexico has spread over the whole continent south of her.

---

A bill for preventing and punishing the giving of liquor to slaves has passed both Houses of the Louisiana Legislature, and will become law. It is very stringent in its provisions, and was designed to have especial reference to the parish of Orleans, where the evils arising from this source are said to have become intolerable.

---

Some of the Italian residents of New York propose to raise a fund for the purchase of a costly sword, to be presented to the King of Sardinia, as a testimonial of regard for his efforts for the salvation of Italy. The testimonial will be of the highest style of workmanship—the hilt to consist of a small statue of Italy, in pure California gold.

---

The approaching visit of the Emperor of Russia to the Tuileries is talked of as a certainty. Confirmation to the report is given by the presence in Paris of the mayor of Cherbourg, who is supposed to have been sent for to receive instructions concerning the ceremonies to be observed on the occasion of the landing of his Imperial Majesty at that port. *Fetes* upon a scale of magnificence never before witnessed, are said to be in preparation for the event.—*Court Journal.*

---

It is stated in the French journals that the city of Paris in consideration of M. Lamartine's great services to the country in 1848, has made him a present of a handsome house and extensive grounds in the Bois de Boulogne. M. Lamartine has lately refused to accept a residuary bequest made by an old maiden lady to whom he was a stranger. His friends say that he will not take advantage of the ill-considered bequest of an imaginative woman to deprive her relations of an inheritance upon which they had justly reckoned.

## PHONOGRAPHY,

OR,

## WRITING BY SOUND.

PHONOGRAPHY was invented by ISAAC PITMAN, of Bath, England, in the year 1837. It is the most simple, most natural most rapid, and most easily-learned system of Writing which has ever been, or ever can be invented

During the past fifteen years, hundreds of thousands of persons, in England and America, in both public and private life, have learned to write Phonography, and thousands of social, and business letters annually pass through the post office

Nor is its great popularity to be wondered at. The present system of writing is exceedingly cumbersome, and totally unworthy these days of progress and invention. Phonography is equally as legible, can be learned in one-twentieth the time, and can be written *six times as fast!* In other words, the labor of six days can be performed in one—one man can do the work of six! So simple is the system, too, that a person may learn to write it slowly, in a couple of hours. An hour's daily practice for a few weeks will enable *any* person to write Phonography with certainty, and with some degree of freedom. The same amount of practice continued for six months will enable a person to take reports of speeches, lectures, sermons, or conversation, and to read them with accuracy.

Dr. J. W. Stone, of Boston, says: 'I deem Phonography an invaluable adjunct to education, and one which, when acquired in youth, would not be parted with in manhood for thousands of dollars"

The late Hon. Thos. H. BENTON, upon being presented with a verbatim report of one of his masterly speeches, taken by a little boy only twelve years of age, said: "*Had this art been known 40 years ago it would have saved me 20 years hard labor.*" The learned senator spoke but a portion of the truth. What longhand requires six years to accomplish, Phonography will perform in one.

To Clergymen, Editors, Physicians, Lawyers, Secretaries, Conveyancers, Law and Medical Students, Lecturers, Printers, School Teachers, Merchants, School Boys and Girls, a knowledge of Phonography is of vast utility.—In fact there is no profession or calling in which it is not useful and no young man's education can be considered complete without it.

During the past nine months hundreds of persons in Canada, of every pursuit in life, have acquired the Art, from many of whom the subscriber has received neatly-written phonographic letters, expressive of their delight with the attainment, and the extraordinary ease with which they have acquired it.

For the purpose of aiding in the dissemination of so important a reform in his own country, the subscriber is now prepared to supply all who apply, with the MANUAL OF PHONOGRAPHY, and the PHONOGRAPHIC COPY BOOK, sent by mail to any part of the Province, postage pre-paid, for the small sum of ☞ ONE DOLLAR.

Anybody and everybody, who can learn anything, can learn PHONOGRAPHY from the MANUAL, without other assistance.

Those who wish to be able to put their thoughts to paper at the rate of from 100 to 250 words "per minute," should send for the above-mentioned works at once.

The instruction given by the Manual is as plain as A. B. C., and ten times as easy to understand.

The "CANADIAN PHONETIC PIONEER" is a Monthly Journal, devoted to the advocacy of the Reform. Price 25 cents per annum.

Address, (post-paid)

WILLIAM H. ORR,
Oshawa, C. W.

## FOR SALE,
