Smoke Balls.

We had a visit on Saturday from a gentleman who has been only in the country but a few months. He was peddling the above balls. We did not inquire whether he had a license for so doing (the question might not have been out of place as seeing there are so many peddling through the country, and no one, whose duty it is, to look after them). He insisted that it was necessary for us to have one of his smoke balls and offered to take a dollar in advertising and a dollar in cash. We suggested the necessity of his engaging the druggist to take up the sales, but it appears he could not come to terms with our druggist, and hence his desire to sell to us. In the course of conversation he read a very flattering recommendation from one, Dr. Watson, member of the House of Commons. We called in question whether any gentleman of that name belonging to Montreal was a member of the House of Commons, and requested, before purchasing, he would satisfy us on that point. The fact is recommendations are not very reliable as a rule, and unless some one locally known to all, much confidence cannot be placed in many of the recommendations that quacks are so ready to palm off upon those who know no better. And in this connection it may not be out of place to ask the readers of this paper to be careful how they place reliance upon the smoke balls that Messrs. Wiman and Butterworth are now scattering throughout the country under the name of "Commercial Union" with the United States. Where are their credentials and upon what authority do they offer those "Smoke Balls" of theirs to the people of this Dominion. They tell us they are going to cure us of all the ills that they allege we are at present suffering under. They tell us they have credentials that the United States Government and people are willing and anxious to break down all barriers in the shape of Custom Houses, and admit all goods into their country free of duty from us, we doing likewise the same with theirs— pool the revenue and divide the stakes. They have the Globe newspaper on their side as also the independent Mail, both, if rumor is correct, having been bought up for the occasion by the money of Wiman, both willing to sell their country at the rate of ten cents a line. The Globe was at one time owned by a man who was willing that six Intercolonial Railroads should be built rather than Confederation should not exist. The mail supported and sustained the Government of Sir John Macdonald in advocating the "National Policy and the building of the Pacific railroad," now it goes back on its record and would make this country subsidiary to the United States. We read in the Ontario press from time to time how anxious the editors are that the Maritime people should have their natural market—the United States. At one time we use to hear considerable about the lower provinces sucking at the teats of the Ontario cow. We hear nothing about that story now. It is as well to bear in mind that for a number of years we had a reciprocity treaty with the Government of the United States whereby the natural products of each country went free into the other. This treaty was set aside by the American Government and until an offer of renewal comes from them upon equitable terms, we should be content to go on our own way doing our own business in a way we deem best for ourselves, and not knuckle or kneel down to our American cousins beseeching them to have compassion on us and admit us into what is called Commercial Union.

Kingston News: Contemporaries have made the convention of young Conservatives at Toronto the theme of lay sermons on the subject of the young man in politics, and the youthful voter has been warned not to be in too great a hurry to put on the shackles of party. The young Canadian ought to be in politics. He has a stake in the country and ought to take a lively and practical interest in its government. In order to make himself felt it is necessary that he should identify himself with one or other of the political parties, and if he examine the record und pass judgment fairly and without prejudice, he ought to see that if he desires to forward the best interests of Canada he cannot do better than join himself to the Conservative party, which has always been the party of real progress, and whose leader has ever displayed faith in the future of the country. The young Canadian who takes a lively interest in politics is to be complimented. In joining one or other of the political parties he does not give up freedom of thought or independence of action. The moment he finds that he cannot conscientiously give his party his support that moment he can leave it. The party man is no slave.

A Canadian exporter, writing from Liverpool to the Mail, says United States makes Canada a "dumping ground" for surplus stocks, and will continue to do so. Well, United States figures for last year's trade show that the country is not making Canada a "dumping ground" for surplus or any stocks of manufactures to anything like the extent it used to. But if we only had commercial union now, what a good time the American manufacturers would have selling their surplus stock in our market,

Our Washington Letter.

(From our own Correspondent.)

Bond of offerings continue to be so light, that it is believed that the balance of the fourteen millions called for by the late circular, will not be obtained within the limited time, and it is very probable that the period for the purchase of bonds for the sinking fund may be extended either temporarily or indefinitely, as the exegencies of the case demand.

The Treasury statement for the month of September shows that there has been a decrease of $954,526 in the circulation of national bank notes, and an increase in the circulation or gold coin, standard silver dollars, subsidiary silver, gold and silver certificates, and United States notes, amounting in all to $33,304,901, the increase being largely in the gold coin. On October 1st, the total circulation of all money was $1,353,485 660.

The political sensation of the season has been furnished by Civil Service Commissioner Oberly, greatly to the surprise and annoyance of such Federal employes in this city as have organized themselves into State Associations for both political and social purposes, for the Commissioner virtually vetoes the existence of such societies, admonishing the members that they are violating the provisions of the civil service act, and that for so doing they are subject to fine, imprisonment, and dismissal from the service.

Commissioner Oberly's ruling, just as might have been expected, is severely condemned by all spoilsmen, especially those of his own party—the Democracy. But, on the other hand, he is warmly applauded by civil service reformers and independent thinkers, the more so, because, under the circumstances, such an advanced step on his part exhibited the highest degree of fidelity and moral courage.

At last there seems a probability of the settlement of the vexed issues between the United States and Canada, as the President has appointed for that important duty a Commission composed of the Secretary of State and Messrs Angell of Michigan and Putman of Maine. The Commissioners are fairly representative of the North-west and East—the two sections of the country most vitally concerned in the controversy—and besides, the commission is not of a partisan complexion—there being two Democrats and one Republican.

There are a few Congressmen—perhaps a baker's dozen—at the Capital; some are looking after the interests of their constituents who have a consuming desire to serve the country, and others are pipe laying and wire working for the approaching session of Congress, which, I am of the opinion, will be one of the most stormy and exciting in the history of the Government, as each party will strive to outdo the other in the manufacture of campaign capital.

I find the report of the Utah Commission will not be without popular interest and approval, as it shows satisfactory progress in extirpating the "twin relic" polygamy, under the rigid operations of the Edmunds act. Since the passage of this law in 1882, five hundred and forty-one persons have been indicted for the practice of the peculiar institution of the Mormons, and of this number 279 were convicted. The Commission condemns the movement for the statehood of Utah as a scheme to free the Mormon church from the rigorous execution of the law.

At the Metropolitan M. E. Church, of which the famous divine, the Rev. John P Newman is pastor, there was a dramatic and unusual scene last Sunday—the occasion being the denunciation in his sermon on "Infidelity" of the anarchists and the socialists, which sentiments were greeted with general and vigorous applause from the great congregation present.

Misapprehension.

To the Editor of the Herald.

SIR,—Reviewing with indulgent and impartial eye your last graphic editorial entitled "That Estate," I seem to have led you to partly believe that my object is to come before the public simply for my own personal benefit exclusively—the very opposite is the truth! What I aim at is chiefly in the interests of morality and justice to the WHOLE POPULATION of Canada, myself being only one among the crowd of millions. (Perhaps I might be considered a little more interested than the rest). Pardon me for thus explaining my apparent error in informing you imperfectly, as the public are very critical, you see, and flounder into wrong conclusions innocently.

Board of Education

A special meeting of the Board of Education was held in the Public School room on Tuesday afternoon last, The Committee that was appointed on the 1st August has not reported. The members of the School Board were all present with the exception of Messrs. Duncan, Savage and Dr. Wilson.

Minutes of last meeting read and adopted.

The chairman stated that Mrs. Wiley was absent for a week by consent, Miss Miller acting for her.

A communication from D. H. Lent, the assistant in the High School, asking for $700 per year, was read.

Miss Spragge, Principal of the Public School communicated the average attendance during the past three months, (why not the High School report as well):

I. Division 27—14; II 33—34; III. 29—19; IV. 33—82. On Register for September: I. Division 35; II. 44; III. 44; IV. 57.

Mr. Trench, seconded by Mr. Russell, moved that three teachers only be engaged for the incoming year for the Public School

Mr. McConaghy, seconded by Mr. Switzer, moved that the question be left over till next meeting.

Mr. Trench's motion was carried.

Mr. Marsh moved that the teachers of the High School be re-engaged at the same salaries as they are now paid.

Objection was raised to putting the both names together.

Mr. Marsh moved, seconded by Mr. McConaghy, that Mr Redditt be re-engaged at the same salary next year.—Carried.

Mr. Marsh moved, seconded by Mr. Switzer, that Mr. Lent be re-engaged at the same salary.—Lost.

Mr. McConaghy moved, seconded by Mr. Russell, that an assistant be advertised for at $600.—Lost.

Mr. Trench moved, seconded by Mr. McConaghy, that an assistant be advertised for at $500.—Carried.

Mr. Trench moved, seconded by Mr. Naughton, that the re engagement of three teachers for Public School be left over till next meeting.—Carried.

Grand Results.

For several years R. H. Brown, of Kincardine, suffered from dyspepsia, he says he tried several physicians and a host of remedies without relief. His druggist recommended B. B. B. which he declares produced "grand results" for which he gives it his highest recommendation.

"The King Can Do No Wrong."

To the Editor of the Herald:

SIR,—This ancient and recognized constitutional motto is, on extraordinary occasions, made to duty even by premiers when great national enterprises are placed in jeopardy of being carried through opposing powerful political clamour for peace. A band of this sort were marshalled under the banner of George Brown, who ran the Globe newspaper condemning Conservatives as villainous corruptionists at elections, while at the same time using his quiet, pious, pen privately to electors urging them that Reformers had spent their "strength in outlying districts" and could not possibly hope for success unless they would make a grand stand—grand rush, even at their grandmother's long stockings—in other words—get money by hook or crook to buy up constituencies; in fact "come down handsomely," people will remember that angelic dodge! it was nicknamed Big Push swindle!

The "king," said to be represented (indirectly) then by Sir John Macdonald, determined to take big risks upon himself, for the good of Canada, and checkmate Grit banditti; he obtained a large sum of money from Sir Hugh Allan in order to beat them and benefit the country, but it appears people (even his own supporters) would not tolerate such peculiar work under any such circumstances; the consequence was he sank beneath boiling waves of general disapprobation, but like a cork only, bound to rise again when people came to their sober senses and thoroughly understood difficulties, the only alternative he had to hold ground against the obstructive Reform "long stretches" hoodlums. But for his absurd temporary defeat that great national undertaking would have been completed years ago, and now Grits grin like cheshire cats if reminded thereof. Sir John naturally thought because he had a large majority at his back he was quite safe—but his own friends foolishly turned upon him in one night, by a round robin, when he saw the only way to escape said robin and vote was by resignation, then wait till Conservatives came to their senses to reinstate him in power. There are some dangerous lengths, however, which, if attempted, would sink premiers like lead beneath the waves of sound public opinion never to rise again.

HOLLOWAY'S PILLS.—With darkening days and changing temperatures the digestion becomes impaired, the liver disordered, and the mind despondent, unless the cause of the irregularity be expelled from the blood and body by such an alterative as these Pills. They directly attack the source of the evil, thrust out all impurities from the circulation, restore the distempered organs to their natural state, and correct all defective or contaminated secretions. Such an easy means of instituting health, strength, and cheerfulness should be applied by all whose stomach are weak, whose brains are overworked. Holloway's is essentially a blood tempering medicine, whereby its influence reached the remotest fibre of the frame and effects a universal good.
