Sold by all Druggists.

SALESMEN WANTED.

Pushing, trustworthy men to represent us in the sale of our Choice Nursery Stock. Specialties controlled by us. Highest Salary or Commission paid weekly. Steady employment the year round. Outfit free; exclusive territory; experience not necessary; big pay assured workers; special inducements to beginners. Write at once for particulars to

ALLEN NURSERY CO., ROCHESTER, N. Y.

The Grey Review.

DURHAM, AUGUST 29th, 1895.

—Guelph city council proposes to abolish Market fees.

—Mr. Haggart expects to have the Sault Canal open September 1st.

—The Corean Government has decided that all public officers shall keep Sunday as a day of rest, and that Government offices shall close at 12 noon on Saturdays. Score a gain for Christianity. The people will soon follow their leaders.

—"The P. P. A. is in better shape now than it was two years ago," boasted an enthusiast. "I know the P. P. A. is in better shape now than it was two years ago," was the answer. "A good deal better shape. The P. P. A. was alive two years ago, and its dead now.

—A national conference of the Liberal party is to be held soon in England. The object is to ascertain the cause of the late overwhelming defeat, and no doubt to brace up for the future, and for the defence of those principles of liberalism which though suffering a temporary eclipse will surely triumph in the end.

—In 1891 Canada exported swine products only to the value of $635,732, but in 1893 to the value of $2,119,244. In the United States, swine products exported, increased from the value of $15,409,647, in 1870 to $87,281,174 in 1890. These figures are startling and show what a large trade is to be done in swine products.

—The Trades and Labor Council, of London, Ont., are indignant at the action of a contracting firm in importing American labor, and are taking steps to stop it. The Council is quite logical in its efforts: the laborer has a right to protection from competition as well as the manufacturer or any other class. If we must have protection let there be equal rights.

—The Ottawa Separate School Board has asked for the appointment of efficient teachers in room of the Christian Brothers. The Board was unanimous on the principle involved in the resolution, but some members did not support it on the ground that it did not go far enough. Curiously the Schools taught by the Sisters were found by the commissioners to be well taught comparatively, although even in the best of them, the character of the teaching is far short of what the Roman Catholics of Ottawa seem to be determined to secure for their children.

—The failure of the hay crop has induced many, and very properly, to sow Millet or as it is sometimes called Hungarian grass, as a substitute. But it should be known, as we learn from a very interesting bulletin sent out by the Ontario Agricultural College, that Hungarian grass (Millet) when cut in early bloom, makes a fair substitute for hay, but, if allowed to stand until the seeds have formed, it is not so good, for the seed is generally believed to have an injurious effect upon the kidneys of the animals to which they are fed.

—Again pleuro-pneumonia has appeared in some Canadian cattle landed in England, and of course the trade is naturally depressed in consequence. It is idle for the Canadian officials to deny the existence of the disease. The experts employed by the British authorities maintain that it did exist in the cases in question, and there is an end of the matter. What is required is that greater care be exercised at the port of embarkation, and especially that cattle shipped from the United States through Canada be closely examined. Only recently Canadian officials were reported to have been culpably negligent in allowing diseased animals to pass through.

We need scarcely say, that our rulers at Ottawa are perfect adepts in squandering the peoples' money, and that every public work seems to be deliberately seized upon for the express purpose of enriching their friends and hangers on at the public expense. The Tay Canal, the Curran bridge, the Tobique gypsum beds have recently been made use of for this purpose. Now, the Soo Canal is being diligently used to the same end. Some time ago, the public were informed that the Soo Canal would be opened for traffic on the first of July. Later, it became known that the contractors were paid a bonus, let our readers observe, of $90,000 (!) so that that might be done. The opening of course did not take place, but Mr. Haggart now hopes the canal will be opened by the first of September. In the ordinary course of things we may expect to learn shortly that another bonus will have been paid to hurry the work up before the frost sets in.

—Lord Wolseley has been appointed Commander in Chief of the British Army in room of the Duke of Cambridge resigned. The change is hailed with universal satisfaction by all who wish well for the peace and unity of the Empire, and is the strongest testimony that could be given at the present time and in the circumstances of the change, of the deference shown to public opinion in Great Britain from the crown downwards. Lord Wolseley is a distinguished soldier. In 1870 he led the Red River expedition to Winnipeg and settled the matter up then He took an active part in the Crimean war. led the forces sent to rescue Gen. Gordon and put an end to the troubles in Egypt by the brilliant victory at Tel-el-Keber. Not only is Lord Wolseley a great General he is a great administrator, and under his management the military resources of the British Empire will no doubt be placed in the very best possible condition.

—Secretary Morton has a most directive way of impressing his views on the silver coinage advocates who are employees of the Executive departments When pay day arrives they are handed bundles of white metal, sometimes weighing several pounds. Those who wonder why the public have no insatiate longing for the white metal have then a chance to sound their own feelings. An object lesson is the best for a man with a false feeling.

—Manitoba matters are much muddled. Here we have the Winnipeg Tribune, no mean authority, saying that Hon. Mr. Patterson will be here September 1st to become Lieut. Gov. of Manitoba, while Sir Jno. Schultz has lately declared that he has received no intimation of the appointment of his successor. Another rumor (a 2nd edition) is to the effect that Sir John is trying to select a new Cabinet, and when this is done Mr. Greenway will have to be accommodating or be dismissed.

The managing Editor of the 'Globe' Mr. Willison, who is now on a trip out West, has been looking into the state of public opinion in Manitoba on the School Question. So far as it can be learned it appears that if the pressure of his grace, the Archbishop of St. Boniface (where by the way all the thunderbolts are forged,) were removed and the question could be divested of its political character there would soon be a wide acceptance of the new school system among Irish Catholics, but more tardily by the French population. It appears also that the Catholic people in Manitoba are "bunched" into separate communities, and therefore will practically control the schools in their district. They will have the last half hour of the school day for religious instruction, and, except that they must employ certificated teachers, and use the authorized text books there does not seems to be a peg on which to hang a grievance. He adds, certainly with much truth, that these provisions constitute a grievance, will not be easily established.

—Dr. Kingsford, the historian, writing to the Montreal "Witness" denounces unsparingly the proposal to erect a monument in the city of Quebec to the memory of Captain Montgomery of the United States, who fell in his attempt to storm Quebec in 1775, shortly after the war of Independence. Dr. Kingsford advises Montgomery's United States admirers to erect a monument to him on their own side of the line, but, that in Canada, where the memory of their hero is regarded neither with sympathy nor respect, such a proposition could not be once thought of. In these days of peace and unity with our neighbors, there would appear to be no objection to the erection of a monument to a fallen hero any where. But in the case of Montgomery it does appear incongruous in the nature of things. A monument has been erected at Quebec to the memory of Montcalm, but he was a great general and at the time he fell he was fighting for his country. Montgomery on the other hand was a mere filibuster and engaged in an attempt to compel a handful of Canadians to sever their connections with the mother country, and join the Eastern States. Dr. Kingsford seem to think, however, that at bottom the proposition has a commercial basis, and, if carried into effect, designed by some cute Yankee to be a drawing card in directing U. S. tourists by way of Quebec.

LEADING VARIETIES OF WINTER WHEAT.

Report of Successfully Conducted Experiments from Thirty Counties in Ontario.

One hundred and twenty-two varieties of winter wheat have been tested at the Ontario Agricultural College within the past six years. Some of these varieties have produced yields of grain which were more than double those of varieties grown beside them on plots of the same area. Not only has there been a great variation in the comparative yields of grain produced by the difference in strength of straw, weight of grain per measured bushel, value of grain for milling purposes, etc, of the different varieties tested. The results of these experiments are published annually in bulletin form and in the College report, and are sent free to all members of Farmers' Institutes in Ontario, by the Department of Agriculture, Toronto. The bulletin giving the results of the winter wheat experiments conducted in the Experimental Department, the past year, is now in Toronto for publication.

In the fall of 1894, nine leading varieties of winter wheat were selected from the kinds, which had been grown from one to five years at the Agricultural College, and were distributed through Ontario for co-operative experimental work. These were divided into two sets, with five varieties in each, the Dawson's Golden Chaff being used in both sets to form a basis by which the results of all the varieties could be compared with one another. Each person wanting to conduct an experiment, stated in his application which set he desired, and the five instructions for conducting the experiments. The grain was sown at the rate of 1½ bushels per acre upon plots 1/160 of an acre in size.

Two hundred and forty seven winter wheat experiments have reported already this season. Of this number, one hundred favored us with good reports of successful experiments, eighty furnished partial reports, and sixty-seven wrote of failure or unreliable results. The names of the successful experimenters and the detailed results of the tests will be printed in the annual report of the Experimental Union for 1895, which will be published as an appendix to the Agricultural College report.

The following table gives the comparative yield of straw and grain per acre of the winter wheat varieties tested during the past season on one hundred Ontario farms:—

	STRAW PER ACRE. (tons)	GRAIN PER ACRE. (bu. 60 lbs.)
1. Dawson's golden Chaff	1.39	32.9
2. Early Genesee Giant	1.44	30.8
3. Early Red Clawson	1.23	28.9
4. Jones' Winter Fife	1.33	28.8
5. Pride of Genesee	1.33	28.8
6 American Bronze	1.34	28.6
7. Surprise	1.33	28.1
8. Early Ripe	1.36	27.8
9. Early White Leader	1.29	27.1

As none expect the one hundred good reports of successfully conducted experiments have been used in the preceding summary of results, they should be of great value and worthy of the thoughful attention of wheat growers in Ontario. Much credit is due to the careful experimenters who sent us the full reports, which have been used in this summary.

CONCISE RESULTS OF THESE CO-OPERATIVE WINTER WHEAT EXPERIMENTS.

1. Reports of successful experiments with winter wheat have been received this season from thirty counties in Ontario, nineteen of which are east and eleven west of the City of Guelph.

2. The Counties of Lambton, Middlesex, Huron, Grey, Elgin, Simcoe, and Bruce furnishes fifty-one of the one hundred good reports received in 1895.

3. Of the two hundred and forty-seven experimenters who reported the results of their tests, only eight speak wishing to discontinue the co-operative experimental work, and much interest is manifested throughout.

4. Dawson's Golden Chaff, Early Genesee Giant, Early Red Clawson, and Jones' Winter Fife gave the highest yields of grain among nine leading varieties of winter wheat tested throughout Ontario for two years in succession.

5. In average yield of winter wheat per acre, Dawson's Golden Chaff stood highest among eleven varieties tested over Ontario in 1893, nine varieties in 1894, and nine varieties in 1895, also among fifty-three varieties grown at the Ontario Agricultural College for four years in succession.

6. In co-operative experiments for 1895, Dawson's Golden Chaff, Jones' Winter Fife, and the Early Genesee Giant gave the best yield on heavy soils; and Dawson's Golden Chaff, the Early Genesee Giant, and the American Bronze on light soils.

7. When the experiments followed pease, grass, or bare fallow, Dawson's Golden Chaff gave the largest average yield of grain, and when they followed potatoes, Early Genesee Giant came first in this respect.

8. Early Genesee Giant and Dawson's Golden Chaff made the best appearance in the spring of 1895, and Early Ripe looked the poorest.

9. American Bronze, Early Genesee Giant, and Dawson's Golden Chaff possessed the stiffest straw in 1895.

10. Pride of Genesee and American Bronze produced the greatest length of straw, and the Surprise the shortest length.

11. Early Ripe and Dawson's Golden Chaff were the least, and Early Genesee Giant and Early White Leader were the most affected by rust.

12. Early Ripe and Early Red Clawson were the first to mature, and Pride of Genesee and Early White Leader were the last to mature.

13. Early Genesee Giant and Dawson's Golden Chaff produced the plumpest grain, and Early Ripe and American Bronze, the most shrunken grain.

14. Dawson's Golden Chaff was decidedly the most popular variety with the experimenters in each of the past three years; and during the present season, it was chosen by over sixty percent of the farmers who sent in full reports, as being the best among the varieties tested.

DISTRIBUTING THE SEED FOR TESTING PURPOSES.

In the following table will be found two sets of winter wheat varieties, which will be sent free, by mail, in half-pound lots of each variety, to farmers applying for them, who will carefully test the five kinds in the set which they choose, and will report the results after harvest next year. The seed will be sent out in the order in which the applications are received as long as the supply lasts.

SET 1.
Dawson,s Golden Chaff
Early Red Clawson
Jones' Winter Fife
Surprise
American Bronze

SET 2.
Dawson's Golden Chaff
Early Genesee Giant
Pride of Genesee
Bulgarian
Jones' Square Head.

Each person wishing one of these sets should write to the Experimentalists, Agricultural College, Guelph, "mention which set he desires;" and the grain, with instructions for testing, and blank form on which to report, will be furnished free of cost to his address, until the supply of grain for distributing becomes exhausted.

C. A. Zavitz, Experimentalist and Director of co-operative experiments in Agriculture.

A BATTLE FOR LIFE.

THE RESCUE OF A C.P. R. OFFICIAL'S WIFE.

Helpless and Bed-ridden for Months—$275 Spent in Medical Treatment Without Avail—Her Early Disease Looked for as Inevitable—But Health and Strength Have Been Restored.

From the Owen Sound *Times*.

Last fall when the *Times* gave an account of the miraculous cure of Mr. Wm. Belrose through the use of Dr. Williams' Pink Pills for Pale People we had little idea that we would be called upon to write up a case which is even more remarkable. The case referred to is that of Mrs. John C. Monnell, whose cure has been effected by these marvelous little messengers of health. The *Times'* reporter was met at the door by Mrs. Monnell, who, though showing a few traces of the suffering she had undergone, moved about sprightly. With apparently all the gratitude of a man who had been saved out of the deepest affliction, Mr. Monnell gave the following account of his wife's miraculous cure. I have been in the employ of the C. P. R. at Toronto Junction for some time. In August last year, after confinement, my wife took a chill and what is commonly known as milk leg set in. When I came home from my work I was informed of the fact, and next morning called in the family physician. The limb swelled in a very short time to an enormous size. Every means known was adopted to reduce the inflammation but without avail. Consulting physicians were called in, but all the satisfaction they could give me was that the doctors in attendance were doing their utmost. A tank was rigged up, a long line of rubber hose attached and wound around the afflicted limb and ice water allowed to trickle down through the piping to relieve the pain and reduce the inflammation above the knee. The leg was opened and perforated, a tube inserted from the thigh to the ankle with the hope that it would carry off the pus which formed. For five long anxious months I watched the case with despair, while my wife was unable to move herself in bed. At the end of that time she was placed in a chair where she spent other three months. To add to the complication gangrene set in, and for weeks there was a fight for life. At last the physicians gave up. They said the only hope was in the removal of my wife to the hospital. After a brief consultation she emphatically refused to go, stating that if she had to die she would die among her little ones. At this time she could not put her foot to the ground. Her nominal weight was 135 pounds when in good health, but the affliction reduced her to a living skeleton for she lost 65 pounds in five months. To all human intelligence it was simply a case of waiting for the worst. Up to this time I had not thought of Dr. Williams' Pink Pills for Pale People, until one day I came across an advertisement and determined to try them. This was two months ago, just about the time we were moving up from the Junction."

At this point Mrs. Monnell took up the story of the marvellous cure, and corroborated what her husband stated. Continuing she said: "After using a few boxes I could walk on crutches, and after their further use I threw away my crutches and am now doing all my own housework. The limb is entirely healed up, and the cords, which in the terrible ordeal had been forced out of their places, have come back to their natural position. And to show how complete has been my recovery I am pleased to say that I have recovered my lost weight and five pounds more. I now weigh 140 pounds.

"We spent $275 in doctors' fees and other expenses without avail, before beginning the use of Dr. Williams' Pink Pills," said Mr. Monnell, "and it seems marvellous that my wife, who a few months ago was considered past human aid, had by this wonderful medicine been restored to health and strength;" and the *Times* concurs in the conclusion.

Mr. Monnell is one of the C. P. R. staff of clerks at this port, and he is always willing to tell of the cure effected. But there are hundreds of witnesses to the truth of his statements both in Owen Sound and at Toronto where he resided up to two months ago.

Dr. Williams' Pink Pills are offered with confidence that they are the only perfect and unfailing blood builder and nerve restorer, and where given a fair trial disease and suffering must vanish. Sold by all dealers or sent by mail on receipt of 50 cents a box or $2.50 for six boxes, by addressing the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y. Beware of imitations and refuse trashy substitutes alleged to be "just as good."

A PERFECT TEA

MONSOON TEA

THE FINEST TEA IN THE WORLD

FROM THE TEA PLANT TO THE TEA CUP IN ITS NATIVE PURITY.

"Monsoon" Tea is put up by the Indian Tea growers as a sample of the best qualities of Indian Teas. Therefore they use the greatest care in the selection of the Tea and its blend, that is why they put it up themselves and sell it only in the original packages, thereby securing its purity and excellence. Put up in ¼ lb., ½ lb. and 1 lb. packages, and never sold in bulk.

ALL GOOD GROCERS KEEP IT.

If your grocer does not keep it, tell him to write to STEEL, HAYTER & CO. 9 11 and 13 Front Street East, Toronto.

School Teachers!! its just the thing for you during the summer. Write for particulars.

STONE & WELLINGTON, TORONTO, ONT.

LOCAL AND GENERAL

Miss Mary Main is visiting friends in town.

Pharmacist J. L. McKenzie is in Stouffville on Tuesday morning.

Money to loan. Most favorable rates for good security. Calder & Livingston.

Miss Russell, of Galt, is visiting her aunt Mrs. Burnet for a week or two.

Miss E. Calder, is spending a week or two round the old home at Calderwood.

Lawyer G. L. McCaul, of Walkerton was in town last Saturday and Monday.

Misses Lizzie and Aggie Horne of Lucknow, are guests of Mrs. Jno. Cameron, this week.

Mr. And. Bucham, from Brantford was visiting at Mr. Jno. Topham's, Scotch Hill, a few days lately.

Mr. C. C. McFayden took in the Scotland celebration in Mt. Forest last week. Loyal Scot, Colin.

FOR SALE.—Butcher business in McIntyre Block. Apply to Neil McIntyre or C. Eberman.

Mr. J. A. Imrie, the affable representative of the Dominion Printers' Ink Co., was on his rounds last week.

Calder & Livingston call attention this week to the great bargains they are offering on all wheeled rigs.

SOME OATS.—Mr. Jno. Topham, 2nd Avenue has 4 acres of oats average 6 feet. Next, for this famine country.

The Chesley *Enterprize* points out that Durham Public School had better results than Wiarton H. School at the departmental examinations.

Mrs. Jno. Quinn, and Miss Fogarty of Sault Ste. Marie, daughters of Mr. And. Fogarty, Glenelg, are making an extended visit at the old home.

Mrs. Willison, and Mrs. Pickens of Chinguacousy, sisters of Mr. Jno. Topham were visiting at the old home last week. Miss Maggie Hunter, Durham, is also a guest there.

Mr. Bailey, of Melancthon, a third year student of Knox College preached very acceptably in the Presbyterian church last Sunday. He will be again Sunday next.

Miss Fairy Morgan, daughter of Mr. H. F. Morgan, Picton, was married lately to Dr. R. B. J. Stanbury, of Toronto. This young lady and her father were remembered in connection with a visit to Brussels under the auspices of the R. T. of T., when their singing was much admired.—*Brussels Post.*

On Monday last, one of the very oldest settlers passed to join the great number in the person of Duncan Innis, of Bunessan. Deceased had taken of dinner and shortly after died quietly but suddenly away. His sons are widely known and respected, the latter for many years kept the Post Office at Bunessan. Deceased was over 90 years of age: a quiet inoffensive christian man.

A WARNING TO SMOKERS.—For a time past certain dealer have been selling inferior brands of tobacco with "T & B" is asked for, thus not only to the reputation of the manufacturers but also injuring the sale of the genuine. The Geo. E. Tucket & Son Co., of Hamilton, have taken the matter in hand and intend prosecuting the offenders. Smokers should be careful to see the "T & B" stamp on each plug as, to gain a profit, unscrupulous dealers tear the tags off other brands and say it is "the best" and "just as good."

The number who "kissed the book" at the Division Court, on Tuesday last was unusually large. Some of the cases were most interesting, and others were quite frivolous, but of course to the interested ones important enough. Judge Morrison presided, and Lawyers Jno. O'Connor, Clark, McKenzie, Weir, etc. were on duty. Decision was served on a case between Messrs. Middaugh and his late tenant, Mr. Kenny. A case of damage by Bruce Hutson, Plaintiff, Brown, Defendant, was settled in favor of plaintiff, Judge Morrison reducing the claim of $25 to $10. We may give a fuller report of the proceedings next week.

SUDDEN DEATH.—On Wednesday last residents in the neighborhood of Rob Roy were surprised and grieved to hear of the death of Mr. Francis McCrory. Deceased had not been in good health lately, but was out and around the morning about as usual. A long absence than common led to a search and he was found by his friends justed as he was found by his friends justed as he was found by his friends justed as
