NOTICE OF PUBLIC INFORMATION CENTRE No. 2

Bram West Parkway (Heritage Road to Financial Drive) and Financial Drive (Heritage Road to Winston Churchill Boulevard) Municipal Class Environmental Assessment Study

The Study

The City of Brampton is conducting a Class Environment Assessment (EA) for a new north-south arterial road, Bram West Parkway, from Heritage Road to Financial Drive and the extension of Financial Drive from Heritage Road to Winston Churchill Boulevard, see map. In order to best address the need for additional transportation capacity in the area, a number of alternatives are being examined as part of the study including a new road, Bram West Parkway, the extension of Financial Drive, cross-sectional elements, intersection improvements and the overall impact of improvements on the social, cultural and natural environments.

The Process

The study is being carried out in accordance with the planning and design process for Schedule 'C' projects as outlined in the *Municipal Class Environmental Assessment* (October 2000, as amended in 2007 & 2011), approved under the Ontario Environmental Assessment Act.

A key component of the study is consultation with interested stakeholders (landowners, agencies and the public) at two Public Information Centres (PICs).

The first PIC was held June 27, 2012 to present the background information, the need and justification and alternative solutions for the extension of Financial Drive, and the alternative alignments, evaluation and preliminary preferred alternative identified for Bram West Parkway. Since then the preferred alternative was determined, taking into consideration comments that were received from landowners, agencies and the public following the first PIC, completion of supporting technical studies and environmental effects.

The preferred alternative involves the extension of Financial Drive as four lanes from Heritage Road to Winston Churchill Boulevard and a new road, Bram West Parkway from Heritage Road to Financial Drive, with a new interchange at Highway 407. Bram West Parkway is proposed as two lanes south of Highway 407 and six lanes from Steeles Avenue to Financial Drive.

A second PIC has been arranged to review the preliminary preferred design and to receive public comments. Following the PIC, the preliminary preferred design will be reviewed, taking into consideration the comments received, and confirmed or refined. The second PIC has been arranged for:

Date: Thursday December 12, 2013 (Drop-in-Centre Format)
Time: 6:30 p.m. to 8:30 p.m.
Location: Huttonville Public School
2322 Embleton Road, Brampton, ON

Should you have any questions or comments regarding the study, or wish to be added to the study mailing list, please contact either of the following project team members:

... Lend Me Your Ears

COMMON QUESTIONS ABOUT TINNITUS - PART 1 WHAT IS IT?

Tinnitus is a subjective experience where one hears a sound, ringing or noise when no external physical sound is present. Some call it "head noises", "ear ringing", or other similar things.

WHAT CAUSES IT?

There are many causes; indeed almost everything that can go wrong with the ear has Tinnitus associated with it as a symptom. Things as simple as wax against the eardrum to very serious items such as tumors on the 7th facial nerve can produce Tinnitus. Meniere's disease has Tinnitus associated with it. One of the most common causes of Tinnitus is exposure to excessively loud sounds such as shooting, chain saws, rock concerts, or other loud noises.

ing, traditional food, hikes, visiting gravesites. I hope to return to the North some day, as I'm particularly interested in the cultural/human security of the region," says de Chastelain.

Academics have also played a role in de Chastelain's interests and activities outside the classroom. She served as vice-president, academic for the Students' Union in her third year and currently works as an intern with Mount Allison's Purdy Crawford Teaching Centre through academic support services. She is also an intern with the University's Centre for Canadian Studies.

"University education is a long-standing and very important tradition in my family," she says.

de Chastelain is also involved in Global Brigades, the world's largest student-led global health and sustainable development organization, and will be heading to Honduras this February with the Mount Allison chapter.

A member of the choral society and highland dance, de Chastelain is also the recipient of a Bell Scholarship, one of Mount Allison's most prestigious entrance awards, valued at \$48,000 over four years.

A LETTER TO SANTA

Dear Santa:

I have been an extra, extra good boy all year! This year I need to ask you for something very special! I really need a new set of dentures! "All I want for Christmas is some new false teeth!"

You see, I went to visit my Denturist, Alex last week, as I do every year, for my yearly check up. My dentures have become loose and are causing me discomfort. Whenever I eat, food gets under my plate and causes me pain. My upper denture often falls down while I'm talking. How embarrassing! Not to mention my annoying "floating" lower denture. Santa don't be mad at me, but my lower teeth have been sitting in my bottom drawer all week, I just can't wear them.

Alex explained to me that gums constantly shrink, and therefore in time causes dentures to become loose and illfitting. Also, I told him how it takes me twice as long to chew my food as it used to. He told me this was because the teeth on my denture have become dull, and therefore unable to cut through the food like they should. He also said that my bite was "off" meaning my jaw was not coming together properly when I bite down. He said this could be the reason I've been having so many headaches. Apparently illfitting dentures could be the cause of many health problems. Santa, this Alex guy really knows his stuff!

We have both decided that if I'm going to enjoy my turkey dinner this Christmas, that I'm definitely going to have to have a new set of dentures! Thanks Santa!!

Your buddy, Kirk
