AT THE GRAND.

The Appearance of Lillian Mortimer.

One of the most thrilling scenes ever presented on the stage is the second act of Lillian Mortimer's "Girl of the Streets" which comes to the Grand Opera House on Thursday, April 6th. Here a squalid den of vice is shown where the wickedest creatures that walk the paths of life congregate and concoct their foul schemes to obtain money by any artifice or plan without regard to legal right or conscience. The taking of a life, the soiling of a young and innocent girl's honor is merely the means to serve their ends. That such places are permitted to exist is only by reason of peculiar conditions that exist no where, but in New York city. No attempt has been made to overdraw the picture, and however, startling the situations may appear, nevertheless they are absolutely true to life.

"Sweet Clover."

In the superb scenic production of the comedy drama, "Sweet Clover," the patrons of the theatre in this city will see one of the prettiest plays of sentiment ever given to the stage in recent years. "Sweet Clover" will come to the Grand Opera House, Saturday, April 8th, matinee and night.

Alderman Mowat's Views.

At the waterworks' committee meeting, Ald. Mowat remarked that the locomotive works had not been given fair play by the city council, recently, when it asked it to pay the cost of laying a water main for fire protection. The works was the best industry in Kingston, and yet it had been harrassed, while other concerns of the castle-in-the-air type had been bowed down to and worshipped. The city should appreciate the works more than it does and in every way favour it where any favors were to be given. When met with the remark that the waterworks' committee must look after the welfare and interests of the waterworks, Ald. Mowat replied that so far as he was concerned, he would deal with it in the interests of the city.

Easter Excursion To New York.

The New York Central has cancelled the annual spring excursion to Washington and substituted an Easter excursion to New York. The date will be Saturday, April 22nd, and tickets good to return, leaving New York to and including Tuesday, May 2nd, thus giving Easter Sunday and the following week in New York. The rate is one fare for round trip, plus $1, with a maximum of $10. The Easter season in New York is the most beautiful of all the seasons. Time and money cannot be spent to greater advantage than on such a trip. Apply to nearest New York Central ticket agent for full information.

Another Chance Afforded.

Another chance is afforded those interested in hospital work of helping to supply a need at the General Hospital, which never had, and probably never will have enough money to make ends meet. Lattice work is required for the balconies in the rear of the buildings so that soiled linen, etc., may not be exposed, as it has been, when hung out to dry. Only a portion of the work can be undertaken just now, as there is no money to cover the cost. A few donations would be welcomed.

TO USE THE PAPERS

FOR PURPOSE OF BOOMING THE LIGHT PLANTS.

Civic Committee Decides to Take Advertising Space—New Generators Required — Mustn't Supply the Street Railway.

At the light plant committee meeting yesterday afternoon were Alds. King, (chairman), Toye, Walkem, Angrove and McCann.

The first account read was one for $15 due the street railway company for rent of a portion of its ground. The amount will not be paid, as the company owes the plant for a month's power. It will reduce the amount of the company's debt to the city.

The chairman said that the sub-committee appointed to canvass for subscribers the district where it was proposed to extend the lighting system had thought well to make the applications binding by an agreement. It also proposed to take space in the local newspapers for six months or a year and boom the plant, and also to continually give all information to the people as to rates and the standing of the plant. If the plant was to grow, it must be boomed. The suggestions of the sub-committee were approved, and on motion of Ald. Walkem, authority given to begin the advertising recommended.

Tenders were ordered to be called for razing and carting away the barn on the lot of the light plant on Barrack street, and also for fencing the lot. The G.T.R. company offers to build a siding into the lot, and the oil cars can be run in there and unloaded.

Mr. Campbell informed the committee that more generators were necessary for the electrical plant in order to meet the demand of next winter. The cost would be about $2,100. He was authorized to secure tenders and submit them at the next meeting.

Mr. Campbell stated that if the city intended to supply the street railway with power during the coming summer and fall, the plant would be seriously affected. Power could be given till July 1st, but not very well afterwards. If it was, no more consumers could be taken on, with the plant in its present condition. With the street railway to supply, justice could not be done to the light business.

In reply to Ald. Walkem Mr. Campbell said that if the city took over the road, it would have to instal another engine to operate it. Replying to another query of the same alderman, he stated that the School of Mining had decided not to supply any power, having came to the conclusion that it would not be profitable unless a contract was secured for a long period.

Ald. Toye drew the committee's attention to the fact that the walk in front of the power house was in a sad condition, and recommended that steps be taken to have a cement walk laid. This suggestion the committee decided to adopt.

Before The Legislature.

The petitions of the city council of Kingston were presented to the legislature on March 23rd and 27th. Its petition for confirmation of debenture by-law for light works was passed in the standing orders committee, although the number of by-law did not appear in the notices published. This, however, was not material in effect, and the act was duly presented to the legislature yesterday.

An Improvement on Nature.

Nature gives us fruit to keep us healthy. But fruit can't bring back health after we lose it. It takes something more effective than fresh fruit to cure Stomach, Liver and Kidney Diseases.

Fruit-a-tives

or Fruit Liver Tablets

are fruit juices in tablet form. We improve on nature by our secret process. By it, we so change the medicinal action of the fruit, that "Fruit-a-tives" are rendered effective enough to cure Constipation, Biliousness, Torpid Liver, Indigestion and Sick Kidneys.

If you want to be rid of these troubles, ask your druggist for a box of "Fruit-a-tives." They never fail. 50c. a box.
