MEDICAL MEN'S VISIT

To the Royal Military College in July Last.

Medical Council Declare That the R. M. C. Has Been Unfairly Criticised---Its Instruction Standard is High.

The following is the report of the special committee appointed for the visit of the Medical Council of the College of Canada, on the invitation of the commandant, Lieut.-Col. Taylor, and which took place July 5th last:

The occasion was the regular annual meeting of the council, held at Kingston, at which the full council was present. The special committee composed of the following gentlemen: Dr. Johnson, Toronto; Dr. Hubbard, Bowmansville; Dr. Bascom, Dr. Bardy, Toronto; Dr. Lane, Mallorytown; Hon. Dr. Sullivan, Kingston, were appointed to make such arrangements as would enable the whole council to be present.

One of the reasons for this was that the council wished to see for themselves the R.M.C., which is one of the few institutions whose graduates are exempted from taking the full course of study required to obtain a degree in medicine. But there were also other reasons apart from the above. The R.M.C. is the only institution of the kind in Canada, its raison d'être, as stated in the authorized pamphlets, is, firstly, to impart a complete education for the military profession, and, secondly, to afford a practical and scientific training in civil engineering, surveying and physics.

It is thus a national institution and it exists for work more important, perhaps, than more scholastic training which it gives, as the course provides not only for their mental training, but combines with it a careful moral and physical training under strict discipline. Apart from this, again it was known to some of the members that the course of instruction at the R.M.C. had been subjected to reckless and unjust criticism, which, however, contained definite statements, and as these had been made by a public man in high place, it was fitting that they should be inquired into. We only refer to one statement, the most glaring, to the effect that "a graduate of the R.M.C. was about on a par with a university matriculant."

Accordingly, arrangements were made, and, on the morning of July 5th, 1907, at 10 o'clock, all the members of the council, with several ladies, were ferried over to the Royal Military College wharf, where they found awaiting them Lieut.-Col. Taylor, the commandant; Major deBury, professor of artillery and tactics; Capt. Cochrane, professor of chemistry and physics (all graduates of the college), and also Prof. Martin, a graduate of Toronto University, professor of mathematics. After a welcome and introductions, the members proceeded to the gymnasium, a splendid building, thoroughly equipped and up-to-date. Many of us had previously never seen so large, well-lighted, or well-regulated a gymnasium. After this the members began a tour of the buildings—inspecting the class rooms, dormitories, refectory, library, laboratories and workshops. We were shown the maps, instruments, etc., of the survey department, the scientific apparatus in the laboratories, etc. We also took note of the sanitary conditions which we find to most carefully attended to. For two hours we were kept occupied. We finished with an inspection of what was most interesting to us, and gave marked evidence of the great solicitude shown for the health of the cadets, and of what makes provision for any illness or accident much more efficiently than could be done in a cadet's own home. This was the hospital, perfect in all its fittings and apparatus, and capable of accommodating ten patients. This concluded the inspection and nothing could have exceeded the consideration with which we were treated—the desire of our guides seemed to be that we should see everything in order to enable us to render an impartial verdict. One other feature of the college, a most marked one, regarding which no differences of opinion can exist, is its situation. Viewed from any point of the compass, the sight is a magnificent one, full of attraction, but from the lake side it is simply magnificent. It seems to guard the junction of the great chain of lakes with the mighty St. Lawrence. The beauty and salubrity of the country is manifest even at the first view, and confirmed a closer inspection, one, two, full of historic memories from Frontenac's time, the position of the college is indeed a favored one. The buildings are in harmony with the sight. As reminded by the commandant in his remarks, the R.M.C. was founded by one of Canada's greatest statesmen, the late Sir Alexander Mackenzie, and established during his administration. We thought that it was one of the noblest monuments that could have been devised to show his political sagacity, sure foresight and faith in the future of Canada.

We are of opinion that the institution is a truly national one, and that it exists for more important reasons than the mere scholastic training given. It is the only institution of the kind in the country where a thoroughly sound training, practical as well as theoretical is combined with strict discipline. It is an institution essential to any country where free institutions exist, and where civil and religious liberty prevail. At the time of the visit the cadets and most of the staff were away on long leave, but this fact has not interfered with our enquiry into the working. The course of studies pays more attention to the military subjects, mathematics and modern languages, than to classics. The "entrance examinations" is more difficult than the "matriculation examination", for the universities, and when this examination becomes competitive it will become still more difficult.

Those graduates who enter the military profession are commissioned at once. Since July, 1907, three have gained commissions in the imperial service, four in the Canadian permanent force. The majority of those who take up civil engineering go direct to their work, and several of the graduates occupy responsible positions in the country. There are about twenty-eight on the T. C. railway alone. There are more applications for R.M.C. men than there are applicants.

In spite of the fact that a thorough military training in theoretical and practical subjects is given it is a fact that when, as often happens, graduates go to McGill university for science work they are invariably able to enter the third year and occasionally the fourth. These facts conclusively prove how ridiculous and unfounded were the statements with reference to the course of instruction.

In the course of some remarks made and partly in reply to questions, the commandant said he could see no reason why, without any great expense, such subjects as botany, practical chemistry and the use of the microscope (all particularly of benefit to the graduate intending to pursue the study of medicine) should not be taken up. As a matter of fact the two latter were dealt with when the course was a four year one. Latterly time has not been available. He would express no opinion on the question of lengthening the course.

As to the religious training full opportunities are given for every cadet to follow any form of religious belief desired by his parents. Every cadet has to attend divine service once every Sunday.

In conclusion, the commandant thanked the medical council for the interest which they had shown in the college. He considered it a matter for congratulation that so representative a body of the medical profession should see for themselves exactly what the Royal Military College was, and be in a position to form an independent and impartial opinion. On taking leave each member of the council was presented with a small but very rare book, the annual calendar of the R.M.C., so rare that a member looking for a copy last session of parliament could not find one in the library, and had to send to the department of militia for a copy.

The merits of the institution are only known to a few in the dominion, and this ignorance may go far to explain the cause of the charges made against the Royal Military College. The council were quite satisfied after their inspection and examination of the college that there could be no foundation for the statements made regarding the work carried out during the course, and were unanimous in their opinion that the charges made were ridiculous.

Finally, your committee recommend that a copy of this report be sent to the commandant, and that it be inserted in the proceedings of the council, and such parts of it as the chairman may approve, or the council direct, be sent to the press for publication.

Covered With Eczema.

Miss Katherine M. Bartlett, of 73 McGill College avenue, Montreal, has been cured of an obstinate case of dry eczema of four years standing by Zam-Buk, when all other remedies had failed to give her relief. She says:

"Four years ago my face broke out in rough, red blotches which burned, smarted and itched terribly. When the disease was at its worst my face, neck, breast and hands would swell terribly.

"I consulted doctors, but got no relief. A lady friend who saw my sad plight recommended Zam-Buk. I procured a supply and within a few weeks from commencing with Zam-Buk my skin was as smooth and white as before the dread eczema came to trouble me. I can hardily find words to express my gratitude for the wonderful cure made by Zam-Buk."

Zam-Buk cures blood poison, cuts, bruises, old wounds, running sores, ulcers, boils, eruptions, scalp sores, eczema, itch, barber's rash, burns, scalds, and all skin injuries and diseases. Best cure for piles yet known. All druggists and stores at 50c. a box, or from Zam-Buk Co., Toronto, three boxes $1.25. Send one cent stamp for sample.

Your New Directors.

Cornwall, Ont., Oct. 7.—The Canadian Improvement company, the holding corporation for the Lake Superior company at their meeting held in New York, nominated four directors for the approval of the Ontario government. The directors nominated are: Messrs. George Gooderham, Toronto; R. Wilson-Smith, and T. Drummond, Montreal, and R. A. Pringle, M.P., Cornwall.

The Lord don't take kindly to grumbling followers.

FROM PICTON TOWN.

The Sad Death of a Lady From Cancer.

Picton, Oct. 8.—The freight shipment by boat out of Picton continues heavy, the cargoes being principally made up of apples, cheese and canned goods. Yesterday fully 4,000 barrels of fruit, principally apples, were shipped to Montreal for European markets on the steamer Alexandria and steambarge Waterlily.

The schooner Annie Minnes, lying idle for more than a year, has again been put into good shape. She will likely be put into commission by Hepburn Bros., for freight carrying on the Montreal route.

Early Monday morning the death occurred of Mrs. Walt, widow of the late Allie Walt, at her home, on Queen street. Mrs. Walt has been a sufferer for a long time with cancer. The deceased woman had been a life-long resident of the county and Picton, with the exception of a few years during her married life, when her husband was in business near Brighton. She was about sixty years old. One sister, Miss Warren, with whom she lived, and a brother, Mansfield Warren, ex-chairman of the high school board, survive.

On Saturday a large number of Pictonians drove to Ameliasburg, to attend the annual township fair. There was a large exhibit and the show is thought by many to have equalled any held in the district.

Mrs. C. H. Widdifield, of Owen Sound, is visiting in town, guest of Mrs. H. S. Wilcocks. She will spend a month visiting several former friends. Miss Gena Hepburn and her guest, Miss Kathleen Johnston, of Belleville, left yesterday, on a week's trip to Montreal. Miss Lenora Porte, who has been in Cobourg for the wedding of her aunt, Miss Minaker, has returned home.

FASHION'S FORM.

Hat Trimmed With White Aigrettes and Coque Feathers.

A very effective and becoming new hat model is here pictured. The broad turn-down brim was faced underneath with a two-inch bias fold of black moire silk, clusters of white aigrettes and coque feathers branched off from a huge knot of tulle in the centre of the front, with two large jet ball pins to give a smart finish.

Escape Needless Disease.

Rheumatism, neuralgia, locomotor ataxia, tumors and a variety of other diseases as well as a general debilitated condition of the system, comes from impure or impoverished blood. Escape these ills and keep health up to the highest standard by using Wade's Iron Tonic Pills (Laxative). They fortify the system against disease. They are a great nerve strengthener and blood maker. In boxes, 25c., at Wade's Drug Store. Money back if not satisfactory.

Subsidy Depends On Speed.

London, Oct. 7.—The voyage on which the Lusitania started Saturday is one of very great interest to the Cunard company, for the terms between the government and the line as to the subsidy of $750,000 a year now come into force. The agreement is very precise. The full amount will be paid if the company gives reasonable evidence that the steamers have maintained an average speed of 24½ knots. If they fail to obtain that, but have reached a speed of 23½ knots, a reduction of the subsidy will be made, but if they do not obtain 23 special advantage to the admiralty. 1-3 knots they are held to be of no

To check a cold quickly get from your druggist some little Candy Cold Tablets called Preventics. Druggists everywhere are now dispensing Preventics for they are not only safe but decidedly certain and prompt. Preventics contain no Quinine, no laxative, nothing harsh nor sickening. Taken at the "sneeze stage" Preventics will prevent Pneumonia, Bronchitis, La Grippe, etc. Hence the name, Preventics. Good for feverish children. 48 Preventics 25c. Trial boxes, 5c. Sold by all dealers.

Lord Mount Stephen has given £35,000 to Aberlour Orphanage, providing for the permanent endowment of one hundred beds. His benefactions have been great and numerous. Among them may be mentioned £200,000 to the King's Hospital fund, and of about £100,000 for Victoria hospital in Montreal. Previous gifts of such land include one of £25,000 to Aberdeen Infirmary, and a fund of £40,000 for parish ministers on Spey Side.

"Elliman's Embrocation" for football players. It cures sprains and bruises at once. Sold in Kingston at Gibson's Red Cross drug store.

The devil has a way of making your debts to him appear square and honest.

Mira

TRADE MARK REGISTERED.

Handles cure all skin and blood diseases—Eczema, Salt Rheum, Sores, Piles, Constipation, Indigestion and other ailments it imparts blood. They correct the cause and destroy the evil condition.

Mira Ointment soothes and heals all diseased skin. Mira Blood Tonic and Mira Tablets cleanse the blood and invigorate stomach, liver, kidneys and bowels.

Ointment and Tablets, each 50c. Blood Tonic, $1. At druggists—or from The Chemical Co. of Canada, Limited, Hamilton-Toronto.

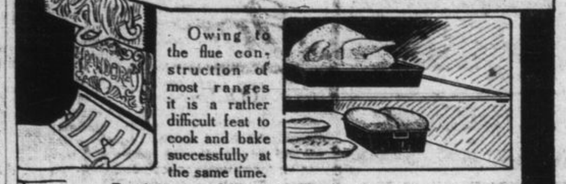
PANDORA



Owing to the flue construction of most ranges it is a rather difficult feat to cook and bake successfully at the same time.

But the arrangement of the Pandora flues differs considerably from others. They are so constructed that the draft for baking is also the best for cooking, the heat circulating around the oven twice and under every pot hole before passing up the chimney.

The Pandora bakes and cooks perfectly at the same time.

Do you know of another range that does?

If your local dealer does not sell the Pandora write direct to us for Free Booklet.
