BRITISH COLUMBIA

SOME OF THE PERILS OF BAD GOVERNMENT.

Liabilities of the Government in Railway Grants and Guarantees—Who is Running the Province Anyway?

Toronto Globe.

Three years ago Premier McBride of British Columbia practically wiped out the liberal representation in the legislature by promulgating just before the general election a large scheme for railway building. The alliance between the Canadian Northern and the MacBride government became so close that it was difficult to say whether the C.N.R. was running the government or the government the C.N.R. Having proved that a policy of railway grants and guarantees was profitable politically, McBride is at it again. Again the guarantees are on a colossal scale British Columbia had less than four hundred thousand population in June, 1911. Yet this population, no larger than the city of Toronto, was committed by Mr. McBride and his colleagues at the recent session of the legislature to the following grants and guarantees:

To the Canadian Northern Pacific a guarantee of principal of $35,000 per mile on 150 miles on Vancouver Island and 145 miles on the mainland, from Kamloops to Vernon, Kalouna, and Okanagan Lake on the west side, opposite Okanangan Landing.

To Messrs. Foley, Welch & Stewart, incorporated under the name of the Pacific & Great Eastern Railway company, a guarantee of $35,000 per mile for 450 miles from Fort George to Vancouver. The interest is also guaranteed at four per cent.

To the Kettle Valley Railway a bonus of $10,000 per mile for fifty miles from Hope on the Fraser river to the Coldwater junction, the summit of the coast range.

A bridge across the Fraser from Hope on the south side of Ruby Creek on the main line of the C.P.R., $200,000.

A subsidy to to the C.P.R., to help them in taking over the Kaslo & Slocan, $100,000.

The repurchase of the British Columbia Southern land grant and of the Columbia & Western land grant from the C.P.R., at 40c. per acre will amount to $1,622,872.

That British Columbia is dowered with wonderful natural wealth is indisputable. That some of the railway projects outlined above will aid materially in opening up and promoting the settlement of the province is undoubted. But the load that Premier McBride has laid upon his province is a tremendous one, and, should any large part of the railway systems outlined fail to pay their bonded charges, might well crush British Columbia beneath it. Here is the liability of the province:

Canadian Northern Pacific (original guarantee)	$21,000,000
Pacific & Great Eastern	15,750,000
Canadian Northern Pacific (new guarantee)	10,325,000
Total	$47,075,000

The interest bill at four per cent. would be in case of default, $1,883,000, or about a fifth of the revenue of the province.

The people of British Columbia should remember that it may take but a few hours to fasten a load of debt upon their shoulders that will hamper and cripple them for generations. For the moment the reckless, debt-incurring premier may be the hero of this province, but if ever the time comes for the bondholders' chorus of "pay, pay, pay," British Columbia may be sorry that she leaped before she looked.

Married in Toronto.

On March 4th Miss Gertrude Marie Eward, formerly of Kingston, and Albert W. Wolter, formerly of Chicago, were quietly married by Rev. C. Sykes, at the parsonage. The bride was gowned in white and carried a bouquet of beautiful white roses. She was assisted by Miss Green. The groom was attended by Mr. Davie, both friends of the groom. They drove to the residence of Mrs. George Irvin, formerly of Kingston, where they had supper. Mr. and Mrs. Wolter left by the G.T.R. for eastern points. After their return they will reside in Toronto.

Miss Maude George, of Brockville, and Dr. F. H. Stone, of Chicago, were married on Wednesday.

Belleville had a thunder storm, on Friday morning. Nothing else will "wake up" the people of the bay city.

When the Lungs Are Weak

To every person with weak lungs or who has a family history with records of consumption, a cough or cold is a serious matter.

Coughs have a tendency to hang on. They irritate the weakened membranes and prevent healing. There is always the danger that a cold may get a firm foothold and settle on the lungs. It is so easy under these conditions for pneumonia or consumption to develop.

About the surest means of controlling coughs and colds is by the use of Dr. Chase's Syrup of Linseed and Turpentine. This treatment loosens the cough, allays the irritation and inflammation and thoroughly overcomes the disagreeable symptoms. The success of this medicine has given rise to many imitations. It is only natural to suppose that the original possesses merit of an unusual degree.

THE CLUB HOTEL

WELLINGTON STREET, (Near Princess).

There are other hotels, but none approach the Club for homelike surroundings.

Located in centre of city and close to principal stores and theatre.

Charges are moderate.

Special rates by the week.

F. M. THOMPSON, Proprietor.

ANCIENT FUNCTIONS.

Two Very Important Bodies In the Commons.

Judged by practical results the most important sittings of the House of Commons are those devoted to the Committee of Supply and the Committee of Ways and Means. The functions of Parliament exercised through these two committees of the whole House, are also among the oldest, if not the very oldest, performed by the representatives of British people assembled in national council. These functions consist of deciding upon ways and means by which revenue is to be raised—and that means taxation—and of appropriating that revenue to the public service. Devising means for raising revenue was about the only service the Plantagenet kings wished the Parliament to perform, but having gradually established control over taxation the English House of Commons made use of that control to build up that system of constitutional representative, responsible government which Canada has inherited and so many other countries imitated.

The Committees of Ways and Means and of Supply are, therefore, foundation stones in our parliamentary systems. The former decides the ways and means—the method of raising the revenue. The latter decides the amount of money to be granted the crown, which to-day means the Government, and the manner in which this money shall be spent.

We hear little of the Committee of Ways and Means—although it sits a number of times each session—except when the customs tariff or the excise tariff is under revision, for these are the measures under which fully three-fourths of the federal revenue are collected. For instance, this session there will be very little for the Committee of Ways and Means to do. The tariffs stand, the method of raising the revenue is on the statute book. There it stands till changed or repealed, and under its operation the revenue flows into the federal treasury.

Not so, however, with the Committee of Supply to whose sittings are devoted probably more than one half of every session. While the revenue accumulates in the treasury not one penny of it can be spent by the Government without the authorization of Parliament; the only exception being in the case of emergency arising when Parliament is not sitting. In case of such emergency the Government can use the public funds on the authorization of the Governor-General's warrant, the expenditure to be ratified by Parliament as soon as it meets.

Supplies are voted by Parliament for only one year. There must be a session every year, and each year the Government must go before Parliament and ask for the money necessary for the carrying on of the public service. Because of these things the Committee of Supply sits during a considerable part of each session.

The basis of the committee's deliberations is a little blue book of about one hundred pages, known as the Estimates, and which is, or should be laid before the House of Commons early in the session so that the members can study the work before being called upon to pass judgment on its contents.

The supplies, as a rule, are voted in advance, and the estimates now before the House are for the fiscal year, which will run from April 1 next to March 31, 1913.

The estimates contain a detailed statement of the sums required for the public service for the year, the items being grouped under the various departments. The estimates also show the vote for the preceding year, so that comparisons of expenditure can always be readily made.

The estimates are always accompanied by a message from the Governor-General approving of the expenditure proposed. Measures proposing expenditures or charges upon the revenue must always be introduced into the House by a Minister and accompanied by a message from the Governor-General recommending the same.

Peopling the West.

The annual report of the Interior Department of the Dominion for the last fiscal year, tabled in the House of Commons recently, calls attention to the fact that the total cash revenue from all sources collected by the department during the year reached the large total of $5,063,140. This is an increase of $384,126 over the previous twelve months. The revenue of the department is now fourteen times as large as it was ten years ago.

A corresponding increase is noted in the number of homestead entries. During the year there were 44,479 entries, representing a total acreage of 7,166,640, which is an increase of 3,000 entries over the previous year, which had been the largest in the history of the department.

Those entries represent a total population of 107,834 settlers and their families. It is regarded as very satisfactory from the immigration standpoint that over one-third of the total immigration last year can be accounted for as having engaged in agricultural pursuits in the western provinces.

"Toronto the Good."

This is a reference to Toronto, culled from Reynolds Newspaper, of London, England:

Clara Ward, once the Princess De Chimay, who ran away with a gipsy fiddler, is about to take her fourth matrimonial venture in the person of a handsome Italian chauffeur. She has lost most of her money, but still has an income of £3,000 a year. Clara Ward was originally a Canadian and not an American, as is usually stated. She lived in Toronto, and moved in local society, the most strait-laced, church-going society on the American continent.

A Big Rink.

An unusual thing has happened this winter in that the whole of the Little Shuawap Lake, B.C., has frozen smooth, providing the skaters of Chase with a rink five miles long and from two to three miles wide.

The Italians of New York city are to build a hospital of their own at a cost of $1,000,000.

It's easy to get something for nothing—if you are satisfied with worthless advice.

THE NATURAL WAISTLINE RETURNS WITH LONG BODICES.

Basques, peplums and other contrivances for carrying the lines of the bodice below the belt have had their inevitable on the waistline which is now almost at normal. The lace coat pictured here is a summer type that promises to become very familiar a little later. These coats are worn with frocks of white linen or lingerie material, in the south now, and also over costumes of dark colored silk or satin, the dark fabric throwing the lace pattern into high relief.

PAPER CRIES "SHAME"

ON THE FRENCH-CANADIAN CATHOLIC MINISTERS

For Voting for Borden's Manitoba Bill—La Press Demands Separate Schools For That Province.

La Presse, the well known Montreal French-Canadian liberal paper, thus deals with the Manitoba boundary award.

"The question of the school rights of minorities is too serious and too important for us to put it in the background. La Presse is prepared to support whoever will work sincerely to make justice triumph, no matter what differences of opinion we may have with him on other questions. Perhaps the Catholic minority of Keewatin does not possess all the rights which some claim, in virtue of the constitution—that is a question for study—but it possesses certain rights which are unmistakable. The least the government might do would be to safeguard these existing rights which no one contests. Now in spite of the appeals of those interested, it has deliberately neglected doing that. The Manitoba boundary bill does not contain a single word on the subject of the schools of the adjacent district of Keewatin—to be annexed. That is, the Catholic minority of Keewatin comes under the Manitoba school law and is delivered to the discretion of the provincial legislature.

"The whole government merits denunciation. But what shall we say of our French-Canadian and Catholic ministers who so consent to the sacrifice of their co-religionists and compatriots? To the most flagrant denial of justice they add the shame of capitulation."

Le Temps, Ottawa, says: "The Borden ministry inserted nothing in the boundary bill to give hope to Catholics. There was given no mention of separate schools. To excuse himself to the many private delegations who appealed to him, Mr. Borden said that Mr. Rublin, premier of Manitoba, would render the justice that was due. This answer did not satisfy Lavergne, who spent part of the week amongst the French members. It did not satisfy any one else. If justice and British institutions are to exist in Canada the rights of minorities must be respected."

Money Market Glutted.

Montreal Gazette.

It is intimated that only 35 per cent. of the Canadian government loan of £5,000,000 was taken by the public when offered in London this week, and this though the price was low for so good a security. There are various reasons for this state of affairs. The causes that depress the price of British consols work also to depress the price of other high security and low interest issues. Then, the London market has had put upon it in recent times unusually heavy offerings of Canadian government and Canadian government guaranteed securities; and its appetite is no longer keen. The loan will be duly taken, without a doubt, but the underwriters will remember their experience and will be likely to shade their figure for the next offering. Canadians are giving the British market rather more bonds than it can digest.

China Gets Into Line.

Ottawa Journal.

The adoption by China of the world's corrected calendar leaves Russia the only important nation to go on reckoning its time by an antiquated and erroneous system. It will require, apparently, the faith that removes mountains to have the calendar revised as it is incorporated in its present form in the creed of the Greek church. Russia is now twelve days behind the time of all the world beside. Who would have thought that China would have beaten Russia.

Han Bradley and son, William, of Beaver Dams, Schuyler county, N.Y., have some standing in the tall class. The son, at eighteen, is seven feet four inches in height and his father is seven feet one inch.

MUCH BUILDING AT STELLA.

Is to be Done Next Summer—An Orange Supper.

Stella, March 6.—Farmers are taking advantage of the good driving on land and ice, and are hauling lumber, shingles, coal, etc., from the city. The carpenters will be kept busy here next summer, as quite a lot of building and repair work is to be done. S. Miller intends erecting a new house.

Moving is the order of the day here. W. H. Preston has moved to his upper farm, and Capt. Glen has moved to the farm lately purchased from the former. R. Filson has rented Mrs. J. C. Howard's farm on the front road, having sold his farm in the village to William Filson. Good prices were realized at Beggs Bros.' and Harry Howard's auction sales of farm stock and implements, held on Monday and Wednesday, Feb. 26th and 28th. Cows sold for over $40. Horses also ranged high.

The members of Burleigh L.O.L., No. 482, are having an oyster supper in Victoria Hall on Thursday evening. Some Kingston brethren are expected to be present. Mrs. R. Kilpatrick, Mrs. T. Polley and Capt. H. Sanders have been ill. Harry Howard left on Saturday for Calgary. A sleigh-load of Kingstonians spent Sunday at T. J. Hill's. Mrs. W. Reid and son, Harold, left for their home in the west to-day. Visitors: R. Veech and sister, Miss A. McMaster, Garden Island; Miss A. McDonald, Sydenham.

"Settled by Laurier for All Time."

Toronto Globe.

Hon. F. D. Monk told parliament that "the Manitoba school question was finally and for all time settled in 1897."

For doing that thing Sir Wilfrid Laurier was traduced by Hon. L. P. Pelletier, another of Mr. Borden's nationalist-conservative colleagues. He was arraigned as a traitor to the Roman Catholic church, a betrayer of the Catholic minority. He was accused of having taught Canada his "no-coercion doctrine of 'Hands off Manitoba.'" And the nationalist-conservative postmaster-general declines now to interfere on behalf of that same "Catholic minority," because, as he says, such a course would "defeat our friends" as it defeated the Tupper government in 1896. That would be "suicidal."

Story of J. E. Starr.

A Toronto clergyman tells an amusing story concerning a very important event in the life of Rev. J. E. Starr, the newly appointed commissioner of the juvenile court, Toronto. It seems that when Rev. M. L. Pearson, formerly pastor of Berkeley street Methodist church, was married years ago, he asked Mr. Starr to perform the ceremony and presented him with a fee of $50. Mr. Starr took it gracefully, and when very soon after he was married himself he selected Mr. Pearson to tie the knot, whereupon he handed back to his friend his $50.

All in the Climate.

Montreal Herald.

Mr. Ames tells us that the west is inclined to state ownership. It must be something in the climate. Mr. Borden was inclined to state ownership when he was out there, and look at him now.

One of the Syracuse savings banks has installed a finger-print system for identification among depositors who cannot write. Five other banks in New York state are using such a system.

OXO Cubes certainly do save the housewife a lot of work and worry—and money, too. Exact—convenient—indispensable in the kitchen. 4 Cubes—10c.

Health and Beauty Hints

BY MRS. MAE MARTIN.

H. N. R.: To whiten and beautify the complexion you will find nothing better than a simple, inexpensive lotion made by dissolving 4 ounces spurmax in 1-2 pint witch hazel (or hot water) then adding 2 teaspoonfuls glycerine. This lotion will freshen up and improve any complexion without giving that artificial, powdered look. It does not clog the skin pores like powder and lasts much better. It gives to the skin a smooth, velvety tone and takes away that shiny sallow look. For treating freckles and skin discolorations generally, spurmax lotion is very fine.

D. L.: To quickly get rid of that sallow, pimply look on your face, you should take a good system tonic to remove the impurities from your blood which come from lack of exercise and eating too much solid food in the winter. A good, old fashioned tonic can be made by dissolving an ounce of kardene in 1-2 pint alcohol, then adding 1-2 cup sugar and hot water to make a quart. Take a tablespoonful before meals and you will be surprised how quickly the look of perfect health will come into your face and your energy and ambition be restored.

Nadie: To strengthen your weak eyes and rid them of that dull, overworked look, put in each eye daily two or three drops of a fine, strengthening tonic, made by dissolving an ounce of crystos in a pint of water. This eye tonic is very soothing and strengthening, and will make your eyes strong, clear and sparkling. I find it unequalled as a tonic for treating weak, inflamed, expressionless eyes.

Reader: There is one remedy above all others that I take pleasure in recommending for fat reduction, it is harmless and so very effective in regaining a shapely figure. Just dissolve 4 ounces of parnotis in 1 1-2 pints hot water and take a tablespoonful before meals. This simple remedy will remove your excess fat rapidly without dieting and strenuous exercising, and seems to produce best results in the winter months. Your skin will be firm and free from any flabbiness.

Mrs. T. B.: You will not catch cold from shampooing if you use for your shampoo a teaspoonful of canthrox dissolved in a cup of hot water, rinsing the hair thoroughly. You should never use soap shampoos, as the alkali dulls and deadens the hair, causing it to become brittle, streaky and split at the ends. Canthrox produces an indescribable softness and fluffiness that one gets only from a perfect shampoo. It relieves irritation and removes dandruff thoroughly. The hair will be very lustrous and you will have no trouble keeping the short hairs in place.

Mrs. R. C.: Nothing is worse than stale or greasy beauty creams. Always use fresh-made, greaseless complexion creams and your skin will not be shiny or hair grow on it. By mixing into 1-2 pint cold water 2 teaspoonfuls glycerine and one ounce almozoin, you have a dependable cream-jelly for cleaning, softening and beautifying the skin. This is excellent for chapped face and hands, and keeps the complexion in perfect condition. Use it morning and night and you will soon have a charmingly smooth, refined complexion.

Ruby R.: Do not despair. You can easily save your hair, but not by using so-called hair tonics that have lost their strength. Get at your druggist's an ounce of quinzoin and 1-2 pint of alcohol; mix these with 1-2 pint cold water. Apply this tonic to the scalp about twice a week and you will be amazed to see how quickly it rids your scalp of dandruff and irritation, and your hair will stop coming out. This tonic makes the hair soft, lustrous and beautiful. By preparing your own hair tonic as directed you will have the best hair and scalp remedy known to science.

Anxious: It is not necessary to resort to the pain and expense attending the use of the electric needle. With powdered delatone and water mix enough paste to cover the hairy surface. After letting remain on two or three minutes remove, wash the skin, and the hairs will have vanished. This leaves the skin white, firm and hairless, and while druggists charge a dollar for an original one-ounce package, it never fails to do the work.

Every Eddy Match is a Sure, Safe Light

When you strike an Eddy Match it always lights easily and burns smoothly, with a steady even flame.

These perfect matches come from first class materials and mechanically perfect machines under the supervision of skilled workmen.

Eddy's Matches are always full M. M. count—for sale by all good dealers everywhere.

The E. B. EDDY COMPANY, Limited, Hull, Canada

Makers also of Wooden Pails, Tubs, etc.

THE DOCTOR'S QUESTION

Much Sickness Due to Bowel Disorders.

A doctor's first question when consulted by a patient is, "Are your bowels regular?" He knows that 98 per cent. of illness is attended with inactive bowels and torpid liver, and that this condition must be removed gently and thoroughly before health can be restored.

Rexall Orderlies are a positive, pleasant, and safe remedy for constipation and bowel disorders in general. We are so certain of their great curative value that we promise to return the purchaser's money in every case when they fail to produce entire satisfaction.

Rexall Orderlies are eaten like candy, they act quietly, and aid in producing a soothing, strengthening, healing influence on the entire intestinal tract. They do not purge, gripe, cause nausea, flatulence, excessive looseness, diarrhoea, or other annoying effect. They are especially good for children, weak persons, or old folks. Three sizes, 10c., 25c., and 50c. Sold only at our store—The Rexall Store. G. W. Mahood.
