SANDS'S SARSAPARILLA.

For the removal and permanent cure of all diseases arising from an impure state of the blood, or habit of the system, namely:

SCROFULA, or King's Evil, Rheumatism, obstinate Cutaneous Eruptions, Pimples, or Pustules on the face, Blotches, Biles, Chronic Sore Eyes, Ring Worm, Tetter, Scald head, Enlargements and pains of the bones and Joints, Stubborn Ulcers, Syphilitic Symptoms, Sciatica, or Lumbago, and diseases arising from an injudicious use of Mercury, Ascites, or Dropsy, Excessive or imprudence in life. Also, Chronic, Constitutional Disorders will be removed by this preparation.

Improvement in whatever regards the happiness and welfare of our race is constantly on the march to perfection, and with each succeeding day some new problem is solved or some profound secret revealed, having an important and direct bearing over man's highest destinies. If we take a retrospective view over the past twenty years, how is the mind struck with wonder! What rapid strides has science made in every department of circulated life! particularly in that which relates to the knowledge of the human system in health and disease. How valuable and indispensable are the curative means recently discovered through the agency of chemistry! How does the imagination kindle and our admiration glow at the ingenuity, the near approach to the standard of perfection, of the present time!—Through the elaborate investigations of Physiology, or the science of Life, and the Pathology of prevalent diseases, much valuable practical knowledge has been gained. In consequence of becoming acquainted with the organization, the elements of the various tissues and structures of the system, remedies have been sought after and discovered exactly adapted to combine with, neutralize and expel morbific matter, the cause of disease, and substitute healthy action in its place. The beautiful simplicity of this mode of treatment is not only suggested by the pathology of diseases, but only grateful to the sufferer, but perfectly in consonance with the operations of Nature, and satisfactory to the views and reasons of every intelligent, reflecting mind. It is from that Sands's Sarsaparilla, a scientific combination of essential principle of the most valuable vegetable substances, operates upon the system. The Sarsaparilla as combined with the most efficacious aids, the most salutary productions, the most potent simples of the vegetable kingdom; and its unprecedented success in the restoration to health of those who had long pined under the most distressing chronic maladies, has given it an exalted character, furnishing as it does evidence of its own intrinsic value, and recommending it to the all-dread terms the afflicted of every kind.—It has long been a most important desideratum in the practice of medicine to obtain a remedy sender to this—one that would act on the liver, stomach and bowels with the promptness and power of mineral preparations, yet without any of their deleterious effects upon the vital powers of the system.

The attention of the reader is respectfully called to the following certificates. However great achievements have heretofore been made by the use of this invaluable medicine, yet daily experience shows results still more remarkable. The proprietors have await themselves of the opportunity of saying it is a source of constant satisfaction that they are made the means of relieving such an amount of suffering.

WONDERFUL EFFECTS OF SANDS'S SARSAPARILLA IN NORWICH, CONN.

Read the following from Mrs. Wm. Phillips, who has long resided at the Falls. The facts are well known to all the old residents in that part of the city.

Messrs. A. E. Sands & Co.—Since I feel gratefully embrace this opportunity for stating to you the great relief I obtained from the use of your Sarsaparilla. I shall also be happy, through you, to publish to all who are afflicted, as I lately was, the account of my unexpected, and even for a long while despaired of cure. Mine is a painful story, and trying and sickening as is the narrative of it, for the sake of many who may be so sorely relieved, I will briefly yet accurately state it.

Nine or ten years ago last April a bit of sticking left me with an Erysipelas eruption. Tropical collections immediately took place over the entire surface of my body, causing such an enlargement that it was necessary to add a half yard to the size of my dresses around the waist. Next followed, upon my limbs, abscess, pentile beyond description. For years, both in summer and winter, the only mitigation of my suffering was found in pouring upon those parts cold water. From my limbs the pain extended over my whole body.—There was literally for me no rest by day or night. Upon lying down these pains would shoot through my system, and compel me to arise, and for hours together, walk the floor, so that I was almost entirely deprived of sleep. During this time the Erysipelas commenced active, and the ulcers enlarged, and so deeply have these ulcers, that for two and a half years they have been subject to bleeding. During these almost twenty years I have consulted many physicians. These have called my disease—as it was attended with an obstinate cough and a steady and active pain in my side—a dropsical consumption; and though they have been skilful practitioners, they were only able to afford me case a partial and temporary relief. I had many other difficulties too complicated to describe. I have also tried many of the medicines that have been recommended as infallible cures for this disease, yet these all failed, and I was most emphatically growing worse. In this critical condition, given up by friends, and expecting for myself, relief only in death, I was by the timely interposition of a kind Providence, furnished with your, to me, invaluable Sarsaparilla. A single bottle gave me an assurance of health, which for twenty years I had not once felt. Upon taking the second my enlargement diminished, and in twelve days from the 6th of October, when I commenced taking your Sarsaparilla, I was able to enjoy sleep and rest by night, as refreshing as any I every enjoyed when in perfect health. Besides, I was, in this short time, relieved from all those excruciating and unalleviated pains that had afflicted my days, as well as robbed me of my night's repose. The ulcers upon my limbs are healed, the Erysipelas cured, and my size reduced nearly to my former measure.

Thus much do I feel it a privilege to testify to the efficacy of your health-restoring Sarsaparilla. A thousand thanks, sire, from one whose comfort and whose hope of future health are due, under God, to your instrumentality. And may that same Providence that directed me to your aid, make you the happy and honored instrument of blessing others, as diseased and despairing as you much relieved and very grateful friend,

ABENAITH M. PHILLIPS.

SONNET.

On the proposed Erection of a Statue to Sir Charles Metcalfe, in Saint Jago de la Vega, Jamaica.

To that great Statesman, whose enlightened mind
Grasped all thy cares, Jamaica! 'tis to him,
Whose orient gold, his brighter honours dim,
Who, for thy sake, the noblest case resigned,
We raise this tribute; that his deeds, enshrined
As yet in all our breasts, which yield to Time,
Herein may an *immortal* temple find,
Whose eulogy survives the fleeting rhyme;
To tell his worth, and Knighthood fairly won,
To other chiefs, in whose unborn career
We may forget the Vandal and the Hun,
And history entomb each ancient fear,
Repose, Jamaica! in thine azure ear,
And sing how METCALFE raised thy setting star!

THE MEETING IN ST. ANDREW'S CHURCH, TORONTO.

We have given separately the resolutions that were adopted at the meeting on Monday evening last, in St. Andrew's Church.

The proceedings at this meeting have created great sensation here, and we therefore think proper to refer to them more particularly.

According to the intimation given from the pulpit on Sunday, the meeting was to have been merely a *preliminary* on'.

The resolutions given in another part of this paper, from 1 to 9 inclusive, (save the amendments,) were distributed in hand-bill form through the Church, on Sunday, with a notification that they would "be submitted to the congregation for consideration."

There was no information given as to the source whence these resolutions emanated, and their authorship was therefore known only to those who were concerned in their preparation and distribution, and such other parties as they chose to communicate the fact to.

Those members of the congregation who were not admitted into the secret, viewed them in the light of resolutions that had been drawn up by some other members of the congregation to be laid before the preliminary meeting on Monday, and to stand over along with any other resolutions that might at the same time be submitted, for mature consideration, at a subsequent meeting to be held, of which due notice would be given.

But considerable surprise was excited, when the mover of the first resolution proposed its adoption at once. To this Dr. Telfer objected, submitting that the whole of the resolutions ought to be read together for the information of the meeting; that he had prepared a rough draft of other resolutions which he intended to propose in amendment, and that they should be printed and circulated amongst the congregation in the same way as the others had been, to be taken into consideration along with any considered so very reasonable, that the meeting received it with loud applause, to the manifest disappointment of those who wished to convert the meeting into one at which the resolutions were to be finally disposed of, instead of its being what it was publicly intimated to be, a mere *preliminary* meeting. A scene here ensued which it was painful to witness; and the minister of the congregation was [illegible] the meeting in a different manner from that in which he was authorised; *but it turned out that he had called it in exact compliance with the instructions he received from the Chairman.*

Great blame was thrown out on the leaders of the Church, for some imaginary crimes or delinquencies of which some parties present appeared to hold them guilty, but of which the trustees were not only entirely innocent, but ignorant of their existence.

But, indeed, from the spirit which prevailed at the meeting, a few lay trustees might feel no manner of surprise at being so rudely attacked, and that, too, without being made aware of the charges brought against them, or being allowed any opportunity to defend themselves, when the *Synod of the Church* was assailed, if possible, with greater virulence than the trustees were.

We have never witnessed an instance of the Lon's power being used by any body of men so very ungenerously and arbitrarily as it was at this meeting. Every manner of insinuation was thrown out against the trustees, but not one word would be listened to from them in explanation!

The reason of this was obvious. The object of the leaders of the movement was to pass their resolutions at once, without any opportunity being allowed for calm, dispassionate discussion. It was declared by them to be of the greatest importance, that the resolutions should go forth to the country at once, stamped with the authority of the congregation of St. Andrew's Church, in order that, from the circumstance of its being considered the principal congregation in Upper Canada, other congregations throughout the Province might be influenced and led by them! How very complimentary to the intelligence, discernment, and judgment of the other congregations! The same parties knew that had the trustees been allowed to give a fair explanation of facts and circumstances respecting which they had been most unfairly misrepresented as a body, the congregation would as cheerfully have sustained them as they had in the first instance applauded Dr. Telfer's proposal, to allow the resolutions to lay over for consideration until the subsequent regular meeting. The trustees have always met the congregation in good faith, and until the present occasion they have always been treated with the respect to which they were entitled. Their anxiety always has been to discharge the duties of the trust reposed in them with fidelity; and notwithstanding what took place on Monday evening, their confidence in the congregation is not in the least degree shaken; so as to induce them for a moment to entertain the idea that, on calm consideration and with a proper explanation from the trustees of the foul insinuations thrown out against them, the opinions and feelings of the congregation will not be materially changed, from what an indifferent observer would have considered them to have been during the unseemly excitement which prevailed at the meeting on Monday evening. Indeed, some gentlemen not connected with the congregation, who were present at the meeting, have expressed their thorough disgust at what they witnessed; and to those gentlemen we would say, that it is only from a sincere desire to preserve the Church to which they are warmly attached from ruin, that the trustees would continue to fill their office; but to abandon which at present, notwithstanding the provocations that are offered them, they would consider, under the prevailing excitement, to be a gross breach of their trust
