BRITANNIA
LIFE ASSURANCE COMPANY,
NO. 1 PRINCES STREET BANK, LONDON.
Empowered by Act of Parliament.
Capital £1,000,000 Sterl'g.
CHEAPEST RATES OF ANY OFFICE DOING BUSINESS IN CANADA.
Medical Referee for Kingston,
DR. THOS. W. ROBISON.
THE undersigned having been appointed to act as Agent for this Company, which has been doing business in Canada and this City since the year 1839, respectfully requests persons requiring Life Assurance, to call at his
OFFICE, PRINCESS STREET,
Kingston, where Prospectuses and all necessary information will be given.—Also, a variety of Tables, to meet the circumstances and convenience of applicants, can be seen.
The Rates of similar Tables in the Offices doing business in this Province, are as follows:—
For an Assurance of £100

Colonial Life Assurance Co., age 30	£2	4	4
National Loan Fund, do.	2	5	2
Britannia Assurance Co., do.	2	0	8

These moderate Rates, (little more than sufficient *safely* to provide for losses,) put it in the power of most persons to assure; and with reference to the present state of the health of the inhabitants of the Province generally, it *may* be thought necessary, should the prevailing sickness increase, to decline taking any risks. It appears therefore to be a duty on those who have to provide for their families to take the timely precaution of assuring their lives, and thus provide against the risk of perhaps leaving those dependant upon their exertions or means, to suffer difficulties, if not destitution.
THOMAS BRIGGS, Jn., *Agent.*
Kingston, Aug. 21, 1847. 67-y

DR. TOWNSEND'S
SARSAPARILLA.
THE MOST EXTRAORDINARY MEDICINE IN THE WORLD.
This Extract is put up in quart bottles; it is six times cheaper, pleasanter, and warranted superior to any sold. It cures diseases without vomiting, purging, sickening or debilitating the patient.
GREAT FALL AND WINTER MEDICINE.
The great beauty and superiority of this Sarsaparilla over all other medicine is, while it eradicates disease, it invigorates the body. It is one of the very best Fall and Winter medicines ever known; it not only purifies the whole system and strengthens the person, but it creates new, pure and rich blood; a power possessed by no other medicine. And in this lies the grand secret of its wonderful success. It has performed within the past two years, more than 35,000 cures of severe cases of disease; at least 20,000 of these were considered incurable.
More than 3,000 cases of Chronic Rheumatism;
2,000 cases of Dyspepsia;
4,000 cases of General Debility and Want of Energy;
7,000 cases of the different Female Complaints;
2,000 cases of Scrofula;
1,500 cases of Liver Complaint;
1,500 cases of Disease of the Kidneys and Dropsy;
8,000 cases of Consumption;
And thousands of cases of diseases of the blood, viz: Ulcers, Erysipelas, Salt Rheum, Pimples on the Face, &c., &c., together with numerous cases of Sick Headache, Pain in the Side and Chest, Spinal Affections, &c., &c.
This, we are aware, must appear incredible, but we have letters from Physicians and our Agents from all parts of the United States, informing us of extraordinary cures. R. Van Buskirk, Esq., one of the most respectable Druggists in Newark, N. J., informs us that he can refer to more than 150 cases in that place alone. There are thousands of cases in the City of New York, which we will refer to with pleasure and to men of character. It is the best medicine for the preventive of disease, known. It undoubtedly saved the lives of more than
5,000 Children the past Season!
As it removed the cause of disease, and prepared them for the Summer season. It has never been known to injure in the least the most delicate child.
RHEUMATISM.
This Sarsaparilla is used with the most perfect success in Rheumatic complaints, however severe or chronic. The astonishing cures it has performed are indeed wonderful. Other remedies sometimes give temporary relief; this entirely eradicates it from the system, even when the limbs and bones are dreadfully swollen.
☞ Hear Mr Seth Terry, one of the oldest and most respectable lawyers in Hartford, Conn. The following is an extract of a letter received from him:—
Dr. Townsend—I have used one bottle of your Sarsaparilla, and find it is excellent in its effects upon a Chronic Rheumatic pain, to which I am subject, from an injury occasioned several years ago, in a public stage. Please send me two bottles to the care of Dr. Seymour. I have conversed with two of our principal physicians, and recommend your Sarsaparilla.
SETH TERRY.
Hartford, March 12, 1845.
CONSUMPTION CURED.
Cleanse and Strengthen. Consumption can be cured. Bronchitis, Consumption, Liver Complaint, Colds, Catarrh, Coughs, Asthma, Spitting of Blood, Soreness in the Chest; Hectic Flush, Night Sweats, Difficult or Profuse Expectoration, Pain in the Side, &c., have been and can be cured.
Dr. Townsend—Dear Sir: Nearly twenty years ago I took a violent cold, which settled on my lungs, and affected me severely, indeed, finally it became a constant hacking cough, but not so severe as to prevent me from attending to my business. Within the last few years it increased on me gradually. At last I became reduced—I breathed with difficulty, and raised with my cough much bad matter, and for the last nine months previous to using your Sarsaparilla, had regular night sweats; indeed, my friends and myself supposed that I would die with the Consumption; but I have the happiness to inform you that, to my surprise, after using three bottles of your Sarsaparilla, I find my health restored. It relieved me gradually, and I am now enjoying much better health than I have before in 26 years. I had almost entirely lost my appetite, which is also returned. You are at liberty to publish this with my name in the papers, if you choose.
My little girl, who is three years old, had a very bad cold the whole of last Winter. We became very much alarmed on her account. While using the medicine, I gave her some of it, and it soon entirely relieved her, as well as myself, and she is as well now, as any child I ever saw. She was also full of little blotches; it took them away, and her skin is smooth and fair now, and I am satisfied she recovered her health from using your excellent medicine. S. W. CONANT,
414 Bowery.
GIRLS, READ THIS.
You who have pale complexions, dull eyes blotches on the face, rough skin, and are "out of spirits, use a bottle or two of Dr Townsend's Sarsaparilla. It will cleanse your blood, remove the freckels and blotches, and give you animation, sparkling eyes, fine spirits, and beautiful complexion—all of which are of immense value to unmarried ladies.
GREAT FEMALE MEDICINE.
Dr. Townsend's Sarsaparilla is a sovereign and speedy cure for Incipient Consumption, Barrenness, Leucorrhœa or Whites, obstructed or difficult Menstruation, Incontinence of Urine, or involuntary discharge thereof, and for the general Prostration of the system, no matter whether the result of inherent cause, or produced by irregularity, illness or accident.
Nothing can be more surprising than its invigorating effects on the human frame. Persons, all weakness and lassitude, from taking it, at once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the great cause of barrenness.
It will not be expected of us, in cases of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted, that hundreds of cases have been reported to us—Several cases where families have been without children, after using a few bottles of this invaluable medicine, have been blessed with healthy offspring.
Dr. Townsend—My wife being greatly distressed by weakness and General Debility, and suffering continually pain and a sensation of bearing down, falling of the womb, and with other difficulties, and having known cases where your medicine has effected great cures, and also having it recommended for such cases as I have described, I obtained a bottle of your Extract of Sarsaparilla, and followed the directions you gave me—In a short period it removed her complaints, and restored her health. Being grateful for the benefits she received, I take pleasure in thus acknowledging it, and recommending it to the public.
M. D. MOORE,
Cor. Grand and Lydius-st.
Albany, Aug. 17, 1841.

TO MOTHERS AND MARRIED LADIES.
This Extract of Sarsaparilla has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that critical period, "the turn of life," should neglect to take it, as it is a certain preventative or any of the numerous and horrible diseases to which females are subject at this time of life. This period may be delayed several years by using this medicine. Nor is it less valuable for those approaching womanhood, as it is calculated to assist nature by quickening the blood and invigorating the system. Indeed, this medicine is invaluable for all the diseases to which women are subject.
It braces the whole system, renews permanently the natural energies—by removing the impurities of the body—not so far stimulating the system as to produce a subsequent relaxation, which is the case of most medicines taken for female weakness and disease.
SCROFULA CURED.
This Certificate conclusively proves that this Sarsaparilla has perfect control over the most obstinate diseases of the blood. Three persons cured in one house is unprecedented.
THREE CHILDREN.
Dr. Downsend—Dear Sir: I have the pleasure to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine. They were afflicted very severely with bad sores; have taken only four bottles; it took them away, for which I feel myself under deep obligation.
Yours, respectfully,
ISAAC W. CRAIN, 106 Wooster-st.
New York, March 1, 1847.
OPINIONS OF PHYSICIANS.
Dr. Townsend is almost daily receiving orders from Physicians in different parts of the Union.
This is to certify, that we, the undersigned, Physicians of the City of Albany, have in numerous cases prescribed Dr. Townsend's Sarsaparilla, and believe it to be one of the most valuable preparation in the market.

UNITED STATES OFFICER.
Capt. G. W. McLean, one of the United States Marine Corps and member of the New Jersey Legislature, has kindly sent us the following certificate. It tells its own story.
RAHWAY, Jan. 25, 1847.
A year since I was taken with the Influenza, and my whole system left in a debilitated state. I was induced to try Dr. Townsend's Sarsaparilla, and after taking two or three bottles, I was very much relieved, and attribute it entirely to the said Sarsaparilla. I have continued taking it, and find that I improve every day. I believe that it saved my life, and would not be without it under any consideration. G. W. McLEAN.

These Stoves, for the convenience of inspection, are placed in the Warehouse immediately adjoining the Subscriber's Hardware Establishment; an inspection of which is solicited before purchasing elsewhere.
J. POWELL.
Princess Steeet, Oct., 1847. 83-3m

Lamps! Lamps!! Lamps!!!
THE Subscribers have just received a large supply of Cornelius's
PATENT SOLAR LAMPS,
of various sizes, comprising Stand, Hanging, and Side Lamps, to which they would particularly invite the attention of the public. They have on hand a supply of
SUPERIOR BEER PUMPS,
which they will fit up to order; also, in addition to their usual stock of Tinware and Stoves, a quantity of How's Patent Summer and Winter
"AIR TIGHT COOKING STOVES."
E. & A. CHOWN.
Kingston, Oct., 1847. 83-tf.

BUTTER.
20 Kegs new Packed Butter for sale by THOS. HENDRY & Co.
Oct. 7, 1847.

SOAP ROSIN.
50 Barrels Bright Soap Rosin for sale by the Subscribers
THOS. HENDRY & Co.
Oct. 7, 1847.

HERRINGS.
JUST RECEIVED, 30 barrels No. 1 Herrings this Fall's Catch.
THOS. HENDRY & Co.
Oct. 7, 1847.

OAT MEAL.
50 Barrels Oatmeal for sale by the Subscribers.
THOS. HENDRY & Co.
Oct. 7, 1847.

LONDON STEEL PENS.
JUST RECEIVED AT THE
ATHENEUM BOOK STORE,
A LARGE assortment of Steel Pens, by various makers, including Gillot's Celebrated Magnum Bonums; the New York Ladies' Pens, and several other new articles.
*** A Liberal allowance to the Trade.
October 26.

BLANKS of every description may be had at the Athenæum Book Store.

TO THE FARMERS OF CANADA.

From the Hamilton Gazette.

Silk is raised in Vermont and Massachusetts, places far colder than Western Canada, but as before remarked, there is so much labor and attention required, that until population is denser, it is in vain to expect success.

Broom Corn might be raised instead of having to import it. There is a good demand for it in Britain; The seed alone, excellent for horses, would pay the expenses.

Were the Maple cultivated for the purpose of making sugar from its sap, not only enough might be made for home use but for export. Four acres of maple will produce as much sugar as one acre of sugar cane, with the advantage that in the case of the maple grove, the soil can be employed for pasture, or for raising some kind of crops. To make it answer well, however the trees must be planted on rising ground, so as to convey the sap from row to row, and finally into the kettle; and new maple orchards must be continually planted to supply the place of those cut down when too old. The fuel for boiling would be supplied by the old trees.

Connected with the rising manufactures of Canada, the cultivation of plants for dyeing merits great attention. Among these may be reckoned—

Weld, or dyers Wood, produces the best yellow, brighter than yellow Oak, or Quercitron Bark, and more durable. This is sown in Spring, and cut down when ripe, and put up in bundles.

Wood gives a blue, still more durable than that from Indigo. It is also sown in Spring and on rich land. When the leaves have attained their full growth, they are pulled off, made into balls, allowed to ferment, and after a few days, broken and allowed to dry. With the same management namely, maceration in water, and separating the Sediment after fermentation, it is probable Indigo might be made from the plant.

But the most important dye plant, whether for home use or for export, is the madder. This plant, raised from either seed or slips, sown or planted in Spring, requires two years to come to perfection, must have deep, rich, lightish soil, and be kept free from weeds, still it is so much in demand, that it deserves the utmost attention.

Safflower, used for dyeing pink, and also as a drug, could easily be cultivated—sown in Spring, and gathered when ripe.

Rhubarb might be raised for the sake of its roots, as a drug. It requires rather a poor dry soil.

Sumac deserves cultivation; the demand for it in Britain is very considerable, and it will grow on the poorest soil. The wild variety is inferior to the cultivated, but is still worthy of attention from its effects in closing the pores of leather. It makes hemlock-tanned leather equal to oak-tanned. If used when the leather is three-quarters finished with hemlock; and for harness and upper leather, kips and calf-skins, it is of the greatest importance. It would be as cheap to grow it as to cut the wild plants, as it can, when once started be cut annually, for many years without further trouble.

There are a number of native plants that probably would furnish dyes of more or less value. The scarlet willow, the scarlet thread, and a variety of others, yielding red or purple colors, are worthy of attention. A bright vegetable red dye of a permanent character, is still a thing to be desired.

The products of the dairy next claim our attention, of which butter claims the first place. This must be put up by the farmers. Repacking always injures butter, giving it a greasy character, sticky, like lard in consistency, and totally destructive of its delicate flavor. It must be put up at the dairy, and not touched again until consumed.

To have good butter, cleanliness is absolutely required. Every utensil must be kept clean, and scalded after use. The cream must not be too sour; the churning must be done at a proper moderate temperature; the whey must be thoroughly beat out, and the butter well and evenly salted, with half an ounce of salt and half an ounce of loaf sugar to the pound of butter—no saltpetre on any account. It must be put up in seasonable ash or white oak casks, all of one size, not over 80 lbs. weight, well scalded. A piece of cotton soaked in brine should be placed at the bottom of the cask, then a layer of salts and a similar piece on the top, after a layer of coarse salt had also been placed; the cask should then be filled with brine. In this way, butter equal to the Dutch might be prepared, which, in the British markets, would fetch a quarter more than that put up in the present mode. The great drawback, however, has been in receiving the butter in rough, and putting it up at the country stores, and spoiling in the repacking.

With a country so highly suited to pasturage, it seems similar that Canada should import cheese from the United States, instead of having a large quantity for export. The demand in Britain is constant and extensive. All qualities are consumed, and from the great success attending the manufacture of cheese in some parts of Canada, it is perfectly deplorable that so extensive and profitable a branch of industry should be so sadly neglected. The descriptions best suited to the English market, consists of imitations of Double Gloster and of Cheshire, large cheeses made from either all new milk, or the morning's milk with the skim milk of the previous afternoon. Imitation of Stilton, made from the morning's new milk with cream of the previous afternoon, might also answer in some dairies; but, it would be found in the long run, that the most profitable would be to make one description—large cheeses from all new milk.

The packing of provisions next claim notice, which without the greatest care and attention, preparing them for the British market only ends in disappointment, whereas, with proper precaution, a most valuable branch of trade may be carried on with the Mother Country.

But, even for home consumption, the difference in price between an article well put up, or prepared, as is but too often the case, would make an improvement of great importance.

The great difference between the old manner of packing and the improved—copied from the Irish mode—consists in always rubbing the meat in the first instance with dry salt, so as to absorb the moisture of the meat, contract the pores, and altogether alter its nature. After being well rubbed with salt, with a very small quantity of saltpetre, to give a color, to be piled up for twenty-four hours, to be then rubbed once more, and again piled up for a similar period. If for bacon, hams, checks, or dried meats, generally, then stacked up with layers of salt for at least a fortnight—hams and checks to be rubbed frequently during the time—after which, they may be dried or smoked, but for the British market, the smoking must be very light.

THE POSTAL ARRANGEMENTS.

From the N. Y. Albion.

Notwithstanding the "retaliatory" measure of the American Government has been actually resorted to and put in force by order of the Post Master General, it appears that there is yet some hope of coming to an amicable arrangement by general treaty or rather convention, between the two Governments. The following extract from the *Washington Union* presents us the present state of the question. The British Government, it seems, declined to rescind the order of the 9th of June relative to the charge of sea-postage on the Washington's letters, but submitted to Major Hobbie the plan of a Postal Convention which Major Hobbie has brought back with him, and which is now under the consideration of the American cabinet.

"He (Mr. Hobbie) has not, it seems, effected a postal arrangement with the British post office. The Government of Great Britain still adhere to their obnoxious order of the 9th of June last, imposing the British sea-postage on the American mails conveyed in the American steam
