A genuine Yankee at Lisbon, Ct, wanting to put a water-pipe through a drain several feet below the surface without digging up the drain, tied a string to a cat's leg, thrust her into one end of the drain, and giving a terrific "scat!" the feline quickly appeared at the other end. The pipe was drawn through the drain by means of the line, and an expense of ten dollars saved by the operation.

That both belligerents are to be allowed to hold undisturbed their actual positions at the time of signing the stipulations. Third. Intelligence has just reached the Foreign Office to the effect that the German authorities at Versailles have consented upon a final demand to that effect, couched in diplomatic but courteous language, of the governments of Great Britain and Russia to grant M. Thiers a safe conduct from Tours through the German lines into Paris. It is expected that an interview between M. Thiers and General Trochu will decide the fate of the negotiations for an armistice.

Mr. S. B. Hull has purchased the Burstall timber limits on the St. Maurice, and will commence manufacture on a large scale immediately. The American Company of Quebec is also engaging largely in the trade.

It is related that soon after war was declared, one of Bismarck's friends said to him: "But, my dear Count, only think of the fearful loss of life this war is going to superinduce." "Ah, my boy, the world, though many thousand years old, has not yet discovered the art of making an omelette without breaking eggs!"

Holmes gives the following splendid type of innocence:—"One of my friends had a little marble statuette of Cupid in the parlour of his country house—bow, arrow, wings and all complete. A visitor indigenous to the region looking pensively at the figure, asked the lady of the house, "Is that a statoo of your deceased infant?"

Dagblatet of Copenhagen, though a sympathizer with France, gives a far from flattering report of the French Baltic squadron. It states that the want of order and foresight, and of settled plans, which has been so disastrous to France by land was still more marked by sea. So ignorant were officers of high rank that they thought the Baltic was not free from ice later than October. The success of the Arminius in reaching Frederickhaven on 27th of July is attributed to the unsatisfactory state of the French fleet. A considerable part of the fleet was only victualled and equipped after reaching the Baltic, there the crews received outfits, and the ships all sorts of requirements.
