TO OUR ADVERTISING FRIENDS.

Our advertising friends would confer an additional obligation by forwarding their favors at as early an hour as possible, as, disappointments will occasionally occur when announcements are sent at a late hour at night, for insertion next morning.

The Daily British Whig.

"Opifer per Orbem Dicor."

WEDNESDAY MORNING, JUNE 16, 1852.

THE ELEPHANTS!—This morning, at an early hour, Barnum's great Caravan will enter the City from Gananoque, and preceded by the Hindoo Car of Juggernaut, drawn by a long train of Elephants, pass through the principal streets on its way to the monster Pavilion, within which the Exhibition will take place. This parade will form a brilliant spectacle. The Museum and Menagerie will be open both afternoon and evening, and visitors will have an opportunity of witnessing the several wonders mentioned in Mr. Barnum's advertisements, for the single admission fee of Fifteen-pence.

THE TRUNK RAILWAY.—The "Niagara Mail," speaking of the Trunk Railway, says:—We ought to proceed at once with the continuation of the Great Western to Quebec, and if the guarantee can be obtained, to Halifax—we ought to set our faces against any more transverse sections being made before the line lengthwise of the Province is completed—every cross cut made not as a feeder to a Provincial trunk line, but as a branch of American lines, tends more and more to disunite the interests of the country as a whole, and creates influences at every point it touches against a thoroughly Canadian policy. With a trunk line first laid down, transverse sections in every direction will be most beneficial and profitable; but if such sections be made before we secure the means of retaining their traffic in the country, they will in our humble opinion do more harm than good, and their influence in the end—a purely foreign influence by the way—may defeat us in ever getting a trunk line at all through Canada.

THE GREAT EXHIBITION.—The Royal Commission have recently presented their first report to the Secretary of State for the Home Department. With the copious appendix attached to it it forms a volume of considerable size and of great value as a source of future authentic reference. At present, while the event to which it relates is still fresh in the public recollection, the interest which it possesses is comparatively small, for every remarkable feature connected with the Exhibition was seized upon with avidity, and had due prominence and publicity assigned to it. It would be drawing therefore too largely upon the patience of the reader to do more than direct attention in general terms to this careful compilation of all the facts connected with the great event of last year. To those who in after times may wish to ascertain how the exhibition was carried out the report will afford a complete and most valuable body of information. They will find that the Royal Commission have left behind them a monument of frankness towards the public unprecedented in any official body. The appendix contains copious returns in every department to which their labors and influence extended, and hardly anything is kept back that could hereafter be useful or instructive. There are no less than 42 of these returns, and as one glances over their diversified contents it is impossible to restrain a feeling of astonishment at the gigantic organization by which and at the cost an Exhibition was secured, short-lived history. The building itself is about to be removed, and nothing will shortly remain to mark its site except "Lord Seymour's favorite pump." It is consolatory therefore to think that an official record will exist of everything connected with it, and that down even to the consumption of provisions in the refreshment courts, the statistics of the waiting rooms, the loss from bad money at the doors, and the daily state of the temperature, the facts have been preserved. Such a mass of thoroughly digested information has never yet been collected with reference to any contemporary event, and thoughtful minds will long find fertile and varied sources of reflection opened up to them in this remarkable volume.

SOUTH AMERICA.

Much Federal and State dissatisfaction exists in New Grenada, if we are to rely upon the Journals published at the Isthmus.

PERU.—Equador continues in a very disturbed state, and a war between Peru and the Republic is confidently looked for, at least if we may judge from a paragraph contained in the proclamation of Gen. Urbinas, wherein he says:—"A nation, that defends what we are about to defend and that has on its side the justice we have is never defeated; we must conquer; the day of our victory over, we have yet a duty to perform. We must inflict an exemplary punishment on that Government that has traitorously put arms into the hand of our murderers. We or the Government of Peru must cease to exist. Those of us who should remain alive, after the defeat of Flores, will march against Peru, though it should be to die in the first encounter; for it is better to die than to live dishonored, and the Government of Peru has humbled the sovereignty of our country by arming a gang of murderers to invade her. To arms! fellow citizens, may those who invade our country die! To war with the Government of Peru!"

Nothing has been doing in the way of business nor are men to be had except for war purposes. Instead of the quantity of Cocoa brought into the market being 120,000 cargoes as was anticipated it has not reached 30,000 from 2,500 to 3,000 men being under arms and employed on the various batteries along the coast chiefly in the Puntilla, Malecon, the Planchada which count amongst them about 20 guns, chiefly of heavy calibre.

In Machala which has pronounced in favor of Gen. Flores, was anchored one of the ships belonging to his expedition.

A letter dated April 27th, and written on board the war steamer of Flores, says,—

To-morrow we commence operations against Equador by marching against Puna, where it is intended to remain during the remainder of this month, for the purpose of organizing the troops and at the same time to threaten the enemy in any way which may give us an opportunity of taking them at a disadvantage. To-morrow or next day we shall attack the enemy's forces stationed in the town of Machala, where some show of opposition may, perhaps be made, but it must fall into our hands. I am, myself organizing a vanguard force of picked men that will be equal to the Chilians—Germans, English, and North Americans who are amongst us.

The rumors received regarding the movements of Flores, are varied and uncertain. Some say that his men are dissatisfied and deserting him; others, that he is merely carrying out his plans from the be ginning, in remaining so long at Puna; and others again say that he has been trying to induce a declaration of war on the part of Equador against Peru, and that the latter country will, before long, have a sufficient force at the disposal of the revolutionary leaders to capture Guayaquil, and obtain an easy conquest of the whole of Equador. Nothing, however, can be positively relied on, but the probability is, that with Peru to assist him, Flores will not be so easily driven out of the Guayaquil river as many people suppose.

THE CRYSTAL PALACE.

Sydenham, a station on the Brighton Railway, has been fixed upon as the spot on which the Crystal Palace is once more to display its graceful proportions. It is to be placed in the midst of a park of 150 acres, which is to be planted with specimens of every tree which can be grown out of doors in England. The Palace itself is to contain a winter garden of 18 acres in extent, filled with the choicest plants and flowers. Within its walls flower-shows are to be held, which will put to shame the exhibition of Chiswick or the Regent's Park. There are to be sculptures by the chief living artists, and casts of the most celebrated works of antiquity. Geology and mineralogy will receive their appropriate illustrations, while specimens of the most striking costumes and manufactures of the various nations will be laid out as at the time of the Great Exhibition. Not the least interesting part of this splendid spectacle will consist of samples of machinery, such as those which were seen at work last year in the northern section of the building when it stood in its full glory in Hyde Park. In a word, as far as it may be possible, no effort will be spared to make the Crystal Palace what it was last year, and something more besides. The building itself will show to much greater advantage when placed in the midst of a large open space, filled with shrubs and trees, than on its old site in Hyde Park, where the immediate proximity of the Kensington houses spoiled the effect, as seen from the south. Nor, as far as the arrangements for passing to and fro are concerned, will there be much reason for regret. The situation in which the building is to be placed is as easy of approach for the greater proportion of the inhabitants of London as the former site. It is but an affair of a few minutes to pass from the London-bridge to the Sydenham station. There are to be also extra lines from Waterloo, Vauxhall, and the Bricklayers Arms, so that the inhabitants of any portion of the metropolis may have the opportunity of visiting the Exhibition with a tolerable degree of facility and comfort. We may well hope that the possession of such means of rational and instructive recreation will tend to educate the people to nobler habits of enjoyment, to purer desires, and more elevated thoughts.—[Times.

FEMALE SERVANTS.—We learn with much pleasure that the "Protestant Female Servants' Home," recently established in this city, under the auspices of a committee of the highest respectability, and the management of a matron well qualified for the situation, is proving very useful, though very little needed as a boarding-house. It appears that there are always many more applications for servants on the registry of the institution that there are servants out of places, so that no one needs to avail herself of the House for more than a few days, until the preliminaries respecting a new engagement be arranged. In fact, were five hundred or more Protestant female servants to arrive in Canada every season, they could find situations in the different cities and towns without overwork, and at from 15s to 25s a month, wages according to capacity and duties. Nor would such a supply probably counterbalance the number which is every year leaving this calling, chiefly through marriage. Will British papers have the goodness to copy this paragraph?—[Montreal Witness.

NEW POWER PRESS.—The Worcester Transcript, since its enlargement, has been printed on a new power press, of simple and ingenious construction, lately invented in that city by Dr. Hawes, one of the most competent of practical mechanics. We cannot describe the *modus operandi* of the machine, so that our readers would gain a very intelligible idea of its construction—but it prints 2000 an hour, is propelled by one man, and costs about $600. It takes but one person to feed it, delivers the papers itself, and does not occupy as much room as an ordinary hand press.

LARGEST WOMAN IN THE WORLD.—Miss Catharine Schooly, who is represented as the largest woman in the world, is holding levees in Columbus. She is a native of Pickaway County, Ohio, 36 years of age, and weighs 611 pounds. The advertisement further says: "Her size round the body is 10 feet 4 inches; around the arm, 4 feet 6 inches: around the thigh, 7 feet 11 inches; height, 6 feet 2 inches."

THE FRENCH BUDGET.—It appears from the budget that the Government proposes to increase the stipend of the Archbishop of Paris from 40,000 francs to 50,000 francs, those 14 archbishops bishops from 10,000 to 20,000 francs, and of 65 also proposes to increase the stipends of the vicars-general by 500 francs, to improve the position of some of the lower clergy, to increase the allowance to the chapter of St. Denis, and to grant 180,000 francs for increasing the choirs of cathedrals.—The salaries of ministers are set down at 100,000 francs each. Besides which the Minister of War is to have 30,000 francs for representation, and 500,000 francs secret-service money. The Minister of the Interior is to have 800,000 francs secret-service money, the police 1,200,000 francs, and the Minister of War 150,000 francs. Under the monarchy the secret service voted each year used to be about 1,000,000 francs altogether.

IMPROVEMENT IN WINDSOR.—Our stores and shops are here thronged with customers from sunrise in the morning until nine o'clock at night, mostly by our French farmers, and many come from Detroit here to trade, especially when they want to get a good bargain, or a good English manufactured article. Our docks are so frequently crowded with steamboats and sailing vessels, loading and unloading, that there is scarcely room for the ferry boats to land. New side-walks are being made, new houses are being built, new shops and stores are being opened, and the great cry is for more dwelling houses. We furnish Detroit with a large portion of their marketing. We saw a colored friend of ours to-day cross on the ferry-boat, with about 200 dozen of eggs, six or eight turkeys with chickens and butter also, and they are continually going over with loads of a like character. Mr Ascue, of Amherstburg, is now about to open a line daily in Windsor, which is much needed. We are informed that his breed of cattle is the finest in America. But it is not only in business that we flourish,—as a place of resort for pleasure seekers this side is unsurpassed on the American continent. Nature has elevated the Canadian shore far above the level of the Michigan side of the river, so that when the Detroit citizens wish to have a good carriage ride, they visit us, and ride up and down our shores. Our livery stables can often let out from thirty to forty carriages in a single day, and the steam ferry-boats are frequently crowded with persons who ride for pleasure and health.

NEW YORK HORTICULTURAL SOCIETY.—The delightful exhibition of this society in Metropolitan Hall closed last evening at 10 o'clock. During the whole of yesterday the exhibition was crowded, and during the last two hours of the exhibition the room was almost suffocating. Its appearance by gas light was very effective. We understand that the sums paid for admission amounts to about $1200, two-thirds of which were taken yesterday. An address was to have been delivered by Mr Shepherd Knapp, but in consequence of his being indisposed it was read by Mr. Tomlinson, who had kindly undertaken the duty for the former gentleman. Mr. Oakley acted as president.

Mr Hoadley, after an eloquent preface, read the address, which observed that it was not surprising that the older countries of Europe, and the still more ancient oriental nations, should have an advantage in horticulture over the United States. Horticulture and gardens were always deemed as one of the proofs of an advanced state of civilization. The origin might be traced to a very remote period, and it had an adaptation to different soils. Among many of its advantages were the selection of the best vegetables, and the study of the diseases of plants, and their protection from heat, cold, and vermin. The application of the science of chemistry was also a great result. Scotland, notwithstanding her sterile soil, was eminent for her gardens. It should be also remembered that one of the most important plants to the community was a native of America—the potato. Horticulture should receive a great deal of attention of the public, and public nurseries for the education of young men should be established. In Germany, persons were obliged to serve an apprenticeship, and to pass an examination before he could take an office of head gardener. Why should England alone boast of her Kew Hampton Court, Kensington, Windsor gardens, in London; and the Rosco garden in Liverpool, and New York be backward in similar establishments? The European universities had their gardens, which were regarded almost in a philosophical view. This society was but in its infancy; but it had done well, and would live and flourish. (Applause.)

Mr. Peter B. Mead, Chairman of the Committee of the Arrangements, briefly returned thanks to the audience for their patronage; shortly after which they retired, and this interesting exhibition closed.—[*New York Herald, June 12th.*

SAINT ANDREWS AND QUEBEC RAILWAY.—A correspondent at Saint Andrews informs us that the good people of the town are in high spirits, as they contemplate the early completion of a line of railway, which will connect their beautiful town with Woodstock and its thriving locality. The road is well graded for ten miles, and nearly prepared for the rails, of which there are plenty on hand for the completion of that distance.

[Since writing the above the Saint Andrews Standard has come to hand from which we cheerfully reprint the following announcement:—]

"It is with much pleasure we announce, that it has been determined to celebrate the commencement of the works under the contract lately entered into with Messrs. Stykes & Co., for the completion of the whole Railroad to Woodstock, and that the ceremony of "turning the first sod," will take place near Bartlett's Pond, on the Frye Road, on Friday next, the 4th inst., at 12 (noon,) when a goodly company of the friends of this great undertaking will be present.

VERY LATE FROM CENTRAL AMERICA.—We have received files of the *Gaceta de Guatemala* to the 7th of May, and the *Gaceta del Salvador* to the 30th of April. In the first of these State, the President, Rafael Carrera, after having taken the advice of the Council of State, had proclaimed a decree to repress the abuses of the press. We translate the principle articles:—

No person can publish a newspaper without the authorization of the government, and giving a security of $500 to $2,000 to the government, under penalty of the confiscation of the printing office in case of an infraction of that clause.

The responsible editor of any periodical publication will give a security fixed by the government.

No paper is permitted to appear without the authorization of the Minister of the interior, who will receive two copies before its distributing. Offenders will be subjected to six months' or a year's imprisonment, or a fine of $500 to $1,000.

The same paper publishes the letter of President Fillmore to the President of the republic of Gautemala, in which he congratulates Sr. Rafael Carrera upon his election.

Mr. John Bozman Kerr, Charge d'Affaires of the United States, was received by the President, in a private audience.

Mr. Frederick Chatfield, before leaving Central America, in which he resided for eighteen years, expressed to the public generally, and to Guatemala particularly, his thanks for the attentions and benevolence which he had always received from them. He left Guatemala on the 3rd of May.

Don Felipe Molina, and Sr. Felix Dettres, both charges d'affaires, the former in the United States, and the latter in France, are also nominated plenipotentiary ministers.

The *Gaceta del Salvador* gives notice of the arrival and brief residence of Mr. Kerr, Charge d'Affaires of the United States, who was received by the inhabitants with every mark of respect and pleasure.

These two countries appear to enjoy the most perfect tranquillity and happiness, under the wise administration of Francisco Duenas and Rafael Carrera.

QUEENSTON & GRIMSBY ROAD.—At a meeting of the Council of the Township of Niagara, held last Saturday, it was resolved to take £2000 stock in the Company proposed to be formed for completing the above road. And a meeting of the Reeves of the different municipalities directly interested in said Road was held on Monday last, when it was found that they were unanimously agreed to go on with the work as soon as the necessary formalities can be observed. Our readers will remember, that the plan proposed is for the County Council to take stock in the Company to the extent of its liability to the Government, and the different municipalities through which the road passes to contribute £2000 each. The capital 000, which is [illegible] will therefore be about £13,[illegible] make a capital road. [illegible] sufficient to

KOSSUTH'S FAMILY.—One of the London papers gives the following paragraph:—

The venerable mother of Kossuth, the late Governor of Hungary, is accompanied by her two daughters, their husbands, and their nine children. The mother of Kossuth is of small stature, and about 70 years of age. She appears to enjoy good health. The two sisters, on the contrary, are tall, and one of them appears to be in ill health.

HYDROPHOBIA CASE.—The son of a Mr. Waite, of Cincinnati, was recently seized with hydrophobia. We learn by the Cincinnati *Gazette* that since then, by judicious treatment, he has entirely recovered, though a running wound is intended to to be kept up where the lad was bitten in order to prevent the possibility of a return of the symptoms. The vesicles which formed under the tongue rapidly disappeared under the administration of Lachesis, a medicine prepared from the virus of the lance-headed adder, which was given as an antidote to the poison, and the spasms were prevented by the use of Belladonna and other remedies.

A SPECULATION.—A Yankee genius follows in the wake of Kossuth, providing all hands with Hungarian, French and American flags. His entire stock was taken here before 10 o'clock on Thursday morning, and had his "pack" contained twice as many more, he would have had customers.—[*New York Paper.*

STRANGE SECT.—THE AGAPEMONE, NEAR BRIDGEWATER.—Some curious stories respecting this place are mentioned in the Bristol Gazette. It is said that Mr. Prince, the founder, on a recent occasion drove up to the Castle-inn, at Taunton, in the carriage and four which belonged to the late Queen Adelaide, and which he has purchased for his own private use. A servant at the door of the inn warned off some idlers standing in the way, with the words—"Take care, here's Mr. Prince coming." He overheard the expression, and on alighting from the carriage said to the servant in a solemn tone, "Mr. Prince once—Jesus Christ now." He then entered the inn, consumed a cigar and a bottle of wine, and returned to the abode of love. Among other strange regulations observed in the institution is the election of "Mrs. Prince," or "The Bride." This is a distinction which every week falls to the lot of one out of fifteen women, who, with their husbands, are members of the sect. A large stage is erected, on which is placed a number of seats according with the number of candidates for the espousal. This stage revolves round a chair, in which Mr. Prince seats himself. At a given signal the husbands of the women enter, and each, stationing himself at the back of his better half, begins to force the stage round. This is continued until it has attained a pretty good speed, when at a sign from Mr. Prince, the husbands retire, and the stage is left to itself; when it stops, the woman opposite to Mr. Prince becomes the "Bride" for a week, at the end of which time the same ceremony is repeated. On one occasion, Mr. Prince happened to catch a "Bride" as she was being kissed by her husband. As a punishment for this unfaithfulness, she was divorced from her heavenly consort and put to menial labor, and the peccant husband was scatenced to wheel a barrow full of stones up and down the yard for three days. Once, a "Bride" was discovered to be in an interesting condition—an offence that could not be tolerated by the laws of the Agapemone, and she was dismissed as a traitress in whom no further confidence could be placed. Several expulsions of this nature have, it is said, occurred lately, a fundamental law of the Prince, ites being, that no children are to be admitted within the institution. It is rumored, however, that the founder's influence is on the decline.

MR. TEEVIN'S WRITING CLASSES are now in full operation. A visit to his rooms will convince the most sceptical of his ability to change the crampest knuckling fist into a free, bold business style. His class for young ladies opened yesterday. His ornamental style is unsurpassed. Parents who wish their families to possess this useful accomplishment in perfection, should call and see the daily improvement of Mr. Teevin's pupils.—Rooms opposite J. Duff's Book Store.

The Sandusky Register says the wheat field in Michigan are said to be in an extremely promising condition, and there is every prospect of a larger crop than was ever produced in the Wolverine State.

BY TELEGRAPH.

[REPORTED FOR THE BRITISH WHIG.]

MARKETS.

NEW YORK, June 15.

Ashes easier for Pearls. Sales 5,62½ a 5,58. Pots scarce, 4,75 o 4,87.

Flour good demand for low grades, state and western. Better grades dull. The Eastern demand is not so active. Canadian in fair request and steady. Sales 2,700 bushels at 4,12 a 4.25 in bond. Through from Bytown to Quebec in 24 hours.

THE WELL KNOWN AND ELEGANT STEAMERS LADY SIMPSON, Capt. SHEPHERD, AND PHŒNIX, Capt. SLATTER, The former between Lachine and Carillon, and the latter between Grenville and Bytown.

DURING the Season of Navigation, 1852 it is intended that a TRAIN will leave the Railroad Terminus in Montreal at EIGHT o'clock A. M., DAILY, (Sundays excepted,) with the PASSENGERS and MAILS for BYTOWN, arriving the same evening; and the STEAMER "PHŒNIX" will leave BYTOWN, at SIX o'clock A. M., DAILY, (Sundays excepted) the Passengers and Mails reaching Montreal in time to proceed by the Quebec Steamer the same evening.

FALSE ECONOMY.

'A hint to the Blind is as good as a nod.'

THE success of business depends much on the extent of a man's credit. Some erroneously suppose they practice economy and increase their credit by wearing an Old HAT or CAP in their ordinary business. But this is false economy in the ordinary business of a City life. For it is a fact proverbial, that he who is slovenly in his personal appearance, is also careless in business matters. Therefore he who wishes to secure esteem and credit among men, should in proof of his good sense and correct taste, not fail to honor his head with a genteel HAT or CAP.

P. S.—A large and general assortment of the best quality and most modern style, of both kinds for sale cheap for cash or approved credit, by GREENE & SON,
Wellington Street

Kingston, 8th June, 1852. 135

HERE IS YOUR REMEDY!

HOLLOWAY'S OINTMENT!
A MOST MIRACULOUS CURE OF BAD LEGS, AFTER 43 YEARS' SUFFERING.

Extract of a Letter from Mr. William Galpin, of 70, Saint Mary's Street, Weymouth, dated May 15th, 1851.

To Professor HOLLOWAY,

SIR,—At the age of 18 my wife (who is now 61) caught a violent cold, which settled in her legs, and ever since that time they have been more or less sore, and greatly inflamed. Her agonies were distracting, and for months together she was deprived entirely of rest and sleep. Every remedy that medical men advised was tried, but without effect; her health suffered severely, and the state of her legs were terrible. I had often read your Advertisements, and advised her to try your Pills, and Ointment; and, as a last resource, after every other remedy had proved useless, she consented to do so. She commenced six weeks ago, and, strange to relate, is now in good health. Her legs are painless, without seam or scar, and her sleep sound and undisturbed. Could you have witnessed the sufferings of my wife during the last 43 years, and contrast them with her present enjoyment of health, you would indeed feel delighted in having been the means of so greatly alleviating the sufferings of a fellow creature.

[Signed] WILLIAM GALPIN.
