The insurgents, 1,000 strong, attacked an encampment containing the garrison of Savana Nueve near Puerto Principe, on the 20th inst. and captured the entire force, some 80 men. A number of filibusters who landed from the schooner Grapeshot, and subsequently fell into the hands of the troops, had been executed there. Among the victims were Charles Speakman, of Aurora, Indiana. Albert Worth, formerly operator in the Franklin Telegraph office, New York, and others.

New York, June 29.—Letters from London state that the party of English mechanics who are about to emigrate to the Cornell University, were received at a public breakfast presided over by Lord Houghton, would sail for New York on the 26th of June. The movement under which they are emigrating was first suggested to Prof. Smith by Mr Cornell himself. The Hon. Auberon Herbert, a well known liberal, had charge of the movement. The young men are selected from different branches of the building trades, and will be employed both in the instruction of those undergraduates who may desire to obtain a practical knowledge of them and in the construction of the University buildings.

Some Buffalo shovellers were very much excited on Wednesday by an experiment at the Sturges elevator which they thought calculated to take their work away from them. Two hundred of them gathered at the spot to stop the experiment, but the police kept them peaceable. The new machine did not work well, however, and their occupation is saved to them for the present.

With the opening up of the North-west Territory for settlement, a new era in the history of British North America will begin. The New York *Tribune* very justly remarks that "there are unreckoned possibilities in the immense territory north of us," and sees that the time is not far distant when a line of railway will traverse the whole extent of British American territory, from the Atlantic to the Pacific, along a route 1,500 miles shorter than the Pacific Railway just opened. The advantages such a line would give are incalculable, as forming the great highway between England, India, China and Japan.
