Mr Gladstone will, to-morrow, bring in a bill to suspend for the present the making additional appointments in the Irish Church.

Tobacco is usual to the trade. The *Journal* of the Tobacco says: "The National Guards Mobile have been organized, and the whole army has been armed with Chassepots, which leave no reason to think a collision with the Prussian needle-gun. The concentration of the eastern frontier have been put in a thorough state of repair; and in order to final any opposition, it is announced that this year the conscripts are to be formed simultaneously. In short, France is prepared for any emergency, and the Power which assumes the aggressive will be very ill advised."

Mr Burgh, in a recent address to the New York agricultural society, stated that he had lately visited the street of a master-butcher—a councillor of New York city—for having chopped off the legs and allowing them to lie in the scorching sun hours before putting them out of misery. He proposed to write his name be made a cross, as he had acquired the art. Indeed, it is an accomplishment not deemed necessary for the legislator of the largest city in the country.

The vagaries of poor Train during his stay in Dublin gaol has been to scrawl on the door of his cell a picture representing a lion dead, and the American eagle perching on a ponderous pile of greenbacks. The drawings is emulation. In the background is a fair representation of the Capitol at Washington, where George Francis himself, wearing the Stars and Stripes as a handkerchief, appears just opening his mouth to take the oath prescribed as President of the United States.

The New York Labour Exchange at Castle Garden has proved to be a complete success. The monthly report of the Superintendent for the thirteen days ending with April, shows that in that time there were 1,404 applications for employment, all of which were provided for, and 1,619 applications for employees—of which evidently had to wait.

Bread is being made of a new machine at the Great Flour office which is expected to transform the trade to a great extent. The paper is made in one single sheet, and delivered out from a roll. The machine is intended to print 46,000 and 50,000 perfect copies per hour, which is more than has ever yet been accomplished, and it also cuts the paper into sheets, and records the number printed.
