[illegible] QUESTION IN WOODSTOCK.—At [illegible] held on July 13, the dry goods [illegible] of Woodstock and Ingersoll [illegible] a joint meeting, agreed to [illegible] Toronto silver movement, to [illegible] on the 1st August.

One of the Canadian Zouaves in Rome Mr De Cazes, very nearly lost his life by poisoning. While he was on sentry duty, a little boy peddling cigars offered one to the Zouave, who purchased it, and began soon after to smoke it. He had not had the weed long in his mouth, when he fell almost senseless, but, having been taken to the hospital and proper remedies being administered, he recovered, and is now well. It is believed that the cigar was impregnated with the *aqua tofana*, the celebrated poison used by the Borgias, to poison the family of Pope Alexander VI.

THE SILVER QUESTION.—A meeting of merchants was held last evening in the Merchant's Institute, for the purpose of further considering the best means of getting rid of American Silver. Mr Yarker, of the Bank of Montreal, instructed Mr J. G. Merrick to state to the meeting that his bank would be prepared to take silver from the merchants at the same rate that they took it from the public, and ship it out of the country to the best market, and refund the profits whatever they might be, to the merchants; and also to make advances to cover the amount, free of interest, until such time as the sales were made, provided the other banks did the same with their customers. On motion of Mr Merrick a Committee was appointed to wait upon the Bank managers this afternoon at the Bank of Toronto to carry out the above object, and also to wait upon Sir J. A. Macdonald to solicit the aid of the Dominion Government in furthering the objects of the meeting.—*Leader.*

THE IMPROVED CHARCOAL PIPE.

The Beau Ideal of the Smoker.

THE CHARCOAL PIPE is composed of no other ingredient than *Pure Carbon* in the form of *Charcoal*, and is manufactured in such a form and manner as—while imparting all the requisite hardness, strength, and durability—to preserve its remarkably porous and absorbent quality. It is also calculated, by its great absorption of heat in the bowl of the pipe, to cool the smoke effectually. Tobacco of a coarse and harsh description may be used with impunity; and no waste of the Weed will be experienced, as the charge may be smoked till completely consumed.

These Pipes require no inflated statements to recommend them, and need only be tried once in order to establish to the satisfaction of every smoker their great superiority over all others.

When purchasing be sure they bear the stamp, Pat'd. F by. 12th, 1868.

Manufactured by the Carbon Pipe Manufacturing Co.
