BRITISH NORTH AMERICAN STEAM-SHIPS.

The undernoted or other vessels are appointed to sail as follows:—

DEPARTURES FROM LIVERPOOL.

Europa	March 23	For New York
Hibernia	April 6	For Boston.
Cambria	April 13	For New York
America	April 29	For Boston.

DEPARTURES FROM AMERICA.

Europa	April 17	From New York
Hibernia	May 1	From Boston
Cambria	May 8	From New York
America	May 15	From Boston.

Auction Sales This Day.

As Advertised in the British Whig.

Wm. Ware's Sale at the stores of John Carruthers, at 1 o'clock.

James Linton's Furniture Sale at 11 o'clock.

The Daily British Whig.

"Quifer per Orbem Dicor."

FRIDAY MORNING, APRIL 12, 1850.

☞ CITY TOLL GATES.—We strongly recommend the City Fathers to pause in their headlong career against the peace and happiness of the town. Let them take the sense of the inhabitants at a public meeting, ere they place Toll Gates at every avenue. Of this fact they may rest fully assured, that every man who votes for the Toll Gates, should the Bill be passed, will be ignominously turned out of his seat at the next election, and the Toll Gates be removed. They should save the city the expense of their being put up.

☞ COMMISSIONER OF PUBLIC WORKS.—The Hon. William H. Merritt has accepted the Chief Commissionership of Public Works, and will immediately present himself to the electors of Lincoln for re-election. We hope to have the hon. gentleman's Address for publication in our next. Mr. Merritt's acceptance of this office furnishes conclusive proof that there is no truth in the statements which have been currently circulated, that he and his colleagues are at issue on retrenchment or any other point. We believe the Assistant Commissionership of Public Works and the Presidency of the Council will be filled up, without loss of time, by a gentleman from Lower Canada—by which a saving to the revenue will be effected. The Cabinet will thus consist of four Upper Canadian and four Lower Canadian members.—*Globe.*

MORE GOVERNMENT CHANGES.

We have heard from a reliable source, that Mr. Merritt has resigned his place of President of the Council, and accepted instead, the office of Chief Commissioner of Public Works. It is probable that the office of Assistant Commissioner will be offered to Mr. Cauchon, member for Montmorency. It will be remembered that Mr. Cauchon accompanied the late Assistant Commissioner, Mr. Malcolm Cameron, on his tour through Upper Canada, as far as Amherstburgh, after the prorogation of Parliament, which, we presume, was the only opportunity he ever had of seeing the Upper Province. Mr. Cauchon is a member of the legal profession, which in this lawyer-ridden country, is regarded by the Baldwin-Lafontaine Administration, as a passport to any office in any department whatever. The electors of Lincoln may prepare themselves for an immediate election in their county, in consequence of their representative, Mr. Merritt, having accepted another office. In Montmorency, too, there will likely be an election; but as that is only a French holding, subject to the nod of Lafontaine, it makes no difference, as the Government nominee will; as a matter of course, walk the course.

It is well known, that before Mr. Malcolm Cameron resigned office, he urged his colleagues to abolish the office of President of the Council, and to place Mr. Merritt at the head of the Board of Works, abolishing at the same time the office of Assistant Commissioner. It would seem that the remnant of the Executive, as a last effort to retain their places, have some idea of adopting those plans of retrenchment which they formerly rejected, and that the present shifting of Mr. Merritt is but a preliminary step to the carrying into effect of the others. It is humiliating to see the Government of the country driven to such shifts—to pursue a course to-day which they rejected very recently—and that pursuing it, they do so, not from any conviction of its propriety, but in order to insure for themselves, by this means, a renewal of their office for a short time longer. The people will understand the danger and govern themselves accordingly. Men of Lincoln! be ready! Mr. Cauchon, who is talked of as Mr. Merritt's colleague is the same person who wrote so violently respecting the famous Representation Bill of last session, the loss of which he so deeply deplored, as in his estimation it deprived Lower Canada of the opportunity of placing her heel politically, on the neck of the Upper Canadians. He will make a worthy accession to the precious crew who now form the government of this Province.—*Colonist.*

MRS. HOWARD, THE HEROINE OF THE CINCINNATI TRAGEDY, AND HER CHILDREN:—The famed Mrs. Howard, who killed the paramour of her husband, in Cincinnati, some time since, has, since the death of that husband, obtained possession of her children.—According to our information, she gained access to her little girl, who was at a convent, by pledging her word that she would use no illegal or forcible means to get possession of the child. The guardian of the children was not at home when the application was made at his residence, but under this solemn promise, his lady consented to accompany Mrs. Howard to the convent. When they had arrived there, the Lady Superior, by request brought forward the child, when the mother, seizing it, threw aside her shawl, and exposed a belt of pistols, declaring her intention to carry off her child at all hazards, and saying, "I have killed one man, and I can kill others if I am opposed!" The ladies, struck with consternation, made no resistance, and soon after, Mrs. Howard with her child, entered a carriage and departed. Returning to the house of the guardian, Mrs. Howard, and her male friend—who seemed to be a passive spectator of what was going on—met with the little boy, when he too was taken possession of, and carried off. Howard was divorced from his wife in 1846, in Kentucky, at which time the court decreed to him the guardianship of his children. The mother afterwards obtained them by stratagem, but finally relinquished the boy to his father by the payment of $500. The girl was more recently obtained from her in a similar manner.—*St. Louis (Mo) Union, March 19.*

THE FLOOD.

We understand from a gentleman who came down Yonge-street on Saturday last, that the damage done at Thornhill and Hogg's Hollow is considerable, both to the highway, and property of the vicinity.

The flood had quite subsided, and yet no preparation had been made to repair the road at those two places, though a safe passage could have been made for teams at a very trifling expense, of a temporary nature; no one had been out from the Government or Board of Works, to examine the Road, or take any steps to put it in order; and the inconvenience to the public from the interruption of the immense travel on this great thoroughfare has been and still is very great. With proper attention, we are assured, the road could have been made passable on Saturday. We have heard that an Engineer was sent out yesterday [Monday] for the first [time, nearly a week after the damage.] to inspect the road, and put it in order; and considering that the Board of Works has neither head nor tail, perhaps this is as much as could be expected from our strong Government.

A temporary floating bridge has been placed over the Don, so as to enable waggons to pass; and for this service the Government had to employ an extra Engineer; a gentleman, however, who had formerly been unceremoniously discharged by them, from the works at Bytown, to make room for some Radical hanger on, in no way competent for the duties entrusted to him. We think it likely that they will be under the necessity of calling in others, who have been so dismissed; for those who, from political causes solely, had been appointed to fill their places, are in no way fit for the duties, under the extraordinary emergency that has occurred.—*Colonist.*

CALIFORNIA:—It would appear that there is about to be a large Emigration to this exciting region, from this Province, during the ensuing Spring. We have heard of several who are making arrangements for a start, and settling their affairs prior to taking a trip to this El Dorado. From private and public accounts which have reached us it would seem that a trip to California is but a speculation after all—a mere lottery. The mania is spreading in the Niagara District, as will be seen from the following taken from the *Chronicle:*

We understand that a party of enterprising young men, 25 in number, start this day for the gold mines of California, from the Townships of Wainfleet, Thorold and Crowland. Their intention is to go by steam to Chicago, thence by rail and steam to Fort Independence, and thence by ox-teams across the Rocky Mountains.

Another party will leave Dunville for the same destination in a few days. They will pursue the same route, but their intention is to travel by land all the way from home with horse teams.

These parties are formed of individuals whom the country can ill spare—industrious and respectable young farmers, with means of their own. It is to be hoped that a short time will satisfy their love of adventure and gold, and restore them to their homes, wealthy and contented.—*Hamilton Gazette.*

DR. GESNER'S DISCOVERY.—We are glad to learn that the new description of Gas, produced from *Asphaltum*, is winning its way into favor with our citizens. The material is to be found in abundance all over America, and it is said immense quantities can be procured in this province. Dr. Gesner is kept busily employed explaining the nature of his discovery, and exhibiting the light to the curious in such matters. For a trifling sum, say twenty five or thirty dollars, the whole apparatus including retort, gasometer, &c., may be set up in a building, and the cost of lighting the whole not exceed a few pence per night. To use the Doctor's words, there is no science about it; the hall stove will manufacture the gas and the girl that sweeps the house may keep it in order. The exhibitions, thus far, have been in the highest degree satisfactory; the light being remarkably brilliant, even without the usual purifying process of the Gas-house. The light of one burner, of the ordinary size, has been ascertained to be, by actual experiment, equal to six tallow candles. There is also another striking peculiarity in the new gas, it being of a green color, which is well known to be grateful to the eye. This property was not observed by Dr. Gesner until pointed out by the New York professors. It is gratifying to learn that this gas is likely to get into extensive use at New York and other American cities. Dr. Gesner's son is now fitting up the Astor House in the former city to burn the article, and the corporation are making preparations to use the *Asphaltum* also. We also learn that is in contemplation to light the Halifax Hotel by the same means. And if it be true that the article can be produced at the rate of *three shillings* per M. feet, it cannot fail to benefit consumers of gas generally. It is even asserted by many that already has the city felt the influence of competition, in being supplied with gas of a better quality.—*Novascotian, Halifax.*

☞ ELECTRIC TELEGRAPH TO HALIFAX.—We are happy to have it in our power to announce that the new telegraph line between Portland and Boston—not under the management of the noteworthy Fog Smith—will be completed in about a month, and put in connection with the Halifax line. The tolls by this new connection will be considerably reduced; as the line is in opposition to Mr. Smith's monopoly. The charge for ten words to Boston, it is understood, will be about $1, instead of $1,50c. as at present.—*Halifax Journal, March 15.*

ST. LAWRENCE AND LAKE CHAMPLAIN CANAL.—It is a circumstance of no slight significance, that the Canal Committee in the Assembly of N. Y. State, have, after a full and patient investigation of the facts, reported unanimously in favor of the practicability of the enlargement of the Champlain Canal, to the capacity of ship navigation. Mr. Martin, in bringing in this report stated that the committee had concluded not to ask for an appropriation at the present time, and had recommended the postponement of the work until the communication with the St. Lawrence shall be established.—*News.*

TORONTO, SIMCOE AND LAKE HURON RAILROAD.—At the regular meeting of the Council of this City, held last evening, the question of the Toronto, Simcoe and Huron Rail Road was under discussion, with reference to the propriety of aiding in the construction of that important undertaking, by advancing debentures on the security of the road, to the amount of £100,000 bearing interest at 6 per cent, payable half-yearly,—the principal sum to be redeemable in twenty years. The discussion resulted in the adoption of the following resolution, which was moved by Alderman Bowes, and seconded by Councilman Ashfield, and *Resolved*—"That the second Report of the Standing Committee on Finance and Assessment, be referred to a select Committee, to consist of Aldermen Dempsey and Campbell, and Messrs. Thompson and Ashfield, with power to obtain the assistance of the City Solicitor, and report to this Council by bill or otherwise."

The object of this resolution is, to Report by Bill to the Council, for the advance of the proposed amount for the Railroad, with conditions upon which the proposed advance, in debentures, will be made; that the Bill, when so prepared, shall be submitted to the citizens for their opinion, before being finally passed by the Council.—*Colonist.*

AN INQUEST was held on the 7th instant, in the Township of Scarboro' before George Duggan, Esq., on the body of Kenneth McKenzie. It appeared in evidence that he had a cousin in Scarboro', William McKenzie, a blacksmith, whom he visited every Saturday, and returned to the city on Monday following. He left his house last Monday after breakfast and did not return. He put up at the Rob Roy Tavern. Yesterday, as James Jones and Richard Johnston were going through the bush to the plank-road, they saw him under a pine tree, as if he was shooting; one of them went over to him to ask what he was doing; when he got closer, found he was hanging to the limb of a pine tree, not six feet high, with his plaid scarf tied round his neck, and the other end tied to the limb of the tree. By appearance, he must have been hanging previous to the last storm, as his clothes were drenched with rain. He was a native of Argyleshire, and came to this country last summer. He was a sober, steady man. Verdict—That he hung himself in a fit of temporary insanity.—*Ib.*

QUEEN VICTORIA.—A pretty compliment was paid to Victoria at the celebration of the Athenæum, at Manchester, three weeks since, by the presiding officer, who said: "On all occasions she has consulted the welfare of her people; nor is she less admirable in private life. Her private life is remarkable; she is a good wife and a good mother. Her expenses has never exceeded her income; more than that, she has paid, and is still paying, the debts of her father, without asking for any assistance from the nation. Moreover, she has insisted upon paying the income tax, and is thus contributing to defray the expenses of the sale.

THE NEW POST OFFICE REGULATIONS.—We are happy to learn that the Bill now passed (if not already passed) through the New Brunswick Legislature, will perfect the preliminary conditions for the transference of the Colonial Post Office department from the Imperial Government to the several Provincial authorities. The Bill will be sent home with all speed, and the necessary arrangements for the transference completed without delay. It is absolutely necessary that this should be done on one of the quarterly days on which the accounts are made up. It is feared that it will not be possible to have every arrangement effected by the 5th of July, but on the 5th of October undoubtedly the transference will be completed, and threepenny postage thereafter the law of Canada.—*Globe.*

The late shower of flesh and blood which came off in Sampson county, is reported far and wide and exciting the especial wonder of everybody. We will venture a solution of the problem.

It is the habit of the Turkey Buzzark to overload its stomach with the proceeds of any dead carcass that may fall under its observation, and lay in a concatable state. On mounting into the air, finding the load too cumbrous, it disgorges a part of the same, and thus produces a shower of the kind described; real flesh and blood.

If the bones of some animal or animals, horse, cow or sheep, robbed of their fleshy covering, are not found somewhere not far from the scene of the shower, after a strict search, we recant the above and go back to point—"Dont know."—*Wilmington (N.C.) Commercial.*

SINGULAR AND FATAL ACCIDENT.—We learn that yesterday afternoon at the hour of the last relief of the guard at the State Prison, just as the men were about to leave the Eastern Guard House, Charles F. Whiting, one of their number, leaned or rested his chin on the muzzle of his carabine, awaiting the moment to repair to his post, when by some unexplained accident, the charge entered his head, passing in at the chin or left corner of the mouth, producing almost instant death. The young man was of excellent character, much esteemed. He was about 23 years of age, in the bloom of life, and the stay and solace of his affectionate parents.—*Sing Sing Herald.*

A Smart Woman.—The *Grove Hill* (Ala.) *Recorder* states that in the country of Choctaw, a new one, created at the recent sessions of the Alabama Legislature, a woman was charged with murdering her husband, and employed a legal gentleman, whose name is not necessary to mention, to defend her, promising him two negroes as his fee. He undertook her defence, and contrary to the expectations of all she was acquitted; he called upon her for the negroes, when she gravely informed him that the negroes belonged to her daughter. Not relishing the idea of being cheated out of the negroes, he instituted a suit against her for perjury, which she defended and mulcted him for the cost! In a short time she gave birth to an illegitimate child, made oath that he was the father, and compelled him to enter into bonds for its support and maintenance, according to the statute.

The Bishop of Toronto is to leave for England on the 10th. The subscriptions for the Church of England University amounts to upwards of £20,000, in money, land, and Building Society Stock, besides 3000 acres of land, not yet valued.

TUMULT IN A COURT OF JUSTICE.—A tragic scene, of which the annals of justice offer few instances, occurred on the 22nd ult., in the court of appeal of Turin. The President was about to pass sentence on a band of seventeen murders, three of whom had been condemned to death, and the fourteen others to hard labor or imprisonment, when these convicts rose at a signal given by their chief, and attempted to disarm the carabineers seated by their side. A frightful tumult ensued. The judges and part of the auditory retired terror-struck, whilst the carabineers endeavored to master the revolters. A sergeant, finding himself closely pressed by one of them, named Vincenzo Artusio, shot him dead with a pistol. This put an end to the horrid struggle. Two other convicts were dangerously wounded, and one of them was not expected to survive.

Why are the Clergy Reserves and Rectories like a Kirk without a preacher?

Because they are open to the Ministry.

Why are the Clergy Reserves like the York Roads?

Because the *Price* has not been agreed to.

Why is the Quebec *Journal* like a colony without manufactories?

Because the best articles are got up at a distance.

Why is the *Globe* like the Custom House?

Because it is always open to the Inspector General?

Why is the *Provincialist* like a bad singer?

Because he can't bring out the notes.

We have it from the best authority that it is the intention of the government to leave the Clergy Reserves an open question at the next session of Parliament. The reasons assigned for this are that the Hon. Mr. Lafontaine and the Canadian members generally, refuse to support a ministerial measure in the matter, because, as they say, the Catholic Clergy in Lower Canada, have similar endowments, and consequently it would be a bad precedent. It is understood that Lord Elgin agrees in opinion with Mr. Lafontaine, and there are rumors of Mr. Price resigning. What saith the *Globe?*—*Daily Express.*

The Grand River, in this vicinity, has risen to an immense height. The flats are covered in some places to the depth of three or four feet with water. Portions of the canal bank have given way, but nothing as yet to any extent. Great fears are entertained for the little Bridge, and the piece of road between the two bridges, in West Brantford, owing to the great current and pressure of water. A part of the road, we are informed, is already going, and in all probability, before morning unless something is done to prevent it, road and bridge will be among the missing. Several families living on the flats, had to make a quick retreat.

Since writing the above we are informed the river is still on the rise, and fears are entertained of much damage being done.—*Brantford Cou.*

WELLAND CANAL.—The Navigation of the Welland Canal fairly opened last week, and we hope soon to see this "silent highway" fully occupied in the conveyance of produce from one Lake to another. The *Welland*, Captain Smith, sailed from this port last week for Port Stanley and the *Brunswick*, Captain Fortier, for Bear Creek. On Easter Monday our enterprising shipbuilder, Mr Shickluna proposed to launch a fine schooner he has just completed, but to the disappointment of the public, some obstruction prevented her gracefully gliding into her natural element, and the launch did not take place at the hour appointed.—*St Catherines Constitutional.*

LOUIS PHILIPPE'S NEW WORK.—The politicians are looking with some anxiety for the appearance of a work in four volumes, from the pen of Louis Philippe. It is to be entitled, "Eighteen years of Royalty," and will doubtless contain many new views of persons who have figured prominently on the political stage in the last generation.—*Globe.*

A country clergyman being opposed to the use of the violin in the church service, was, however, overruled by his congregation, who determined upon one. On the following Sunday, the parson commenced the service by exclaiming in long-drawn accents, "You may fi-d-d-l-e and s-i-n-g the 40th Psalm."

THE REPUBLICAN PARTY.—"The Toronto *Examiner* has declared is determination to place itself in the opposition ranks, and to create a new party, of which, according to the Toronto Correspondent of the New York *Tribune*, the Hon. M. Cameron and Dr. Ralph will be the leaders."

It is thus that the Liberals of Upper Canada advance to their own ruin and to the triumph of their enemies.—*Journal de Quebec.*

St. Paul, Minesota, is said by the Pioneer, to have at present, a population of 800. The head of navigation on the Mississippi is 17 miles above it at St Anthony, the town near the Falls of that name. The original name of St. Paul was "Pig's Eye."

BRANTFORD PRODUCE MARKET.

Wheat	3s. 9d.
Barley	1s 10½d
Peas	2s. 0d.
Oats	1s. 0d.
Flour per barrel	18s. 0d.

A sale of 5,000 barrels of Four was made on private terms during the week for the New York Market.

Dr. Wistar's Balsam of Wild Cherry,

Is a chemical extract of Wild Cherry and Tar. Every body knows that Wild Cherry possesses important medicinal properties; and Tar Water has always been administered in *consumption and lung affections* generally, by our oldest and safest physicians. Various remedies, it is true, have been offered and puffed into notice for the cure of diseases of the lungs, and some have no doubt been found very useful, but of all that have yet been discovered, it is admitted by physicians, and all who have witnessed its effects, that none has proved as successful as this. For *Asthma, shortness of breath, and similar affections*, it may be pronounced a *positive cure*. It has cured Asthma in many cases of ten and twenty years standing, after physicians had declared the case beyond the reach of medicine.

This Balsam is made from materials which Nature has placed in all northern latitudes, as an antidote for diseases caused by cold climates.

Nature is but the name for an effect
Whose cause is God.

None genuine, unless signed I. BUTTS on the wrapper.

For sale by E. W. Palmer, Market Square, and Chas. Brent, Princess Street, Kingston.

Arrivals in this City.

ARRIVALS AT KENT'S BRITISH AMERICAN HOTEL.

JAS. LINTON,
A. B. & Q. C.

Kingston, April 8, 1850. 85

SOMETHING OF A MYSTERY.—In September, 1847, Dr. Oliver Reynolds, of Webster, in this county, while on his way to Buffalo, was robbed of his pocket book and contents. It contained in notes some three or four hundred dollars, about 20 dollars in money, and sundry papers, among which was a certificate of membership in the Toronto Lodge. Yesterday he received all his notes and other papers, including the certificate, which furnished the robber with Dr R's address, in an envelope from Germany. The only loss was the money, which the robber took to pay for his trouble. We recollect advertising Dr. Reynolds's loss at the time; for he was not certain that he was robbed; and from that day to this, he has got no clue as to the manner or precise time that his pocket was picked.—*Roch. Daily Adv.*

By Magnetic Telegraph.

Last Night's Report.

MONTREAL, April 11, 7 P. M.

Nothing commercial to report. Business quite at a stand, pending the opening of the navigation. The Richelieu is clear of ice, and the steamer *Oregon* has arrived at Chambly from Sorel.

SIR JOHN FRANKLIN.—*From the New York Commercial Advertiser.*—We are indebted to Mr. John Randolph, fur merchant on water street for the following information, forwarded by his agent as correspondent at Saint Paul, Minesota Territory:—"Saint Paul Minesota, March 12.—A dog train arrived here yesterday from some distance above Lake Superior, brings news that an American vessel had been seen by some of the Indians, and had sent letters saying that Sir John Franklin was found; the particulars I cannot learn, however, they say he is safe. The writer of the letter is a brother of Mr. Randall, and we have seen the letter containing the intelligence. Both are gentlemen of high respectability. He writes by every mail, so that we have, thro' his letter, the most recent news. Our former advices from Saint Paul were to the 6th March. The dog train mentioned some 10 days ago, as being arrived at Saint Paul, was from Selkirk settlement, which lies quite in another direction from Lake Superior."

A private letter states that the Jane Brown had sailed from Liverpool for Quebec, and had put back.

No report from New York. Line down between Toronto and Buffalo.

Announcements of Births and Marriages are not inserted unless duly authenticated and paid for.

THOMAS BROWN,
Boot and Shoe Maker,
Princess Street, Kingston.

RETURNS his sincere thanks to his customers and the public in general, for their patronage for the past year, and at the same time respectfully informs them that he has enlarged his shop and is now prepared to execute all orders entrusted to him, on the shortest notice and on the most moderate terms.

N.B.—A large stock of ready made Boots and Shoes, of every description, for mens women, and children, kept constantly on hand, which he is determined to dispose of *cheap for ready cash.*
