FLAX, HEMP, JUTE AND RHEEA FIBRE.
Prepared without Scutching
BY
J. Hill Dickson's Patent Portable Machine
To be worked by
HAND, WATER, OR STEAM POWER.

117 Gt. Dover Road Boro, London.

THE advantages and economy of using GREEN FLAX STRAW by Stronger and Finer fibre than Cotton, Silk, Worsted, or Flax Spinning Machinery, retting or steeping in either Cold or Hot Water (which process frequently by over 50 per cent.) produces as much Tow, as long Fibre, and the following facts, respecting a ton of Green Flax Straw, will show the saving of Tow and Waste:

1st.—The seed bolls or husks can be removed in the field, and the flax is pulled, by projecting rollers that are upon the machine, only about six inches of the top of the straw, and down between them to break the seed bolls, without crushing or injury to the seed, or taking any portion of the fibre.

2nd.—The wood inside the fibre is so crushed and ground into dust when land on the machine table, which admits of such a light beating as that whether the Flax Straw, Rotted in water, the woody and dusty substance is all rid of without scutching, and the (so called) hurl of the fibres are so perfectly broken into tow, that they are ready for the row ribbons. Flax spinners are certain of this great improvement in preparing tow. Waste can be seen, and as a consequence gain of fully one-third, more than the weight of flax straw than by any other system known, see report of Messrs. Marshall of Partington & Leeds, taken from Society reports and copied at length in the work of Dixon on the Fibre, Plants of India, &c., &c.

3rd.—The Flax and Hemp fibre is left on the wood, covered over with a mucilage, which is made perfectly soft and pliable by a simple run of Hot Water, as soon as it is through in a few minutes, the whole secret of the invention, and then washing and beating means the horse are stronger and more durable for the Flax Spinners, than any other yarns from it will be nearly white, without any chlorine or acids to injure the strength, and all this without boiling.

4th.—It very fine quality of Tow for Silk or Worsted spinning is a valuable part of the Machine must be given to parties purchasing the machine, as it is to be best Courtrai, Flax at a cheap rate to be produced, and practical information given to parties purchasing the machine, by the inventor and Patentee.

RIP VAN WINKLE
Mining Company.
CAPITAL $100,000.
IN
SHARES OF FIVE DOLLARS EACH.

THIS Company has been formed for the purpose of working a valuable

Lead Mine

discovered in the Third Concession of the Township of Marmora. Excellent water power on the Lot, (one hundred and twenty-five acres), sufficient to work a crushing mill and to do any pumping required, with an unlimited supply of wood in the immediate neighborhood, give this Company advantages possessed by few Mining Companies in the Province, while the great and increasing demand for Lead ensures the Company large profits on its outlay.

The Company will take out Lead Ore during the Winter and in the Spring, and will erect a Crushing Mill and Furnace, for the purpose of supplying the Province with Pig Lead.

Specimens of the Ore may be seen for a short time at the Office of Thomas Wilson, Esq., opposite the Post Office, Kingston, where Shares may be taken by those wishing to participate in the rich returns confidently anticipated by the Company.
