TO ARCHITECTS.

THE Mayor, Aldermen and Commonalty of the City of Hamilton, hereby give notice that it is their intention to have erected, in their said city, public buildings for the purposes of a chief and general Market, together with Council Chamber, Public Offices and Halls, the cost of the whole not to exceed the sum of £30,000, and that plans for the same will be received on or before the 1st March next. As an arrangement for the proposed buildings, it is suggested, that those for the Market block shall consist of an Arcade, extending from the present market-place to Merrick street, with Public Halls at either end, having Shops or Stores underneath, the object being to render the project as remunerative as possible, having in view, however, a commodious and well arranged Market. Competitors are, nevertheless, to exercise their own taste and judgment, as to the arrangement of buildings and the character of the design. The spare ground, not required for market purposes, to be appropriated for Shops, such Shops to form part of a general design in connection with the public buildings, but not to be included in the general estimate.

The Council Chamber and public Offices to consist of a separate building, with Bell and Clock Tower, having a front on James street and another on the Market-place.

The whole to be substantially built of Stone or white Brick, faced and ornamented with Stone.

A plan of the ground, for the site of the buildings, will be seen at the Office of the City Engineer.

Competitors will inscribe on their plans a motto, and an envelope with same motto on the outside, containing the name of the Competitor, to be addressed to the undersigned.

The following premiums will be given for the three most approved designs:

First,	£125
Second,	75
Third,	50

REAPING & MOWING MACHINES,

R. & R. S. PATTERSON,

Manufacturers, Belleville.

THE Subscribers would respectfully inform the public, that they are engaged largely in the manufacture of Agricultural Implements, at the head of Main Street, Belleville, C. W., near the Railroad depot.

We would call particular attention to our Combined Reaping and Mowing Machines, which we confidently recommend to the public as possessing greater advantages for Farmers than any other machine yet introduced, among which we would enumerate, its perfect adaptation to uneven surfaces; its means of adjusting to various heights of cutting; Its freedom from side draft; the ease and facility of removing it from one field to another upon its own wheels, and changing it from a reaper to a mower. It is simple in construction, and not liable to get out of repair; is capable of cutting from 12 to 15 acres per day, and the grain is discharged in good shape for binding, entirely out of the way of the machinery—which admits of a whole field being cut without interruption. We use the very best of material—employ none but experienced workmen; and any person disposed to give them a trial, can depend upon having a durable machine, and one that will work to their entire satisfaction.

We are also manufacturing Thrashing Machines from one to eight horse-power, with or without cleaners, either under or over shot, of the best description; and a general assortment of Agricultural Implements;—together with a complete assortment of, and most other articles pertaining to a general Foundry business.

We keep a large stock constantly on hand, and intending purchasers will find it to their advantage to call and examine our implements and prices.

☞ All orders promptly attended to

R. & R. S. PATTERSON.
