To the Electors
—OF—
CATARAQUE DIVISION.

GENTLEMEN,—

The writ for the election of a Member to represent Cataraque Division in the Legislative Council has issued, and the nomination will take place almost immediately.

Having been solicited by requisition from many of the most respectable and influential inhabitants in the constituency to come forward as a Candidate, I consented, and have been in the field since January last.

Having been born in the Division, and having lived amongst you nearly all my life, I have the pleasure of knowing very many of you personally, and most of you by reputation. On several occasions you have done me the honor of electing me to positions of public trust, and have had the kindness to intimate, that, to the best of my ability, I endeavored to do my duty. Nearly all I am possessed of is vested in the Constituency, and all my sympathies are bound up in it; therefore, no less my advantage than my gratification may be taken as a guarantee, that I will strive faithfully and energetically to fulfil my trust, should I become your representative.

The test for a Lower House Candidate should strictly be those political questions which may happen to occupy for the time the attention of the public, the probabilities being, that when these questions are disposed of, or even before, he may be required again to appear before his constituents; but it is different with the Upper House.

By our Constitution the Legislative Council was intended to act as an arbitrator between the People and the Crown—to moderate the exactions of both, and reconcile their differences as far as possible. The members were chosen for merit, vested interest in, and devoted attachment to their country—the partisan spirit was not intended to be its governing element. And for the purposes of carrying out this intention as fully as possible, the qualifications and elections of members to the Lower and Upper House have been made as different as possible. For the former, the candidate need be possessed of only £500 of real estate, situated in any part of the Province: the latter must have at least £2000 of like property, located within the Division which he desires to represent. He must be at least 30 years of age instead of 21, as for the Lower House. He is elected for eight years instead of for four years; and different Lower House constituencies, or parts of constituencies, are amalgamated for the purpose of returning a member for the Upper House, in order that the prevailing influence in any one constituency shall not be permitted to overrule the others. If both Houses were to be partisan, the greatest danger would exist of their constantly coming in political antagonism with each other. Or, if the composition of both Houses was intended to be the same, why the necessity of the two? Let those who desire advancement, as the would-be representatives of a mere sect or clique, go to the Lower House—the legitimate arena in which their merits will be appreciated and their partizanship be recognized—but let them not obtrude such unseemly strifes upon the Upper House.

However, it is the duty of a Candidate for the Legislative Council to give expression to his views relative to the various political questions, for the time being, before the public, and this I unhesitatingly have done and shall do at the various public meetings which I have held, am holding, and shall continue to hold, throughout the Constituency.

But as I have not been enabled to canvass the Constituency as thoroughly as I desired, and as many of the electors may not find it convenient to attend the meetings yet to be held, I beg to say that my views with respect to the political questions at present before the public are—

That I cannot but strongly disapprove of the conduct of the present Ministry in returning to office by means of a legal stratagem, thereby evading an appeal to their constituents for approval.

I shall urgently advocate an abolition of the monopoly of the Hudson's Bay Company.

I am in favor of Representation by Population, but believe that in order more effectually to obtain this desirable result, that the endeavor should be to accomplish it in a conciliatory, equitable, and practicable manner.

So likewise with respect to the Common School question; I am of opinion that through the instrumentality of a Legislative Commission composed of the ablest, least prejudiced, and most practical men of the country, that a system of public instruction might be devised which, while it would further the great object of Education, would be acceptable to all classes of the laity, and would be unobjectionable to the clergy.

I shall, as I always have done, urge a Protective Tariff for Canadian Mechanics.

And as the question of the Seat of Government has been declared an open one, I shall continue my endeavors to have Kingston made the Metropolis.

'Canada,' our beloved country, my native land, shall be my motto; and I respectfully point to my past public actions as a criterion to judge of my future conduct, should I be elected your representative in the Legislative Council.

I am, Gentlemen,
Yours faithfully,
O. S. GILDERSLEEVE.

University of Queen's College.

THE Seventeenth Session of Queen's College will begin on the first Wednesday of October (6th October) 1858, at which date all Intrants and regular Students in the Faculty of Arts are required to be present.

The Divinity Classes will be opened on the first Wednesday in November.

Candidates for matriculation as regular Students of the first year will undergo an examination before the College Senate in the first three books of the Æneid of Virgil; the first three books of Cæsar's Commentaries; Mair's Introduction; the Greek Grammar; the first book of Euclid; and Arithmetic, as far as Vulgar and Decimal Fractions, and the Extraction of Roots, inclusive.

The only charges are £1 for Matriculation Fee; £2 for each class per session, to be paid on admission to the classes; and £1 additional in the Natural Philosophy Class, for expenses of apparatus.

Each student on entering must produce a certificate of moral and religious character from the Minister of the Congregation to which he belongs.

Intrants becoming candidates for Scholarships will be required, in addition to the ordinary Matriculation Examinations, to undergo an examination on the Greek Grammar and the first ten chapters of the Gospel of John. For students of previous years the subjects of examination for Scholarships will be those prescribed at the close of the session.

THE PREPARATORY DEPARTMENT, or College School, will be conducted as usual, under the charge of competent Masters.

The fees in this department are as follow:

TRUE TIME.
AMERICAN WATCHES.

These superior Watches are made by the aid of new and original machinery, expressly designed to secure *with a low price,* a fine substantial and uniformly reliable time-keeper. The movements are new in construction, have been pronounced by the highest authorities to be faultless in principle and quality, and have been proved by the most exacting tests to be unfailing in action. These watches are made entire from the crude materials, in a single establishment, by connected and uniform processes—the factory being organized upon the same system that has been adopted in the production of the unequalled American fire-arms,—which enables us to produce a movement at one-half the price of a foreign movement of the same quality. Each watch is carefully tested, and is accompanied with the maker's certificate and warranty for TEN years.

All foreign watches are made by hand, the American watches being the only ones made by machinery upon a uniform system throughout. Nearly all hand-made watches are defective, and are continually getting out of order. In many parts of the country it is impossible to find good watch repairers, and watch repairing is always uncertain and expensive. The introduction of American watches disposes of this difficulty, and country merchants, as well as watch dealers, can keep watches as a part of their miscellaneous stock, and thus supply their customers with a new Staple, which may be used as any other article, without mystery or humbug. Sold by the trade generally.
