ISPA Woodworking of Georgetown received an incentive cheque worth more than \$42,000 from Halton Hills Hydro. Pictured above (from left) are: ISPA business development manager A.J. Sparkes, health & safety co-ordinator Stu Wilson, vice president Linda Soules, Halton Hills Hydro president & CEO Art Skidmore and conservation & demand management officer Linda Boyer.

Company gets \$42,000 incentive to conserve on its hydro usage

A Georgetown company that struck up a partnership with Halton Hills Hydro to retrofit its interior lighting systems was rewarded for the conservation efforts with an incentive cheque for more than \$42,000.

ISPA Woodworking, which manufactures quality custom millwork and store fixtures for major retailers across North America, took up the local utility's offer to retrofit three different projects in early 2013 and the move resulted in a reduction of electrical consumption of close to 120,000 kWh per year.

The Armstrong Ave. plant's compressors were also replaced with more efficient models and that project qualified for funding incentives totaling 50 per cent of the installed cost of the system. Electricity savings of almost 275,000 kWh a year will pay for the project in less than a year.

"Conservation and demand management is not only good for the environment, but it makes good business sense," said Art Skidmore, president & CEO of Halton Hills Hydro.

"Companies such as ISPA receive incentive payments that help offset the initial in-

stallation costs of retrofits and the annual energy savings have a direct positive impact on the company's bottom line."

Funding for the incentives comes from Halton Hills Hydro under the Ontario Power Authority's (OPA) saveONenergy program.

Skidmore noted that the incentives have been available to local firms since 2007, yet few have taken advantage and many others aren't even interested in learning about the potential financial benefits of entering into a partnership.

"ISPA believes that showing leadership in the fields of environmental and social responsibility pays huge dividends in the long run; not only in terms of direct cost savings, but also taking into account the value added to the community at large, by acting as responsible role models for future generations of business leaders," said Stu Wilson, ISPA's health & safety co-ordinator.
