

Friends of the Library buys painting, seek funding for other projects

The Friends of Halton Hills Public Library have purchased local artist Margaret Carney's painting "La Grenouille," which features a large bullfrog, to watch over the children's department on the main floor of the George-

town Branch.

"This painting fills the children's area with colour as a sombre bull frog surveys the library. The Friends of the Library thought he was a perfect fit and happily voted to purchase the painting," said Friends Chair Mark Rowe.

In addition, the Friends are hoping to raise enough money to continue their sponsorship of other valuable Library projects including One Book, One Halton Hills and Ink Writing. Their sponsorship of the One Book, One Halton Hills, which is currently in its fourth year, has in previous years brought award-winning authors Judy Fong Bates, Terry Fallis and Dr. Vincent Lam to Halton Hills.

The Friends' sponsorship of the Ink Writing program has provided prizes for this writing and illustration contest for children and teens.

The Friends are also raising funds for the proposed Acton Branch Reading Deck. The estimated cost of the reading deck, complete with outdoor furnishings is \$50,000. This beautiful outdoor area will allow patrons to sit outside and enjoy the natural surround-

ings while reading a book or magazine and enjoying a coffee.

The Friends raise money through membership, donations and from their use book kiosks located within both Branches. The Friends fundraising goal for 2014 is \$6,000.

**COMMON QUESTIONS
ABOUT TINNITUS - PART 2**

DO WE KNOW WHAT TINNITUS IS?

The actual cause or event or mechanism of Tinnitus is not known. We know it is real; it is a symptom that something is wrong in the auditory system, but we do not know what that something is. We do know that it is not the patients imagination; it is a physiological or neurological event. There is reason to be hopeful because current research using a Tinnitus model may provide the necessary information for identifying it's cause.

IS IT ASSOCIATED WITH HEARING LOSS?

In most cases, Tinnitus is associated with some hearing loss. For example, those who have been exposed to excessively loud sounds may have a hearing loss for the high pitched tones. Usually their Tinnitus will be located as a high pitched tone in the region of the hearing loss. In some cases Tinnitus is present where there is no hearing loss and for no discernable reason.
