FIFE'S SPRING WHEAT.

Osnabruck, Colborne District,
To the Editors of the Agricultural.

MESSRS. EDITORS,—One of our farmers having been so fortunate as to introduce a new kind of wheat into this township, of which a brief notice was given in the Gleaner some 12 months ago—I took a more full account of it, may not be unacceptable to your readers, on from its tendency to resist the effects of rust, and the adaptation to the black soil—I imagine very be known to be extensively cultivated and highly valued.

Eight years ago Mr. David Fife having heard about to revisit Scotland, requested it an opportunity occurred, that he would forward to his brother a small quantity of wheat from some of the northern parts of Europe. On landing at Glasgow—a distance of nearly 600 miles—having procured a portion, he sent it to Mr. Fife who sowed it the spring following, and in course of various kinds, as might be expected and the whole was affected by rust, except this variety, of which there was but five ears, and two of them were destroyed by pigeons, yet from the remaining three ears he reaped the third year, half a bushel—from the produce of this he supplied some of his friends with a few bushels, and it began to be noted for our vicinity, and was plentiful. Next year the Agricultural Society introduced the Club wheat as a change of seed, which being sown along side of the new wheat in many instances, and the latter being reputed as to be worthless, which the latter was not the best equivalent established of became so reputably that last spring the Agricultural Society thought it advisable to purchase 200 bushels to distribute amongst its members, which should be taken out of the society, and the principal holder of the wheat offered to take back from two dollars a bushel for that part was given by the Society, and more than twice as much to the neighbouring townships on the same terms, many people applying back in vain.

It will be a little of which being 8 or 10 days behind the Club or Rhoden, of which at the same time, but this spring farmer has not sufficed it as well on the soil, but on low black soil, as also and any similar place not too wet for wheat to vegetate, a favorable soil, and the wheat yellow appearance confirms the application of "The Golden Grain" as also applied to wheat, although perhaps some of your readers may think that the price paid, he gives its name chosen to this title.

A sample of the wheat shown by Mr James Fife obtained a prize at the Provincial Exhibition last year, and a specimen will accompany this letter, together with an advertisement, which, by your giving publicity to, will oblige

Your obt. Servant,
HENRY LAWRENCE.

Sec. Gleaner & Agricultural Agt. Society.
Osnabruck, 1839.

A few bushels of the above Fife Wheat will be found for sale at Chisholm's Tough Factory, Princess Street.

Kingston, April, 1839

TREES, SHRUBS, &c.

SPRING, the best season for transplanting the most hardy trees, shrubs and ornamental trees, has arrived; and the subscribers would inform the public that they have for sale a large and the most choice varieties of FRUIT TREES, embracing nearly all of Mr. Thompson's select lists, and those recommended by the Congress of Fruit Growers, for general culture.

Their Nurseries, embracing over twenty-five acres, are situated on Twelve-mile Creek, two miles east, but little over half a mile east of the Rail-Road Depot.

They have a large stock of extra sized trees of all the fruits, except the Plum, than in any Nursery in Western New York, and feel confident in claiming superior hardiness and adaptedness to the climate of the shore of Lake Ontario, exposed to its winds, at a point further north than any other extensive Nursery in the states; and would also claim superior value in their trees, not from their being and exposure only, but from the fact that they them more rich to the Nursery than other trees grown, thereby rendering them more stocky. They have a large stock of pears on standards, at a lower price than usual, viz. Bon Chretien, Bloodgood, Bartlett, Seckel, Duchesse d'Angoulême, Louise de Bonne, Beurre d'Amalis, Beurre Bosc, Beurre Diel, Beurre Gris, Beurre Rance, Beurre Blanc, Beurre Noir, Beurre Bretonne, Beurre Ronsalet, Beurre Sterkmans, Beurre Superfin, Beurre Van Mons, Beurre Wilkins, Beurre Wilmot, Beurre Worsley, Beurre Zephirin, Beurre Zephirin Gregoire, Beurre Zephirin Gregoire Jr., Beurre Zephirin Gregoire Sr.,
