Fare from Ogdensburgh to Montreal $3
" " " Boston $5
" " " New York $7

No Charge for conveyance of baggage from the Steamboats to the Cars, or from the Cars to the Steamboats, on this Route.

Arrangements are now being made for a Through Route by Railroad from Ogdensburgh to New York, via the Valley of the Connecticut River, by which passengers can reach New York in one day from Rouse's Point—the route to be open of the Ogdensburgh Railroad.

A new and complete route is now open to the Travelling Public, by which passengers destined for Boston or New York or Montreal, can have an opportunity of passing through a portion of the country, heretofore shut out from the Traveller for want of proper Railway communication from Lake Ontario to the seaboard. This connection is now formed by the completion of the Ogdensburgh Railroad, (110 miles) and two Lines of Rail from Lake Champlain to New York and Boston. (For a more particular description of all these routes see advertisement in another column.)

As a new Route to and from Montreal, and from Canada West to Boston and New York, the Ogdensburgh Railroad and its connections, presents many objects of interest to Canadians at this time, more especially to those who are interested in the movements now making to give Canada West the advantages arising from a carefully arranged system of Railway communication between Lake Huron, Lake Erie, Lake Ontario and the Atlantic Cities of the United States.

By taking the steamers at Hamilton, Toronto, and the Canadian Ports on Lake Ontario, passengers can be conveyed to Kingston, Brockville or Prescott. At Kingston, the United States Steamers touch on route to Ogdensburgh, connecting with the Branch Line from Hamilton. A Ferry Boat plies between Prescott and Ogdensburgh daily.

Travellers desirous of examining the method of connecting Railways in the United States, can have an opportunity (by taking the Boats crossing at Ogdensburgh in the evening), of viewing the Ogdensburgh Station Grounds, (60 acres in extent,) the Bridge, 4,400 feet in length; the large Passenger and Freight Houses, (the Grain Warehouse and Steam Elevators now in progress of construction;) the Engine Houses and Machine Shops, and leave in the 10 o'clock, A. M. Train, which arrives at Rouse's Point, for dinner at 3 o'clock, P. M. The Steamboats bound north, for Montreal touch Rouse's Point, take their passengers at 7 o'clock, P. M., thus giving Travellers four hours to examine the vast warehouse (300 feet long by 104 feet wide, built on a pier in Lake Champlain,) the Machine Shops, Car Houses, Engine Houses and the Bridge, now connecting on the Vermont and New York side of the Lake.

The 8 o'clock, P. M., Train and Cars leave Rouse's Point for the evening Boats from Kingston.

Parties on pleasure, during the summer months, after visiting the Falls of Niagara and the Saspension Bridge, if proceeding to Boston or New York, will view some of the most magnificent Mountain, Lake and River Scenery in any part of America, when (via Ogdensburgh) passing through Vermont, New Hampshire, Massachusetts, the Valley of the Connecticut River, and the River Hudson.

The Ogdensburgh Railroad Company, anticipating this being the Great Channel to the Atlantic Seaboard for Canada West, on the most direct, expeditious and cheap route, invite the attention of all interested in the Commercial and General prosperity of the important section of the British North American Colonies, to a careful examination of all the facilities afforded by the Road and its connections, when it will be found that there have in view the most rapid and favorable channels through which to develop the Canadian trade.
