HASELMAYER, the Illusionist, in the City Hall this evening at eight o'clock. Matinee in the afternoon at 2:30.

SALE of Colts, imported stock, at Wm. Murray's, this morning at eleven o'clock.

SAIL BOAT REGATTA at one o'clock this afternoon.

For the BRITISH WHIG.

An Excursion in the North Country.

(Concluded.)

Having finished my business north of Mud Lake, I returned with gladness as far as Verona, where I turned westward again, and took the road to Bellerock,—not a very good one, I assure you, though by no means so bad as the one north of Mud Lake, and much improved in the last eight years.

In proper course I arrived at Bellerock, which as soon as I came in sight of I concluded should have been called "Poly-rock," for if the rocks are numerous in other parts through which I passed, they seemed to be greatly multiplied in this locality. The cause of this uncommonly rocky appearance is partly attributed to the fact that a larger extent of cleared country can be seen here than in any neighboring locality, and in looking a distance over the surface of the country the elevated rocks fill the whole range of vision, while the valleys of soil are hidden entirely from view.

Bellerock is another embryonic village struggling for existence, but possessing a vast advantage over Verona in the excellence of its water privileges. Even at this dry season of the year the stream furnishes abundant water to drive all the machinery of both the saw-mill and grist-mill. The village comprises, I presumed, between 20 and 30 houses, including a tavern and two small grocery stores: the buildings are all of wood. The chief attraction, and the life of the place, is the large lumber establishment carried on by Mr. Pomroy, who seems to be very enterprising and thorough in his business transactions, and, at the same time, very affable and agreeable in his manner. He has on hand at the present time an immense quantity of excellent lumber, of almost every description of size and shape required by builders, and I should suppose, at very reasonable prices, from the quotations given by him. After examining a very large and substantial barn which he has lately erected, Mr. Pomroy directed my attention to the various description of machinery in his saw-mill, and explained the several operations of cutting lumber for the market. Besides the inch boards, two-inch planks, house-flooring, siding, &c., made from the interior of the log, materials of not less use are manufactured from the slabs, broken pieces and the parts between knots, in stuff too knotty for any of the foregoing descriptions of market lumber. From these are made various kinds of fence pickets, laths for plastering upon, and staves and headings for flour barrels. Besides these he showed me a large quantity of basswood stuff cut in the proper shape and size to become frames for zinc washboards, and which have been ordered by a Mr. Chown, one of your own townsmen. Mr. Pomroy seems to be doing a thriving business, and has a very fine garden attached to his premises, but he does no like the place, for "Oh," he says, "the country is so rocky that this can never become a place of any importance." The village depends upon the lumber trade, and as the latter diminishes the former must decay, unless the flinty rocks shall yield a golden harvest to attract and enrich a more numerous population.

Had the method of clearing these lands, already hinted at, been strictly followed, they might have been much improved for agricultural purposes; hay and oats might have flourished in the valleys, and pasture and shade for cattle and sheep, given beauty and value to every wooded hill; and this sterile region, which is now literally good for nothing, might have turned out annually its thousands of fat animals, and exported its tons of butter, cheese and wool!

Could not our ingenious Government devise some means by which a better system of clearing, than the one now practiced, might be adopted, and thus protect millions of acres yet unsettled from that inevitable barrenness which must overtake them, under the present method of procedure?

Also our Government would do well to adopt more liberal distribution of our northlying lands to actual and intending settlers upon them. As not over one-third of the surface is really tillable soil, a sufficient number of acres should be included in their deeds to compensate the waste of rocks, and to put into the possession of each settler at least one hundred acres of real arable soil. Reserves of minerals and timber should not be placed upon them; for it is an inhospitable region, and the great object should be to induce settlers there; to retain our young men among us; two-thirds of whom it is estimated go to the United States, and to prevent, if possible, the thousands of emigrants that travel our waters from seeking a home in the favourable considerations of other reply. The agents holding out such prospects and Company will, of course, would warrant them in protectorate.—Hamilton lines for themselves and families unsettled forests of Canada.

BARNUM IN A MOUNTAINS.—Pe continue my observations no far-Mr. P. T. Barnum the road from Belleville out an engagment which amden furnishes nothing of in-ago to run a footmore the immense swamps of over tested at six o'clock, which one passes through leaving the little village.

VIATOR.

Ameliasburgh, Aug. 17th, 1868.

City Council.

A special meeting of the City Council was held in the Council Chamber on Thursday evening last. The Mayor and the following members were present:—Aldermen G. Brown, Henderson, Chown, J. Cunningham, Gibson, Sullivan, Kinghorn, T. Robinson, A. M. Brown and Gildersleeve.

The meeting was called for the purpose of passing a by-law to impose a tax of 1½ cents on the dollar for the present year.

The Clerk informed the Council, before proceeding to business, that he had received a summons in the Court of Common Pleas from the County of Frontenac against the City.

Members stated that the affair was already in the hands of the Finance Committee, and consequently no action was taken.

The Council went into Committee of the Whole, Ald. Gildersleeve in the Chair, when the by-law was read, passed clause by clause, and adopted.

Upon motion of Ald. Kinghorn, it was resolved, that Mr. W. P. Minnes be Collector for 1868, and that this appointment form another clause to the by-law.

Ald. T. Robinson handed in a petition of J. Austin, to erect a sign, which was granted on the usual conditions.

On motion the Council adjourned at twenty minutes to nine o'clock.

LETTER FROM MONTREAL.

MATTERS AND THINGS AT MONTREAL—GREAT CROWDS OF AMERICANS—THE NEW HOTEL—THE FALL RACES, ETC., ETC.

Montreal, August 20th.

Matters and things at Montreal have assumed the most lively aspect. This is the time of the pleasure season and pleasure travel, and every body seems to understand it and operate accordingly. Never was there such a season known as the present at Montreal, as well as at all the other resorts on the great American summer tour. This is a beautiful city, and all who come here once come again when they can, and bring all their friends with them if they can. To Americans this is a place of unusual interest. It is much like going to Europe by railroad, and presents the same features of many European cities.

Americans are pouring in here this season en masse, and after stopping and seeing all that they desire, they continue their peregrination down the River St. Lawrence to Quebec, the River Saguenay, Cacouna and the watering places on the lower St. Lawrence.

Henry H. Hogan's new hotel will probably be commenced upon in a few weeks. This hotel, when finished, will be one of the finest in the country, and fully equal to the great Fifth Avenue Hotel, New York. It will be furnished with all the modern improvements and conveniences which are conductive to health, pleasure and comfort.

The fall races of the Montreal Turf Club commenced yesterday at the Longueuil Race Course. They were well crowded, and a grand time was enjoyed by all present. The various routes from here to Longueuil presented the most lively appearances. The hurdle race, two miles, over 8 hurdles, 3 feet 6 inches, 11 stone, was won by Starlight in 5:18¼, Warwick having struck his hind legs on the top bar at the second hurdle, and caught a heavy cropper, throwing the jockey over his head, but not injuring him very badly.—Many fine horses are entered for the races to-day, and high sport is anticipated. Many ladies were in attendance yesterday, and their flashing eyes during the heat of the contests told whether they knew anything about racing or not.

Yours, &c.,

ALONZO.

Some of our contemporaries are freely discussing the merits of the gentlemen mentioned as probable successors to Messrs. Blair and Howland. The names of Mr. Morris, Mr. Walsh, Mr. Shanley, Mr. Burton, and Mr. Carling, are used in connection with these officers, but it is quite possible that none of these will be selected.

The silver movement has next exploded at Chatham, and silver is once more taken at par. Which will be the next place to drop out of the line? The London Free Press, commenting on the collapse of the Hamilton movement offers the following sensible suggestion:—

'Doubtless the discount is a great inconvenience and heavy loss to the retailer, but the public who get bills and make the discount, have so long had their own way and profited by the arrangement, that they are hard to control. The only plan now open to the Hamilton storekeepers is to mark their goods in payment in silver, and when a customer tenders a bill to give him the discount. The public will therefore no longer be gainers, and the trade there will thus be enabled to protect itself.'

The Minerve very earnestly and repeatedly advocates the construction of the canal to connect the Georgian Bay with the Ottawa, from which we infer that Sir Geo. Cartier favors it. In Sir George the project was a formidable ally. The leading London papers are calling the favorite attention of British capitalists to the Ottawa canal; and, probably, if the enterprise were properly brought it would meet with favor among them. It would undoubtedly prove highly remunerative, for a very large share of the grain of the North-West intended for Europe, would naturally come by it, as the shortest and cheapest route.

The Duck Question.

DEAR WHIG—

You were right as usual on the "duck question." I had the pleasure yesterday of eating at a gentleman's table of a young black duck, and if ever a black duck was in perfection for eating, or, as you say, "fit for the table," that one was. After dinner I took occasion to question the cook about it (I said nothing to mine host pro or con), and she assured me that it was a young black duck. I should mention that there were two pieces on the table, "of the same sort." If "Rideau" of the News, has never been able to bag such game he must be par excellence a "flapper" sportsman.

Yours, &c.,

ONE WHO KNOWS.

August 13th, 1868.

Advices from England by mail says that the harvest weather continues brilliant, wheat was of a first rate quality and condition, and the yield ample. Wheat had fallen in price ten shillings per quarter in ten days. Vegetables generally were scarce and dear.

The water in the Carillon and and Grenville canal is so low that steamboats of light draft find difficulty in getting through.

The transport department of the Admiralty have chartered the ship John Bull for the conveyance of Government stores to Canada.

The Irish Canadian endorses the proposal of a correspondent to collect a fund to fee counsel to defend the Fenian prisoners at Ottawa, styling it 'a patriotic suggestion.'

The Halifax Citizen recommends the Agricultural Societies of its Province, to send representatives to the Ontario Provincial Exhibition, report upon the stock raised in this Province, as compared with that of Nova Scotia. The idea is a good one.

The annual meeting of the Brockville and Ottawa Railroad Company was held on the 12th inst. The following gentlemen were elected Directors for the year; J. G. Richardson, H. Abbott, A. B. Dana, J. W. B. Rivers, R. P. Cooke, A. M'Arthur, and B. Rosemond, Esqs. John G. Richardson was elected President and Managing Director, and W. B. Worsley, Secretary and Treasurer.

Belleville has a new Elevator which has just been erected by Messrs. Simpson Brothers. The building is 38 feet by 85, and 30 feet high. It has storage capacity of 45,000 bus., and will load a vessel with 8,000 bushels in four hours, or at the rate of 2,000 bushels an hour.—Under the ordinary system of loading grain it usually takes 24 hours to load a vessel. The building cost about $4,000.

FROM HALIFAX.

Proceedings of the Legislature.

Halifax, N. S., Aug. 20.

When the House opened at 3 o'clok, the debate of the resolutions was resumed.

Mr. Blanchard spoke another hour, chiefly on the finances. In summing up, he said Nova Scotia gained $740,000 last year by Confederation. The antis had made calculations on the basis of increased revenue figures. He showed the revenue had fallen of.

Mr. Troop replied that Mr. Blanchard's statement that the delegates abandoned the House's resolutions were laid on the tables of both Houses of the Imperial Parliament on the 10th June. He was confident that continued constitutional agitation would gain repeal. Nothing but Imperial coersion will keep Nova Scotia in the Union. As spoke an hour and a quarter, and will continue to-day. The galleries were well filled. Considerable 'anti' feelings was manifested.

The Dominion authorities tried to negotiate for the Provincial building. The Government positively refused to give them up. Some local department will take possession.

Mr. McDougall and family left this morning for home.

BY ATLANTIC CABLE.

Sugar duties—Crisis in the Spanish Government—Threatened renewal of the troubles in Bulgaria—Yacht race.

London, Aug. 18.

Soon after the arrival of the American yacht Sappho at Cowes, the captain issued a general challenge to the yachtsmen of England for a race. The challenge was immediately accepted by the following named yachts:—Aline, Cambria, Onoura, and Condor. The race, which will be for sweepstakes of £20, will occur on Friday next.

Atterdam, Aug. 19.

Representatives of France, Holland, Berlin, Prussia and England are now assembled at the Hague for the purpose of holding a conference, looking to equalization of duties on imported sugar.

London, Aug. 19.

Despatches from Madrid state that a crisis has taken place in the Spanish government, the minister of war has withdrawn from the cabinet and the captain generals of Madrid and Barcelona have resigned.

Vienna, Aug. 19.

Applications are entertained that the recent attempt at a rising against the Turkish authority in Bulgaria will be renewed. Accounts received from that quarter represent that the country remains in an unsettled condition, and though the insurrectionary bands have disappeared or been dispersed the indications are that secret preparations of a formidable character are being made for another and more extensive outbreak. The attention of the Austrian government has been called to this threatening state of affairs by an unusual demand for fire arms from the other side of the Danube, and an order has been issued prohibiting the exportation of arms or ammunition from Australian territory into the Danubian principalities.

LATER.

Peace Demonstration Alited—Attack in South America.

London, Aug. 19.

Crop reports from Calcutta to the 23rd of July have been received. Cotton in the north-western districts of India has suffered from heavy rains, and the yield will fall below the estimates of the planters.

Advices from Hong Kong to July 10th state that a commission appointed to consider the subject reported against the granting by the colonial government of licenses for gambling. To this the governor of Hong Kong made a hostile reply, which gave great offence to the merchants of the colony.

Paris, Aug. 19.

The Corps Legislatif will reassemble in December.

The elections for members of the Corps Legislatif have been postponed until next year.

At a review of troops at Marseilles yesterday, which attracted an immense crowd of citizens, a popular demonstration was made in favour of peace and against war. The crowd was orderly, and there was no interference on the part of police.

Rio Janeiro, July 31, via London, Aug. 20.—The attack on the Paraguayan fortress of Humaita, news of which has been daily expected for a fortnight, passed, took place on the 16th of July. On the morning of that day the combined Brazilian and Argentine forces, under the command of the Marquis de Caxias, advanced to the assault in three columns, amounting in the aggregate to 10,000 men. At the same time a heavy fire was opened upon the fortifications from the fleet of iron-clads and the land batteries. After desperate and prolonged fighting at the foot of the entrenchments, the allied columns retired without effecting a lodgement within the enemy's works. The loss of the allies is reported to be 3,000 killed and wounded. Nothing is known of the loss of the Paraguayans, but as they fought most of the time under cover of their entrenchments, it is supposed that the number of their killed and wounded will fall far behind that of the allies. The allied force in the Gran Chaco also advanced with the object of cutting off the communications of Lopez in the forest. They found them defended by a large body of Paraguayans, protected by breastworks. After an obstinate engagement, the allies withdrew to their former position. The casualties in this battle are not stated. The hopes of the war party in Brazil rested upon the success of this enterprise, and its failure will give a great impetus to the peace movement.

LATEST.

Anglo American Cricket Matches.

London, Aug. 20.

A selected 11 from the most celebrated cricketers of England will sail from Liverpool on Sept 2nd, and will arrive in New York about the 12th or 13th. The following are their engagements in America. During the 1st week of their arrival, they will play matches against two selected 22, from various club in the state of New York, and the city and its environs. During the second week, they play matches in Montreal, with 22 selected from the officers of H. M. Regiment, and from various Canadian Cricket Clubs. In the third week they play two matches in the neighbourhood of Boston, against 22 selected from the Massachusetts Cricket Clubs. The fourth week will be given to Philadelphia, where they will meet the American Cricketers again who made the best stand and played the best matches against the English in 1859 of any. Of that series the fifth week will be given to New York, when possibly they may be reduced to enter into a contest with an American nine at the American-English game of rounders, alias base ball, for which the former party refused the offer of five thousand dollars to play a game on the Fashion Course. There is considerable speculation among the leading English cricketers here on the coming events, which it is fully expected will end in a series of victories for 11.

London, Aug. 20.

MELANCHOLY OCCURRENCE—TWO YOUNG WOMEN DROWNED.—The Hamilton Spectator says:—One of the most melancholy accidents which has taken place in this vicinity for a very long time, occurred yesterday afternoon at Burlington Beach, whereby two young women named Augusta Yearsly and Annie Thompson were drowned. About ten o'clock yesterday morning Mr. Thompson, his wife and four daughters and son William, accompanied by Mrs. Robt. Yearsly, of Hughson street, and her daughter Augusta Mary, procured a yacht and started for the Beach. On their arrival there the company separated into twos and threes in various directions. The young women Annie Thompson aged 22 years, and Augusta Yearsly aged 15 years, started for a secluded point some distance off, and removing their apparel, proceeded to the lake to bathe. Miss Yearsly was the first to enter, followed shortly by her companion. The former suddenly coming upon a deep spot, threw up her hands, gave a loud scream, and immediately sunk under the water. Miss Thompson sprang forward to rescue her companion, but she, too, in turn, had got beyond her depth, and quickly went down in the wake of her drowning companion. By this time William Thompson, observing the occurrence, hastened to the spot, entered the lake, and managed to get hold of his sister, and brought her to shore. Miss Gough also fearlessly entered the lake to give assistance, and narrowly escaped with her life. Had it not been for the timely aid of other parties who had been attracted to the spot, it is supposed these two latter persons must have been drowned. A boat was procured, and the body of Miss Yearsly was recovered in a short time. Neither of the Young women breathed after being taken on shore. The bodies were conveyed to the city last evening, and taken to their late homes. This melancholy calamity has created much sorrow in the community, and the respective homes of the deceased young women were surrounded with sympathizing friends of the relatives until a late hour last night.

Poachers and Pot-Hunters.

[To the Editor of the Leader.]

SIR,—You are probably aware of the existence of a law prohibiting duck shooting, woodcock shooting and snipe shooting till the 1st prox. May I ask your opinion on the sanity of the "poppy-cock gabblers" who made this law, without at the same time providing measures for its enforcement. Where is the law respected or enforced? In Toronto, Hamilton, Kingston, and a few large towns only, where detectives and informers are cheap and plentiful, and where game neither breeds nor exists in any abundance. I affirm, and have ample proof, that at this very time woodcock and duck are being shot all through the country districts. On the Holland Marsh hundreds of ducks are being killed daily, and a certain doctor of Bradford or Holland Landing (an inveterate pot-hunter) is making a large bag daily, and I can prove it. This is ample proof that the law as it is is no benefit to the game, and a scourge to all true sportsmen, who are deprived of their shooting, without any redress, by country pot-hunters; so much so that a few gentlemen have been compelled to send detectives to the places above named, and others at their own private expense, so that they may have a little of the tail-end of the sport when the season begins.

A movement is already on foot among some of our sportsmen to call a meeting of lovers of the gun from all parts of the province and our own city to express their disgust at the ridiculous law now in force, which is a bane to the sportsman and a benefit to the poacher, to take measures to quash it and have a new one passed, and to provide means for its enforcement. May I express a hope that you will kindly give a hand to accomplish the deserved object with that assistance which, through your valuable columns, you can so easily afford. In the meantime, can nothing be done? Where is Mason? Where are the county magistrates? Where is everybody?

Yours in disgust,

"WILD RICE."

The late Rev. Dr. Granger repeatedly expressed his belief that he owed his life to the truely use of Perry Davis' Pain Killer. During his recent visit to the Missions in Burmah, he had a severe attack of the Cholera, and was immediately relieved by the use of the Pain Killer.

R. TANDY,

Kingston, Aug. 20, 1868. 197

For Sale,

The Chequered Hotel.

THIS long established Hotel is situated on Ontario Street, Kingston. The premises are large, and well adapted for Boarders, being opposite to the Shipyard and Foundries, and near the principal Steamboat Landings, and is a good opening for an active person wishing to commence the business. A General Grocery would do well. There are three additional tenements on the property, at present rented.

The owner wishes to retire from the business.

For terms apply to the Subscriber on the premises.

Farm property will be taken in part payment.

G. W. FENWICK.

Kingston, Aug. 20, 1868. 197

TRUTH!

WHEN I say to the public that I can serve them with

CHEESE

Better and Cheaper than can be procured elsewhere in Kingston, I believe I am telling the TRUTH.

I have as usual a large Stock of

WOLFE ISLAND CHEESE

in prime order, for Cutting and Retailing, and am prepared to serve the trade or families taking a whole CHEESE or over at the lowest rate per pound.

I understand the business practically. I will guarantee satisfaction at all times as to quality, and I sincerely thank the public for past patronage and a continuance of the same.

Are now receiving and opening out

THEIR FALL IMPORTATIONS.

WANTED!

A SMART ACTIVE BOY.

APPLY TO

R. WADDELL & CO.

Kingston, Aug 21, 1868. 198

THIS AFTERNOON AND EVENING.

CITY HALL.

TWO NIGHTS ONLY!

Friday & Saturday, Aug 21st & 22nd,

AND

Saturday Afternoon at Half-past Two.

L. HASELMAYER,

Chief Escamoteur & Enchantemegin to the KING OF PRUSSIA.

THE public of Kingston and vicinity are respectfully informed that

Professor L. Haselmayer,

Preceptor of Hermann and Inventor of the FAMOUS GOBLIN DRUM,

Will give Two Entertainments both

MAGIQUE AND MUSICALE,

ON

Friday & Saturday, Aug. 21st & 22nd,

AND

Saturday Afternoon at half-past 2,

GRAND GALA MATINEE,

In which he will have the honor of introducing his celebrated

EASTERN NECROMATIC ILLUSIONS,

Performed on a narrow platform, and in the midst of the audience, who thus have an opportunity of personally testing the Wondrous powers of the

CHIEF OF ESCAMOTEURS

who is pronounced by the press of Europe and the United States to be unrivalled in the black art.

Among the other wonders that will be exhibited,

THE GOBLIN DRUM.

Is one of the most Incomprehensible Wonders of the 19th century.

A late Boston paper thus refers to it:—The Goblin Drum still excites the wonder of thousands, and although a hundred theories are started, the manner of its accomplishment still remains an unsolved mystery, and among countless wonderful things which the Professor accomplishes, it still remains the greatest wonder.

PROFESSOR HASELMAYER

Will also have the honor of introducing, and perform a Solo on a new Musical Instrument,

THE STYLOCARFE

(Invented by himself).

The Performances will be varied each evening.

Adm
