TOWN AND COUNTRY.

FRIDAY EVENG, APRIL 5, 1872.

☞ SEE FIRST PAGE.

RUNNERS have altogether retired.

SIR JOHN Macdonald has returned to Ottawa.

POLICE COURT, Thursday.—There was a clear sheet at the court this morning.

SUCH a lovely day! One can hardly imagine that on last Monday we were in the depth of winter.

SOME people will persist that winter will still take an innings. He will hardly come back now, however.

THE Ottawa Citizen says that the "Hon. D. D. Calvin" is at the capital. He is a connection of Mr. Calvin, M.P.P., Kingston.

There is a rumour in town to-day of a cock fight last night. We are sorry that the police did not light on the sporting gentry who indulge in the cruel pastime.

THIS morning, in and about the City Park, the robins made the air melodious with their welcome notes. The tuneful bullfrog has also been heard. Spring has come, gentle Annie.

SCIENTIFIC CANADIAN AND REAL ESTATE GAZETTE.—We've received a copy of the first number of this paper, which is devoted to the interests of art, science, mechanics, manufactures and real estate. We wish our new friend every success.

ST. PATRICK'S SOCIETY.—Last evening this body held a special meeting. It was decided not at present to invite the talented young Irishman, Mr. O'Donohue, to Kingston. However, we hope at no distant date to hear a lecture or an address from him at the City Hall.

MANUFACTURING COMPANIES.—The Ontario Gazette announces the incorporation of the "Cobourg Manufacturing Company (Limited,)" with the nominal capital of $50,000; and the "Bowmanville Machinery and Manufacturing Company," with the nominal capital of $30,000.

DRY GOODS.—Messrs. Shaw & Minnes are displaying a splendid spring and summer stock, at the old and popular Glascow Warehouse. The elegance of the styles and the charming variety is deserving of notice. We are glad to note the success of this young firm.

SCHOOL OF GUNNERY.—The following cadets belonging to the Wellington Field Battery, Guelph, have passed their examinations at the school of gunnery very creditably, viz: Lieutenant W. Nicoll, 1st Class; Sergeant R. Thomson, Corporal A. Murchinson, Bomb. D. McNaughton, Gunner G. Sully, H. Sorby, 2nd Class.

DIABOLICAL.—There is strong evidence of an attempt on Wednesday evening last, while the Oratorio was proceeding, to cause an alarm and panic among the vast audience. A large stone was thrown in the large window at the rear, and fell beside the altar. Another was thrown at the door of the large centre entrance in front. The design of the perpetrators was not effectual, for scarcely any notice was taken of the affair. It is said also that the bell of No. 3 Engine House was rung to spread an alarm, and this, too, failed. Whether the design was for fun or satisfaction is not known, but in either case the acts were diabolical. Care should be taken to prevent a repetition next week at Mr. Keeley's Benefit and Prof. Goldwin Smith's Lecture, when the City Hall will be filled.

Police Court.

Before Mr. Strange, P.M., and His Worship the Mayor.

James Purcell, who was tried at the Assizes for larceny and acquitted, was charged with drunkenness. Fined $4 in default to go to gaol for thirty days.

Catherine Devine was charged with stealing a coat, the property of Mr. George M. Macdonnell. The prisoner admitted the charge, and pleaded extreme poverty in extenuation. Sergt. Major Bell found the coat at the store of Mr. David, Broker, on Princess street, who stated that the prisoner sold the coat (valued by Mr. Macdonell at $14) for $1.25.

Mr. Macdonnell sworn—Goes to his office about 9 o'clock; hung his coat in an unoccupied room down stairs; while engaged with a client up stairs heard some one enter the room below; paid no attention to the fact; when he came down he missed the coat; and immediately gave information to the police.

Wm. David sworn—Bought the coat for $1.25. His Worship gave the witness a sharp rebuke for buying the coat in question for such a small sum. He said in reply, that the prisoner told him that her husband said to get anything she could for it.

The prisoner was committed for trial at the first court having competent jurisdiction. She was also charged with stealing a candlestick, the property of Mr. Hardy, and admitted the crime. Committed for trial.

Ten cabmen were summoned for a breach of the by-law in leaving their cabs at the Depot. The Police Magistrate having no jurisdiction, the cabbies, who were represented by Mr. McIntyre, were allowed to depart. The Mayor or an Alderman must try these cases.

THE NEWSPAPER REPORTER and PRINTER'S GAZETTE, April 1st.

The Railroad

(To the Editor of the BRITISH WHIG.)

DEAR SIR,—I have been greatly amused by reading a number of letters in your paper, signed "A Loughboro Voter," showing the best and most direct route of the Kingston & Pembroke Railway to be by way of Sydenham and the Bedford Iron Mines; and he also states that Mr. O. S. McGann never advertises more than he can do. As the new line is about to be surveyed, the above-named gentleman will find it a hard matter to get a practicable route from Kingston to Sydenham, and then go from Sydenham to the Bedford Iron Mines; and they will also find that it will cost more to build one mile of road there than would two miles on the route already laid down; I would venture to say that it would cost as much to build a railroad from Kingston to the above-named place as would build the road from Kingston to the Duncan Sports, a difference of fifteen miles; and that much money would be saved by bringing the road by way of Harrowsmith and Verona on the line that is already surveyed. I should think that it would not be doing justice to the people of Frontenac to run the road where it would require double the amount of money to build it for the sake of a few cords of wood, and to satisfy the people of Loughboro. I, as well as the majority of people, am well aware that the road cannot be built on the newly proposed route with as little cost, and through as fertile a part of the county as the one already surveyed, which runs within two and a-half miles of the Bedford Iron Mines. I think a tramway could be built from the railway to the Iron Mines (only two and a-half miles) far cheaper than ten or fifteen miles of railroad could be built through a rough and rocky country—that is, from Sydenham to the Bedford Iron Mines, where nothing can grow but thorns and poplar trees. The line surveyed last fall runs through the levelest part of the county, crosses the best rivers for floating wood and timber, and through the best timbered part of Frontenac.

I am, Sir,

A VOTER AND RAILROAD MAN.

DRIFTS.

New Brunswick journals are again agitating for "better terms."

The Status of Confederation and Rhode Island have "gone" Republican.

New York has about 4,000 beggars, 25,000 paupers and 4,000 condemned criminals and lunatics.

Over eight thousand singers have offered their services for choruses of the Boston jubilee this summer.

The Russian fleet were charged $70 per day for wharfage in Brooklyn, when the legal fee is only $26.

March, 1872, was colder than the three preceeding months, which is probably the first instance on record.

The *pallium* accorded by Pope to His Grace the Archbishop of Quebec was brought out by the last mail steamer from Europe.

The name of Colonel Maude, C.B., V.C., is mentioned in connection with the representation of Muskoka (which is about to be given Parliamentary representation) in the House of Commons.

—Some time ago we had an account of the explosion of a barrel of flour which had been packed while damp. A mince pie, surcharged with steam, and with no vent in the crust, exploded in Shakpoee (Minn.) recently, fatally scalding a young child. What will go off next?

CURRENCY.

—Spain has now within her limits nearly 3,000 nunneries.

—The Greeley statue fund amounts to $16,500. Buy him a farm.

—It's quite the fashion in Iowa, now, to dig a well and discover the finest vein of coal in the State.

—The best conundrum out—In my first my second sat, my third and fourth I ate—In-sat-i-ate!

—China has a newspaper which has just entered upon its two thousandth volume. Not of its original staff are dead.

—A gambling shopman hangs out this placard:—"Our cotton is enormous, but O! it cannot stale our infinite variety."

—Iowa folk ascribe the prevalence of spotted fever to the hogs having eaten locusts last year, and so having been poisoned!

—The "Dolly Varden" bonnets are said to be the prettiest and most bewitching head gear that has been worn by women for centuries.

—Mr. Wm. McKechnie, late G. T. R. agent at Brockville, has been appointed general Freight Agent of the Midland Railway, Port Hope.

—It is said in the rural districts that unless April shall do miracles to compensate for the backwardness of March, there won't be the making of a May-queen this year.

—The "meanest man" in Central Illinois, is a farmer living near Decatur. He discharges his laborers Saturday night, and charges them for lodging and board over Sunday.

—The Dominion Government contemplates building light houses on Hickory Point and Hamilton's Island, (below Cornwall,) during the ensuing summer. Tenders have been advertised for by the department of Marine and Fisheries.

—If a teaspoonful of genuine coffee be thrown into a tumbler full of cold water it will float upon the surface of the water, while the substances generally used in adulterating coffee will sink under the same circumstances. If, when the suspected coffee is thrown upon cold water, a part sinks at once, the sample is quite sure to be adulterated.

Persecution of the Jews in Roumania.

A correspondent thus writes to the London papers:—"The latest news from Roumania is truly heartrending. Great as have been the cruelties committed at Ismail, they were by far exceeded by the horrors perpetrated at Cabul. This is a town with a population of about 7,000, 1,000 of whom were Jews. These were suddenly set upon by their fellow-townsmen, and for three days beaten, wounded, plundered, driven out of their houses, which were battered into ruins, and the tenants forced to take refuge in the barracks, where, instead of being befriended, they were again allowed to be beaten, and for several days left without food. In these tumults heads were broken, open arms broken, beards plucked out by the roots and rapes committed. One of the sufferers, named Gold, more courageous than the other unfortunates, defended his house for three days, his four sons standing by him. He made them swear that, should he fall, they would continue to fight. The bands surrounding his house were for a considerable time held at bay by these brave men, but they were at last compelled to give way as the villains set fire to the premises. The damage inflicted on these Jews is estimated at 40,000 ducats. The two synagogues were devastated and filthily polluted, and the sacred objects found scattered in all directions. My informant, whose veracity may be relied on, adds: 'The sufferings of the Jews at Cabul were horrible. Language fails to depict what they had to endure. I cannot suppress my tears when I recall these sufferings.' And then continues: 'They say there is scarcely a village in the whole of Bessarabian Roumania where there have not been frightful scenes. The misery is dreadful; help is need immediately.' My informant then urges that a mass meeting of citizens, without distinction of religion, should be forthwith convened, in the metropolis, in order to protest against these scenes, which threaten, as Passover approaches, to be even more frightful.

ANATOMY OF A PIANO-FORTE.—A writer has taken the trouble to give the actual material used in constructing a piano-forte. In every instrument there are fifteen kinds of wood—viz., pine, maple, spruce, cherry, walnut, whitewood, apple, basswood and birch, all of which are indigenous; and mahogany, ebony, holly, cedar, beech and rosewood, from Honduras, Ceylon, England, South America and Germany. In this combination elasticity, strength, pliability, toughness, resonance, lightness, durability and beauty are individual qualities, and the general result is voice. There are also used of the metals, iron, steel, brass, white metal, gun metal and lead. There are in the same instrument of seven and half octaves, when completed, two hundred and fourteen strings, making a total length of seven hundred and eighty-seven feet of steel wire, and five hundred feet of white (covering wire.) Such a piano will weigh from nine hundred to one thousand pounds, and will last, with constant use, (not abuse) fifteen or twenty years.

THE BOY O'CONNOR.—Mrs. O'Connor, the mother of the crazy boy who attacked the Queen, has said to an interviewer that she and her husband detested the crime, of which her boy had been guilty. She appeared utterly broken down under the affliction, which is increased by the suspicions against herself and her husband. They both assert their entire loyalty. Their son's violent action is a puzzle to them. The mother thinks he must have imbibed his wild notions in some secret conclave. The father is as stern as the mother is heart-broken, and attributes his son's freak to trashy reading and an ungovernable spirit.
