TOWN AND COUNTRY.

TUESDAY EVENING, MAY 7, 1872.

☞ SEE FIRST AND FOURTH PAGES.

SUNNY DAYS and cool nights are the order of the weather.

PEOPLE praise the cleanliness of the streets.

THERE is nothing like Laverty's Blackening.

PIGEON SHOOTING is become a popular sport. Challenge matches have begun.

DESERTERS.—The two missing men of the Dominion Battery have not been captured, and are probably in the land of liberty.

TRENTON AND MONTREAL.—The *Picton* will run to Montreal until the *St. Helen* is either repaired or replaced by another boat on that route.

THE Watson Bros., who perform here to-morrow evening, are highly spoken of in our late Oswego and Watertown exchanges.

THE CONCERT.—There should be a rush for seats to-night, at this Grand Concert of Mr. Boscovitz. When a treat like this is within our privelege, let us enjoy it.

THE NEWEST STRIKE.—Capital and labor will conflict in every place. The latest strike has been that of the washerwomen for 90c a day. The house-keepers hold out, and think of doing their own washing.

DIVISION COURT was held to-day in the Court Couse, His Honor Judge Burrows, presiding. There were no cases of public interest. The Court of Chancery Spring Hearing opens the day after to-morrow, before V. C. Mowat.

CRICKET.—The annual meeting of the Kingston Cricket Club will be held to-morrow evening. We trust there will be a large attendance, and that new spirit and life will be put into the game in Kingston, so famed once for its cricketers.

CITY COUNCIL.—A special meeting is to be held to-morrow evening, to consider the appointment of a deputation to Ottawa, on the subject of Harbor Improvement, as requested by the Board of Trade. The Mayor and Fire Committee have delayed their Western trip in consequence.

LOW WATER.—The Mail Line steamers *Magnet*, and *Corsican* tried to run up the Gallop Rapids, but on account of the low water were forced to turn back and take the canal at Iroquois. The river was never known before to be so low there at this season of the year.

FIRE, FIRE, FIRE.—The city bells are good on an alarm. Last evening they rang out as if each particular bell was ringing out for dear life. How they clattered, and how the firemen and the bumbering engines and ladder cart rushed out. And all about that torture to firemen—a chimney on fire near the foot of Queen street. The public were spared another exhibition of the want of a steam fire engine.

Dr. Livingstone.

The New York *Times*, remarking on the glorious news of Dr. Livingstone's safety, says:—

The faith of Sir Roderick Murchison is justified. That sturdy old man could never be made to believe that Dr. Livingstone was dead. He clung to his conviction of Dr. Livingstone's safety, and now that his judgment is affirmed by the reappearance of the long-lost traveller, the joy is dimmed only by the thought that the steadfast friend of the man who has finally solved the capricious problem of the Nile is no longer living to greet him. Beyond the bare fact of Livingstone's arrival in safety at Zanzibar, we have no later news of the results achieved by him. When his discoveries are made known, then will vanish forever from our maps that tempting "unexplored region" of Africa which has lured so many brave men to suffering and death. Now that we may consider ourselves to be in possession of the secrets of the African continent, the question naturally arises,—what shall we do with them? In what respect, beyond the gratification of curiosity, are we better off, now that we know the course of the Niger, the source of the Nile, and are about to learn the origin of the Congo? If we gain nothing else, we gain the safety of future explorers. Livingstone's discoveries and their consequences are, however, scarcely to be thought of at the moment when the news comes that the man himself is safe. The fearless traveller, the faithful missionary, the noble philanthropist, whom we had mourned as dead, is alive again. This is surely good news enough for one day, and if science had gained nothing by his return, the world would still have been richer by the spared life of a pure and spotless hero.

SELF-MADE.—Henry Clews, the well known bald-headed banker, who always prides himself on being a self-made man, during a recent talk with Mr. Travers, had occasion to remark that he was the architect of his own destiny—that he was a self-made man.

"W-w-what d-did you s-say, Mr. Clews?" asked Mr. Travers.

"I say with pride, Mr. Travers, that I am a self-made man—that I made myself."

"Hold, H-Henry," interrupted Mr. Travers, as he dropped his partaga, "w-while you were m-making yourself, why the d-d-devil didn't you p-put some more hair on the top of your h-head?"

Mr. Clews has since invested seventy-five cents in a wig.

BOARD OF TRADE

At an evening the Board of Trade met in the Council Chamber, the President, A. Livingston, Esq., in the chair.

The Bill Stamps duty again came up. Mr. Kingston, and Mr. Kingborn moved, seconded by Mr. Carruthers, that in the opinion of the Board the Stamp tax on notes be abolished, being very inconvenient to the community, and yielding but a small revenue; and that Mr. G. A. Kirkpatrick be communicated with and requested to urge its abolition. Carried.

Capt. Putnam presented the report of the Committee on the harbor:—

"In consequence of the extreme shallowness of the harbour this season, it is very desirable that some dredging should be done at as early a date as possible, in order to make it available for the proper safety of the large class of vessels that now trade to this port.

"The present depth is inadequate to do so. In ordinary low seasons the depth near the wharves where the greater part of the transshipping is done, is barely eleven feet, which is the draft vessels load to. Now it is fifteen to eighteen inches lower, and in the slips where mud and dirt have been accumulating for years, it is shallower still. It is in these slips that grain cargoes are transhipped to barges, and it is necessary to have still water, well protected from winds to do this work properly.

"These slips are the property of private parties, and it is for the public good that they should be deepened. Although it is the interest of owners or occupants to have this done, they have not the facility to do so, unless the Government furnish the dredging facilities.

"Opposite the Grand Trunk wharf there is a shallow part of the harbor that vessels frequently ground on. It is also very desirable to remove the shoal near Point Frederick, if the nature of the bottom will admit of it.

"Your committee recommend that the Government be petitioned to send a dredge to improve the depth of the Harbour, and that private wharf owners be allowed the privilege of getting their slips deepened at a reasonable rate.

"Upon inquiring your committee have learned through Mr. Thomas Overend, a gentleman who has had much experience in building piers, that in his estimation a breakwater could be built a quarter of a mile long and about 26 feet deep, which assuming an average of water to be 20 feet, and 6 feet above surface, by 36 feet wide, at a cost of $40,000. Such a breakwater as this would be very useful to the harbour, if it commenced at Murney Tower, from that point to shipyard the deepest water is to be found, but it is too much exposed to southerly winds to be made proper use of at present.

"Your committee are of opinion that the Dominion Government ought to build this breakwater, and that they will do so, if its great necessity is properly brought under their notice.

"On a chart of the harbour, kindly furnished your committee by the City Engineer, the following depths of water is indicated, say at a distance of 40 feet off the front of the following docks:

"In front of the Water Works dock 40 to 50 feet; on the shoal off United States' dock 12 to 15 feet; Between Martello tower and Railway track 12 to 15 feet; off Atlantic wharf 14 to 17 feet; off Anglin's wharf 14 to 17 feet; along the upper side of Cataraqui Bridge 9 to 15 feet; on Point Frederick shoal 10 to 15 feet. The depth of water on each side of this shoal is represented at from 35 to 30 feet on south side, and from 13 to 19 feet on north side.

"These soundings were undoubtedly taken at an ordinary high stage of water, and actual sounding now would undoubtedly reveal from 11 to 2 feet less water."

Mr. Harty moved, seconded by Mr. Simpson, that the report be adopted, and that a delegation be appointed at the earliest possible moment to wait upon the Government at Ottawa with a petition, embodying our wants and urge upon them the necessity of at once proceeding with the improvements; and that the City Council be requested to join in the delegation. Carried.

Mr. Voigt moved, seconded by Mr Carruthers, that the Mayor be requested to call a special meeting of the City Council for Thursday evening if convenient, to take action with the Board in petitioning the Government in relation to harbor improvements and requesting the Council to send a deputation to Ottawa to accompany the members of the Board of Trade. Carried.

A letter was read from Mr. Overend. He had examined the depth of water for a quarter of a mile from Murney Tower, and finds the average depth to be 55 feet. The breakwater would require to be 40 feet—wide in that depth and to make a substantial job the cost would be $110,000.

Mr. Carruthers expressed the opinion of the Board in the following resolution, which was carried: That should the House of Commons give the Finance Minister leave to increase the legal tender, that it ought to be limited to a sum not exceeding twelve millions of dollars. Adjourned.

GABRIEL'S PREPARATION FOR THE TEETH

MESSRS. GABRIEL, Dentists, LUDGATE HILL, LONDON.

MESSRS. GABRIEL'S "SEDADENT" or CURE for TOOTH ACHE. This extremely easy application, may be relied on to effect a cure immediate relief without injuring the tooth, and forms a temporary stopping. Price, 1s 1½d.

MESSRS. GABRIEL'S CORALITE TOOTH PASTE for cleaning and improving the Teeth, imparts a natural redness to the gums, and gives full beauty to the Enamel. Price 1s 6d.

MESSRS. GABRIEL'S ROYAL DENTIFRICE, prepared from a receipt as used by Her Majesty. Gives the teeth a pearl-like whiteness, and renders a delicious fragrance to the breath. Price 1s 6d.

MESSRS. GABRIEL'S WHITE GUTTA PERCHA ENAMEL for stopping decayed Teeth, renders the Teeth sound and useful for masticating, no matter how far decayed. Price 1s 6d.

MESSRS. GABRIEL'S OSTEO-ENAMEL STOPPING warranted to remain white and firm as the Teeth and is the most delicious preparation for decayed teeth, and can be easily pared. Sufficient to stop six teeth. Price 1s.

MESSRS. GABRIEL'S ODONTALGIQUE, EXIR. This celebrated Tooth Ache is most delicious, it strengthens the gums, eradicates tartar and all infectious secretions, sweetens the breath, and for a sound or diseased teeth is invaluable. Price 1s.

Full directions for use enclosed to each Box.

IMPORTANT TO RESIDENTS ABROAD.

Parties at a distance may have Artificial Teeth supplied in partial or complete sets, by Messrs. Gabriel's new system, on sending particulars of their case, with a remittance to the Messrs. when the apparatus for taking a model of the mouth will be forwarded with all necessary instructions.

MESSRS. GABRIEL, remodelled the mineral system, and at a moderate cost. Artificial Teeth supplied by other dentists which have not proved satisfactory to the wearer.
