REMEMBER the Base Ball Meeting this evening.

HOTTER than Herchimer County, New York.

MONEY was lost on the Centre Toronto elections. The Tories can make it up by betting on the Reformers for the remainder of the campaign. The difficulty will be to find takers.

DEMISE.—We regret to hear of the death of Mrs. A. M. Mackenzie of Alexandria, Glengarry, sister of the late A. J. Macdonell, Esq., and daughter of the late Col. Macdonell, of Greenfield, Glengarry.

NEW BOAT.—The Lindsay *Warder* says that Captain Crandell's new steam-packet Vanderbilt left port on Monday, for Port Perry, on her first trip. She is the neatest and best boat on the inland waters of Ontario. Her speed fully equals the expectations of her owner. The engine, which is a first class one, is from the Kingston Foundry.

BAD WALKS.—Union and Gore streets, below Bagot, are troubled with very bad plank walks. That is not all. A pile of rubbish from a demolished house on Mr. Ald. Brophy's corner is allowed to take up part of the walk. Let the citizens have the new plank walks at once, even if they can't have a civic holiday, or won't have another chance to defeat Sir John for five years.

BUSTLES.—We have read many tales of ladies bustles being made up from newspapers, and never believed them. But we do now. We were told to-day by several person of the peculiar manner of a young lady saving a yacht load of people, who were returning from an Island Pic-Nic, by prompt production of a bundle of newspapers faom her fashionable protruberance, which when lighted warned off the approaching steamer. Our correspondent "Snip" relates the incident and we strikly rough for the truth of it.

SERIOUS ACCIDENT.—On Friday afternoon last, a serious accident happened at the residence of J. Campbell, Esq., Cataraqui, by which Mr. James Lawson, school teacher in Battersea, barely escaped with his life. He was assisting in unloading some barley, in which the horse hay-fork was made use of. Suddenly and unexpectedly the pulley gave way, and a heavy piece of iron struck him on the head, breaking in the skull, and inflicting a deep gash. He was insensible for a time, and was immediately conveyed to the house. Dr. Dupuis was summoned, and under his skilled treatment he is rapidly recovering.

THE WEATHER.—We can stand a joke about as well as most people, but we'll leave it to anybody, or but two dollars and thirty-seven and a half cents that if you're honest and speak the truth that isn't in you like a white man and a brother and no humbugging, it is, when you come to cypher it right down to the fine point, without any gerrymandering or shananiging, the elections to the contrary notwithstanding in which the Tories are becoming transitories, like Artemus Ward's breast pin, "parsin away," "parsin away"—well it is hot, and any man says it isn't is a horse thief and a Union Prog. We nail our colors to the mast and planting our foot firmly on the foundation of eternal truth call the rocks and the eternal hills to witness that if it isn't hot we're an Indian.

MR. PATERSON.—Mr. Paterson, to whose bow Sir Francis Hincks has fallen, is a wholesale confectioner, a comparatively young, but very able and well-informed man, a partner in the firm of Leeming and Paterson; Mr. Leeming being a brother of Mr. John Leeming, of this city, who was an unsuccessful candidate at the last election.—*Herald.*

EUROPEAN.

Von Moltke lives now quietly in the little Silesian town of Schweidnitz.

The Marquis of Bute cannot be induced to ride on horseback, having a superstitious dread.

It is stated that diseased cattle have been imported into Leith from Iceland and Denmark.

The Burmese ambassadors to Europe have gone to study the cotton manufactories at Manchester.

The *Musical Standard* says a new work by M. Gounod will be produced at the Glasgow Festival next spring.

The strike among the railway goods-porters on the London and Northwestern line of railway has resulted in complete defeat for the men.

Veal and lamb have been totally tabooed by a mass meeting of the working-men of Bradford, who resolved to abstain for a month from the use of butcher's meat.

The *Lancet* states that a recent Volunteer review, near Manchester, the men suffered severely from the heat, one battalion alone having thirteen cases of syncope; happily none were fatal.

Eton College at the close of the last half was in a most flourishing condition, the students numbering about 1,000. In the late school-time there were 426 boys unable to swim, and 299 boys who "passed" for swimming.

The 28th birthday of the Duke of Edinburgh was commemorated at Windsor with the usual Royal honours. The bells of St. George's Chapel and the parish church rang merry peals during the day, and a Royal salute was fired in the Long walk by the Royal Bombardier.

The Duke of Edinburgh is making a very promising beginning in his new career of a composer. He acknowledges the composership of the pretty valse, the *Galatea*, played at the Prince and Princess of Wales's ball, and has elsewhere been heard with much approval on the part of those who would not say it was good because H.RH. were the letters of recommendation, perhaps the contrary.

A splendid new pier was opened at Hastings, England, by Earl Granville, on August 5. The pier is 910 feet long, and varies in width; at the shore end it is 190 feet, and at the sea end 45 feet. It has been built principally for promenading, seats being arranged all along the sides, and there is also a splendid saloon, in Oriental style, at the head of the pier, suitable for concerts and balls, capable of accommodating 2,000 persons.

Miss Ellen Edmunds, a young lady of "prepossessing appearance and fascinating manner," was charged at the Manchester police court recently with horsewhipping a male friend in broad day, and in a crowded bazaar. Evidence was given for the fair prisoner to the effect that the young man had given what the presiding magistrate called "the grossest provocation" to the defendant, whom he had courted and then insultingly cast off. Miss Edmunds was bound over to keep the peace.

IN GENERAL.

Tobacco is being successfully cultivated in Maine this season.

The senatus of the University of Edinburg has conferred the degree of LL. D. on Mr. William Chambers, the veteran publisher and author.

Edwin Booth has purchased from Chas. Mr. Barras the marine villa of "Cedar Cliff," Greenwich, Conn., on the Sound, for $50,000.

Take a look at your furs and other valuables just now. Moths are very numerous, and can do irreparable damage in a short space of time.

The foulest smells arising from sinks or drains may be destroyed by pouring down one pound of green copperas dissolved in one quart of water.

An obdurate screw may be drawn by applying a piece of red hot iron to the head for a minute or two, and immediately using the screw driver.

A new line of steamers, to ply between York and Hamburg, Germany, is about to be established. The company are now building seven ocean steamers, and expect to increase the number to fifteen.

Metallic roofs are rapidly coming into use as the best safeguards against lightning, as the roof instantly distributes the electric fluid over its surface, and by so doing prevents all danger.

A number of colored waiters at the Ocean house, Long Branch, occupy a foremost rank among the students at the Howard University in Washington. They pay their college expenses out of the fees levied on hotel guests during the summer.

The springs at Saratoga are said to be drying up. The flow is less strong, and the residents and hotel-keepers are prohibited from obtaining pailsful of the water in the morning, as has been the custom for years past. The water is also less pungent than it used to be.

An English lady asks the British Academy of Sciences to give her a million sterling for that she has "discovered the principle which differentiates the finite from the infinite." Mr. Caudle made the same discovery while he was enduring Mr. Caudle's curtain lectures, and had to pay for making it into the bargain.

Only Me.

A young man in Hoboken who hates mosquitoes and loves girls, discovered that a kerosene bath, taken every morning before breakfast, kept away flies and mosquitoes from the person, took one, and that evening visited his heart's idol. When they had embraced, h. h. i. rang for the servant girl, and said: Bessy, did you sweep this room out to-day?" "You'm," said Bessy. "Well, then there must be a dead rat under the floor. I'll get Pa to-morrow to have the carpenters here and pull up the boards. I can't stand the stench." "Darling," said the inventive genius, "It isn't a dead rat. It's me. I——" "Leave the house, sir, and never dare to enter it again. Bessy, sprinkle the room with cologne." The inventive genius has decided to put up with the bites in future.

English Ritualists.

The service at Mr. Purchas' church at Brighton was conducted with the usual ceremony the other Sunday. There was a high celebration of the Holy Communion, Mr. Purchas being the celebrant. He was most gorgeously apparelled. Incense was freely used, and all the practices and vestments lately declared illegal were carried out and worn. In the sermon there was an expressed contempt for the Privy Council and its decisions, and a scornful allusion to the Church Association throwing money like water upon the ground in cruel persecutions that might have been used for the purposes of heathen conversion. The tone of the discourse was defiant and mocking. There is evidently no probability of his heeding the judgment of the Privy Council.

PAPER MANUFACTURE.—An establishment in Pittsburg has a process for treating paper which makes it much tougher and harder than leather, and so elastic as to resist almost any blow without perceptible compression, while it can be worked very easily and cheaply. A French inventor has a similar process, and he is now in this country making arrangements for an exhaustive trial of the material for ship armor. It has been approved of by several naval officers who have seen it, and who express an opinion that the most valuable service may be rendered by it.

TESTIMONIAL!

GENTLEMEN,—I have taken considerable interest in the examination of the Hamilton and other Wines of your importing, on account of their being of a character so much superior to what I expected. I have tested them by the processes of Chevallier, Jacob, Vogel and Esenbeck, and in all cases have found them to be pure and unadulterated Wines.
