CITY AND VICINITY

☞ GOLD in New York at 3 o'clock 112½

TREES.—The sale to-morrow of trees and shrubs will attract the attention of all classes.

FIRE AT CAPE VINCENT.—About two o'clock yesterday morning folk were awakened by the alarm of fire in the lower part of the town; it proved to be Mr. J. Poe's store. The *Despatch* says the fire was under such headway when discovered that it was impossible to save anything. The building belonged to Mrs. Anthony and was not insured. We understand that Poe's stock was insured for fourteen hundred dollars. How the fire originated is not known.

GYPSIES—The Napanee *Express* warns the public of the appearance in different parts of the country of gangs of gypsies who are engaged, as usual, in peddling and telling fortunes, and horse trading, plundering and stealing if they get a chance. The *Express* cautions its readers to give the clan a wide birth, and we do the same, believing tho' there may be an honest "critter" among them. Occasionally, most are addicted to loose habits, and wouldn't scruple much about offending the law.

VISITORS.—The most notable visitors to the city during the past few days have been the small bands of Indians and their families who arrived from the back country by the Kingston & Pembroke Railway. These peculiar people seem to have weathered through the inclement season gallantly. They look well and hearty, and seem to enjoy themselves after their own fashion as much as the "white trash" under more favourable circumstances. They have a great appetite for gingerbread and "red herns." They use the steps of the City Buildings for dining purposes.

IMMIGRATION.—It is to be regretted that some of those are helped out to this country by the liberality of immigration, but only occasionally—repay the kindness with which they have been treated. The case of a party of seven, occurring on Wednesday, may be cited. Their passages were chiefly borne by the Ontario Government who paid £5 for each, and on their arrival their expenses were paid until they reached Kingston. Here they were received by Mr. Hitchens, the Superintendent of the Immigration head-quarters, the ladies and children being conveyed from the Depot in a cab. They remained over night and received good food accommodation, and prepared to leave the next day. It then transpired that the party were experimenting in a little sharp practice. They deliberately went to work and engaged passages for Charlotte, N. Y., which it would have cost them quite a sum to reach it. They had not travelled under the Ontario Immigration policy. Their scheme in leaving was to make a cheap passage by being deceitful, and they certainly succeeded very well. They were provided with plenty of money, and had their tactics been discovered a little sooner, they would have been obliged to pay at least their fare from Quebec here.

DEATH OF MR. MATTHEWS.—This morning, after a long and painful illness, the spirit of a good man and a patient sufferer passed from its earthly tenement, Mr. Robert Matthews had almost reached his nonagenarian years, and the infirmities of age assailed him within the past year with intensity. For three months his death has been felt to be very near, and more than once his affectionate family was summoned to his bedside at an understood dreaded approach of the last scene. But the vitality of his early life left him a strong constitution to battle with, and he was spared till to-day to his friends, though his death must be looked upon as a relief from great suffering. Deceased led a quiet, unostentatious life, but has left a durable name behind him, having been one of the best of citizens and most upright and generous of men. He used the wealth which his steady industry and perseverance won for him in kind acts, done so quietly often that none but the beneficiaries were aware of them. His domestic qualities endeared his children to him, and he loved and was regarded by them with uncommon affection. Mr. Matthews was one of the very oldest residents, having left his native place, Markhinch, Fifeshire, Scotland, sixty years since, and settled in Kingston and its neighborhood after a short residence in Halifax and New York. As a builder and contractor he has left many enduring landmarks of his skill and success—including Regiopolis College, and Cedar Island Tower, Kingston; and the Court House and gaol at Belleville. He was a warm friend of the workingman, and in olden times took an active interest in the Mechanics' Institute, being its president for several years. Chalmers' Church was aided in its establishment very materially by his marked liberality, and his position of elder since its opening has been linked with the heartiest support. The College and Presbyterian Mission Funds have again and again benefitted by his generosity, but his public offerings were far below his private ones. Mr. Matthews leaves two sons, Major Matthews and Mr. Robert Matthews, and two daughters who fill the highest place in public estimation, Mrs. Carruthers and Mrs. Gunn.

WIND WAFTS.

The Belleville *Intelligencer* has enlarged its weekly. It is now a 40 column paper, well printed and very readable.

The "Canadian Illustrated News" gives an amusing sketch of moving day. The cuts of current events are well executed.

The publisher of the Picton "New Nation" had a verdict of $100 returned against him for seduction.

Bro. Thomas Flynn, temperance lecturer, is laboring in the interest of prohibition at Newington.

Mr. Grange, M. P. P. for Addington, visited the city to-day in the interest of his paper mill at Newburg.

The "Juanita" has been taken off the route between Cape Vincent and Clayton, and the "D.C. West" will make regular trips hereafter.

The workmen are now at work at the foundation of the new M.E. Church at Belleville. When completed it will be the finest M.E. Church in Canada.

Rev. Prof. McKerras, of Kingston, Moderator of the Toronto and Kingston Synod, attended the Montreal Synod and was asked to deliberate with it.

Crime is increasing, so the papers say. So is the population, so S. S. Phippen says. One idea suggests the other. Boys become bad men because the mischief is not licked out of them when young.

"JIM O'GRADY," the strong Tory correspondent of the *Daily News*, in speaking of his party's tyranny, enquires, "Can no good thing come out of Nazareth?" In this relation that question may be emphatically answered in the negative.

Belleville will soon have the street cars running. The track is nearly laid. Kingston's railway was to be begun when the frost left the ground. Spring must be terribly backward here, or the season is in advance of its time in Belleville.

The annual session of the Kingston District meeting of the Canada Methodist Church commence at Selby on Wednesday, the 24th inst. On Thursday the Lay delegates will attend.

The Napanee *Express* was shown a cancer extracted from the breast of Mrs. Levi Snider, near Odessa, by Mr. James I. Martin, of Leinster, who possesses a receipt for the cure of this dreadful disease, which is said to be unfailing.

The storm drum was hoisted last night, but up to the present atmospheric currents have been very light. That there was violence up west and reason to be cautious in marine movements here there cannot be any doubt.

Gananoque has a band of gypsies hovering about, and the Oswego *Palladium* man arrives at the very sage conclusion that pretty poor horses may be expected from that neighborhood for some little time to come.

According to the official returns the population of Cape Vincent has decreased in five years 154. It is perhaps interesting to note that in the meantime the editor of the *Eagle* and progeny have removed to Clayton.

It costs six dollars to kiss a girl in Barrie. But by what we saw on Sunday evening last, on our way home from church, we think they must be much cheaper in Kingston, or that young man could not have bought so many as he did over the gate on Bagot street, west.

The Rev. G. M. Meacham, C. M. minister, of Napanee, is going to Japan as a missionary. From a heathenish point of view there's hardly a shade difference between them. In Japan people don't write slanderous poetry. Of course that is an important consideration.

The Watertown Base Ball Association has voted to offer $1,100 in prizes at its fourth annual tournament, for which the time is not yet fixed. There is not a Watertown chap but swears worse than ever since this announcement was made.

The annual meetings of the Ontario and Bay of Quinte Conference of the Methodist Episcopal Church of Canada will be held as follows:—Ontario Conference, at Orono, commencing on Wednesday, 24th inst., and the Bay of Quinte, Conference at Brockville, commencing Wednesday, June 7th. Bishop Carman is expected to preside at both Conferences.

The *Enterprise* would like us to slip down to Brockville to note the great building operations and view the progress of the municipality generally. No, thank you; we've been there lately, and we are satisfied Brockville is a beautiful place, and has some beautiful houses and beautiful people. The *Enterprise* scribe and the *Recorder* local are two of the leading beauties.

The Corporation of Brockville have, up to the present time, distributed five hundred and thirty-five shade trees. In Kingston the Council take great delight in the appearance of the streets, but the officials engaged for the purpose haven't time to distribute a few stones much less trees. In case of a seige there wouldn't be any necessity of trenches being dug and ramparts built. They are located in every block.

Weary, dusty and sad, a beer tap in one hand and a carpet satchel in the other, a stranger passed up Princess street yesterday, and pursued his way leisurely and with a halting gait in the direction of Napanee. He was quiet and inoffensive enough looking, but the public either mistrusted him or took a special interest in him, as he was watched closely from his advent in one end of the city till his exit in the other end.

HISTORY.—"Established in 1841—The *Daily News*." Old age is honorable, and we congratulate our contemporary on its rise to fresh honor. We forthwith haul down the DAILY BRITISH WHIG sign of being the Oldest Daily in Ontario, for in the light of the new discovery of 1841 relics, it is plain that its venture of 1848 was by no means the pioneer enterprise that it flattered itself over. We would not fib for a century of time let alone seven years. At the next Y.M.C.A. Arts Show a *Daily News* file of 1841 will probably be one of the great objects of interest. Science is throwing light every day on hidden mysteries.

APPOINTMENT.—We are glad to be able to congratulate Captain Andrew Dunlop, of this city, Commander of the steamer "Spartan," on his appointment to the Montreal Inspectorship of the Royal Canadian Insurance Company, marine branch. Captain Dunlop has been connected with the Royal Mail Line for some seventeen years. The Mail Company lose a good official and Kingston a much esteemed citizen.

WANTED, A WIFE!

These are the words which begin the advertisement in another column, and they strike one with peculiar interest, if not surprise—interest in that they relate to a theme which never ceases to be a novelty; and surprise that in these latter days, when the details of courtship are reduced to a system, it is considered necessary on the part of even a "modest widower" to depart from the ordinary routine and gain by matter-of-fact principle what is usually won between romance and strategy. That the advertisement will be duly answered we have not the slightest doubt. Without presuming to hint there are many of the proper age—they may be mature maidens and yet in looks not be considered old maids—whose correspondence will speak for itself and make such commendations as will ensure a wise and discreet election. We may be permitted to add that whoever should receive the attentions of "F. K." will be fortunate indeed, we are under no obligations to secrecy, and forfeit the confidence of no one when we say that he is a retired gentleman, he is very old old, crotchety or eccentric, but one who has a winsome nature, whose companionship is much esteemed and whose love cannot be measured by the standard of most men. It is for ladies contemplating matrimony to dream over the case, and in reply to "Wanted, a Wife!" respond with maidenly feeling and impulse, "Darling, here am I."

CURRENCY.

—Giddy maize—distilled corn.

—Hon Malcolm Cameron is not expected to live many hours.

—The Dominion Lacrosse team have arrived in Londonderry, Ireland.

—Reports from Michigan indicate a full crop the present season.

—The Dunkin Act was defeated in Dorchester by a vote of 67 to 15.

—Six of the New York State life insurance companies are in the hands receivers.

—The mills on the Ottawa have been obliged to stop running in consequence of the flood.

—Boston proposes to invite Moody and Sankey to hold a revival meeting in that city.

—The London *Times* has a folding machine which folds that paper at rate of 7,000 per hour.

—Betting is immoral; but how can the man who bets be worse than the man who is no better!

—Potato bugs have been roosting in the potato pits all winter. The opening of a pit brings them out by thousands.

—There are enough Parliamentary candidates; what this country wants and must have is more base ball clubs.

—The Ontario Government intend offering a banquet to Dom Pedro in case he visits Toronto, as he has been invited to do.

—The strikers on the Welland Canal still hold out, and it is said the contractors intend bringing 500 new men to work on the canal.

—Mr. Bigger, city solicitor of Toronto, takes the place in the legal firm vacated by Mr. Lash, the new Deputy Minister of Justice.

—An Albany paper calls Canadians 'hoggish' for refusing to let aliens fish in Canadian inland waters at pleasure. O, those obster cans!

—The Paris cabs are hereafter to have skylights covered with silk screens, so that people riding in them may conveniently read the papers.

—The band of the 26th Battalion, at Strathroy, has disbanded, because the Town Council will not give the sum of $100.

—A grand temperance demontration is to take place in Strathroy on the 24th. Among the attractions will be an address by G. W. Ross, M.P.

—An immense run of herring has filled the Taunton and Nemasket rivers, Mass., so full that one sweep of the seine filled the waggons and left thousands of fish on the ground.

—Henry Ward Beecher lectured at Port Jervis for the benefit of the Brotherhood of Locomotive Engineers. The church, which seats about eight hundred, was three-fourths full.

—What a woman lacks in skill she makes up in enthusiasm when she cuts her boy's hair. The back of his head may look like thunder, but every scallop is a bright vision of devoted affection.

—Why should the beehive be taken as a symbol of industry? Not a bee is to be seen all winter long, while the cockroach is up at five o'clock in the morning, and never goes to bed till midnight.

—An exchange asks: "What are our young men doing?" We can't answer for the rest of the country, but around here they are engaged mainly in trying to lead a nine-dollar existence on a seven-dollar salary.

—The three examiners for the license in midwifery at the Royal College of Surgeons, England, have tendered their resignations rather than perform the duty imposed on them by the law of examining women as well as men.

—The union of the City Bank of Montreal and the Royal Canadian of Toronto has become a *fait accompli*. Mr. J. B. Renny and Mr. Thomas McCraken were appointed joint cashiers, one to reside in Montreal, the other in Toronto.

—The superintendent of the Canada Southern Railroad has issued an order prohibiting tram hands from boarding at hotels and saloons. That is a pretty go indeed. The next thing will be an order prohibiting them from wearing diamonds and owning fast horses.

—Mlle. Emma La Jeunesse (the Mlle. Albania of the stage), the Canadian *prima donna*, has been achieving fresh triumphs in London. The London *Times'* criticism of her singing is highly flattering. Mlle. La Jeunesse was born near Chambly, and lived for some years in Montreal, attending school at one of the Convents. Her father was a violinist.

—A Virginia railroad was made to pay $25 for killing a valuable rooster. The engineer said he blew the whistle as kindly as possible, but when the rooster dropped one wing on the ground, raised his eye heavenward and commenced whitting his spur on the rail, forbearance ceased to be a virtue, and he let drive into him with thirteen cars.

POLICE.—Chas. Shaver, who had the honor of exhibiting the new slab collar and new Tim Flaherty hat, was drunk—a charge grateing so harshly on the feelings of the young man that he felt ready to faint, and indignantly demanded authority for the rudeness of the proceedings, was relieved of $2 and put out.—John Turner, not unknown to fame, tackled too much spirits—drunk—$2 or 15 days.

REAL ESTATE.—Those who seek good investments should remember the sale by auction, on Saturday next, of two valuable properties—the two houses belonging to Mr. R.M. Rose, on Queen street, and the house on Brock street belonging to Mr. William Shannon. Both are excellent property, and should attract competition.

BASE BALL.—Yesterday the junior boys of the Christian Brothers' School challenged the senior boys to play them a game of base ball. The senior boys consented. At the expiration of two innings play ceased, leaving a result of: Seniors, 12; Juniors, 4.

Phosphorus AS A Medicine

ALTHOUGH the Modern Materia Medica includes many valuable remedies for human afflictions, it is a matter of certainty that in all cases where the animal vitality is failing, Phosphorus is decidedly superior to every other remedy at present known, and it possesses the the great advantage of not causing, when its use is relinquished, the slightest reaction or depression.

The *Cornhill Magazine* of April, 1861, says:—But of all the inorganic elements, none seem to exist so striking an adaptation to become a constituent of the organic body as Phosphorus. Here, then, in an element, which can imperceptibly and quickly pass from a condition of great chemical activity to one of great chemical inertness. In virtue of this character Phosphorus may follow the blood in its changes, may oxidise in one great set of capillaries, and to be indifferent to oxygen in the other; may occur in the brain in the vitreous form, changing as quickly as the intellect or imagination demands, and literally flaming that thoughts may breathe and words may burn and may be present in the bones in its amorphous form content, like an impassive caryatid, to sustain upon its unwearied shoulders the mere dead weight of stones off flesh—and what is here said of the brain, as contrasted with the bones, will apply with equal or similar force to many other organs of the body. All throughout the living system, we may believe that Phosphorus is found at the centres of vital action in the active condition and at its outlying points in the passive condition.

Dr Rowbotham says it is difficult to avoid the conclusion that Phosphorus in a free, unoxidated state is an essential element of activity in the brain and nervous system of animals; it is equally difficult to resist the conviction of the great importance of Phosphorus as as an element of the *Materia Medica*.

The question naturally presents itself, Why is so valuable an element so little regarded and so seldom prescribed? The only answer which can be given is—that a certain difficulty has been found in so preparing it that its action may be kept under perfect control. Hitherto it has been used in almond and olive oils, in sulphuric Ether, in rectified Alcohol, in chloroform and in several other substances; but however valuable it has been found in all the hitherto known methods of its preparation, certain irregular results have been experienced, which have led physicians to neglect it for general purposes and to employ it only in extreme cases. But a chemical process has now now been discovered, by which its invaluable action on the human system may be realized with any of those drawbacks which previous modes of administration have invariably produced.

Protected by Royal Letters Patent,
Dated October 11th, 1869.

UNDER DISTINGUISHED PATRONAGE.

DR. BRIGHT'S

PHOSPHODYNE.

OZONIC OXYGEN

The New Curative Agent, and only Reliable Remedy for Nervous and Liver Complaints.

This Phosphatic combination is pronounced by the most eminent members of the Medical profession to be unequalled for its power in replenishing the vitality of the body, by its supplying all the essential constituents of the blood and nerve substance and for developing all the powers and functions of the system to the highest degree. It is agreeable to the palate and innocent in its action, while retaining all its extraordinary properties; and as a specific, surpassing all the therapeutic agents of the present day for the speedy and permanent cure of—Nervous Prostration, Liver Complaints, Palpitation of the Heart, Dizziness, Noises in the Head and Ears, Loss of Energy and Appetite, Hypochondria, Female Complaints, General Debility, Indigestion, Flatulence, Incapacity for study of Business, Sick Headache, Lassitude, Shortness of Breath, Trembling of the hands and limbs, Impaired Nutrition, Mental and Physical Depression, Consumption (in its first stages only), Timidity, Eruption of the Skin, Impaired Sight and Memory, Nervous Fancies, Impoverished Blood, Nervous Debility in all its stages, Premature Decline, and all morbid conditions of the system arising from whatever cause. The action of the Phosphodyne is twofold—on the one hand increasing the principle which constitutes nervous energy, and on the other the most powerful blood and flesh generating agent known; therefore, a marvellous medicine for renovating impaired and broken down constitutions. It quickly improves the functions of assimilation to such a degree, that where for years an emaciated anxious, cadaverous and semi-vital confirmness and the whole system return to a state of robust health. The Phosphodyne acts electrically upon the organization; for instance, it assists nature to generate that human electricity which renews and rebuilds the osseous, muscular, nervous, membranous and organic systems. It operates on the system without exciting care or thought upon the individual as to the process. It moves the lungs, liver, heart, kidneys, stomach and intestines, with a harmony, vigour, yet mildness unparalleled in medicine.

The Phosphodyne gives back to the human structure, in a suitable form, the Phosphoric or animating element of life, which has been wasted and exerts an important influence directly on the spinal marrow and nervous system of a nutritive, tonic and invigorating character, maintaining that buoyant energy of the brain, and muscular system, which renders the mind cheerful, brilliant and energetic, entirely overcoming that dull, inactive and sluggish disposition which many persons experience in all their actions.

The beneficial effects of the Phosphodyne are frequently shown from the first day of its administration, by a remarkable increase of nervous power with a feeling of vigour and comfort, to which the patient has long been unaccustomed. Digestion is improved; the appetite increases wonderfully, the bowels become regular, the eyes brighter, the skin clear and healthy and the hair acquires strength, showing the importance of the action of the Phosphodyne on the organs of nutrition.

Finally, the Phosphodyne maintains a certain degree of activity in the previously debilitated organs to returns to their sound state and perform their natural functions. Persons suffering from Nervous Debility, or any of the hundred symptoms which this distressing disease assumes, may rest assured of an effectual and even speedy cure by the judicious use of this most invaluable remedy.

DR. BRIGHT'S PHOSPHODYNE

IS SOLD ONLY

In Cases at 10s. 6d. by all Chemists and Patent Medicine Vendors throughout the Globe.

Full Directions for use in the English, French, German, Italian, Dutch, Spanish, Portuguese, Danish, Russian, Turkish, Persian, Hindostani, Madrasse, Bengalee, Chinese and Japanese languages, accompanying each case.

☞ CAUTION.—The large and increasing demand for Dr Bright's Phosphodyne has led to several imitations under similar names, purchasers of this medicine should therefore be careful to observe that each case bears the English Government Stamp, with the words Dr Bright's Phosphodyne engraved thereon, (White Letters on Red ground) and that the same words are also blown in the bottle. In every case bears the Trade Mark and signature of Patentee. The public are particularly cautioned against purchasing spurious imitations imported from the United States and are requested to note the directions for use are printed in all the languages as above, without which none can possibly be genuine.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.* Made simply with Boiling Water or Milk.—Sold only in packets labelled—"JAMES EPPS & Co., Homœopathic Chemists, 48, Threadneedle Street, and 170, Piccadilly, Works, Euston Road and Camden Town, London."
