STEAM COAL.

THE FORMER ADVERTISEMENT for Tenders for Coal for Kingston Penitentiary and Rockwood Asylum, dated 23rd April, has been withdrawn, and the following is now substituted for it:—

SEALED TENDERS,

Endorsed "Tender for Coal," will be received at the office of the undersigned until

Monday, 10th June next, at noon,

from parties willing to contract for the delivery of

2,100 Tons, of 2,240 lbs. each, Large Coal,

1,400 tons of which to be delivered at the Coal Shed, Rockwood Asylum, and 700 tons at Coal House, Kingston Penitentiary.

The Coal to be clean and free from slate, and a Certificate must accompany each cargo, distinguishing the Mine from which the Coal has been taken.

The whole of the Coal must be delivered on or before the 15th October next.

Two responsible sureties, whose real signatures must be given in the Tenders, will be required for the due fulfilment of such contract as may be entered into. Parties tendering will please state from what Mine the Coal is to be taken.

There is safe and convenient wharfage accommodation at each Institution for mooring vessels.

S. P. JARVIS, Lieut.-Col., D.A.G.,
Kingston.

R. Gage,

ARCHITECT, MARBLE BLOCK, Princess Street.

Kingston, May 25th, 1872.

To the Public of Canada.

OFFICE OF THE
JOSEPH HALL MANUFACTURING COMPANY,
OSHAWA, ONT., MARCH 8, 1872.

Being desirous of testing the merits of the different water-wheels now offered for sale in Canada, as to their economical use of water, we as manufacturers of the GENUINE JAMES LEFFEL DOUBLE TURBINE, make the following challenge to the manufacturers of ANY WHEEL now made in Canada, whether it be IMITATIONS of the JAMES LEFFEL DOUBLE TURBINE or any other pattern, the wheels in all cases to be wholly manufactured by the competing parties:

We will place in the hands of any responsible party six thousand dollars ($6,000), the party accepting the challenge to do the same, the money to be held subject to the award of the judges. The wheels to be tested in a flour mill, driving the same runs of stone, grinding the same wheat, and having the same number of square inches of opening to receive the water, the amount of water discharged to be the measure of the amount used by each wheel.

The judges to be non-residents of Canada, and to be thoroughly well informed in the mode of testing the power of turbine wheels—each party to choose one judge, and the two to chose the third.

The owners of the winning wheel to have their money refunded them, and the loser's money to go towards establishing a mechanical free library in any town in Canada named by the owner of the successful wheel.

The wheel to be tested at ¼, ½, ¾, ⅞, and full gate.

Each party to give good and sufficient bonds, to the amount of $4,000, that the loser shall pay the entire expenses of the test.

There are some wheels that give very good results with full head and full gateage which entirely fail under partial head and partial gateage. Such wheels in our climate, where the water-powers are affected by both cold and drouth, are of no practical value.

We claim that we are the only makers of the GENUINE JAMES LEFFEL DOUBLE TURBINE WHEEL in Canada, and that it is without a RIVAL in the WORLD IN PRACTICAL RESULTS.

More than 6,000 of these wheels are now in operation in Canada and the United States. The sales of no other wheel ever yet introduced on this continent exceed one-sixth this number.

Our wheel has been thoroughly tested in GREAT BRITAIN, and has fully maintained the reputation it has gained in Canada and the United States, as the most economical water-wheel in practical operation ever yet introduced.

We are now publishing a new descriptive water-wheel pamphlet containing 150 pages of valuable matter, which will be sent free to all applicants.

For further information address,

F. W GLEN,
Oshawa, Ont.

N. B.—We desire to call attention to the following certificate:—

SPRINGFIELD, Ohio, Dec. 25, 1868.

We take pleasure in informing the public of Canada, that we have sold and furnished Mr F. W. Glen, of Oshawa, Ontario, Patterns, Formers, Drawings, Guages, and all other necessary information to build our celebrated Double Turbine Water-wheel, invented by James Leffel, and known as the "Leffel Wheel." We have also obligated ourselves to furnish the same facilities for manufacturing to no other parties in Canada. Without the information we have given to Mr Glen, no one can successfully build our wheels, and we advise parties in Canada to purchase our wheels of no other manufacturer. Mr Glen's facilities are unsurpassed, and we feel sure that he will build a wheel that will give perfect satisfaction. We therefore commend him to the public of Canada with entire confidence, feeling sure he will manufacture a wheel in all respects equal to our own.

[Signed, JAMES LEFFEL & CO.

Correspondence.

EARLY CLOSING.

TO THE EDITOR OF THE DAILY NEWS.

Dear Sir,—Pardon me for asking a short space in your paper to say that while looking over the paper of the *British Whig* of the 30th, I noticed an article by dry goods, upon the (as he says) much needed reform of early closing. I am glad Sir, to find that there is among the young men of the dry goods stores in this city, one who can exert himself to try and benefit his fellow workmen, and who understands how to go about getting the much needed reform started.

I understand Sir, that it is under contemplation to call a meeting at an early day of the salesmen of Kingston to take into consideration the ways and means to accomplish the desired end, and I am sure that you Mr Editor will coincide with me when I wish them success in their undertaking, and also that the custom of keeping stores open till the hour stated by dry goods, is quite unnecessary, and that the same amount of business could be done if it was generally understood that all the stores would be closed at six o'clock p.m. And as is stated if they go about it in a respectful manner that their desires will be satisfied.

OBSERVER.

THE PARK GUNS.

TO THE EDITOR OF THE DAILY NEWS.

I am an occupant of the Park. I am a Russian although I am a captive, and as a trophy I do not like to be ill treated. When the Park gates were closed more than a month since I felt happy and, my happiness consisted in the hope that I should not be looked at by my countrymen's eyes. You know well that degradation in national matters is the worst kind of degradation. The men who rule the Park have forgotten, or do not wish to remember me. But I do not forget when the Park men closed the gates I fondly supposed that they would have considered me while they had a thought of the ground where I was penitentially confined. Some kind Samaritan has acted the Samaritan's part—a part which many persons in the world might copy to advantage—and allowed the Kingston public to look at me. But I am ashamed; my weight and my voice at Sebastopol were good enough for the time, but unfortunately for me I have left my native country and exchanged one northern for another northern climate. But I am a prisoner—a slave—a conquest. I must submit to my fate; my fate is a bad one; I have to stand upon three legs, and am entirely neglected, just as the park is. Were I at the small town of Brockville, where I am told my brother is, and is well treated, I should be happier than I now feel, but, alas for me I am not there, and therefore through you I express my woes. Oh, city councillors, aldermen, if I should miscall you, attend to my grief, and at least do merit to the country that conquered me, even if you do not respect myself. I am only a

RUSSIAN GUN.

Kingston, June 3, 1872.

A PATENT IDEA.

TO THE EDITOR OF THE DAILY NEWS.

Sir,—Does it not surprise you that bloated manufacturing capitalists have not come hither in swarms to lease untaxed motive power from the Patent Motive Power Company, and gorge themselves upon the magnificent bonuses wherewith our municipal corporation would endow foreign enterprise and capital? Are you not disgusted at the apathy wherewith the maritime world regard our labours to make this the chief harbour on the unsalted seas? Is not the blind obstinacy which makes the Cataraqui Bridge Company cling to the foundations of their institution in the mud, positively astonishing? If a dredged harbour, a magnificent breakwater, cheap motive power, untaxed manufactories, and endowed schemes for the benefit of that beggarly individual, Public Good, cannot induce the sleeping beauty to awake from her slumbers, what will?

How far the public may have been edified by the ingenious plans get up for the rescue of the city from that chronic discontent which makes many people zealously assert their determination to "clear out," I cannot undertake to say. Despite his pitiful appeals for patronage, Public Goodhas common sense enough left to see that any plan which taxes the working-man for the benefit of the manufacturer is a premium to the working-man to honour us by his absence. The mental capacity of Public Good to comprehend what is wholesome for him depends upon the plan of his nativity. Usually communities measure their progress by comparison, and derive motives to progress from the example of others. It could be easily proved that there are exceptions to the rule, and that many places of would-be importance render thanks that they are not so given to notions or projects as others are, and among such the surest mode of bringing an idea into disregard is to cite the example of any other place.

With this in view I am diffident in arguing a departure from the course which has hitherto obtained here of letting every man mind his own business. Thousands of immigrants are settled in the Eastern Townships, in the Townships on the Ottawa, in the Muskoka Territory, who have been induced to settle in the lands they have chosen by special exertions for that end. Toronto puts forth its energies to secure the settlement of the country in its rear. Ottawa has its immigration club. Great railway companies and land companies have their agencies in every place where immigrants are to be met with, bent upon procuring them to settle here or there.
