Kingston, Sept. 7, 1872.

CAUTION.
THE CORNWALL
Manufacturing Company

HAVE PLEASURE in intimating the complete restoration of their works at CORNWALL, which are now in full operation, producing large quantities of WHITE and GREY BLANKETS, and Heavy Medium Class TWEEDS.

They regret, however, having again to draw the attention of the public to the continuance of the disreputable practice of importing ENGLISH Blankets and selling them as Canadian. These Blankets are made largely of *Shoddy and Cotton Waste*, with a small percentage of Pure Wool, and though lightly in appearance, closely imitating the CORNWALL BLANKETS, and ticketed "CANADIAN MANUFACTURE," have neither WARMTH NOR WEAR, but can be sold at a lower price than the CORNWALL BLANKETS (which are made of PURE WOOL) can be produced for.

The public are cautioned against this attempted deception, and respectfully informed that the name of the CORNWALL MANUFACTURING COMPANY is printed on the Ticket of every Blanket made by them.

Cornwall, Sept. 7th, 1872.

KINGSTON MARBLE WORKS
TANDY BROTHERS,

AN AMUSING SCENE.

In connection with the case Watson *et al* vs. Pike, mentioned in the proceedings at court at Cornwall the other day, a rather amusing incident occurred. The defendant, who, by the way has a strong touch of the Yankee about him, was so hugely elated by the favourable result, that on the evening of the trial, he went to the hotel where Mr Justice Gwynne's rooms were, and requested the clerk to shew him the Judge's parlour. He complied, and upon entering, the following refreshing colloquy took place:—

Pike,—"I presume you're the Judge?"

His Lership,—"Sir!"

Pike,—"Aint you the Judge?"

His Lordship,—"Yes; to what am I indebted for the honour of this visit?"

Pike (extending his hand)—"I jest calculated so, and am glad to make your acquaintance Judge. What's your address?"

His Lordship (quizzingly,)—"For what purpose do you require my address?"

Pike,—"Wa-al, you see I was the defendant in that saw case and I almost guessed it had gone against me, if you hadn't acted so handsome."

His Lordship (inquiringly)—"Well?"

Pike,—"Wa-all, I can't give you anything just now, but I want to send you a present, so if you give me your address you may bet you'll get something."

His Lordship (sternly)—"Will you please leave the room sir?"

Pike,—"Hesw?"

"His Lordship, (angrily)—"Leave the room at once, Sir!"

Pike,—"Why Judge, you needn't get your ile up quite as fast as all that, I meant no offence and I kinder reckoned it was the clean thing to give you a fee. Let us have a smile anyheow?"

His Lordship (vehemently)—"I will have you arrested and brought before the court, unless you leave the room instantly."

Pike wilted.—*Cornwall Freeholder.*

THE LATE LAKE DISASTERS AND TELEGRAPHIC MISMANAGEMENT.

The late multiplied disasters to lake navigation are among the most serious that have been recorded for some time. On the night of the 28th ultimo four vessels were sunk, a propeller and many rafts and scows went ashore on Lake Erie, and numerous vessels out of reach of assistance were flying their signals of distress. The intelligence of the 30th ultimo showed fatal casualties to fourteen large vessels on Lake Erie and the total destruction of numerous smaller craft and barges with considerable loss of life. But the telegrams of the 1st instant prove that there was much greater loss of life and property on Lake Huron than on Lake Erie. Several steamers were overwhelmed in the gale, and the waters of the lake must have presented a fearful spectacle of wrecks. The probability is we have not yet heard the worst.

It is certainly a matter of surprise that shipmasters, in the equinoctial season, should be so reckless of life as to be so exposed when these lake tempests come on in their well-known punctuality and fury. The government weather telegrams cover the main parts of the lake region and have not failed to give timely warning of impending danger, and have frequently announced these gales thirty-six hours in advance of their arrival.

The approach of the late storm was duly forewarned, and cautionary signals were ordered to be displayed at Buffalo, Cleveland, Toledo, Detroit, Chicago, Grand Haven, Milwaukee, Oswego and Rochester many hours before the storm reached those places. The orders for Milwaukee and Grand Haven did not reach their destination, it is said, through the negligence of the telegraph company entrusted with their transmission—a criminal omission, for which the company should be held responsible by the public who sustained damage from their neglect. There can be no doubt that shippers and seamen on the lakes would gladly avail themselves of the meteorological forecasts if furnished promptly by the telegraph companies, and, if the latter knew their own interests, they will do well to spare no pains to transmit these storm warnings with the utmost possible despatch. The American public have endured until their patience is exhausted at the inefficiency of our telegraph corporations. These overgrown monopolies cannot expect the people quietly to submit to mismanagement which entails not only vast loss of property but also involves, as in the present instance, great loss of life.—*N. Y. Herald.*

CLEAR GRIT BILL OF FARE.

The Toronto *Express* says: The Grits have not been so very long at the banquet table of honour in this Province, yet they have managed to provide a very rich Bill of Fare:

Speak Now.
If you can't coax them buy them.
Proton Outrage.
Elgin Association Funds.
Silver Islet Fraud.
Indian Reserve Lands.
Isolated Risk Company.
McKenzie and the Coal Oil Ring.

In old the men who could be guilty of the above charges would be driven out of the country. Boss Tweed and his friends in so short a time could not equal our "pure" men in the Ontario Government. In the whole history of Canadian politics no such bill of fare was ever placed before a discerning people. If so much wrong can be performed in so short a time as seven months, how much would our credit be worth if the present men had charge of our affairs for the next four years? Every country is afflicted at some time with an epidemic of some kind; but no country has been called upon to suffer more than the people of Ontario for the past seven months by the present misrule of Blake, Mackenzie, McKellar and Crooks.

Cider is so cheap and abundant in New England this fall that the only trouble, and more than half the expense, is to get a barrel to keep it in. Complaint is made that on the Longmeadow Road the highway in the vicinity of the cider mill is obstructed by teams loaded with apples, and another report likens the coming of apple teams to the advent of a circus at a country village.

The Dominion of Canada.

Some fine specimens of copper have been discovered near Halifax in Nova Scotia.

The two great advocates of temperance, Hon. S. L. Tilley and ex-Governor General Neal Dow, had an interview on Saturday morning.

On Friday evening the body of a man was found drowned at the foot of the Cornwall Canal. The deceased was observed on Wednesday night last walking near the locks in an intoxicated condition, and it is supposed he fell in accidentally.

His Excellency the Governor General has appointed Charles Perry, of the town of Peterborough, in the Province of Ontario, Esquire, to be a Collector in Her Majesty's Customs.

Mr Wise, C.E., has been appointed Superintendent of the Rideau Canal in the place of Mr Slater, who has for so many years filled the position with satisfaction to all concerned.

The following new post offices were established in Ontario on the 1st of September:—Allan's Mills, Burgess, N. Lanark, S.R.; Seale, Brunel, Victoria, N.R.; Spence, Spence, District, Nipissing; Uphill, Dalton, Victoria, N.R.

A Prescott paper speaks of a stool of oats grown by Mr Daniel Caughey, which contains 55 shoots, each shoot averaging 150 grains, or 8,250 grains in all. A pretty good crop from one seed. It is an imported variety.

The demand for domestic servants is increasing every day, and the supply seems to be decreasing proportionately. In some localities in the Upper Ottawa country, girls are offered $20 per month, and very few can be had even at that rate. The trouble appears to be that they get married as soon as they go there.

According to the statement of traffic over the Great Western Railway during the exhibition week the amount of receipts were $150,700, and the number of passengers carried 67,000. This is largely in excess of any one week's return since the commencement of traffic on the road.

A hunting party, composed of several local Nimreds, will visit the 3rd concession of Tyendinaga during the coming week, with the intention of slaughtering some of the bears which have lately been seen in that locality. Other "mighty hunters" are preparing for an onslaught on the ducks, the coming of which in large flocks is expected ere long.

We see by the Whitby *Chronicle* that a person who has been in the employment of the Grand Trunk at the Whitby station for some time has been arrested for pilfering goods from the cars and in the warehouse. He has been remanded to jail, and evidence is accumulating against him.

The Long Point Company has opened the season's shooting on their preserves. The gentlemen comprising the opening party were Col. Tindale, the Solicitor of the Company, Col. French, and Messrs Ramsey, of Montreal, Shears, of the Rossin House, Toronto, J. H. Backhouse, A. Lees, and J. B. Hutchinson, of Port Rowan.

On Monday last, says a Western exchange, as the mail-carrier was quietly conveying Her Majesty's mails between Sarnia and Sombra, he heard the report of a gun from some unknown hand, and presently a magnificent specimen of Uncle Sam's authority, in the shape of a monstrous eagle, fell in his carriage. Recovering from his fright, and observing that the bird exhibited no disposition to interfere with Her Majesty's mail bags, he carried his celestial trophy home with him.

The Huron *Signal* regrets to announce the death of Chas. Widder, Esq., Commissioner of Inland Revenue and Crown Land Agent, which took place at his residence in this town on Thursday morning last. Mr Widder has been ailing for some time, and his death though not wholly unexpected was rather sudden. He got up as usual in the morning and dressed himself, but not making his appearance his family on proceeding to his room found that he had fallen on the floor, and though still alive he shortly afterwards expired. He was one of the oldest residents of Goderich, and was highly esteemed by all who knew him.

LOGIC.

The Grits are fine logicians. They contend that because Riel retired when Cartier was nominated in Provencher, the former must be a supporter of the latter. Well, then, Hurdon retired when Blake took the field in South Bruce, therefore Hurdon must be a disciple of Blake's. You see how it is yourself, although perhaps Hurdon does not. We don't wade through the *Globe* every day for nothing.—*Guelph Herald.*

The South Bruce man retired before Blake, because he knew he would swallow him alive, and he said so himself. But Riel retired "in favour" of Cartier when he knew he could beat Cartier, without any trouble at the Provencher polls.—*Cobourg World.*

How does the *World* know Riel "could beat Cartier?" Does he draw his inspiration from the close intimacy that has been said exists between Riel and his movements and the Grits of Ontario? Or is it true, as has been stated, that the Grits have been furnishing Riel with money sufficient to beat anyone? And therefore the *World* knows that "Riel knew he could beat Cartier?" Grit logic is not at all times comprehensible, and this attempt of the *World* is not an exception.—*Belleville Intelligencer.*

THE ADVANCE IN GOLD.

The gold market advanced to 115¼ yesterday on the news that the Bank of England had raised the discount rate to five per cent. This procedure was wholly unexpected in Wall street, and, an explanation being sought the conclusion was reached that England had become alarmed at the nature of her trade and financial relations with this country, and had advanced the rate to prevent a threatened movement of specie in this direction. While watching Germany all summer to forestall the cashing of the drafts given upon London by France in payment of the indemnity, she gave no heed to the efflux of capital to this country, and has only lately perceived that with our enormous exports of wheat and cotton this winter, and the reduction of our imports to their usual winter standard, the rates for sterling exchange must speedily cause a flow of specie hither—a reversal of the direction of the specie current, which she must stop at all hazards. Hence the first application of the screw on the money market yesterday. The emigration of capital is only a natural sequence of the long emigration of labour to America, and follows it as naturally as water seeks its level. The present relations of the United States and Europe in these matters are very interesting and worthy of profound study.—*N. Y. Herald.*

There is no disease flesh is heir to ... troublesome to manage than rheumatism ... comes when you least expect it, and gets ... remains till it gets ready to go away. ... most conspicuous remedy for this complaint ... Johnson's Anodyne Liniment.—*Adv.*

Two or three doses of Sheridan's Condition Powders will cure a horse of common cough or cold, and the very worst cases may be cured in a few weeks. We know this from experience.—*Adv.*

Parents lessen your Shoe bills two-thirds by buying Cable Screw Wire factened Boots ... Never rip or leak.—*Adv.*
