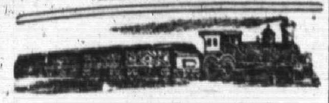
TRAVELLING.



Kingston & Pembroke & Canadian Pacific Railways

Will Run Farm Laborers' Excursion

TO THE

Canadian North-West

AT FARES:—

Winnipeg, Deloraine, Antler, Estevan, Binscarth, Moosomin, Hamiota, Swan River,	$28	Regina, Moosejaw, Yorkton, Prince Albert, Calgary, Macleod, Red Deer, Edmonton,	$30 / $35 / $40

Going August 18th, return trip to be completed on or before November 16th, 1900.

Special train will leave Kingston 8 a.m., making direct connection with C.P.R. at Renfrew.

Full particulars at K. & P. and C.P. R. Ticket Office, Ontario street.

F. CONWAY, Asst. Gen. Pass. Agt. B. W. FOLGER, Gen. Manager.

The Bay of Quinte Railway New Short Line for

Tweed, Napanee, Deseronto and all local points. Train leaves City Hall depot at 4 p.m. R. J. Wilson, C.P.R. telegraph office, Clarence street.

GRAND TRUNK RAILWAY SYSTEM

FARM LABORERS' EXCURSION

—TO—

Manitoba and Canadian North-West via North Bay

AT FOLLOWING RATES:

Winnipeg, Deloraine, Antler, Estevan, Binscarth, Moosomin, Hamiota, Swan River,	$28	Regina, Moosejaw, Yorkton, Prince Albert, Calgary, Macleod, Red Deer, Edmonton,	$30 / $ 5 / $40

Going August 18th, return trip to be completed on or before November 16th.

J. P. HANLEY, Agent.

City Passenger Station, corner Johnston and Ontario Streets.

L. O. & B of Q. Sbt. Co'y Ltd.

Kingston, Picton, Belleville,

Str. **"HERO."**

Commencing April 19th will leave for Picton and intermediate Bay of Quinte points week days at 3 p.m. On Tuesdays, Thursdays, Fridays and Saturdays steamer will call at Deseronto, Northport and Belleville.

Kingston, Rochester,

Str. **"NORTH KING."**

Leaves for Charlotte, N.Y., (port of Rochester) on Sundays, Tuesdays and Thursdays at 6.30 p.m.

Steamer leaves for Gananoque and 1,000 Islands at 9 a.m. SUNDAYS, TUESDAYS and THURSDAYS.

Right reserved to change time with or without notice.

Auctioneer, Market Square.

OF INTEREST TO WOMEN.

LECTURES ON HOUSEHOLD ECONOMICS ARRANGED.

Noted Teachers and Lecturers Will Tour Ontario This Autumn—Kingston Should Secure Them—Course of Lectures to be Given.

This has been called woman's age, and woman has made use of the freedom accorded her, not for her own selfish aggrandisement, but for the uplifting of the home. The ancient Greek subjugated all the interest of the individual to the good of the state; the modern woman is aiming to make the home the centre of her enthusiasm and her intelligence. She has awakened to the conviction that love must be fortified by knowledge, and the home to be dignified must be redeemed from the realm of chaotic instincts to the ordered kingdom of science. Not individual taste or caprice must hold sway, but law and science. Home economics is a very broad term, covering sanitation, cookery and kindred household arts and sciences, and instruction in the art of living from the kindergarten to the college. It means a knowledge of all that effects the welfare of the family, physically, mentally, morally. It means that a woman shall know about the foundation of her house, the drainage and plumbing, heating, lighting, all that makes for cleanliness both visible and invisible, the various properties of foods and the changes effected by combination and heat in them, the architecture and decoration of her home, the proper expenditure of money, with due regard to right proportion in the adjustment of income and expenditure. It presupposes standards of living and aims to substitute system for the mere hit or miss style dependent on daily exigencies.

In Canada household science is in its infancy, in order to awaken public opinion to the realization that domestic science is not a fad, not a knowledge of an increased number of fancy dishes, not mere cookery, but a knowledge of all the laws which govern the development of the family in its relation to the nation and to the individuals composing it, it is purposed to have a number of women who, by college training, have added practical experiences, give a course of lectures in the large cities of Ontario.

* * * *

Miss Anna Barrows, lecturer of The Kitchen Magazine, the successful exponent of the new science, who was instructor in the Boston Y.W.C.A. for five years and has since been very busy between editorial work and speaking before farmers' institutes, women's clubs, etc., will be one of the lecturers. She is a very popular demonstrator in cooking, this summer having charge, in conjunction with Mrs. A. P. Norton, of the summer school of Chautauqua. She will lecture in Ontario during the week of Oct. 10th to 17th, on the practical benefits of a knowledge of household science to the purse, the body and the time of the housekeeper.

Mrs. Helen Campbell, who commenced her work as a journalist, was amused to study the subject of scientific home making by the condition of the homes of the working people. She was lecturer in household economics in the university of Kansas, one of the first colleges to give the subject a place on its curriculum. Her book, "Household Economics," is one of the most popular books on the subject, covering the principles underlying every phase of home life. She has written a number of books, among them, "Prisoners of Poverty," "Women Wage Earners," "The Easiest Way in Cooking and Housekeeping," besides several novels. She was appointed a delegate to the congress in Paris on "Child Labor," and "Conditions and Rights of Women." Her lecture will treat of the relation and importance of the highest development of the family to the nation and the part which household science will play in the development. Mrs. Campbell will give Ontario the last week of October. Having awakened an interest in the subject and shown the importance and extent of the movement, the following lectures will aim to give practical instructions in the science of homemaking.

* * * *

Mrs. A. P. Norton, A.B., who wrote her graduating essay on "Fermentation in Bread," and then went to a house of her own to develop practical household science, which was then in its beginning. Taking up the subject on the death of her husband, she pursued a thorough technical course in Pratt institute and Massachusetts institute of technology. She has been supervisor of domestic science in the schools of Brookline, a wealthy suburb of Boston, principal of the school at Chautauqua, and this autumn goes to Col. Parker's new school, built and endowed by a wealthy Chicagoan to give full scope to carry out the educational theories which have made his name famous. Miss Norton will have charge of the departments of household science and household arts, with a competent corps of assistants. She comes to Ontario the third week in November to lecture on "The New Ethics of the Dust" or "Sanitation Applied to the Household."

* * * *

Prof. Robertson, commissioner of agriculture at Ottawa, has promised to give the lecture on "Foods." It is not necessary to remind Canadians of the excellent work he has done, first for our dairies and then for the transportation of our products. His success has shown the wisdom of a chemical knowledge of foods for commerce, and he will ably demonstrate its wisdom for the home.

Prof. Shortt, of Queen's university, Kingston, will speak on the sociological aspects of the movement to put homemaking on a scientific basis.

* * * *

Last, but by no means least, Mrs. E. H. Richards, who is the mother of the movement, will give her influence to our cause. She has been counsellor in every departure of the new science, starting as professor of science in the Institute of Technology in Boston, and aroused by the sneer of a fellow professor, "What has Chemistry to do with the Kitchen?" she has led in the experiments which sought the chemical laws including all the ordinary processes of the household. The experiments to find the cheapest way of obtaining the most nutritious food, resulting in the New England kitchens being carried on under her directions. The plans for a hygienic residence for women students in connection with Chicago university sought her approval. She has worked out the details of the classes for schools and colleges with the women who were undertaking these new courses of instruction. She is the author of several books on "Home Sanitation," "The Chemistry of Cooking and Cleaning," and her latest "Cost of Living as Modified by Sanitary Science," is a very valuable contribution to the subject. She has promised to spend the first week in December in Ontario. Besides lecturing in the different cities, she has consented to meet school boards, university senates, any body of men and women who wish to seek her advice and her experience in the experiments which are being initiated in our country.

* * * *

Toronto, Hamilton, St. Thomas, Whitby, and Montreal have signified their intention of having the lectures given in their cities. Will Kingston have them?

INDIA'S MODERN CRUSADERS.

The Native Force That Will Go to China.

London Mail.

The Indian army has not had long to wait before called on to render help to the British empire.

The expedition to China has been a slight solace to it for having to mark time while the game of war was lustily played in South Africa.

The expeditionary force, which is to be sent out, will number 5,000 men of all arms. With the exception of the field battery of artillery, it consists entirely of native regiments.

But these regiments have in their ranks many races and many sects and creeds; stalwart Sikhs, Rajputs of high lineage, and the bluest blood of Hindustan, fiery Pathans from the wild borders of Afghanistan, stalwart Punjaubis and Telingas from the uplands of Madras. Sikh, Hindu, and Mahommedan, and Roman Catholic for Madras Sappers generally profess this creed, though now and again a Protestant, a nonconformist, and even an American Methodist finds his way into the ranks of these splendid Indian engineers.

This contingent is thoroughly representative of India as a whole. Its departure will stir up a spirit of envy throughout the native army, it will start multitudinous prayers for a large development of the Chinese crisis and the consequent need for many more troops.

In 1860-62 twelve regiments of native infantry sailed from India for the far east, compared with five on this occasion, and two regiments of cavalry as against one. To put it roughly, the Indian contingent in the early sixties was twice as large as on this occasion. But we only seem to be at the beginning of the China trouble. The Indian army is a more efficient and a larger fighting machine than forty year ago. Moreover, the Indian empire touches hands for thousands of miles with the Chinese empire. Railways have advanced through Upper Burma to within a little distance of the Chinese boundary, so, should the rebellion spread, Britain's army in the east will play a large part in quelling it.

But will India also have to pay? Before the first transport drops down the tide that question will be raised. India has been harshly treated in the past, and in these days of plague and famine, while she can spare men, she cannot spare treasure.

Of the regiments selected for service in China two particularly distinguished themselves in the Pathan revolt of 1897. It was the 1st Sikhs who furnished Mr. Gee, the political officer, with an escort on that ill-fated visit of the Teshi Valley, when the party were ambuscaded as they sat at lunch, and would have been annihilated but for the cool courage displayed by the native officers, every European officer having been shot down. The 1st Sikhs belongs to the Punjab frontier force. It has only four companies of Sikhs, two companies being composed of Pathans, one of Dogras or hill Rajputs, and one of Punjabi Mahommedans.

The 24th Punjab infantry, which is recruited in exactly the same way as the 1st Sikhs, formed part of the famous garrison of the Malakand. Of its Pathan companies the story is told that when the little force was in the most desperate straits the tribesmen shouted to their fellow tribesmen to lay down their arms. "Certainly," was the reply from within the walls, "come and take the rifles from our hands." The tribesmen, relaxing at their treachery, rushed rashly in to be met by withering volleys and scornful cheers as the Pathans of the 24th infantry filtered into the brown. The colonel of the regiment is Maj. Winterbotham, V.C. He won the bronze cross at the siege of Chitral, when after a sally he carried home under a heavy fire a wounded comrade on his shoulders.

The 1st Bengal Lancers, formerly Skinner's Irregular Horse, is recruited entirely from Mahommedans. Its honorary colonel is the duke of York. It last saw service in Afghanistan. The Bombay regiment is raised mainly in Rajputana, while the 1st Madras Pioneers obtains its men from the south of the peninsula. The latter regiment was first raised as long ago as in 1758. The Madras Sappers is a famous corps of engineers, in which families, generation after generation, have enlisted. At the building of bridges, the making of roads, the raising of forts, it is unequalled. It can handle a rifle with pluck. There is no regiment with a finer record in the Indian army list.

The 1st Madras Pioneers are stationed at Bangalore, the 1st Sikhs at Kohat, on the Punjab frontier. From Kohat to Pangalore is a similar distance as from Edinburgh to Gibraltar, similar too, is the difference in climate, also in the breed of men. So it can be understood that the Indian army is not as homogeneous as the British army. But it always fights in khaki. And it always fights well.

GATHERING UP THE DEAD.

H. G. BARRIE WRITES FROM JOHANNESBURG.

This Y.M.C.A. Officer Works as a Stretcher-Bearer on the Fields of Battle — Holding Service Whenever Possible — Men Go Foraging for Food.

Writing from his camp before Johannesburg, on June 2nd, H. G. Barrie, the Y.M.C.A. officer with the Canadian contingent, addresses the local association as follows:

"By 3 p.m. on May 29th we were engaged with the Boers in force. I had several conversations with the men before the conflict began. During the action my time was spent in action, as stretcher-bearer. Darkness brought the struggle to a close, but not before the Gordons had suffered heavily in carrying the kopje in front of them at the point of the bayonet. Their advance was as fearlessly done as a parade at home would have been. In the early morning when the dead were collected there were seventeen laid out in a ghastly row. The wounded made the casualty list run up to ninety-six in all. Before rolling up in our blankets for the night, I got the fellows together round the camp fire and read Psalm xci., by way of thanksgiving for our wonderful escape.

"The scene at the hospital ambulances in the morning was heart-rending. Strong men wallowing in their life's blood were struggling in unconsciousness, necessitating straps to prevent them injuring themselves more; men suffering silently; some tied up in all sorts of bandages, while the attendants were as careful and as gentle as possible.

"If it was not for the paper that we supply to them, the boys could not write one tenth of the letters that they do, as very few carry any paper in their kits. We are not at present able to hold our meetings regularly. The men are on very short rations, and as soon as they get off duty go foraging for themselves, and often it is 12 p.m. before they settle down. Many of the men consider flour and water, without salt or anything, a luxury, and dozens make the major part of their meals of half roasted corn on the cob and eaten on the march.

"When an opportunity for a meeting presents itself we take it. For example: A couple of us joined a small group warming themselves at the camp fire after supper. 'Wouldn't you like some singing after the fatigues of the day?' A hearty response was the answer, an impressive service was the result.

"Poor Glover died very suddenly in Johannesburg, when we first entered the city. It came as a very heavy blow to Black and myself, as the three of us had been intimately and most happily associated together in the work for some weeks past, while my own love and esteem for Glover is now months old. He had large plans for the welfare of the soldiers, and was following up lord Roberts' column with the idea of pitching his tent at the earliest moment, when he was stricken down with dysentery. I doubt if there has been a man so greatly used of God in this campaign as Glover has been.

"The colonel has kindly given us the waiting room of the old station, which we have furnished with several school desks, chairs, etc., making a comfortable reading and writing room. The first man who came in this morning said he would never have thought of writing home, if it had not been for our facilities and invitation last night. Our room is crowded to the utmost. Sunday we had two helpful meetings in it. The men say they do not know what they would do without the Y.M.C.A. now, God has indeed blessed us. The hard living the men have to endure has a demoralizing effect upon them."

She Was Pale and Languid

TOO NERVOUS TO SLEEP AND DAILY GREW WEAKER AND WEAKER.

By Using Dr. Chase's Nerve Food She Gained in Weight, the Color Returned to Her Cheeks and She Gradually Became Strong and Well.

Few people escape the depressing, debilitating effects of spring, when the blood is thin and watery and the whole system exhausted by the artificial life of winter.

The young lady whose case is described below had never been strong since passing the critical period known as the dawn of womanhood. She was always overcome by tired, languid feelings and lacked the color, strength and elasticity of movement which is natural to a girl of seventeen.

Her mother tells in the following letter how her daughter was completely cured by the use of Dr. Chase's Nerve Food, the great restorative.

Mrs. E. McLaughlin, 95 Parliament street, Toronto, states: "My daughter was pale, weak, languid and very nervous, her appetite was poor and changeable, she could scarcely drag herself about the house and her nerves were completely unstrung, she could not sleep for more than half an hour at a time without starting up and crying out in excitement.

"As she was growing weaker and weaker I became alarmed and got a box of Dr. Chase's Nerve Food. She used this treatment for some weeks, and from the first we noticed a decided improvement. Her appetite became better, she gained in weight, the color returned to her face and she gradually became strong and well. I cannot say too much in favor of this wonderful treatment since it has proven such a blessing to my daughter."

In cases of thousands of pale weak, nervous girls and women Dr. Chase's Nerve Food has demonstrated its unparalleled restorative powers. For men who are worn out by overwork or the ravages of disease this treatment is equally efficient.

It is a blood builder and nerve vitalizer of most unusual merit, which overcomes disease by strengthening and invigorating the whole system. As a spring restorative it is unapproached by any remedy known to man. 50 cts. a box, at all dealers or Edmanson, Bates & Co., Toronto.

DEPARTMENTAL EXAMS.

The Results Eagerly Looked for Throughout the Province.

The following further results of departmental examinations were issued yesterday: (a) Matriculation, parts I and II; (b) junior leaving, part II; (c) senior leaving, parts I and II. It has been found impracticable to publish a list in which each candidate for junior matriculation has been successful. The following lists, so far as they refer to matriculants, contain the names of only such candidates as have passed in all the subjects on which they have written. The names of candidates for matriculation scholarships are not included in the lists.

Matriculation.

Kingston—Part I.—Anglin, Baker, Pateman, Browne, Cartwright, Clarke, Crawford, Daly, Doyle, Fenwick, Gordon, Grass, Greaves, Herald, Keys, Laird, Lesses, Low, Mallen, Mills, Mitchell, Moran, Mudie, O'Donnell, Savage, Scott, Smythe, Spangenburg, Uglow, Walsh, Wilson, Black, Evrs, Haycock, Hay, Hughes, Johnston, Linton, Malcee, McDermott, Moxley, Norris, Ohlke, Orr, Raymond, Riley, Shannon, Sharp, Staley. Part II.—Asselstine, Ballantyne, Calvin, Carnovsky, Connell, Dalton, Houston, Lappen, Lindsay, Loree, Macdonnell, Macgillivray, L. W. Reid, Sargent, Williamson, Wormwith, Day.

Sydenham—Part II—Woodruff.

Deseronto—Part I—Dalton, Irvine, McCullough, Tulloch.

Gananoque—Part I—J. F. Benson, Gracey, Hale, Sprague, Keys. Part II—Kane.

Napanee—Part I—Bicknell, Burrows, Gilson, Templeton. Part II—Aylesworth, Mellow.

Newburgh—Part I—Thompson.

Picton—Part I—Allison, E. C. Dwight, H. R. Dwight, German, Jolliffe, Macdonald, McSandress, Mouden, Pine, Wellbanks, M. Y. Williams, R. L. Williams. Part II—Clark, De Mille, Young.

Junior Leaving Examination.

Kingston—Black, Burns, Cooke, Cordukes, Crowley, Evans, Grimshaw, Hall, Holland, A. Kelley, J. Kelley, Landon, Laturney, Norris, Payne, Schofield, Spankie, Timmerman, Webb.

Athens—Barber, Blanchard, Barney (also arithmetic), W. A. Charland, A. V. Charland, Crane (also grammar), Ellis, Eyre, Grey, Hall (also grammar), F. A. Halladay, C. E. Halladay, Lee, Mackie, McConkey, Mitchell, Murphy, Moore, O'Donoghue, Patterson, Philp, Pinkerton (also arithmetic), Scott, Stacey, Taggart, Wilbse (also grammar), J. H. Hunt.

Bath—Forester, Montray, Stevenson, McKenty.

Deseronto—Dumwoodie, McGaughey, McKenty.

Gananoque—Bennett, M. M. Carpenter, Cook, Pillon, German, Henstridge, Somerville.

Napanee—Bogart, Crookshanks, Daly, File, Grange, Hawley, Hogan, Hough, Johnston, McKeown, McGinness, McLean, McGreer, E. Shaw, Vanalstine.

Newburgh—McKun, Nesbitt, C. A. Paul, Ryan, Smith, G. L. Guy.

Picton—Bradley, Bigg, Clarke, Dodge, Gallagher, Gilbert, Howe, Killip, Melmoid, Sullivan, Tulley, Ward.

Sydenham—Brown, Groomes, Hunt, Joyce, E. Lake, Oliver, Reilly, Smithf Sproule, Sullivan, Todd, E. Walker, M. E. Walker, Fillion.

Senior Leaving Examination.

Kingston—Passed in English, Latin, French and German—H. A. Asselstine.

Athens—Passed in English and history and French—T. Duncan.

Deseronto—Part I.—Henley, Stewart. Part II.—Henley, Stewart.

Napanee—Part I.—Beeman, Baker, Crothers, York. Part II.—Baker, Crothers, Fife, York.

Picton—Part I.—Kearney, Wright, Eckert. Part II.—Eckert, Haight, Kearney, Wright.

INCIDENTS OF THE DAY.

Newsy Paragraphs Picked Up By Reporters on Their Rounds.

Condensed Milk, at Redden's.

J. F. Davidson, Newburg, was in the city today.

Miss May Hunt, Earl street, is visiting friends in Potsdam, N. Y.

New Clover Honey in Sections at Redden's.

H. Glover, teacher at Wilton, is the guest of his brother, Alfred Glover, grocer, Earl street.

Forrest, King street, has the best assortment of men's furnishings in the city.

Henry Moore, for an assault upon a young girl at Perth, has been sentenced to four months in jail.

D. J. McCammon, wife and family, after a lengthy visit with Mr. McCammon's mother, returned to-day to their home in Chicago.

This morning market clerk McCammon confiscated two bags of potatoes offered for sale by a Sydenham farmer. Each bag was ten pounds short.

Miss Ruby Donnelly, daughter of Capt. Thomas Donnelly, this afternoon entertained a few of her friends aboard the steamer America this afternoon.

Sergt. Hussey, of "A" battery, left to-day for Toronto, to remain for a couple of weeks. While there he will play baseball with the Crescent team of the Toronto city league.

The silver maple leaf pins for distribution among the members of No. 2 field hospital company's baseball team were received this morning by Sergt. Major O'Hagan. They are very neat little trophies.

License inspector Glidden was after judge Arther this morning because of a statement he made in court regarding the hour at which he and some friends gained admittance to an hotel fronting on the market square.

Dr. R. S. and Mrs. Anglin, Omaha, Nebraska, are in the city for a short visit with his mother. They are on their way to the Saguenay and the Adirondacks for a few week's tour in company with Mrs. Roberts, Utica, N.Y.

Charles H. Haystead, theatrical manager, will manage Nankeville's production, "Human Hearts," opening at Bridgeport, Conn., and embracing the leading cities of America. Mrs. Haystead (Josie Mills) is very sick at Las Vegas, New Mexico.

Jellied Tenderloins, Canadian Pate-de-foie, Veal Loaf, Jellied Hocks, English Brawn, Glenisirn Camp Pie, Boneless Chicken, James Redden & Co.

A WINE OF MERIT

DRY-ROYAL CHAMPAGNE

Shipped by Ackerman-Laurance.

ESTABLISHED 1811.

"Cacoon" or "Neat" Silk is the pure and unadulterated product of the silk worm.

Corticelli Sewing Silk is made up of one hundred perfect strands of this pure silk.

Each strand is tested and proven as to strength, uniformity of size and freedom from flaws or knots, by a machine that cannot make a mistake.

Corticelli Sewing Silk is dependable silk.

Sold Everywhere.

"Tommy, show your teeth."

• • •

"Good, that's an improvement over yesterday morning. What did you clean them with, may I ask?"

"Something sister got at the drug store, and say (confidentially) it's bully stuff.

"Yes, what is it called, but don't describe it by that name again, or I'll have to give you a bad mark."

"Well let me see it's in *red* writing on the label—Dento-Dento-foss, yes, that's it, Dentofoss."

"And say, teacher, it's b—("careful now") beautiful."

Dentofoss has been on the market only six months and it already has its imitators. Beware of them—they may all *look* like "Dentofoss," but none can *be* like it. No reliable druggist will attempt to substitute.

Dentofoss FOR THE TEETH 25¢

ASK FOR Labatt's (LONDON) ALES and STOUT

There are no brews so pure and wholesome as Labatt's Ale and Stout.

From the purchasing of the Malt and Hops through every stage of the Brewing and Bottling, the one aim has been to produce a beverage of absolute purity and superior flavour. A case in your home will convince you that this purpose has been fully accomplished.

At Grocers, Clubs and Restaurants.
