THE BEST THING for a man to do is to combine pleasure and expense to develop his muscles and gain stimulus. The man who hunts does this. He develops his quickness of thought and mind, and his chase leads him through hills and valleys, putting every one of the muscles of his body to the closest test. If you want gun or cartridge you can thoroughly depend upon what you get at

ROBBED THE COMPANY.

The Youth Has Been Run Down In California.

San Francisco, Oct. 13.—Bert. Waite, eighteen years old, arrested at Upper Lake, on Wednesday, charged with forgery on complaint of the president of the First National bank, of Berkely, has confessed, it is stated, to having robbed the United States express company at Ravenna, Ohio, early in August. He was acting agent of the express company at Ravenna and he absconded with over $6,000 in money and bank notes. Waite tried to raise some money on a book of express orders, which came back to the bank at Berkely and led to his arrest.

SIGNS OF DEVASTATION.

RUSSIANS KILLING IN MOST BRUTAL MANNER.

The Chinese Avoid Russian Camps—Some Stories Excruciatingly Revolting — Villages Utterly Destroyed.

Lung Chow, Oct. 12.—It is eighty miles by river from Tien Tsin to this place, and now two weeks after the allied forces marched through, the signs of war and devastation are more apparent than they were at first. The villages that were only partially burned are now utterly destroyed, as they were found to be hiding places for snipers, who attacked single travellers and occasional small parties. The Chinese avoid Russian camps, as the Russians are even now killing them in the most brutal and cold-blooded manner, irrespective of age or sex. Some of the stories are so excruciatingly revolting that it is difficult to believe them.

The Japanese feed and use the soldiers well, but do not pay them. The Americans and the English pay their laborers thirty cents a day Mexican money, and furnish rations of rice, vegetables being obtainable free all along the river banks. No complaints have been heard of the German treatment of their coolies, but the French beat them unmercifully and stick them on the slightest provocation.

Dogs and hogs along the river bank are living off human flesh. Bodies are are not buried and these animals are the only scavengers.

DIED OF A BROKEN HEART.

The Maiden Grieved Over Her Father's Arrest.

Scranton, Pa., Oct. 13.—A pathetic sequel to the E. F. Ames vs. Dr. C. R. Knapp case was the death, of Dr. Knapp's twelve-year-old daughter in Forest City. Since Dr. Knapp was arrested with Mrs. Ames, the girl has changed from a bright, vivacious maiden to a dejected and unhappy little person. When the case went to trial on Tuesday the girl became worse and word was sent to her father on Wednesday that she was critically ill. When the case closed he hurried home, but all he could do to save her life was in vain. The general belief is that the girl died of a broken heart.

MARRIED; GOES TO PRISON.

Minnie Barnett Weds Joseph Brychta—To Serve Three Years.

Cincinnati, Oct. 13.—Prison bars and a three-year sentence to the penitentiary were no barriers to Joseph Brychta and Minnie Barnett, both of Chicago, principals of a marriage ceremony at the office of squire Winkler yesterday morning.

Brychta is under three years' sentence from the United States court for issuing and cashing over $7,000 worth of post office money orders while employed by the government at Pullman, Ill., and was about to be taken to Columbus to enter on his prison career.

The men were under the command of major Hill, on the staff of Col. Mahon during the advance to the relief of Mafeking.

Reached Acute Stage.

Scranton, Pa., Oct. 13.—At the mine workers' convention the ten per cent. proposition, as it now stands, has very little chance of being accepted. The delegates seemed to be almost unanimous that the operators should first make concessions in the other grievances before the increase is accepted by the mine workers.

ABOUT BAKING POWDERS.

Inland Revenue Department Report—Alum Powders Forbidden.

The bulletin of the inland revenue department (No. 68) contains analyses of 156 samples of baking powders bought of dealers and manufacturers in the dominion. The alarming statement is made that eighty-five per cent. of these are alum mixtures.

In view of this large proportion of alum powders, chief analyst Macfarlane, recommends that legal proceedings be taken against parties selling them, on the ground that they are unhealthful articles of food.

Upon this recommendation the commissioner of inland revenue has given public notice that persons selling alum powders will be prosecuted.

The analyses were made by the assistant analyst, A. McGill, who fully discusses the use of alum in baking powders, which, he is of the positive opinion is dangerous to health.

Prof. Ruttan, of McGill college, Montreal, who made a series of experiments on the digestibility of bread baked with alum powders, is quoted as follows: "The unanimous verdict of my experiments is that alum powders introduce into a form of food of universal use, agents which are detrimental to the functional activity of the digestive ferments. They must therefore be prejudicial to health, and the only course is to carefully avoid them."

Both consumers and grocers are interested in this matter. Housekeepers should be very careful in purchasing their baking powders. The alum powders can generally be distinguished by their low price. They cost but two or three cents a pound to make, and are sold from ten to thirty cents. A pure, cream of tartar powder, is quite expensive to make, and is sold from forty to fifty cents.

ELLIOTT DUNLOP WRITES.

He is Stationed Near Pretoria—Saw Several Kingston Boys.

Mrs. William Dunlop, Union street, this morning received the following letter from her son Elliott, of the first Canadian contingent. The epistle is dated at Eeester Febreken, Sept. 2nd, and reads:

"I am again with my regiment and am glad of it. Having got through with our mail escort business, I am with the boys once more. I received two letters from you this week, one dated July 10th, and the other July 23rd. I was in Pretoria last week, and saw Jack Sparks, who is connected with the railway there. I also saw Edgar Birch of 'C' battery, R.C.A. We are now in the line of communication, about sixteen miles east of Pretoria. Our left half battalion is four miles from here, guarding a bridge. There were some socks and shirts sent up the other day for the regiment, and we were glad to get them, as we have been hard run for wearing apparel lately.

"I went down to the river near our camp, thinking I would take a swim across the stream, but just before entering the water I happened to see the head of a small crocodile sticking above the water, so I contented myself with a wash. There is a rumor around the camp that we are wanted to enlist for further six months. As I am in good health now, I am not particular, although anxious to get home. Perhaps they will send us to China. I was on outpost duty all last night. Hoping you are all well, I remain, your affectionate son, Elliott."

Detective Greer On The Case.

Detective Greer was in the city last night, and, in company with police constable Megarry, he went out to Westbrook to endeavor to locate the highwaymen who waylaid Stanley Sprole, near that village a few weeks ago, and robbed him of $120. Up till nearly three o'clock this afternoon the men had not returned to the city. The case is believed to be an easy one to settle.

Secured As A Curio.

STEAMER ARABIAN LIABLE

FOR THE COLLISION IN THE WELLAND CANAL.

Reasons Why the Trial Occurred in United States Courts—The M. T. Company Had Assigned Its Claims to the Underwriters.

Detroit, Mich., Oct. 13.—A Chicago despatch says: "By the decision of judge Lochran, at Minneapolis, the Canadian steamer Arabian is held liable for $10,474 damages to the schooner Minnedosa, by a collision in the Welland canal in 1895. The Arabian was held liable in the first suit, but the case was sent back by the court of appeals on error. The same result was obtained in the second trial."

Detroit owners are puzzled to know what the foregoing means: Two Canadian boats collided in Canadian waters yet a United States judge tries the suit and awards damages.

The lake marine news association, which sent out the despatch, wired last night that it did not know why an American judge tried the case but vouched for the truth of the despatch.

The Whig looked up the causes that led to the trial of the action in an American court and found that it was due to the fact that the Montreal transportation company, owning the schooner Minnedosa, had accepted the payment of its claim of damages from the underwriters and assigned to them its claim against the steamer Arabian. The Arabian was libelled in American waters and the insurance company prosecuted the action in the American court to recover the insurance paid the Canadian marine company.

GOT IN BY ACCIDENT.

Dr. Ryerson Takes Exception to the Charge.

Ottawa, Oct. 13.—The letter from Mayor Hurdman, which appeared in an Ottawa paper a few days ago contained a reference to the Red Cross fund in South Africa, which was published by accident and to which Dr. Ryerson, the late Red Cross commissioner, has taken exception. When the letter was given to the paper, a request was made that the reference to the Red Cross fund should not appear as the family considered it would be fairer to all concerned to await mayor Hurman's return when the affair could be put in more definite shape. However, accidentally the passage referred to was published.

The appointments of Hon. J. E. Robidoux, Montreal, as a superior court judge and of G. F. Gregory, St. John, N.B., as a supreme court judge of New Brunswick, was gazetted to-day.

Only One Man Opposed It.

A citizen, who was canvassing yesterday in support of the proposed $50,000 grant to Queen's, found only one man who would not vote for the by-law, and even that man would not vote against it. The reason he gave for not supporting the measure was a most peculiar one. He said that when he was young no one ever assisted young men to get an education. He had to look out for himself, and he thinks the young men of to-day should be given no better opportunities. The canvasser found that the people did not understand the benefits to be derived from Queen's, but when once it was explained to them they readily signified their willingness to vote for the measure. There is no doubt but that the by-law will carry by a very large majority.

Volunteers For Queen's!

Yours truly,
FRANCIS KING,
J. M. MOWAT,
T. J. RIGNEY,
Joint Secretaries.
