COMMERCE, TRADE.

Marine, Local Items, &c.

MONDAY MORNING, MARCH 27, 1865.

OPENING OF NAVIGATION.—The Ice in the Harbor was much strengthened on Friday night by a heavy frost, and the steamer Pierrepont was unable to make her trips to the Island. The steamer Watertown is ready to commence her trips to the Cape, and it is thought she will be able to leave on the first of the week. The ice-bridge, at Quebec, is broken up, and the first outward-bound vessel, the schooner Southerner, left on Wednesday. Toledo harbor is now clear of ice, and two vessels have arrived in that port. The Cleveland Herald of the 20th says that the lake has been free from ice for several days, for miles up and down the shore. On Sunday afternoon, the schooner W. L. Manning hove in sight and soon came proudly into port, having the honor of being the first arrival of this season. She hails from Black River and has a cargo of firewood. This morning the scow Dupply also arrived from the same port, and also loaded with wood. We can now say that navigation is fairly opened, and the coasting trade begun. The Sarnia Observer says that the St. Clair River is now entirely clear of ice; and the navigation may be said to have commenced, the small steamers Sea Gull and G. A. Bush, having commenced to run between Newport and Sarnia. Lake St. Clair is also open, and the Forester will resume her trips next week. The schooner Chieftain, owned by Messrs. J. & C. Mackenzie is now being put in trim for another trip down the lakes, whither she will be despatched as soon as the canal locks are open.

STEAMER BANSHEE.—This steamer was sold on Friday by private sale to a party of Americans, who intend to take her to New York. She brought her owner's price.

An experiment has been made on the New York Central Railroad by using peat instead of coal. The result was highly satisfactory The usual amount of fuel by coal-burning is a ton to every twenty miles, but in this instance only half a ton was used.

LAKE NAVIGATION.—Considerable uneasiness has been occasioned amongst Western shippers and navigators, by the fact that the great lakes and their tributaries are lower at the present time, than has been the case for many years past. A fear has been expressed, that the state of Lake St. Clair will not admit the passage of vessels drawing more than nine feet of water, which would almost prelude the downward travel of the larger lake boats, and prove seriously detrimental to the Upper Lake trade. The chief cause assigned for the diminution in the volume of water in the lakes is, the gradual falling off in the quantity of rain during the last three or four years, as indicated by the gauges of the Lake Survey corps, in different localities on Lake Superior Huron, Michigan, &c. It is believed that this decrease extends over the district crained by the tributaries of the lakes, embracing 12 degrees of latitude and an area of several hundred thousand square miles.

TURPENTINE MANUFACTORY.—As every body knows, Turpentine and Rosin have been exceedingly scarce since the breaking out of the American War, the principal supplies of these articles having been obtained from the Southern States. So far as Turpentine is concerned, we believe a substitute for it, for a good many of the purposes for which it was used, has been found in Benzole, one of the products of Petroleum. But there are doubtless many purposes to which it was put, which Benzole will not suit. Acting on this idea, Mr. H. B. Clements of Wyoming, have started a Turpentine Manufactory in the Pinery in Bosanquet, and are now making a good article of Turpentine, which at the present price of that article, will at the same time pay them well for their enterprize. We have no idea, however, that an extensive business can be done in that line in that region. The limited extent to which pine prevails in Lambton, will of itself preclude this.—Sarnia Observer.

IRON ORE ON LAKE HURON.—For some time past it has been known that the sand on the South-east shore of Lake Huron, from Point Edward upwards, was largely impregnated with Iron; but it does not appear that the idea of the existence of an Iron mine in that vicinity occurred to any of those aware of the quality of the sand, till recently. An examination has, however, revealed the fact, that a deposit of ore of great richness and of considerable extent, does exist in that locality.—Some of the sand referred to was lately sent to Professor Croft, for analysis, who reports it to be nearly pure iron, the refuse not exceeding 10 per cent. We learn the Mr. John McAvoy, and one or two other gentlemen at present residing at the Point, have obtained the right to the most valuable portion of the deposit; and have already received a liberal offer for their interest therein. The sum we heard stated at $30,000. For this we do not vouch, however; but if it is anything near the truth, it will at least tend to confirm the opinion that the discovery is no 'sell,' but a real, bona fide one.

PORT STANLEY.—The waters have subsided, and the Port is again considered safe. The water in the creek, we learn, is as low as it was before the flood, and the business is once more resumed.—London Prototype.

A REFUGE FOR VESSELS ON LAKE ERIE.—The shipmasters and others interested in our lake commerce will be gratified no doubt to learn that a valuable place of refuge for vessels during tempestuous weather has recently been discovered on the north shore of Lake Erie, which at no distant day is destined to prove one of the most valuable on our whole chain of lakes. We were in possession of this information near the close of last year, but not deeming the source from which it emanated strictly reliable, did not feel justified in giving that publicity to it which it so justly deserved. A visit to this locality during the past winter warrants us in setting forth the facts which we give below, and which may be relied on as being correct in every particular, as our statement is from observations then and there taken. The locality above referred to is located about midway between Buffalo and the Detroit River on the north shore of Lake Erie, and near what in years past was known at Long Point Cut, and to the westward of the latter about one mile. Through a narrow neck of the point here, a channel by the violence of the storms, has been washed through into the bay opposite Port Rowan, with a depth of fourteen feet of water. The distance through is about thirty rods while in width it is one-fourth of a mile. It is accessible in all kinds of weather, and vessels may venture to enter it under any steerage canvas. The only present unpleasant feature to this harbour is the shoaliness of water in the bay, which it is believed will be eradicated by a continued wearing away of the channel, which is gradually being accomplished, and of which we are promised to be advised.—Detroit Free Press.

LOSS OF LAKE CRAFT IN 1864.—During the navigation of 1864, no less than fifty-eight vessels passed out of existence, or became total wrecks. Of this number twenty were grain-carrying vessels, and of first class, and one the mammoth Western Metropolis, the most valuable sail craft on the lakes. Of the others above enumerated, many were of large class, and in many respects fine vessels and fit for many years more service, had their fates been otherwise decreed. The total number of disasters of the season was 384 with the loss of 133 lives. The above loss, will cut short the number of those coming into commission the present season, as but few, perhaps not to exceed half a dozen, were constructed during the past winter to supply their places.—Detroit paper.

WARNING PAYER.—S. N. Taber writes to the Maine Farmer as follows:—"I have been interested in the various discussions on sheep and wool, which have recently appeared in the Farmer. I hope the next move will be to get a vote from all wool growers against washing sheep.—Economy in labor demands it, and the comfort of man and beast demands it." We are glad to know that the practice of not washing sheep is gaining favor among farmers throughout the State, and hope it will ere long become a thing of the past."

THE PROVINCIAL EXHIBITION.—The next Lower Canada Provincial Exhibition is announced to take place in Montreal on the 19th, 20th, 21st and 22nd September next.

The case of Assault preferred by Robert Spencer against two of his neighbors, for assault, was dismissed. Mr. Flitz, one of the defendants, it was proved took no part in the affair, only trying to make peace.

HEALTH AND PURE BLOOD ARE INSEPARABLE.—Recollect that all sickness arises from impurity of the blood, and that Judson's Mountain Herb Pills will as surely find out and cleanse these impurities from the system, that disease cannot exist. So simple are the herbs and plants that compose them, that it is not necessary to have them sugar coated in order that the stomach can bear them. In most cases, Pills are sugar coated because the materials of which they are composed are so griping and malignant, that otherwise a delicate stomach could not bear them.

These Pills deal with the disease as it is, and will not only cure by removing the cause, but will build up and restore the broken constitution. There are many who have so trifled with their constitutions that they think medicine will not help them; let not even these despair; incredulity and skepticism is overthrown by a host of testimony which is truly irresistable. At first the virtues ascribed to the Mountain Pills were deemed fabulous. The public had been so often deceived that they could not believe the simple truths put forward by their discovery. Yet facts undeniable, attested by witnesses of the highest character and respectability have proved, and are proving each day, the virtues of this mighty healer. They bark, by their miraculous efficacy and power a new era in medicine

"WIDELY KNOWN."—It is generally supposed that the Websters, Palmerstons, Gortaschoffs, Metternichs, and Garibaldis of politics are the men of world-wide renown, and so they are where newspapers circulate, but not much beyond. One of our friends lately returned from China, amuses us with the recital of his journey inland for some distance, where the enquiry oftenest made when he became known as an American, was whether he knew or had ever seen the great chemist of his country, Dr. Ayer, that made the medicines. They use his remedies—many of them have been cured by them—and they speak of him, as if he occupied the whole of America or were at least the great feature of it. A mandarin who had been cured of a malignant ulcer on the hip by his Sarsaparilla, seemed to consider it our principal article of export, and its inventor one of the few men this continent had ever produced worthy the attention of Chinamen.—[N. The New York Tribune says, "the reason why Drake's Plantation Bitters are so universally used and have such an immense sale, is that they are always made up to the original standard, of highly invigorating material and of pure quality, although the prices have so largely advanced," &c.

The Tribune just hits the nail on the head. The Plantation Bitters are not only made of pure material, but the people are told what it is. The Recipe is published around each Bottle, and the bottles are not reduced in size.—At least twenty imitations and counterfeits have sprung up. They impose upon the people once and that's the last of them.

The Plantation Bitters are now used in all the Government Hospitals, are recommended by the best physicians, and are warranted to produce an immediate beneficial effect. Facts are stubborn things.

New Bedford, Mass., Nov. 24, 1863.

DEAR SIR:—I have been afflicted many years with severe prostrating cramps in my limbs, cold feet and hands, and a general disordered system. Physicians and medicine failed to relieve me. Some friends in New York, who were using Plantation Bitters, prevailed upon me to try them. I commenced with a small wine-glassful after dinner.—Feeling better by degrees, in a few days I was astonished to find the coldness and cramps had entirely left me, and I could sleep the night through, which I had not done for years. I feel like another being. My appetite and strength have also greatly improved by the use of the Plantation Bitters.

Respectfully,
JUDITH RUSSEL."

If the ladies but knew what thousands of them are constantly relating to us, we candidly believe one half of the weakness, prostration and distress experienced by them would vanish. James Marsh, Esq., of 159 West 14th St. N. Y., says, "he has three children, the first two are weak and puny, his wife having been unable to nurse or attend them, but that she has taken Plantation Bitters for the last two years, and has a child now eighteen months old which she has nursed and reared herself and both are hearty, saucy and well. The article is invaluable to mothers," &c.

Such evidence might be continued for a volume. The best evidence is to try them.—They speak for themselves. Persons of sedentary habits troubled with weakness, lassitude, palpitation of the heart, lack of appetite, distress after eating, torpid liver, constipation, diabetes, &c., will find speedy relief through these Bitters.

Every bottle for exportation and sale out of the United States has a metal cap and green label around the neck.

Beware of refilled bottles. See that the cap has not been mutilated. Any person pretending to sell Plantation Bitters in bulk or by the gallon is an imposter. We sell it only in bottles.

Sold by principal dealers throughout the habitable globe.

IN THE YEAR 1845

Mr. Mathews first prepared the VENETIAN HAIR DYE; since that time it has been used by thousands, and in no instance has it failed to give entire satisfaction.

The VENETIAN DYE is the cheapest in the world. Its price is only Fifty Cents, and each bottle contains double the quantity of dye in those usually sold for $1.

The VENETIAN DYE is warranted not to injure the hair or the scalp in the slightest degree.

The VENETIAN DYE works with rapidity and certainty, the hair requiring no preparation whatever.

The VENETIAN DYE produces yan shade that may be desired—one that will not fade, crock or wash out—one that is as permanent as the hair itself. For sale by all druggists.—Price 50 cents.

Through a trial of many years and through every nation of civilized men, AYER'S CHERRY PECTORAL has been found to afford great relief and to cure more cases of pulmonary disease, than any other remedy known to mankind. Cases of apparently settled Consumption have been cured by it, and thousands of sufferers who were deemed beyond the reach of human aid have been restored to their friends and usefulness, to sound health and the enjoyments of life, by this all-powerful antidote to diseases of the lungs and throat. Here a cold had settled on the lungs. The dry, hacking cough, the glassy, and the pale, thin features of him who was lately lusty and strong whispers to all but him, CONSUMPTION. He tries everything; but the disease is knawing at his vitals, and shows its fatal symptoms more and more all over his frame. He is taking the CHERRY PECTORAL now; it has stopped his cough and made his breathing easy: his sleep is sound at night: his appetite returns, and with it his strength. The dart which pierced his side is broken. Scarcely any neighborhood can be found which has not some living trophy like this to shadow forth the virtues which have won for the CHERRY PECTORAL an imperishable renown. But its usefulness does not end here. Nay, it comes more by prevention than cure. The countless colds and coughs which it cures are the seed which would have ripened into a dreadful harvest of incurable diseases. Influenza, Croup, Bronchitis, Hoarseness, Pleurisy, Whooping Cough, and all irritations of the throat and lungs are easy cured by the CHERRY PECTORAL if taken in season. Every family should have it by them, and they will find it an invaluable protection from the insidious prowler which carries off the parent sheep from many a flock, the darling lamb from many a home.

BEGS leave to return thanks to his friends in Kingston and its vicinity, who favored him with their patronage, and would, while asking for a continuance of the same, inform them that he is now prepared to do whatever work may be intrusted to him in a very superior manner.

He has just received a large stock of the Best Dye Stuffs, &c. With increased facilities he will do his work in

THE MOST REASONABLE TERMS,
IN
A SUPERIOR MANNER,
AND
ON THE SHORTEST NOTICE.

Any article that can be colored or dyed at any other place can be done by him in a very superior manner.

☞ Do not forget 122, Princess Street, second block above the Scotch Church, two doors above Mr. G. Brown's Lumber Yard, nearly opposite Mr. Jenkins' Blacksmith's Shop; that is the place where you will find

BRITANNIA
LIFE ASSURANCE COMPANY
Capital—£1,000,000 Sterling.

No 1 Prince's Street, Bank, LONDON.

Empowered by Special Act of Parliament, 4th Vict. Cap. 9.

ASSURANCES PAYABLE DURING LIFE.

TABLES have been constructed for the use of persons who may be desirous of effecting a Life Assurance for the benefit of their families, in the event of premature death, for the largest possible amount which their present means will afford; and at the same time secure the advantage of having the sum assured made payable to themselves, in the event of a prolonged life.—The Tables show the Annual Premium required for an assurance of £100 or more, payable to the Assurer himself upon his attaining the age of Fifty, Fifty-Five, Sixty, or Sixty-five, or to his representatives at his death, if that event should happen previously.

Every description of Life Assurance transacted.

Detailed Prospectuses, and every requisite information as to the mode of effecting assurance, may be obtained on application to
