FLAX, HEMP, JUTE AND RHEA FIBRE.
Prepared without Scutching
BY
J. Hill Dickson's Patent Portable Machine
To be worked by
HAND, WATER, OR STEAM POWER.
117 Gt. Dover Road Boro. London.
THE advantages and economy gained in converting GREEN FLAX STRAW by Machinery into Stronger and Finer fibre for being spun on Cotton, Silk, Worsted, or Flax Spinning Machinery, than if retted by steeping in either Cold or Hot Water (which process finally by over decomposition produces as much fibre, as long Fibre) arises from the following facts, respecting a system that avoids Tow and Waste.
1st.—The seed bolls or husks can be taken off in the field as the flax is pulled, by turning the side projecting rollers that are upon the ends to permit of only about six inches of the top or seed ends, to pass do between them to break the seed bolls without crushing or injury to the seed, or taking off any portion of the fibre.
2nd.—The wood inside the fibre is so crushed and ground into dust when laid on the grate-like moving table, which admits of such stuff falling through, that whether the Flax Straw be fed in the usual way, the woody and dusty substance is entirely got rid of without scutching, and the needs be as it is called half of the fibres are so preserved from being broken into tow, that they appear like as many narrow ribbons. Flax spinners are certain to appreciate this great improvement in preparing, as no Tow or Waste can be seen, and as a consequence there is a gain of fully one-third more fibre from a given weight of flax straw than by any other invention or system known, see report of Messrs. Marshall & Sons of Partington & Leeds, taken from the Belfast Flax Society reports and copied at page 214 in the work of Dixon on the Fibre Plants of India Flax, Hemp, &c., &c.
3rd.—The Flax and Hemp being when free from the wood, covered over with a natural Green Gum, is made perfectly soft and two-thirds White, by a simple run of Hot Water, as the fibre passes through in a few minutes, the washing part of the invention, and then winding dry at the end, by this means the fibres are stronger and better adapted for the Flax Spinners than any retted flax, and the yarns from it will be nearly white without alkalies or acids to injure the strength, and ready for weaving without boiling.
4th.—If very fine quality be required for Cotton, Silk or Worsted spinning purposes, the colouring part of the Machine must be worked and the scutching liquid applied and by such means flax equal to the best Courtrai, Flax at £70 to £80 per ton can be produced, and practical instructions will be given to parties purchasing the machine by the Inventor and Patentee.

SELF-RISING OR PATENT FLOUR
I have received a small quantity of Patent Flour, and as most of my customers are fond of good things, I would recommend it as being very good for bread, Windsor tea cake, very superior luncheon cake, pastry, &c., &c. An excellent pudding may be made by merely mixing some of the flour and water together, boiling it in a cloth, or steaming it, with room for expansion, and using a little nice melted butter with sugar for sauce. Pancake fritters &c. are very superior when made of this flour—no eggs need be used.

"Unquestionably the best sustained Work of the kind in the World."
HARPER'S
NEW MONTHLY MAGAZINE,
Critical Notices of the Press.
It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the million a more entertaining friend, than Harper's Magazine.—*Methodist Protestant* (Baltimore.)
The most popular Monthly in the world.—*New York Observer.*
We must refer in terms of eulogy to the high tone and varied excellences of HARPER'S MAGAZINE—a journal with a monthly circulation of about 70,000 copies—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the American People; and the popularity it has acquired is merited. Each Number contains fully 144 pages of reading matter, appropriately illustrated with good wood cuts; and it combines in itself the racy monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the dissemination of a love of pure literature.—TRUBNER'S *Guide to American Literature, London.*
The volumes hence constitute of themselves a library of miscellaneous reading such as can not be found in the same compass in any other publication that has come under our notice.—*Boston Courier.*
