Acura scores big on safety

With the just-announced top rating for the 2016 RDX entry premium SUV, Acura has claimed a leadership position as the only luxury automotive brand with an entire U.S. model line achieving the top U.S. government safety rating.

The 2016 RDX is the latest Acura to earn a Five-Star Overall Vehicle Score from the National Highway Traffic Safety Administration (NHTSA) in its New Car Assessment Program (NCAP).

This is the sixth time in brand history that Acura has achieved the top U.S. safety rating across its entire model line – more than any other brand.

Refreshed for 2016, the Acura RDX boasts more advanced safety technology than ever before.

The AcuraWatch suite of safety and driver-assistive technologies is now standard on the Advance package and available on all 2016 RDX models.

AcuraWatch can help improve the driver's situational awareness and, in certain circumstances, intervene to help avoid a collision or mitigate its severity.

New AcuraWatch features for the 2016 model include Collision Mitigation Braking System, Lane Keeping Assist System, Adaptive Cruise Control and Blind Spot Information. AcuraWatch is now available across the entire Acura lineup.

To further improve frontal collision performance, the 2016 Acura RDX offers enhanced crash safety design with numerous changes to its next-generation Advanced Compatibility Engineering (ACE) body structure.

Incorporated in the 2016 RDX, the next-generation ACE design utilizes a network of connected structural elements to help distribute crash energy more evenly throughout the front of the vehicle, enhancing occupant protection and crash compatibility in front collisions.
