Advantages of this Institution.
INCREASING RATES OF PREMIUM.
A Table of Rates peculiarly applicable to cases where Assurances are effected for securing the payment of debts, and to all other cases where a Policy may be required for a temporary purpose only, but which may be kept up, if necessary, throughout the remainder of life.
HALF-CREDIT RATES OF PREMIUM.
Persons assured according to these Rates are allowed credit for half the amount of the *first seven annual Premiums*, paying interest thereon at the rate of five per cent. per annum, with the option of paying off the arrears of Premiums at any time, or having the amount deducted from the sum assured when the Policy becomes a claim.
SUM ASSURED PAYABLE DURING LIFE.
A Sum may be secured, payable at the death of the Assured, if he die before attaining SIXTY years of age, but also *payable to the Assured himself, if he attain that age*,—thus combining provision for old age with an assurance upon life.
Orphans' & Children's Endowment Branch.
This Branch has been established for the purpose of affording to parents, guardians, and others, the means of having children educated and started in life; thus protecting them from the difficulties and destitution to which they may be exposed by the premature deaths of those on whom they are dependent. Reversionary Annuities may thus be secured to commence at the Parent's death, and to be paid until the child if a son, shall have completed his 21st, or, if a daughter, her 25th year of age.
Policies revived, without the exaction of a fine, at any time within twelve months.
Age of the Assured in every case admitted in the Policy.
Medical Attendants remunerated in all cases for their Reports.
Thirty days allowed for payment of Renewal Premiums.
Ladies and others, to whom it may be inconvenient to appear at the Office, visited by one of the Medical Officers.

TO CARRIAGE BUILDERS,
PAINTERS, PAINT DEALERS, &c.
JUST received at the Subscriber's, a new Patent PAINT MILL. This Mill is recommended to all interested, as supplying a want long and severely felt, and the attention of such is invited to the following advantages:—
1st—No color, however coarse, needs grinding through this Mill but *once* to render it fine enough for any purpose whatever.
2nd—It does not trow when run rapidly, as is the case with all horizontal Mills.
3rd—Coarse and heavy colors *do not settle* in it, as they do in all other upright Mills.
4th—It is finished with great care and accuracy, and can be depended upon.
5th—It will pay for itself in the time saved by its use in a single season.
6th—It is the Invention of a practical Painter of thirteen years' experience, who has thoroughly tested every kind of Paint Mill to be found; and who, therefore, speaks understandingly when he claims that this Mill is *far superior, in all respects*, to any other in use.
